# MOTORING TOPICS

## FROM NAIROBI TO JINJA.

Studebaker Gets Through in Record Time.

STANDARD MODEL USED FOR THE JOURNEY.

Outward and Return Runs Accomplished Without a Single Break.

As a reliability and speed trial over the roads of East Africa, a trip undertaken last week by Mr. F. Campbell, the manager of Messrs. Morris & Co., between Nairobi and Jinja, will take a good deal of beating. The trip was originally intended as a speed trial of urgent business. It was, however, decided that records of the run should be noted in view of the fact that the party wanted to push through in the shortest time possible.

The car used for the journey was a Studebaker Standard Sedan, for which the firm are agents. The car was not specially fitted, but was taken on to the road in exactly the same condition as supplied to purchasers. The only extra accessories added beyond those supplied with the car was a spare light for night driving. The car was composed of Mr. Campbell, Mr. Tiddell of Morris & Co., who acted as observer; and a native boy. There was also a good deal of luggage on board, the car carrying a load throughout the journey of 105 lbs., including passengers and baggage.

THE ROUTE. The route taken from Nairobi was that via Nakuru, Eldoret, Kapsook, Kakamega, Mumsis, Kisumu, and Jinja, the return journey following the same road. The going was moderately good, except that during the return journey a heavy fog was experienced between Kakamega and Kapsook, followed shortly after by a heavy rain storm.

### GOOD GOING.

A factor at the time of both the outward and homeward trips will show that the average running speed was just under 27 miles per hour, which, taking the roads, and the night driving, and rain on the return run, is a distinctly creditable performance.

### RELIABILITY.

The outstanding feature of the trip, however, is the manner in which the car held proved the reliability on East African roads. From the time the car left Nairobi until it was returned to Nairobi's garage it did not give a moment's trouble. During the journey the engine was never stopped for any purpose whatsoever, nor was the fuel tank ever in demand. The standard tyre supplied with the Studebaker was used in perfect condition at the end of the journey, and without a puncture in any of the tread.

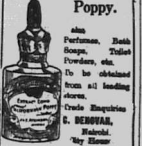

Water consumption was also a noteworthy feature, the average figure for the whole trip being 20 miles to the gallon.

### THE RECORD.

In regard to the outward journey, a definite record has been established, having taken the previous two days by some seven hours. The previous journey was accomplished last year when a party of four left Nairobi for Jinja and returned the following day to that

spot from Nairobi with all speed. On that occasion the car had two drivers, as the nature of the going is such that one driver could not possibly carry through without regular rests, but even then the time that the car did not move within seven hours of that densely packed with the Studebaker was made. As stated previously, the journey from Nairobi to Jinja was not undertaken in the first place with any view to record breaking or as a reliability trial, but simply to transport urgent business with which Mr. Campbell was concerned, and the car used for the journey was simply one of the ordinary models as supplied to the public without any frills. Nevertheless the result of this run has definitely proved that the Studebaker is a car eminently fitted for use in East Africa, and will stand up to the most difficult job which can be given to it.

# Sealed to Protect Buick Performance

Buick Chassis is completely sealed. Iron and steel housing protect the operation of all driving parts—seal them in to safeguard Buick performance. Some cars have some of this protection, but Buick is the only car in the world—regardless of price—that has a wall of defence continuous from fan hub to rear axle against road dirt, stones, water and loss of lubricant.

And now to these seals Buick has added three more—

- 1 Oil Filter
- 2 Air Filter
- 3 Petrol Filter

Here are the vital points at which Buick engineering provides this protection:

- 1 FAN HUB—Fan bearing to hub sealed—lubricated by its own gear pump.
- 2 MOTOR—Shield, cover impeller, water from short-circuiting pump. Seal cover over valve mechanism, bearings, fan out, all in.
- 3 STEERING OVERHAUL—Drive shaft—oil seal—gear case protected and sealed in complete housing. Steering gear housed in oil.
- 4 WHEELS—Completely boxed. Starting teeth protected road. Complete concentration of mud and dirt.
- 5 CLUTCH—Multiple disc—sealed housing.
- 6 TRANSMISSION—Completely protected. Shifting mechanism sealed.
- 7 UNIVERSAL JOINT—Cover firmly spaced in ball joint at front and rear. Bearings lubricated automatically from transmission.
- 8 PROPELLER SHAFT—Sealed in a torque tube, completely enclosed the propeller shaft. It is impossible for dirt to work from the shaft into the universal joint or rear axle.
- 9 REAR AXLE—Flange-type, totally enclosed in rear axle housing.

**THE GARDEN**  
 Written under the auspices of the KENYA HORTICULTURAL SOCIETY. Subscription, Shs. 10/- to be sent to the Hon. Secretary, P.O. Box 27, Nairobi.

**DARLINS**

The darlin class as the name implies the most common to judge, because so few of the flowers shown are true type. Darlins are perfectly wonderful in the garden, highly decorative at the show, but few exhibitors appear to know the true types from the imitations and the plants are based on the form of the flower rather than the shape of the petals as is also the case with consideration.

There are six distinct recognized types or strains which members of the National Dahlia Society, and the Royal Horticultural Society, from their own collection and long years of experimental work I spent some time last year among darlins both at shows and I had darlins that I grew and found more darlins than I had previously known there was to know!

The development of the ray flower the way they are on or out of pattern, etc. There was a time when a single ray flower was not uncommonly one entry had to be classified as several! The exhibitor not knowing the meaning of a single dahlia being to Class I. Single dahlia being to Class I. and very easy to recognize. They have a single regular outer ring of flattened expanded rays which overlap more or less at their edges. The centre forms a golden disc. The single dahlia are under 10 in diameter or perhaps just 8 in. but they may be 10 in. or more in diameter but that and they are not so much more than 10 in. in diameter only.

