STUDEBAKER
 BREAKS WORLD SALES RECORDS

Our October sales exceeded in value those of any other automobile manufacturer in the World except the Ford Motor Company.

We also broke all of our own October sales records, breaking October, 1932, by 68% and October, 1932, by 119%.

The new Studebaker Cars comprise five open, and ten closed body models, mounted on three different chassis.

The 300,000 Studebaker plants which manufacture possible the great values represented by the prices, which range from \$1125 to \$2500 f.o.b. factory.

When you are in the market for a new automobile you would appreciate the opportunity to demonstrate these cars to you. You should not buy our car until you have seen it.

TRAFFIC REGULATIONS FOR NAIROBI.

As will be seen on another page in this issue, the Nairobi Corporation have for the time being approved of a Draft set of Rules for the control of all motor traffic in the Township. It will be remembered that almost a year ago, the Corporation were supported by the Government to examine all the regulations affecting traffic and make recommendations to Government as to the best methods of enforcement of the traffic regulations in question. Nothing has yet been heard of the report of that Committee, which would, presumably, set out what recommendations led to the making of any and every recommendation. We must, however, believe that the proposed regulations as submitted to the Town Council this week are the outcome of the deliberations of the Council and Traffic Committee. We would, however, say further on this subject to better conditions for all users of traffic, and the death regulations that have been published are good in the whole although liable to criticism in some places owing to the form of application as to the manner of their introduction in this form. It will be observed that there are three distinct parts to these Rules. The first part, consisting of sections

1 to 10, may be designated as "prescriptive," and covers chiefly the "primary" or "general" limits in the United States of America, where, according to the special limits is required on prescriptive conditions of negligence and carelessness. These are the three main ways in which they act as an offence to those. These on three main ways in which they act as an offence to those. These on three main ways in which they act as an offence to those. These on three main ways in which they act as an offence to those.

11 to 20, may be designated as "prescriptive," and covers chiefly the "primary" or "general" limits in the United States of America, where, according to the special limits is required on prescriptive conditions of negligence and carelessness. A Remarkable Advance In Balloon Tyre Materials

"SUPER-TWIST" is unmistakably an IMPROVED advance in tyre materials. It is a balanced cord material, of great endurance, having the important advantage of much greater elasticity. A tyre body made of it yields in greater degree to a blow or shock. Because of the advantage "SUPER-TWIST" has been called a development almost as important as the cord tyre itself.

It supplies one more powerful reason for installing on Goodyear Tyres, for "SUPER-TWIST" is an exclusive Goodyear development. "SUPER-TWIST" is embodied into Goodyear Balloon Tyres of both types—to fit new small diameter wheels, or the wheels now on the majority of cars if with straight side or 30 x 2 1/2 beaded edge rims.

Are you thinking of adopting BALLOON TYRES? — if so, this is our advice

1. THE BALLOON TYPE OF TYRE IS GOOD. It has passed the experience of years and has come to stay. But some are better than others!
2. ON NEW CARS we recommend the wired-on type with special wall rim had adopted by the leading British Car Manufacturers.
3. ON OLD CARS it is quite unnecessary to change wheels. A Balloon Tyre of different dimensions to your own tyres, steering and wigg clean-up and spare wheel carrier dimensions must all be checked. By keeping your present wheels you can continue to run your old type tyre, and gradually, for better cushioning, change to Dunlop Cord Balloon Tyres for existing wheels as your old tyres wear out. They are available now in both Beaded Edge and Straight Side types, from all Dealers.
4. If you do change your wheels be sure you are guided by the policy of all leading British Car Manufacturers, and adopt the standard British type of Dunlop wired on.

Apply to THE DUNLOP RUBBER CO., Ltd., at their Depots

The African Mercantile Co., Ltd. For full information, Mombasa Nairobi Kisumu, etc. etc.

Be sure your tyres are British
DUNLOP AND BE SATISFIED

THE FOOTBALL ASSOCIATION
THURSDAY'S MEETING.

He Sleeps Like a Child

A good night's sleep is the foundation of good health. If you are troubled by indigestion and dyspepsia, you are not getting your full share of sleep. Kruschen Salts will help you to sleep like a child.

Indigestion and dyspepsia are making you down for sleep. All this is because to tell you your own health. It is not because to tell you your own health. It is not because to tell you your own health.

Indigestion and dyspepsia are making you down for sleep. All this is because to tell you your own health. It is not because to tell you your own health. It is not because to tell you your own health.

Indigestion and dyspepsia are making you down for sleep. All this is because to tell you your own health. It is not because to tell you your own health. It is not because to tell you your own health.

VERMILION.

SUCCESSFULLY EXTERMINATES MEALYBUG Report by an Expert on E. A. Agriculture.

"The experiments recently conducted with Vermilion, though not extensive, have proved satisfactory. These were chiefly on the lines of soil fumigation. The best results were obtained before or some time after the rains, when the soil was not wet and had a temperature of from 65 to 85 degrees Fahr. The surface soil was levelled round the base of the tree and 1/2 of an oz. of Vermilion (nully grown coffee tree) was sprinkled round in a continuous band about two inches wide with the inner margin about 4 inches from the bark of the tree; the Vermilion was then covered with soil to the depth of 4 inches and packed well down. This killed the mealybug on the stem below ground and in some cases kept off the ants completely."
