most essential that tel. Comm. with Jubaland has to be maintained. At present this is being done with assistance of Reps. R Navy. When may wireless installation be expected? If there will be any delay, a field apparatus capable of operating 200 miles is so to connect Jubaland with same the he sent out.

Dr. G. F. Jones

For minute, from C.A. announced yesterday from his position that he considered the prospect of wireless communication at the W.O. as a very important matter.

but they cannot help - the W.O. is not yet ready to start work. The W.O. have not yet been put into the water but then camp is only about 30 miles - & the currents change. After £620 spent for them.

The W.O. have not yet been put into the water but then camp is only about 30 miles - & the currents change. After £620 spent for them.

for to ship the lumber install
at the beginning of June

Tell to the foreman telling him that
the foreman is to ship the lumber
at the beginning of June
asking whether he can manage to
carry on in the interval.

If the admiral makes difficulties
we must see whether we can get
the admiral to keep him there?

H. J. R.

28/12/14

Dear J. Amerson

Apparently this is all right

We can do more

Yours

28.3.14

Yes. The insurance for all goods
determined to make the most of any
difficulties we may get into, and if
the be answered against them.

W. J. R.

28.3.14

(Ch. inf. - 28th
that we do not propose
to accept the insurance
offer - H. J. R.)

Mr. Read,

In accordance with instructions received verbally we have been in communication with Messrs The Marconi Company regarding the wireless station to be erected at Morroca. The amount of their tender as it at present stands is £4153. They ask for an extra of £500 to ship all the materials by the boat closing in London on the 9th April, this as will be seen is about 12½ % on the value of the contract.

The Marconi Company inform us however that they must receive instructions at once if their material is to catch the boat above mentioned as it only leaves them 12 days from now to get the consignment to the boat, if it is decided on we think they should be informed today.

One military portable wireless station to communicate at a distance of 200 miles would probably cost less than £1000, but we are not sure whether this is the wire required.

23.3.19

Mr. Read

In accordance with instructions received verbally we have been in communication with Messrs The Marconi Company regarding the wireless station to be erected at Bombay. The amount of their tender as it at present stands is £4153. They ask for an extra of £500 to ship all the materials by the boat closing in London on the 9th April, this as will be seen is about 12½ % on the value of the contract.

The Marconi Company inform us however that they must receive instructions at once if their material is to catch the boat above mentioned as it only leaves there 12 days from now to get the consignment to the boat, if it is decided on we think they should be informed today.

One military portable wireless station to communicate at a distance of 200 miles would probably cost close on £1000, but we are not sure whether one or two will be required.

No. 100 ? Your despatch of 19th December No. 1000 most
essential that telegraphic communication with Jubaland
should be maintained. At present this is being done
with assistance from his Majesty the King Royal Navy
and their wireless installation but Admiral most
anxious that his ships should be relieved of these
duties. When may wireless installation be
expected to arrive at Mombasa if there will be any
delay in arrival consider very desirable that Field
wireless apparatus capable operating 200 miles so as
to connect Giumbo with Lamu should be sent out. If
necessary halfway station would be established in
which case 2 sets of apparatus each capable operating
120 miles would be required.