It is very interesting to visit one of the shows with a box of rays and get accustomed to the look of a tall true single dahlia. Once the eye is trained to look for a Bn. dahlia it is surprising how easily they are picked out and just measured for

verification. For a perfect specimen the stems must be smooth, recurved at the tip on the top, broad and overlapping so as to form, as far as possible, a perfectly round flower.

There is also a single decorative type or strain of overlapping or touching for about three quarters of their length, after which the tubular portion and form an eight-pointed star. The centre of the flower is also a single form a voided disc.

Class II. is the dahlia world belongs to Mignon single dahlia. The flowers are the same as the single and the decorative single, but the petals are not so much tubular as in height. These Mignon darlins are very useful indeed, though it is very difficult not to know it is a very proper dwarf bush.

Class III. being the popular one, they are fully double and with any variety created they have more than a dozen of their petals. They are now, however, and there is no doubt of their popularity. The petals are not so much tubular as in height. These Mignon darlins are very useful indeed, though it is very difficult not to know it is a very proper dwarf bush.

Class IV. is the dahlia world belongs to Mignon single dahlia. The flowers are the same as the single and the decorative single, but the petals are not so much tubular as in height. These Mignon darlins are very useful indeed, though it is very difficult not to know it is a very proper dwarf bush.

Class V. consists of double flowers dahlia fully double, rays regularly arranged with their tubular portion, forming wide pointed tips. They have no central yellow disc. Some darlins are grouped in Class VII. They are fully double and must be over 8 in. in diameter. The centre disc is like the outer tubular with margins incurved and incurved at the base. The petals are not so much tubular as in height. These Mignon darlins are very useful indeed, though it is very difficult not to know it is a very proper dwarf bush.

Class VI. consists of double flowers dahlia fully double, rays regularly arranged with their tubular portion, forming wide pointed tips. They have no central yellow disc. Some darlins are grouped in Class VII. They are fully double and must be over 8 in. in diameter. The centre disc is like the outer tubular with margins incurved and incurved at the base. The petals are not so much tubular as in height. These Mignon darlins are very useful indeed, though it is very difficult not to know it is a very proper dwarf bush.

Class VII. they are similar in flower to the show darlins but are much smaller being usually 10 to 14 inches.

Class VIII. is the narrow of the star dahlia, they are seen in flower with long narrow petals and a central yellow disc. The petals are not so much tubular as in height. These Mignon darlins are very useful indeed, though it is very difficult not to know it is a very proper dwarf bush.

Class IX. is the narrow of the star dahlia, they are seen in flower with long narrow petals and a central yellow disc. The petals are not so much tubular as in height. These Mignon darlins are very useful indeed, though it is very difficult not to know it is a very proper dwarf bush.

Class X. is the narrow of the star dahlia, they are seen in flower with long narrow petals and a central yellow disc. The petals are not so much tubular as in height. These Mignon darlins are very useful indeed, though it is very difficult not to know it is a very proper dwarf bush.

Class XI. is the narrow of the star dahlia, they are seen in flower with long narrow petals and a central yellow disc. The petals are not so much tubular as in height. These Mignon darlins are very useful indeed, though it is very difficult not to know it is a very proper dwarf bush.

Class XII. is the narrow of the star dahlia, they are seen in flower with long narrow petals and a central yellow disc. The petals are not so much tubular as in height. These Mignon darlins are very useful indeed, though it is very difficult not to know it is a very proper dwarf bush.

**Norton Motor Cycles**

**Only two Manufacturers Offer "One-Profit" Unit Built Values**

ONLY two manufacturers actually build their cars complete—make all their own bodies, engines, crotches, springs, gear, differentials and steering gears, axles, gray iron castings and drop forgings. One is Ford. The other is Studebaker.

- To make this possible, Studebaker has for many years invested more than half its earnings in new auto-manufacturing buildings and the most modern most efficient machinery and equipment. Because of this policy, resources amounting to more than \$20,000,000 have been built up and devoted exclusively to the production of Studebakers.
- This One-Profit principle of manufacture makes possible four great advantages:
1. It eliminates the extra profits and overhead that many other manufacturers have to pay and include in the purchase price to you. This keeps Studebaker prices low.
  2. Because of the One-Profit savings, Studebaker is able to offer you a sturdier, more substantially built automobile. We pay a premium for the finest steel. We use hard wood in body construction. Throughout the entire car—on hundreds of hidden places—Studebaker uses high quality materials and workmanship that you see and in the open.
  3. It makes possible four quality bodies, Studebaker being an independent manufacturer, with no subsidiary or allied companies to favour, is free to buy on the open market, demanding the finest materials at the lowest possible price. Studebaker purchasing agents are unswerving in their search for quality and value.
  4. And finally, it enables us to build a better car, more complete, more designed, engineered and manufactured completely by one organization. Being built as a one-Studebaker car function as a complete unit with all the advantages of unit over assembled construction.

**Only STUDEBAKER builds the Duplex!**

Studebaker Standard Six Duplex Phaeton (illustrated) is a splendid example of One-Profits in its weight and size; Duplex body, an exclusive Studebaker feature; full size balloon tyres, genuine Spanish grained leather upholstery, instruments, including an 8-day clock, grouped in oval panel under glass, light control on the steering wheel and many other desirable features.

"STANDARD" CARS.

Cellulose Finish for All Open Models.

UNSCRATCHABLE PAINT.

It can now be announced that the Standard Motor Co., Ltd., have definitely adopted cellulose finish instead of oil paint for all Standard cars with open or all-weather bodies...

number being of the final order... a new paint-brush is to be used, for every stroke is applied by means of "pre-paints" through which the paint material is forced under high pressures...

To prevent the workers from inhaling the spray, there is a new hood in each sprayer chamber, which draws the spray and humidifies it to discharge it off side the building... The Standard cars are being fitted progressively and the new cellulose paint is being used for all new cars...

Headlight Care.

