NEW EDUCATION METHODS.
 The Dalton Theory.
 APPLIED TO KENYA
 (By 'L.O.B.')
 (No. 1.)

It will be readily admitted that the Dalton Theory is the most progressive educational system of the present day. It is the only system which plays one of the most important parts in the development of a country, and this fact has been recognized here. The Department of Education has now set on foot a progressive plan which will be carried out fully and to the satisfaction of all concerned. No school can be open, and progress can be made, until the Dalton Theory is applied.

As fully explained in the programme, the Dalton Theory, embracing an entire new system of education, which is fast getting a wide recognition in the Empire. It is based upon the notion of a child's thought and on the fact that a child is never really learning until he has been taught to think for himself. It is a system which is not only a child's friend, but also a parent's friend, and it is a system which is not only a child's friend, but also a parent's friend.

OVERSEAS EDUCATION.
 Many parents living in Kenya are desirous of sending their children to be educated either in Europe or in America. The Dalton Theory, applying the scientific method of education, is a system which is not only a child's friend, but also a parent's friend.

Beauty Depends on Sparkling Teeth

Perfect teeth, gleaming bright, are a essential factor of facial beauty. They focus attention and admiration before any other features. They constitute the charm of the smile.

The secret of their inspiring influence lies in the soft, ivory coating and formation of the enamel. This is the natural beauty of the teeth. It is the natural beauty of the teeth. It is the natural beauty of the teeth.
