we should offer £400 to see them. But he thinks
 we might experiment with an adv. of £400 first.
 should have had grounds for raising the salary (9
 care of Uganda, these would have to be persuaded)

As to the Research Officer at £450 (see V.P. letter)
 Dr. P. Stockman says there are no young men now
 qualified for the work - as the war has disrupted
 post graduate courses and there will be no young
 men for 3 or 5 years. He might be paid
 £1000 or £1100!

He asked why should not the Pathology salary
 be £400 per year with India or European Lab. work

Mr. Fairbairn
 (West African) has found 25 small sites (also 4000
 may be many with the complete or partial rollers),
 & I hope to visit the few weeks necessary for
 cover of the report of the local birds to be written
 & submitted with him A. Fairbairn

(2) Research Officer
 I should tell the Gov. (see original letter) that
 the research officer should be paid as well
 as the salary of £400 per year, as he
 will be working in the field (see letter to Gov. on
 salary of £400 per year) & should be
 included in the 5th Schedule