HOW TO AVOID THE TROUBLE ON THE ROAD

Major F. O. A. Fisher-Leth, holder of "By Road to India" has some interesting comments to make on "Headlight Care" and writes as follows:

It is a mistake to suppose that the beam of a lamp is adjustable in its position... The motorist is still within the accepted rule on the point of what is a safe to run at night... It is in fact to look straight ahead.

The 1926 Crosley.

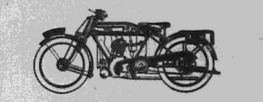

IMPROVEMENTS IN THIS YEAR'S MODEL.

Throughout 1925 the Crosley Company has developed a good deal of attention to their 14000 h.p. model with a view to making it still more attractive... The touring car is now a five-door model and is available in four really seat five in comfort and

Sealed to Protect Buick Performance

Buick Chassis is completely sealed. Iron and steel housing protect the operation of all driving parts—seal them in to safeguard Buick performance.

And now to these seals Buick has added three more—

- 1 Oil Filter. Buick Oil Filter is constantly working while the engine is running. As the oil is used it is passed through the filter and by microscopic filtration all impurities are removed... 2 Air Filter. Dust, grit and all impurities are removed from the air by Buick's air filter... 3 Petrol Filter. No water, grit or foreign substance can get into a carburetor. Buick's petrol filter prevents this...

Standard Six Touring £418

Here are the vital points at which Buick provides this protection:

- 1 FAN BELT—Fan bearings totally enclosed-lubricated by the cover gear train. 2 MOTOR—Steel cover keeps water from short-circuiting electrical parts. Steel cover over valve-in-head mechanism keeps dust out of it. 3 STARTER GENERATOR—Belt single clutch-generators completely housed in zinc housing. Starting gear housed with flywheel. 4 LUBRICATION—Completely housed. Buick's petrol filter protected from road damage and dirt. 5 CLUTCH—Multiple discs completely housed. 6 TRANSMISSION—Completely protected. Shifting mechanism housed inside. 7 UNIVERSAL JOINT—Completely enclosed in ball joint at both ends and herpet seal lubricated automatically from transmission. 8 SHOCKLES & SHAFTS—Buick's third shock drive shaft is in torque tube, completely enclosed in protective shaft. It is impossible for road dirt to get from the shock into the universal joint or rear axle. 9 REAR AXLE—Floating type, enclosed in rear axle housing.

### A Weekly Resume of Current Topics.

#### THE POSITION OF WHEAT

(By Reserve.)  
The news that the Kenya wheat crop of 1925, after a promising start, has been ruined by a severe drought, is a sad one. It is a pity that the crop should have failed, especially as it was the only one of the year which was not ruined by a severe drought. The crop was a very good one, and it was expected that it would be a record one. It is a pity that it should have failed, especially as it was the only one of the year which was not ruined by a severe drought.

#### WHEAT LANCHE

The question naturally arises from the above picture of wheat in Kenya, what is the position of wheat in other parts of the world? It is a pity that the crop should have failed, especially as it was the only one of the year which was not ruined by a severe drought. The crop was a very good one, and it was expected that it would be a record one. It is a pity that it should have failed, especially as it was the only one of the year which was not ruined by a severe drought.

# Only two Manufacturers Offer "One-Prof-it" Unit Built Values

ONLY two manufacturers actually build their cars complete—make all their own bodies, engines, clutches, springs, gear boxes, differentials, steering gears, axles, grey iron castings and drop forgings. One is Ford. The other is Studebaker.

To make this possible, Studebaker has for many years invested more than half its earnings in new and finer factory buildings and in the most modern, most efficient machinery and equipment. Because of this policy, resources amounting to more than £20,000,000 have been built up and devoted exclusively to the production of Studebakers.

This One-Prof-it principle of manufacture makes possible four great advantages:

- It eliminates the extra profits and overhead that many other manufacturers have to pay and include in the purchase price to you. This keeps Studebaker prices low.
- Because of the One-Prof-it principle, Studebaker is able to offer you a car that is a better one for the money than any other car in the world. We use hard wood in body construction. Throughout the entire car—on hundreds of hidden places—you find most durable high quality materials and workmanship that you see in the open.
- It makes possible finer quality because Studebaker, being an independent manufacturer, with no subsidiary or allied companies to favour, is free to buy on the open market, demanding that its materials be of the finest possible price. This means that you get the best value for your money.
- And finally, it enables us to build a better car because the vital parts are designed, engineered and constructed completely by one organization. Being built as a unit, Studebaker cars are made to work with all the advantages of unit over assembled construction.

2 cars in 1

## Only STUDEBAKER builds the Duplex!

Studebaker Standard Six Duplex Phaeton (illustrated) is a splendid example of One-Prof-it values. It has the most powerful engine of any car in the world of its weight and size. Duplex body an exclusive Studebaker feature; full size balloon tyres, genuine Spanish grained leather upholstery, instruments, including an 8-day clock, grouped in an oval panel under glass; light control on the steering wheel and many other desirable features.

## EAST AFRICA MEETS IN NARONI

### CONFERENCE OF GOVERNORS. Outline of Important Agenda under Discussion.

**AIR ROUTE, LABOUR, SETTLEMENT.**

Opening speeches were made by  
**Sir Edward Grigg.**

Your Excellencies, it is a high  
privilege to bid you welcome in the  
name of Kenya today, and I am  
most desirous that I should have  
the opportunity of making a few  
remarks to you. I am sure we all  
regret that someone has prevented  
the proposed East African Conference  
from being in time for the opening  
of the Loucheur.

The history of the Empire is a  
mass of precedents, but in the  
territories which we are inaugurating  
today, I think the first time  
has been in our history that we have  
had in important circles, persons  
of so many different races and  
interests. In the past, we have  
been a community of many divided  
interests, but today we have a  
unity of purpose and a common  
vision of the future.

It is our hope, therefore, that  
we shall be able to meet each other  
on a common basis and to discuss  
the various problems which we  
share. It is my duty to wish you  
a most successful conference.

