Despatched Draft of Third Schedule
for Amending Order in Council with respect to

Wills

(Minutes)

This is an official letter, and I
think all we need do is to send copy
with enclosures to Treasury
asking that the necessary modifications
may be made in the Amending Order
and then say that, if the L.C.C.
have no objection, it is proposed
to submit the bill to go ahead
with the manufacture?

[The points raised are technical ones
which we must be guided by
expert opinion.]

228

Sir,

With reference to the proposed new coinage for the East Africa and Uganda Protectorates and to Mr. Antrobus' letter of the 27th February last, I am directed by the Master of the Mint to transmit herewith the draft of the Third Schedule for the Amending Order in Council, together with a copy of the existing Order in which certain suggested alterations are set out.

The weights and Millesimal Fineness of silver coins remain as in that Order.

In view of the fact that the coins will circulate among natives it seems desirable to prescribe Least Current Weights in the case of the silver at any rate. This is in accordance with recent practice (See Hong Kong, Straits Settlements and Labuan Orders of 2nd February, 1895). The permissible amount of wear suggested is approximately 5 per cent. as in the Orders here mentioned.

These least current weights are rather more liberal than those prescribed in the Fourth Schedule of last year's East Africa Order - for the coins current of British India and of the late Company. But that allowance is very small, only 2 per cent., and corresponds with the Indian Law. The fact that we are now dealing with a lower standard silver fully justifies the more liberal allowance.

Article 9

The Under Secretary of State,
COLONIAL OFFICE, S.W.

Arabia Order of last year's Order (see attached copy) appears to contemplate least current weights being prescribed where necessary.

The East Africa Order of last year prescribed remedies of weight on the piece. This has not been the practice in recent years when the value of the coin is small and the metal of low standard. For Hong Kong &c. the remedy of the British Dorian (two grains) is prescribed for the equivalent number of coins of each denomination, and this approximately corresponds to the allowance suggested in the table.

The remedy of fineness prescribed in last year's Order (3 per milie) was closer than seems necessary; 4 per milie is sufficiently close now, when the fineness is as low as 800 (See Cyprus Order in Council of 17th September, 1900).

The nickel-bronze would be the same as is used for Jamaica - 80% Copper and 20% Nickel - and the Aluminium would be increased in hardness with a view to resist wear by adding about 3% of copper. The weights given for all four coins are those intended for the four perforated samples already approved by the Colonial Office. The hole in all cases to be 0.07 inch in diameter and the outside diameters of the coins agreeing respectively with the English penny, English halfpenny, Ceylon cent, and English farthing.

No least current weights are prescribed, there not being needed for metals of so small intrinsic value.

The remedy of weight is the same and in the same

same terms as for similar coins of Cyprus. (See Order in Council of 17th September, 1900, Third Schedule), of course the latter pieces are not perforated, but it is anticipated that this will — involve any serious difficulty.

Sir,

Your obedient Servant,

William Ellwood Macarthur

Third Schedule

Subsidiary Coins of East Africa and Uganda

Coin	Millesimal Fineness	Standard Weight	Least Current Weight		Remedy Allowances.	
		Grains	Grammes	Grains	Grammes	Weight
<u>Silver</u>						
Fifty Cent Piece	800	90	5.832	85.5	5.340	
Twenty-five Cent Piece	800	45	2.916	42.7	2.767	
						Two grains or such a number of coins of such denomination as is legal tender but (or has a currency value of) two rupees.
<u>Nickel Bronze</u>						
Atta Rupee or larger than mixed metal						
Ten Cent Piece		175	11.340			
Five Cent Piece		87.5	5.670			
						A weight not exceeding the weight of one piece in every forty pieces.
One Cent Piece		30	1.944			
Half Cent Piece		15	0.972			
						Nil

DRAFT

To Her Majesty the
Queen

MINUTE.

Wednesday 11th

Mr. Ellis 173

Mr. Astorius

Mr. Cope

Mr. Lucas

Mr. Graham

Sir M. Osborne

Mr. Churchill

The Earl of Elgin

With reference to the letter
from the Queen of the
6th of April, I am
informed by the Secretary
of State to transmit to
you, the said letter before the
Lords Council of the
Treasury, the accompanying
copy of a letter, with
address in original
form, a copy of which has
been received from the
Royal Mail on the
subject of the arrangement
to be made in regard
to the new railway
concerning the best
route and connection

of 5000 £ down on 8019, 2
days of 12725 (without one), 1/2
days for the time to come
into D.T.

Postscript.

2. I am to request that

the new coinage

may be made in the

shape of the money

now in circulation in

order to give effect to

the views expressed

by the Committee of the

Meet.

3. If the Lord Comr^s
are no objection, I will
then propose to
reject the bill
and have it passed
with the manufacture
of the coins.
