Leave on the 1st.  
Send a copy of the  
Cape Weather Book referred  
to you - and I  
request that you will  
urgently consider and  
act accordingly the question  
of sending the government  
Surgeon's report & copy  
of his financial report to the  
Government before the last  
day of the month.  
by the Order in council  
will the infirmary daughter  
of infected cattle, with  
access to the amendment  
of the Order if thought  
desireable by your attorney  
officer & yourself.

Yours affecly

(Subject.)

Survey of British Colonies and Protectorates  
in East and West Africa

No. 23771  
Dr. H. M. [unclear]  
Dr. [unclear]

(Minutes.)

The survey now: explain staff. If  
you come to Durban you will find I think the Survey  
only belonging to us to the B. & W. Survey  
& the War Office, explaining fully that a  
copy of our letter they will expect  
representative of the Colonial Survey & the Captain  
of the General Staff to sit on the Survey  
Committee. You will see from the attached letter  
from Col. Fletcher who got ready for the  
first 1 month of the Colonial Survey. Please  
there will be no difficulty in getting the papers,  
& the D. O. will be able to get the Survey  
done. I shall mention the Major Mortlock who  
has large practical experience, he and the others  
before he finds himself entirely concerned  
in the matter. In B. & W. many a  
negligence

the 50° N. meridians of longitude  
and every year to complete it.  
The last time I consider it  
is about 1870 at about 22°  
longitude of our region. It will be  
about 1870. The survey ought to be entirely  
to Africa. The survey ought to be entirely  
to Africa.

X. J. R.

I agree perfectly. One may need  
some number of details but that is hardly  
the case. After speaking to Reed I have written  
to the S. Int. and P.C.A. for confidential  
information. (Att/4 pl)

Mr Reed has long been working  
for some scheme which would  
place our surveys on a sound  
footing, and I am sure

that the best way to do this  
would be to bring the two  
systems into one. This would  
be the best method and the  
process is probably

that July 20.

A useful and practical scheme.  
Something of the kind has long  
been needed and these things  
as they stand are less to be desired  
it eventually to other changes  
than those of W & E Africa.  
I believe that the surveys of Ceylon  
Yunnan & many other Ceylon colonies  
are in a deplorable state.

Mr Reed has devoted much care  
and attention to this question.

Ordnance Survey Office

Southampton 29 June 1905

Dear Mr

I return the paper about Colonel  
George with which I am the whole  
cordially agree - It is a great pleasure  
for me to know before I return  
that there is some life of action on  
it here I have educated for some  
time past - I have returned the  
paper verbally to the Board & will  
have no doubt that the Board will  
cordially agree -

I give below some intervals or  
details - by numbers up to the  
final numbers of the page -  
(1) I suggest that the right &  
last date is left - as it stands it  
hardly agrees with the proposal but it

O. S. State, without anyone's knowledge  
else with of course been held  
just late Sunday, but your plan  
natural instruction is a very sensible  
step toward taking good measures

(2) I suggest ~~where~~ ~~the~~ ~~use~~  
use of coal as fuel instead of oil  
as the cost of oil is about 0.3 per quart  
and I think it would be as well hot  
to use & the product less dangerous.

(3) You find lots guns by now  
[4] I think it's up to us to reply to  
offer much to start we know  
though by experience is that the  
is to the same for which offer  
we might stamp a will experience of the  
way back can't get for a few  
years in a row of us. Marshall

States without damage or return  
as well as cover loss and other  
expenses. But your present  
method of collection is a very suitable  
method giving good returns.  
I suggest therefore to the rate  
of cost; say one hundred per cent  
to add to it 10 per cent  
but it would be better to add  
up to the postmaster 50 per cent  
you will lose money by less  
I think it can be copied. All  
we need to state the true  
by experience is that the  
is the sum for which often  
right stamp + with expense of the  
post can be got for a few  
cents + sum of life - Standard

It is a good idea to have a  
receipt and let us know how  
many + what we take  
and then let us except off +  
watch this because the office are  
used to doing duty - capable and  
+ others can of course do it  
there is less chance of them with  
them is less chance of them if the  
post master is in the case of the  
post master is not present. I get the  
right stamp for a hundred times  
the right stamp for a hundred times  
at my high rate of pay -  
this greater sum to my better profit  
only at the time of the S. A. was  
100. The office will not get  
100. When business is poor I  
will still get to an even 100 but  
in the business it will  
not be all turned in money and  
not in the case of their service  
and often to have little money and

While we got advance notice before Mr. Ward & his wife

I think of may be patients -  
it would be more or less difficult  
to get for them from the lists used  
at the D.S. on a sun Sunday  
concerning a General Survey -

(8) While I do not advocate the  
employment of all in telephone  
nursing clients unless thoroughly  
I am strongly in favor of D.C.'s  
being employed when possible  
in telephone clients. This training  
is, and I hope always will be,  
such that they may want practice  
to be a really good telephone  
surgeon - so long as the survey  
nurse is carried on as it  
has been for some time past under  
affairs - with visitors who have

opportunity of surveying and about  
I think the "interview" rate is  
practical -

I am sorry to have referred to  
as my "boy" -

Yours very truly

Bruno A. Whetstone

MINUTE.

Mr. Read. 31 May

*Mr.*

Mr. Astrobus.

*Mr. Cox.*

Mr. Ladd.

Mr. Graham.

Sir M. Ormrod.

*The Duke of Marlborough.*

Mr. Lyttelton.

I am directed by the  
Gen<sup>t</sup>l<sup>y</sup> Lytton to request  
you to inform the  
Army Council  
Board of Agriculture &  
that he has been consulted  
with the desirability of devising  
a comprehensive scheme  
for the Survey of the  
Gov<sup>r</sup> Colonies & Protectorates  
in tropical Africa.

2. The question of merely  
one of great importance is  
that undeveloped countries,  
as all nations are, being  
construction, misery.

land settlement administration.

or settling the public

lands and for the

protection of the

public lands and

the timber and other

natural resources

and also of great importance

for a military front

of our and the greater

now therefore be regarded

as being to a certain

extent a dependent one.

3. At first nothing can

be done satisfactorily without

the help of the Colonies -

but there is no

possibility for a paper

to be made out

on the 200,000,000 of

acres of land apportioned

to the several colonies

therefore not

the same of work

as before the now denies

the possibility of

settling the public

lands and for the

protection of the

public lands and

the timber and other

natural resources

and also of great importance

for a military front

of our and the greater

now therefore be regarded

as being to a certain

extent a dependent one.

4. With a view to placing

settlements on a paper basis

and to facilitate the work

of surveying and

settling the public

lands and for the

protection of the

public lands and for the

protection of the

public lands and for the

protection of the

public lands and for the

protection of the

public lands and for the

protection of the

public lands and for the

protection of the

public lands and for the

protection of the

public lands and for the

protection of the

public lands and for the

protection of the

public lands and for the

protection of the

public lands and for the

protection of the

public lands and for the

protection of the

public lands and for the

protection of the

public lands and for the

protection of the

public lands and for the

protection of the

public lands and for the

protection of the

public lands and for the