THE DUAL POLICY.

It is the only policy of our  
time. It is the only policy which  
is in accordance with the  
principles of justice and equity.  
It is the only policy which  
is in accordance with the  
principles of efficiency and  
economy.

THE PROBLEM.

We are standing in those territories  
with a unique political and  
administrative situation. We are  
faced with the task of developing  
these territories into a united  
East African community.

THE FUTURE.

It is our hope that the  
conference will result in a  
united East African community.  
It is our hope that the  
conference will result in a  
united East African community.

### ORATION BY BRITISH AT END OF TOUR.

**FOURTEEN MONTHS TRIP**

(FOLLOWER SPEAKS AT CAIRO, JAN. 24)  
The tour which I have just  
returned from has been a most  
enjoyable and profitable one. I  
have had the opportunity of  
visiting many of the great  
cities of the East and of  
meeting many of the great  
leaders of the East. It has  
been a most interesting and  
enlightening experience.

### RUSSIAN ULTIMATUM TO CHANG TSO-LIN.

#### Seqel to Affairs of Orient.

MOON, JAN. 27.  
The ultimatum which the  
Soviet Government has  
presented to Chang Tso-Lin  
is a most interesting one. It  
is a most interesting one.

### GERMANY SPYING IN POLAND.

BRUSSELS, JAN. 26.  
The German spy system in  
Poland is a most interesting  
one. It is a most interesting  
one.

### DISMISSAL AFTER HIS ILLNESS.

PARIS, JAN. 26.  
The dismissal of the  
Minister of Education is a  
most interesting one. It is a  
most interesting one.

### THE MILLION GALLON TANK.

The million gallon tank  
is a most interesting one. It  
is a most interesting one.

### THE MILLION GALLON TANK.

The million gallon tank  
is a most interesting one. It  
is a most interesting one.

### ENGINERS' PROPOSAL TO NARONI.

The engineers' proposal to  
Naroni is a most interesting  
one. It is a most interesting  
one.

### WHITWAYS.

Whitways is a most  
interesting one. It is a most  
interesting one.

### THIS WEEK AT WHITWAYS.

This week at Whitways  
is a most interesting one. It  
is a most interesting one.

### MISS BOH-NO.

Miss Boh-No is a most  
interesting one. It is a most  
interesting one.

### "BOHNO".

"Bohno" is a most  
interesting one. It is a most  
interesting one.

### THE LIQUID OF SO MANY USES.

The liquid of so many uses  
is a most interesting one. It  
is a most interesting one.

### THE LIQUID OF SO MANY USES.

The liquid of so many uses  
is a most interesting one. It  
is a most interesting one.

### THE MIRACLE CLEANER.

The miracle cleaner  
is a most interesting one. It  
is a most interesting one.

### DISINFECTANT DEODORIZER.

The disinfectant deodorizer  
is a most interesting one. It  
is a most interesting one.

### NEW REDUCED PRICES FOR BOHNO.

New reduced prices for  
Bohno is a most interesting  
one. It is a most interesting  
one.

### WHITWAYS GREAT SALE.

Whitways great sale  
is a most interesting one. It  
is a most interesting one.

### DESIGNS IN STRIPPED LINEN.

Designs in striped linen  
is a most interesting one. It  
is a most interesting one.

### DESIGNS IN ORANGE GROUNDS.

Designs in orange grounds  
is a most interesting one. It  
is a most interesting one.

# MOTING TOPICS

## SECOND-HAND CARS.

### Points the Purchaser Should Watch.

### CAUTION NEEDED.

To those who have had no experience in purchasing, and who are contemplating the purchase of a second-hand car, my advice is that overworked just on "marriage" - Don't; that is, don't if you can possibly avoid it. Many good, cheap, new cars are now being obtained at what were second-hand prices only a few years ago. It is also possible to purchase a car now new out of the box, on terms that are well within the reach of the majority.

and controlling. Don't take his word for it at all right, but inspect the mechanism with your own eyes, and see that what you see would fit you were buying the car in the open market.

An example of the necessity of this same under my notice only recently. I met an odd acquaintance driving a car of a make different from the one he had purchased only seven months previously. On asking what had happened to the first car, he told me that he skidded into a lamp-post, doing a deal of superficial damage and knocking the chassis slightly out of alignment.

### A REAL TEST.

In the first place, do not be content with a trial consisting merely of a drive round the town. Insist upon a run of at least a hundred miles, if necessary, before you pay for the petrol, and have a careful reckoning of the petrol in the tank at the start and what is added on the run.

During those hundred miles you would be able to do everything that you would like to do were it your property. This will give you a fair idea of the state of the cylinders, for if they are scored or if the piston rings are badly worn, you will find that your spending bill will be almost sure to "do up."

Moreover, any temporarily scoring bearing would make itself known by a change in regular noise during the run. Keep your ears open, for any intermittent humming from the car is the sign, for if you get this when the car is worn, even when wheel or worn differential pins or axles. And at all speeds and in all conditions of road that you get the kind of noise, you can make sure that you are not so fault in the steering.

Try the car at all speeds, and get a good look at the chassis frame, and satisfy yourself that it has not sagged in the centre. If it has, it will crash sooner or later, and this means a great deal of trouble to the owner.

Other points to notice. Having finished the run, have a good look at the chassis frame, and satisfy yourself that it has not sagged in the centre. If it has, it will crash sooner or later, and this means a great deal of trouble to the owner.

then look under the car and make sure that the brakes are not sagging, and that the oil in the crank case is not too low.

Having finished the run, have a good look at the chassis frame, and satisfy yourself that it has not sagged in the centre. If it has, it will crash sooner or later, and this means a great deal of trouble to the owner.

Another recent good performance.

On the motor page on Monday, an article appeared describing a run from Nairobi to Jiji and back in record time by a Brooklands Standard Duplex car. In this article it was stated that the previous best time was done last year, and that the run had been lowered the time by some seven hours.

