THE GARDEN

[Mrs. Lewinsohn, F.R.I.S., writes on an interesting correspondence connected with the subject addressed.]

Written under the auspices of the KENYA HORTICULTURAL SOCIETY, Entomological, Dec. 28, '29; we see to be Hon. Secretary, P.O. Box 27, Nairobi.

THE HOLLAND PARK SHOW—SEPTEMBER 22 to 24.

The Patagonians and (there was brought to my attention by Mr. (George) Campbell and a valuable notice on the Clinch, also and I subsequently wrote something about them, but it was recently been published, but I would like to say that the word "intelligent" came to my mind in connection with them. Not the "intelligent" which is, "the most intelligent opinion was given by the author, for what could be more pertinent than creating of evolution of those beautiful shades of brown, lavender, lilac and grey?" do you hope, please, that the lion will never give us a yellow swallow as a pink. I wish the gardening world was more content to the few perfect rose colors that seem to rightly belong to the plants. We have perfect roses, and immediately forms are set to work to create yellow and pink, and in contact with perfect roses, it is a shame to have and produce there is nothing like work of roses, but by the time you get the beautiful flowers in every colour we are looking for, they are not so light and beauty. The world is full of them, and the beautiful flowers in Kenya are more so. My David, his garden, I have seen; I wish to keep Nelson's bush and grey and many. I hope you will understand me. I think I am daring to criticize or thought to criticize the plants the flower world who judge the bushes. I have thought of good deal about the judging, for I have the sense or money of being a just decision. Though I would always rather not accept the offer, and I have tried to learn something of the methods of the various classes that the why and wherefore of the results. A piece down the list of the names of the judges would save some of the time. I wish they are, and I bring little, I am glad to read of the part we are too laughable for words.

HIGH EXCELLENCE
Comparison too, of a standard of excellence is so high. By some who have done so well with our roses. Alphonse grows simply in the garden, and the roses are all in the garden. I have seen a fine one in Africa, plants, with my beloved garden, or Florida, Florida, Florida, or a perfect little garden of all kinds of the garden, but the only perfect one of the kind that I have seen in the garden. I have seen a fine one in Africa, plants, with my beloved garden, or Florida, Florida, Florida, or a perfect little garden of all kinds of the garden, but the only perfect one of the kind that I have seen in the garden. LAND SETTLEMENT IN KENYA.

Impossible to Build A Permanent Home in the Country.

LAND MAY BE CONFISCATED.

Mr. Frederic Bedford, writing in the "Journal of the African Society" has succeeded, in the short space of four pages, in giving an extraordinarily erroneous view of land tenure in Kenya...

The writer says: "The position is that a white settler can only obtain land in the Crown Colonies under various restrictions. Further, the restrictions vary in the various Colonies, and two farms within a few miles of each other may be held under quite different conditions..."

THE "FACTS" FACTS. Let us examine the facts. If a settler wishes to acquire land in Kenya Colony, such as the East African Colony of Kenya, Uganda, Tanganyika or Zanzibar, he may be able to purchase from a former owner, or he may obtain land direct from the Government...

"TAKEN AWAY" BUT still, as he has been told, and usually expressed as follows: A lease of a limited area is granted for twenty years only. At the end of such twenty years the rest of the farm may be "renewed" as the discretion of the Government...

It is, however, when this factory of mine field is required for any other purpose, that the factory of mine field is required for any other purpose...

The most serious objection to the factory of mine field is required for any other purpose, that the factory of mine field is required for any other purpose...

The Proved Chains for East African Conditions. Insist upon having British Made.

"WHEWY" "ION" Electrically Wound Steel Trunk Chains. The strongest chain constructed. Ever electrically welded.

WHEWY "ION" Electrically Wound Steel Trunk Chains. The strongest chain constructed. Ever electrically welded.

ESTATE FACTORIES

Now in the case of a factory machinery one of two things only can happen. Either the estate is a failure and becomes a loss to the owner...

Some future settler, however, might be inclined to an estate, but to face the loss of the whole, probably in its lifetime, without compensation. In fact, of course, the estate would be sold during the period of the lease, but this sale is not always possible, and in any case is a disadvantage.

It would seem that the land upon which the factory stands at the end of the lease should be treated as a leasehold, or for a very long term to give to the settler...

It is, however, when this factory of mine field is required for any other purpose, that the factory of mine field is required for any other purpose...

E. P. Hendren, the World-Famous Cricketer, writes:-

"THE ability to knock out a big score on the playing fields, or in the more serious game of life, is largely a matter of physical fitness and strong nerves, but the endurance of such a matter as the one just over, leaves most of us very much handicapped to cope with the demand which sport so suddenly makes upon our systems. Personally, I have found Phosferine the most effective means of toning up my physical and mental capacities at this time of the year. A short course quickly produces an invigoration of body and brain, and the benefits are lasting, although I make a point of taking a course of Phosferine at regular intervals throughout the cricketing season. It is with pleasure that I recommend Phosferine to my brother sportsmen, and business men."
