A Northern Railway is contemplated from
 Mombasa to Lake Victoria and the Belgian
 Economic Committee are arranging for the
 exploration of the region, which such a railway
 would open up, with a view to deciding its
 economic value. Among the points on which
 the explorers are to report the following may be
 mentioned:

- (a) Existing caravan routes and means of transport
- (b) Traffic on the British Uganda Railway and on Lake Victoria and the possibility of diverting this into a railway from Lake Victoria to Tanga
- (c) Possibility of settling large numbers of Natives along the line
- (d) Prosperity of the Boer settlements and the possibility of white settlement on a large scale
- (e) Possibility of procuring labour from the thickly populated districts of Lake Victoria for the European Plantations on the Coast.