### Increasing Speed Limits.

### NEW REGULATIONS IN AFRICA.

Fast moving vehicles are the latest ideal of traffic regulators in America, and it is considered well worth a few notes that very low speed limits are a sure case of congestion.

The State of Florida has taken the initiative by increasing the speed limit on the highways to 40 miles an hour. Motorists have followed the example. Motorists are encouraged to drive fast where fast driving is safe, and no incentive in the supervision and control exercised by traffic officials, but it is claimed that those who overstep the bounds of discretion are severely apprehended.

### THAT MAGNETO.

Try starting up by hand when the engine starts. If you have difficulty, it is probably because the magnet is weak.

After this test, try to engage your gear in general concentration for 10 or 15 minutes, and

## Essjay Limited

P.O. Box 634,  
Theatre Royal Buildings,  
Sixth Avenue, Nairobi.  
Phone 877. Telegrams: Esjay Ltd.

We have repeatedly been approached upon the public offer of shares in the above mentioned company. In view of the fact that the value of the shares is increasing, we have decided to issue a prospectus for the purpose of enabling the public to purchase shares in the company. The price of the shares is 1/6 per share. The value of the shares is increasing, and we are sure that what we have offered is a very good value. The following are offered at the following price: 1/6 per share. The value of the shares is increasing, and we are sure that what we have offered is a very good value.

Information has now been received, however, to the effect that a motorist, driving by himself while doing a journey a short time ago, from Nairobi to Nairobi, covered the road from Jiji to Nairobi, similar time to that of the Brooklands. The car used, however, was a Brooklands, and does not detract in any way from the excellent performance of the Brooklands last week.

A ship, however, situated near Nairobi containing 4 tons of iron and other materials, was on 14th inst. Ref. P.F. 20.

A wood and iron house, containing 10 tons of iron and other materials, was on 14th inst. Ref. P.F. 20.

A well appointed stone house, containing 10 rooms, 1/6 per room, was on 14th inst. Ref. P.F. 20.

A well appointed stone house, containing 10 rooms, 1/6 per room, was on 14th inst. Ref. P.F. 20.

A well appointed stone house, containing 10 rooms, 1/6 per room, was on 14th inst. Ref. P.F. 20.

# Sealed to Protect Buick Performance

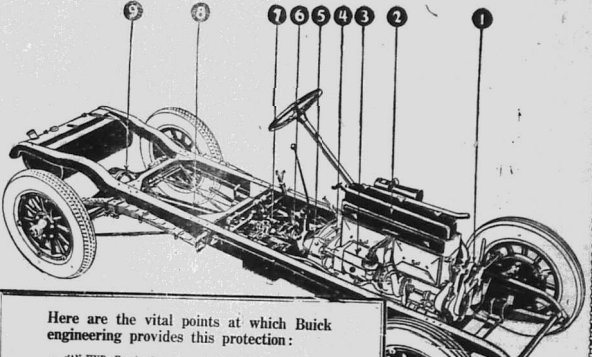

Buick chassis is completely sealed. Iron and steel housing protect the operation of all driving parts—seal them in to safeguard Buick performance.

Some cars have some of this protection, but Buick is the only car in the world—regardless of price—that has a wall of defence continuous from fan hub to rear axle against road dirt, stones, water and loss of lubricant.

And now to these seals Buick has added three more—

- 1 Oil Filter** - Buick Oil Filter is constantly working while the engine is running. As the oil is used it is passed through the filter and impurities are removed, thus pure oil being returned to the engine.
- 2 Air Filter** - Dust, grit and all impurities are removed from the air by Buick's Air Filter. Before the air reaches the combustion it is rendered as clean and pure as mountain air. This feature alone adds years of life to Buick engines.
- 3 Petrol Filter** - No water, grit or foreign substance can get into a Buick's carburetor. Buick's petrol filter prevents this. Buick's petrol filter is rendered as clean and pure as mountain air. This feature alone adds years of life to Buick engines.

Standard Six Tourer  
**£418**

- Here are the vital points at which Buick engineering provides this protection:
- 1 FAN HUB** - Fan bearing is fully enclosed—lubricated by splash from oil bath.
  - 2 MOTOR** - Steel cover keeps water and dirt out of motor. Steel cover over motor keeps out all mechanical dirt.
  - 3 STARTER OPERATOR** - Drive shaft and starter gear completely housed in a single housing. Starting gears housed with flywheel.
  - 4 FLYWHEEL** - Completely housed. Starting gears housed from road damage and contamination. Road shield.
  - 5 CLUTCH** - Multiple disc—completely housed.
  - 6 TRANSMISSION** - Completely protected. Sliding mechanism housed.
  - 7 UNIVERSAL JOINT** - Completely enclosed in ball joint housing. Drive shaft and torque tubes completely protected from contamination.
  - 8 BUICK'S THIRD SHAFT** - Such is a torque tube, completely encloses the propeller shaft. It is impossible for road dirt to work into the shaft from the universal joint or rear axle.
  - 9 REAR AXLE** - Floating type, totally enclosed in rear axle housing.

LAND

Duly instructed, we offer for sale by private treaty—

1. A Duffie Cadillac, highly developed. Purchase price—£1,000. Not estimated. To be sold.
2. A fully equipped Cadillac, estimated to have returned at least during the past few years, approximately 12%, on the purchase price itself. Labour supply situated on a substantial return on the purchase price asked.
3. A large made property, situated on rail, with own station. The land of the property is 100 acres. A residential acreage, can be put under the plough. Highly developed, a strong cover with a steady annual revenue, showing a substantial return on the purchase price asked.
4. A well developed maize farm in the Kiunga area, a few acres only. A good property giving a good return on the purchase price. On rail, well situated for water, fuel and labour. In this ball.

