ANIMAL CATCHER

A Nairobi Visitor.

An interesting visitor was in Nairobi the week in the person of Mr. Chas. H. Baker, who is a representative of the latter part of the week he has helped to break most of the ice in the world.

Mr. Baker is a man who has been engaged with animals for some years, and he has a great deal of experience in the matter of catching and taming wild animals. He has been in the habit of catching and taming wild animals for some years, and he has a great deal of experience in the matter of catching and taming wild animals.

Traffic Control Problem.

MUNICIPAL MOTING MATTERS.

I was very interested to see the result of a case which recently occupied the attention of the Mayor's Magistrate in which a lady was fined for not obeying the general given as to parking on traffic police lines in this case the defendant maintained that she did not actually follow the signal given by the warden, but the warden's own report for the Monday last Mr. A. Stone, wrote a letter to the E.A. Standard detailing a law of his experience with the traffic policeman, and while expressing sympathy for those who are in the course of being treated as traffic offenders, expressed the opinion that the police were ill-treated in justice proceedings based on the warden's information of traffic control.

Mr. Stone concludes his letter by suggesting that the warden's reports were never meant to be taken too literally, and that every driver should be clearly understood that it is his duty to obey the warden's instructions, and that the warden should be allowed to sign a report in any case where he is in doubt.

Supporting the A.M.R.

Mr. H. H. Harris may be right, but I am bound to disagree with him if only because he is fact, that I can find no very few European police constables in on duty when a traffic police constable is on duty, and that every driver should be clearly understood that it is his duty to obey the warden's instructions, and that the warden should be allowed to sign a report in any case where he is in doubt.

In this article, and I am of the opinion that it would be difficult to find in any other part of the world... I was watching the hot locomotive... I have no objection to the junction of Sixth Avenue and the Government Road... I do not see a single driver of such a kind... I was watching the hot locomotive... I have no objection to the junction of Sixth Avenue and the Government Road... I do not see a single driver of such a kind...

Whose Fault?

Now this is a bad state of affairs and brings us back to my old argument that the motorist themselves largely are in the wrong... I am sure convinced that there is no one more concerned than the motorist himself who considers the motorist's own safety and the safety of others... I am sure convinced that there is no one more concerned than the motorist himself who considers the motorist's own safety and the safety of others...

Models open new road to an entirely
better conception of Motoring

Our great Buick Research Departments together with the largest staff of skilled Engineers in the world have been labouring tirelessly and unremittingly for many months to bring to the public a success which would be outstanding in the industry.

You will never know of the countless exhaustive tests which were undertaken to bring these— and to give to the public the new

models. Our resources were all bent on one idea—a car which should represent a development in mechanism so perfect—an equipment so complete that it would place Buick definitely and conclusively in the advance of all known motoring standards.

With this idea Buick's "Enterprise" has succeeded.

As you will hear from every part of the world, the thunder of enthusiasm and intense interest in these new Buick Models make their

THE HOME TURF

Arrangements of Jockeys for Next Year.

NOTABLE CHANGES

According to the latest mail from England the various clubs and owners are already making arrangements for next year's racing season. A number of the leading jockeys have declined to accept their present employers, but have announced their plans to change to be reported.

Perhaps the most notable change is the fact that Frank Buckle, one of the most popular figures on the turf, has declined to return to the end of the present season will start for Australia at the close of the racing season. It is believed he will ride permanently. Although the fact that he is believed to be understood that Billie's return to the turf is a fact that is not to be taken into account.

CAR CAUSEME

(Continued from page 17.)

To grow and yet the practice of using a car for pleasure increased the consideration which is the factor now being considered by many people and they present some abnormal cases in many cases who today could hardly start a car and would not even start their work without their car. To the motorist the car is the best friend he has and it is not surprising that they require places in which they can be left with impunity.

Motorists' Rights.

There is not any need to get into a row with the police over the excessive sums of money that car owners are asked to pay. The Motorist's Review has been treating the subject in the ordinary street motorist are all citizens even though they will appear to be looked upon as a class apart. Our cars are used as a part of our daily existence and they should not be content with taking up our pocket when they are stopped and prepared to give up parking places now being taken up to whether we want them or not in spite of the fact that streets were made for traffic, and not cars for streets. Non-motorists are inclined to look upon cars as an obstacle and obstruction and I believe that they are not correct in their view. I believe that they are not correct in their view. I believe that they are not correct in their view.

Second-hand Cars.

Buying a horse proverbially is a very bad thing. Buying second-hand cars is no exception. BUICK

Announces
Remarkable New Models

New 1926 Models open new road to an entirely different and better conception of Motoring

THE great Buick Research Departments together with the largest staff of skilled Motor Engineers in the world have been labouring diligently and unremittingly for many months to achieve a success never before attained by any motorcar manufacturer—a success which would be outstanding in the history of the industry.

The world will never know of the countless experiments—the exhaustive tests which were undertaken to create—to prove—and to give to the public the new Buick.

Buick's enormous resources were all bent on one idea—to produce a car which should represent a development so modern—a mechanism so perfect—an equipment so luxurious that it would place Buick definitely and conclusively far in advance of all known motoring standards.

Fired with this idea Buick Engineers have succeeded.

As weeks pass you will hear from every part of the world the growing thunder of enthusiasm and intense appreciation as these new Buick Models make their appearance

Sturdiness

Not only does the Standard Car meet the demands of the owner for speed and comfort, but it is a sturdy built car which will respond to their demands again and again, in good fair weather and in bad, in good road and in bad. The engine has a great reserve of power for hill climbing and is most effectively used every chance, and the wheelbase and chassis are specially suitable for the up-country roads. the past at the meetings of the Associated Chambers of Commerce, the Chamber had reported that Messias and the Council were being neglected, and that they should meet more frequently. It was proposed to give £10,000 for communications and general development. It thought they should limit that a fair share to Messias and the Coast. The present position is that both the north and south were absolutely impossible. They were not satisfied with the first idea was to meet for development on the coast. He considered was the unanimous opinion of the Council. He thought that a further two births at the post were immediately essential. He thought that if nothing was done he had been deceived. He thought that if nothing was done he had been deceived. He thought that if nothing was done he had been deceived.

NEW BUILDINGS

The Editor, "The Standard" has been informed that the new building for the Government offices in Nairobi, which was being erected by the Government, is now nearly completed.

It is true, more immediately within the jurisdiction of the Legislative Authority, but it is to be hoped that the Ministry will be consulted in regard to detail and the broad lines of any policy which is adopted. Local opinion may only be voiced, under ordinary circumstances, through local associations and other bodies.

INDIAN STOCK.

To the Editor, "A Standard":

I spent 20 years in Jamaica and when I heard of the great success attending the sale of the Indian stock, I was glad to hear that every one who had bought it was satisfied. This speaks for itself.

I am, Sir, your obedient servant,
D. D. D. D.

No. 6.

TENNIS TOURNAMENT PLAY.

(By A. R. BRADSHAW, The Famous Davis Cup Internationalist.)

In the wake of all good tennis players the time will arrive when they will figure in tomorrow's papers and feel that wonderful thrill of playing in the highest of the high.

Do not doubt the path to that great goal, but to reach it you must make up your mind to play tennis every day. The struggle here is not to play, but to play consistently in the mechanical sense, for the mind is the great secret.

Above all things, friends, you must keep your mind on the ball. Do not let your mind wander. Do not let your mind wander. Do not let your mind wander.

OUR PARIS LETTER.

The Political Situation.

As we are on the eve of a definite election, we are naturally interested in the political situation in France. The situation in France is a very complicated one. It is a situation of great importance to the world.
