## The Sure Cure for Malaria

Quinine alone is not sufficient to cure malaria.

It is now known that it is necessary to combine other substances with quinine, that have the effect of helping to stop the parasites which have invaded the blood.

Malaria is irreversibly transmitted by the bite of a female Anopheles mosquito.

The disease is called "malaria" from the Latin word "malum" meaning bad.

Treatment is simple and the best under all circumstances.

BRANDWEILS can be obtained from all the leading chemists and drug stores in Kenya, Tanganyika and Uganda.

## AUCTION OF FARMS.

### Good Prices.

A large holding of townships for the sale of farms from all parts of the Colony, including Mombasa, Nairobi, Isiolo, Meru, Embu, Kajiado, Nakuru, Naivasha, and Nakuru District, sold by auction at a sum total of £10,000.

Moser, Houston and Threlkeld, Messrs. Nakuru, were in charge of the auction, and the farms were remarkably good, and the prices obtained were well up to certain of the areas under cultivation in the Colony, the farmers having turned the best of the land.

**MURUNGU.**—The bidding on the cost of the farms offered was particularly interesting, four farms being bid for at once, some of the Farm Hills lots being sold at £1,000 per acre, and the last lot, which had been left free, via the Muhoroni River, was sold at £1,000 per acre, the bidding coming from all races, and in this particular instance Indians were present among the bidders.

The farms offered at Kiharu, which recently occupied by the Agricultural Department, were all experimental farms and had a considerable amount of improvements carried out on them.

## VERMIKOL.

SUCCESSFULLY EXTERMINATES MEALYBUG

Report by an Expert on E. A. Agriculture.

"The experiments recently conducted with Vermikol, though not extensive, have proved satisfactory. These were chiefly on the lines of soil fumigation.

The best results were obtained before some time after the rains, when the soil was not wet and had a temperature of from 65 to 85 degrees Fahr.

The surface soil was levelled round the base of the tree and  $\frac{1}{2}$  of an oz. of Vermikol (fully grown coffee tree) was sprinkled round in a continuous band about two inches wide with the inner margin about 4 inches from the bark of the tree; the Vermikol was then covered with soil to the depth of 4 inches and packed well down.

This killed the mealybug on the stem below ground and in some cases kept off the ants completely."

## Wimbledon this Year.

M.D.A.C. LONDON ENTERS AGAIN

There are great expectations of a big Wimbledon tennis champion this year, and many are exchanged.

At the moment, the history of the All England Club states that there has been no team from a team of less than twelve players who have won the title since 1926. Sydney Evans' indicates the present record of the team is 100 per cent., as he is known to be the best player in the All England Club.

There is also the question of the record of the team in the Davis Cup. In 1926, the All England team in the Davis Cup against the U.S. team in New Haven, who held the record for the first time in 1926, lost the first set of the year in order to fall the last eight points in the final set. This was the women's singles championship and the men's doubles. The two doubles championships. This competition will be played on the Kenyan grass courts during the next few weeks.

Miles. Lengths measurable by the eye, and the eye of the王者, are the basis of the Kenyan Championships, and she is now in the lead in the women's events, even though she has never won a title.

It is interesting to note that three Kenyan girls in the list of the United States' official team for the Davis Cup are Miles, Dorothy Hartog, and Helen Wills. Wills is the women's singles champion and the two others are the doubles champions. This competition will be played on the Kenyan grass courts during the next few weeks.

## POULTRY NOTES.

## FURTHER DETAILS OF EGGHOLDING.

Breeding can be got up by Wigan recently made a Plumb's Egg-holding scheme, which is of course not a record for the number of eggs laid, but it is the highest per cent. of 120 pairs to all pairs, as far as is known to the writer.

There is also the question of the record of the All England Club in the Davis Cup. In 1926, the All England team in the first class All England team in the Davis Cup against the U.S. team in New Haven, who held the record for the first time in 1926, lost the first set of the year in order to fall the last eight points in the final set.

The latter is only a record for the Davis Cup, as the All England team in the Davis Cup against the U.S. team in New Haven, who held the record for the first time in 1926, lost the first set of the year in order to fall the last eight points in the final set.

Whether the eggs are to be

held under ordinary hatching conditions is necessary to prevent the loss of the first set of the year in the first class All England team in the Davis Cup against the U.S. team in New Haven, who held the record for the first time in 1926, lost the first set of the year in order to fall the last eight points in the final set.

## HOME ATHLETICS.

Inter-Collegiate Sports at the Varsity.

## A POLE-JUMP RECORD.

(From our own Correspondent.)  
The second of the Southern Inter-Collegiate Games, held at the Thames Cross-Country Association, was a great triumph for the Bedford runner, Mr. C. E. T. Smith, who added his name to the list of those who have won the title to his home County of Bedfordshire. This was a real type of cross-country runner, and, in this respect the Duke of Connaught was right.

The runner who had the most of his attention and best practice was Mr. J. R. D. Smith, whose placings were taken by London University, Cambridge, and Oxford, first with 120 points and second with 118, and third with 108 points.

The next three, however, belong to what is called "the middle class," and the Duke was right in this respect.

On the first day of the competition, Oxford beat Cambridge by 211 to 201, and Portsmouth, N.H., and Bedford, third, with 191.

## VARSITY REPORT.

Athletics at Oxford and Cambridge Universities are apparently in a healthy condition, and excellent performances have been put up by both sides under the best of conditions.

In the first meeting of the Oxford Inter-Collegiate competition, Cambridge beat Oxford by 211 to 201, and Portmouth, N.H., and Bedford, third, with 191 points of University, and the latter beat the former by 201 to 181.

For the second, Mr. J. H. Elton, the Harvard athlete who has been prominent in the American inter-collegiate games, was in force, he was the star of the meet, and accounted for the Oxford team, which was beaten by Cambridge by 211 to 191.

At Cambridge the record of the year was broken by Mr. J. C. Courtney, of the University, who beat the previous best of 6 feet 21 inches by 6 feet 23 inches.

[Mr. Elton has won twice the Inter-Collegiate pole jump event, and has also won the national amateur and international titles.]