WANTED: We have received an enquiry from a prospective settler for about 1,000 acres of land suitable for fruit in the Kiunga district. He will be glad to receive full particulars from owners desirous of selling.

**THE EAST AFRICAN STANDARD**  
Mombasa Times & Uganda News  
WEDNESDAY, JAN. 27, 1926.

### THE GOVERNORS' CONFERENCE.

We had occasion to say yesterday, in welcoming the distinguished visitors who are now in Kenya, that the spirit which would dominate and influence their very important deliberations would be that of their anxiety for the permanent interests of a Greater Eastern Africa. The opening speeches which we published this afternoon strengthen that and justify that opinion. They disclose the determination held by all the administrators, even those who confess that, at the moment, they may only be interested spectators in our East Africa, as His Excellency Sir William Governors, Governor of Uganda, has expressed it. "Steadily," and so we think it is. It is a great faith which gives birth to that determination; it is, too, an admission of the need for toleration, for vision and for sympathetic understanding. The opening speeches, which the Governors have wisely decided shall be made available for the public, not only of East Africa but eventually for the communities in the Home Countries, must create the quiet and confident expectations of a very real measure of service to East Africa by those who are charged with the care of its destinies. Particular interest in Kenya will centre in the opening speech which will be made by His Excellency Sir Edward Drigg. It is not the conventional speech of a Chairman and nothing more; it is an expression of His Excellency's political faith in Imperial Africa and policy as formulated to and applied to East Africa; and it is something more—a restatement of the Kenya view of that policy. From the serious and imperative necessity of the Kenya policy of European settlement and the advantages of the close association of white and black races freely created, His Excellency has not hesitated in voicing the opinion that in each other parts of Eastern Africa, where similar conditions made application of that policy possible, white settlement should be encouraged. It is Kenya's hope that people are profoundly conscious that the welfare of European and African must be treated on an equal basis. From the serious and imperative necessity of the Kenya policy of European settlement and the advantages of the close association of white and black races freely created, His Excellency has not hesitated in voicing the opinion that in each other parts of Eastern Africa, where similar conditions made application of that policy possible, white settlement should be encouraged. It is Kenya's hope that people are profoundly conscious that the welfare of European and African must be treated on an equal basis.

Mr. Howard placed the proposed £100,000 loan in a light which is important should not be overlooked. He has laid stress on the belief that, in order to provide the Kenya view of that policy, it is important to have a proper return, railway development must be treated on an equal basis. From the serious and imperative necessity of the Kenya policy of European settlement and the advantages of the close association of white and black races freely created, His Excellency has not hesitated in voicing the opinion that in each other parts of Eastern Africa, where similar conditions made application of that policy possible, white settlement should be encouraged. It is Kenya's hope that people are profoundly conscious that the welfare of European and African must be treated on an equal basis.

Prohibited Immigrant  
A boy named A. Higgins has been known to the Immigration authorities as a prohibited immigrant. He was arrested on the 22nd inst. and is now in custody of the Kenya Police. He is a native of the United Kingdom and is believed to have been in the country for some time. He is a native of the United Kingdom and is believed to have been in the country for some time. He is a native of the United Kingdom and is believed to have been in the country for some time.

THE LAKE CONSISTENCY.

Hon. Mr. Conway Harvey Meets the Voters.

FINANCIAL POSITION EXPLAINED.

Some Points in Improvement of the Labour Situation.

A VOTE OF CONFIDENCE.

[FROM OUR OWN CORRESPONDENT.]

Friday, January 26, 1926. The ministerial audience of the House of Representatives...

LOANS

On the subject of Loans I do not wish to say that I consider that the majority of the public debt is invariably being used as opportunity...

The 100,000 Kenya and Uganda Loans have been extended to the Kenya and Uganda Railway...

THE RAILWAY SHARE

It is important to bear in mind that responsibility for interest on the sinking fund on all three loans is not equally assumed by the State...

There are 2,000,000 Kenya and Uganda Loans which have been spent on loans for Great Britain...

COLONIAL LOAN.

£80,000 is to be spent on a new colonial loan. It is intended to be raised by the Government of Kenya...

By the LAST PARCEL MAIL we received a list selection of the new issue in Men's Underwear...

Members, Editors and Readers respectively, which will largely find their way into the hands of those who are engaged in the various industries...

We are informed that the forthcoming Government Conference is likely to be an annual event and that it will be held in Nairobi...

To the fringe of all the arrangements for the coming year, it is our hope that the Government will be able to secure the approval of the public...

Most of the items to which the public have been devoted are immediately representative and the interest therein is borne by the railway and harbour administration...

PORT PROTECTION.

We must remember that all who are engaged in the various industries of Kenya are interested in the progress of the port...

PROTECTION.

I have been asked to say something about the protection of the port of Mombasa. It is generally agreed that a sound system of protection can be established...

CRITICISM WELCOMED.

Your reference to the value of industrial public criticism is well founded. I feel sure that it is a very desirable thing that the Government should be able to receive such criticism...

By the LAST PARCEL MAIL we received a list selection of the new issue in Men's Underwear...

daily representative protection, which means that the person who consumes the goods of the country...

The Fibre who purchases his bag of Flour for 25/- has received a 200 lb. bag of flour which is worth 44/- to 45/-...

It is important to remember that a very large proportion of Kenya Wheat is grown in the north...

SHOAR

On 27th September, 1925, the existing ad valorem duty of 15 per cent was replaced by a fixed duty of 10/- per 100 lbs...

In addition to the 2,000 cwt of Sugar was imported during 1925. Now what has been the result of this to the consumer of sugar in Kenya?

DAIRY PRODUCE

As every farmer can be made to produce the other actual local commodities which are substitutes for the production of sugar...

FLOUR

The duty on Flour was fixed on the 27th September, 1925 at 6/- per 100 lbs. This was a very important step...

The dairy industry was founded on the labour and with the advent of heavy the labour problem...

Editor, "E. A. Standard" — read Mr. J. H. Williams' article on the subject of the Kenya Wheat Industry...

THE BENEFIT

I think I have shown the effect of the Protective Tariff to be a most important one...

It is important to remember that a very large proportion of Kenya Wheat is grown in the north...

SHOAR

On 27th September, 1925, the existing ad valorem duty of 15 per cent was replaced by a fixed duty of 10/- per 100 lbs...

"STANDARD" FEATURE PAGE

KENNEL NOTES by Margaret Colyer. Mrs. Cooper, Dept. 1, writes to the Standard...

I am sorry to have disappointed my kind readers by writing on "Notes" last week, but I am continuing my scribbling on canine matters. First and foremost I made a mistake when mentioning Mrs. Keyser and Mrs. McCallum as members of our club...

A FORTHCOMING SALE. Here is a piece of news that will be of interest to hunters, wild bird and gamekeepers, and sportsmen. A fine lot of game birds, including a pair of Golden Pheasants, a pair of Red-legged Partridges, and a pair of Green-winged Teal...

six months old; he has also been well handled in wire, and no "kennel folk" will show him any respect by making love to me when I look him on the road on my way back from the last show.

HOOKWORM CURB

From someone who is well known in this country I have received a long letter the first sentence of which reads as follows: "I was extremely interested in your article on hookworms."

It should be given and if in drop form even in a few drops to quite young puppies of three to three months' age.

Mr. Keyser of Kildare wants to know how many Irish wolfhounds would write to an address of a kennel in England to which she would write with any likelihood of getting what she requires.

ATKINSON'S Celebrated Californian Poppy.

Perfumes, Toilet Soap, Powders, etc. To be obtained from all leading Grocers, Trade Exporters. G. DENOVAN, Nairobi, City House.

ATKINSON'S Celebrated Californian Poppy. The following is an extract of the Manufacturer's Report: "Ehob gives vitality to plants, making it to resist more successfully diseases of all kinds."

NOTE CHANGE OF ADDRESS WHEAT GROWERS USE EHOB AND BE FREE OF RUST. The following is an extract of the Manufacturer's Report: "Ehob gives vitality to plants, making it to resist more successfully diseases of all kinds."

Only two Manufacturers Offer "One-Prof" Unit Built Vehicles

ONLY two manufacturers actually build their cars complete—make all their own bodies, engines, clutches, springs, gear boxes, differentials, steering gears, axles, gray iron castings and drop forgings. One is Ford. The other is Studebaker.

- 1. It eliminates the extra profits and overhead that many other manufacturers have to pay and include in the purchase price to you. 2. Because of the One-Prof savings, Studebaker is able to offer you a sturdier, more substantially built automobile. We pay a premium for the finest steel. We use hand work in vital construction. Throughout the entire car in hundreds of hidden places—you find the same high quality of material as workmanship that you see in the open.

STUDEBAKER CORPORATION OF AMERICA, SOUTH BEND, INDIANA. BUILDERS OF QUALITY VEHICLES FOR 73 YEARS.

SOLE Importers K. McIVOR & Co. P.O. Box 98. Telephone 87.

Only STUDEBAKER builds the Duplex!

Studebaker Standard Six Duplex-Phaeton (illustrated) is a splendid example One-Prof value. It has the most powerful engine of any car in the world of its weight and size; Duplex body, an exclusive Studebaker feature; full size balloon tires, genuine Spinnaker grained rubber upholstery, instruments, including an 8-day clock, grouped in an oval panel under glass; light control on the steering wheel and many other desirable features.

### CHANGES IN ISLE OF PEMBA.

### "Psychic" Impressions of a Tour.

### RESIDENT'S FINAL VIEW.

The following is collated from the Supplement to the Zanzibar Government Gazette, of the 13th February, 1922.

The Hon. Mr. H. H. Johnston, Attorney-General, Director of Public Works, and Mr. H. H. Johnston, British Resident, had for the night of Tuesday, 7th Feb., the 22nd night of the 1922 session, at 11 o'clock of the afternoon, the following proceedings:

At 11 o'clock the Hon. Mr. Johnston, Attorney-General, and Mr. H. H. Johnston, Director of Public Works, were present. The Hon. Mr. Johnston, Attorney-General, presided.

The Hon. Mr. Johnston, Attorney-General, read a paper on "The Resignation of Mr. H. H. Johnston, British Resident, from the office of British Resident, Zanzibar." The paper stated that the Hon. Mr. Johnston, British Resident, had resigned from the office of British Resident, Zanzibar, on the 1st day of February, 1922.

The Hon. Mr. Johnston, Attorney-General, stated that the Hon. Mr. Johnston, British Resident, had resigned from the office of British Resident, Zanzibar, on the 1st day of February, 1922.

An American Discovery. INDIANS WHO SPEAK OLD ENGLISH.

When Indiana of a tribe in Panama, arriving him in the English of the Kiblician period, invited him to "hear himself spoken" and used the "mystic" and "merry" words.

That he heard other words, "merry" and "merry" and found that, while they occurred in the fashions, the Indians among themselves also spoke a native dialect which had far more difficulty in understanding.

FOUNDED A TOWN

That was a few months ago on the coast of Panama, near Boaca 400 Yere, but inland. Mr. Hyatt, who is a collector for the museum of the American Indian, New York, and therefore should not be supposed of selling travelers' tales, learned that the Indians—

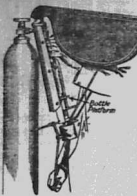

Were descendants of Bartholomew Sharp and his 350 Indians, men, who, sailing to Panama in 1600 in the Most Blessed Trinity, discovered the Spanish settlers in the region, and founded the town of Olanok, which exists to this day.

Such names as Cocon, Savikin, and Ringron, who were lineal descendants of Sharp, as well as the patriarch of the pirate chief himself, are borne by many families in the town, testifying eloquently to their origin, although they know nothing whatever about Mr. Verill says.

The issue of Bartholomew Sharp, Cocon, and Sawkins are well known in the history of the Buccaneers, whose period of greatest prosperity was between 1671 and 1686. In their earlier exploits against the Spanish empire they had the central help of the native Indians, who may readily have played up some of their phraseology—and especially their catch.

"Marry" is a corruption for "the Virgin Mary," and "olds looking" represents "to God's body." These expressions had fallen out of general use in England by the end of the 17th century, and are rather Elizabethan than Restoration speech. But the Buccaneers had little sympathy with Puritanical restraint of language, and the name of Bartholomew Sharp's vessel lacks back to the information that almost forgotten at the time in England.

SODA...STEAM Aerated Water Machine

SHADES  
A huge assortment of  
"TRICOLINE" IN  
VARIOUS COLOURS  
**HAMED BROS.**  
681 Beaman, Nairobi. P. O. Box 254  
Telegrams: "Outfitting."

Here is a toilette which indicates the accoutrements waiting. The cape is composed of chiffon and muslin for trimming, while the gown itself is of crepe de chine ornamented with marshall in a very novel way.

Here is a charming idea for a family or group of girls who wish to contribute to the general harmony of a successful well-dressed party. It is a mistletoe sash to see three or four green-up girls dressed alike, but give them frocks which go well together and you will form a really harmonious group.

Green, yellow and blue, for instance, taken in the right shade, are delightful together and such a sister or friend can choose the shades that suit her best. Of course, such a color would not do. The green has to be that soft new sea or all or nearly so very young apple green; the complementary yellow must have a tinge of green in it rather than orange; and the blue must be just the shade that mixed with the yellow, would produce the green.

A group of coquette frocks in these colors is a lovely sight, and if they are wearing boules a mistake can be taken to mean gold or silver, and here and there a touch of silver embroidery.

# OUR WOMEN'S PAGE

A Letter from Paris  
(From FANTINE CORMAN.)

### The Fluctuating Waistline.

The waistline is becoming more and more narrow; the top in front line is especially noticeable and it may be accentuated by a broad belt or by a narrow band or strip or ribbon. Probably it is the beginning of a generally light waist.

Side panels are often set into the skirt with in the upward movement. This is still possible, but to be interesting and more and more. It is normally convenient to the slowness of the hips, but should not be exaggerated into bulkiness.

The trimmed back is a noticable feature of many of the new models. It may be less pointed or draped, or definitely decorative with drapery and lines of outline or masses—rather difficult to wear by anyone who has not the necessary height and slowness.

### Antiquated Frocks

One sometimes finds in that dress is no longer a uniform and one may choose among dozens of styles something that suits the individual. On the whole the wider skirts are a blessing to those who looked and felt uncomfortable in those tight, short frocks, that were all very well for the very young and slight and boyish.

Fashions are much more fashion that there have been for at least a year. Boyish clothes may still be more for sports or more so, you please, and in the evening you may try magnificent frocks that they have been for at least a year. Boyish clothes may still be more for sports or more so, you please, and in the evening you may try magnificent frocks that they have been for at least a year.

To achieve this there are some gorgeous gold printed materials that might not be discarded by the prince in the fairy tale. The frocks for which I like these best are the simply made long sleeved Moiree age ones, with a square neck, semi-fitting bodice, rather full skirt and little bustle. Shows made of the same fabric are worn with these simply made frocks and magnificently simple gowns.

### The Vogue of the Bath.

Bathone, many more are pastiches are to be in the anecdotal, and it is therefore a matter of importance that we should decide whether they make or make our own particular appearance.

The make of today is undoubtedly the best in the world. It is light and airy, and it is so easy to wear. It is so easy to wear. It is so easy to wear.

For the slightly rounded, the "best" effect is to use a wash made in a jar rather than the gown, so that the light and airy will be to reduce the apparent width of the waist.

Only for the very young and delicate, the wash which is tied in front, while the skirt will come from the waist down the whole length, leaving the two main things separate in the skirt, rather, omitting the waist altogether.

For the delicate and slender, however, who can take advantage of the pouring style with simplicity, the gipsy wash, tied as low as possible, tied to a gorgeous bow in front, is a thing which will be recalled to the simplest of gowns.

Another note in favor of the wash is that it is quite in accord with the note of the short and decorative frocks that are likely to be worn for a long time to come.

Another note in favor of the wash is that it is quite in accord with the note of the short and decorative frocks that are likely to be worn for a long time to come.

A Great Little Lady. I love you because you're a charming way. And when you've had the good night or good day the like of your voice and your laughing smile make life seem suddenly will worth while, and work is almost joy.

Spice of life's sadnesses, you such the sun, spots of its sadnesses, you had life's fun and you can rebuke the sins of those who gratefully stand on other folk's toes. But still I'll scarce begin.

To try to say why I love you, dear, and why your friendship one always doubt, that that none of all I find I love you because you're so heavenly kind, you never before have.

Yet I'm Not most is my heart ache, when you comfort my grief and soothe my woe. It's more than when you're cruel if I'm sad, I love you because you're so heavenly kind, you never before have.

Soil one little with moments of her own youth apparent. "When I was a little girl I never did it," but she refused without the modest shield of freedom of remark. "That's your talk," and the child in her clear high smile, "don't you think things have altered an awful lot since then?"

It was evident from the plying look which accompanied the remark, that she considered the speaker really approaching her somewhat childishly.

But if she is self-assured with those who were out of sympathy, ten-year-old can be very flexible towards those who submit to her frothing. Treat her as an equal and she will treat you with a truly and the full benefit of affection.

She has no necessary grudge for "discussing the Peter Pan" which in her mind, and once she has made the discovery, for determining the years that in between.

But it does seem as two girls together, remembered one response to be complete, fully twenty years her senior, whom she had called as a "pal."

Useful little ten-year-old.
