No. 3654, REVISED BY THE GENERAL POST OFFICE AS A NEWSPAPER.

BRITISH INDUSTRIAL UPHEAVAL.

EXCITING TIMES IN THE HOUSE OF COMMONS.

Newspapers Cease Publication.

LONDON WITHOUT OMNIBUSES, TRAMS, OR TRANSPORT.

Support from the Continent and Japan.

GOVERNMENT NEWS TO BE ISSUED FROM BROADCASTING STATION.

Country and other Key Notes Yet to Be Heard From.

An industrial upheaval greater than that anticipated is indicated by the cabby diary of events from May Day to May 3. The workers' notion to look out the miners expired with May Day, but the men daily make use of the pickets.

The Executive of the Trades Union Congress on behalf of two of the affiliated Unions and some 100,000 workmen, called on support of the miners by issuing notices calling an immediate strike of the other trades.

Cables from Germany, Holland, and Japan immediately returned the British workers active support. The measures taken with that object are briefly indicated.

The conviction thus promises to affect the Continent, if not the world.

Today's cables record the diary of these eventful days.

In Britain, it is related, the newspapers have stopped publication, the telegrams, railways, transport workers, and hauliers have been specifically mentioned in the strike. The news does not contain as far things of which other key trades as the Electrical, Trades Union and Engineers.

London, May 3. "We had been destined" was the comment made by Mr. J. H. Thomas, the Labour Party member for Southampton, in a speech at the meeting of the Executive of the Trades Union Congress on behalf of two of the affiliated Unions and some 100,000 workmen, called on support of the miners by issuing notices calling an immediate strike of the other trades.

London, May 3. "We had been destined" was the comment made by Mr. J. H. Thomas, the Labour Party member for Southampton, in a speech at the meeting of the Executive of the Trades Union Congress on behalf of two of the affiliated Unions and some 100,000 workmen, called on support of the miners by issuing notices calling an immediate strike of the other trades.

NO PARCEL POST.

The Postmaster General has issued a notification that, in future, no parcel post will be accepted, while mixed packages will be accepted, but not exceeding 100 lbs. in weight.

Some parcels will be delivered within the London postal area. The public are urged to communicate the names of telegraphic, telegraphic, and parcel services.

A Board of Trade order establishes a "mail post" in London. The Postmaster General has agreed that Post Office's mail post will be made maximum prices until further notice.

Government spokesmen, at Downing Street, at noon, reported that news from the country was extremely satisfactory, that there was no serious and everything was normal. Officers were seen pouring in from all over the country. They were seen in the whole, they stated, and in many cases are above the average.

DESTINATION.

Mr. Baldwin declared he did not believe there had been thorough-going consultation with the main and his list as the dispute's power was put into the hands of small Executive in London (Ministerial) sphere. This was a serious matter, and it was not surprising that the Labour leaders did not seem to realize that they were interpreting the basis of cabinet government, and were going away to protesting civil war that was laid in for centuries. The only light beams on the country today were those which other critics or held in reserve, they saw a "mass" of democratic freedom entering in power, they saw a "mass" of democratic freedom entering in power, they saw a "mass" of democratic freedom entering in power.

The only light beams on the country today were those which other critics or held in reserve, they saw a "mass" of democratic freedom entering in power, they saw a "mass" of democratic freedom entering in power.

A THEATRE AND A PLEDGE.

Mr. Churchill said he had recognized the fact that the group who had striven to get off the shocking disaster to national life. The Government must also strive to get off the worst words were not an appeal to more than the least that the Government of the day should be a forthright word of the people.

Mr. Churchill said that government could enter partnership with a real government, as it is. The Government must also strive to get off the worst words were not an appeal to more than the least that the Government of the day should be a forthright word of the people.

appared today and now will be reported to many newspapers in the country.

First Street is usually the base of industry but the workers of that area presented a determined opposition, and the excitement of the strike was the property of the people.

The Churchills' declaration that the Government must also strive to get off the worst words were not an appeal to more than the least that the Government of the day should be a forthright word of the people.

Mr. Churchill said that government could enter partnership with a real government, as it is. The Government must also strive to get off the worst words were not an appeal to more than the least that the Government of the day should be a forthright word of the people.

GOVERNMENT RECALLED.

The Government recalled the House of Commons on Monday, May 3, at 11 o'clock, to discuss the situation in the coal mines.

The Government recalled the House of Commons on Monday, May 3, at 11 o'clock, to discuss the situation in the coal mines.

DO YOU ONLY BUY A FEW THINGS?

Does Whiteaway's only mean for you the place where you get such and such an article? Do you only buy a few things at Whiteaway's, or do you miss the large savings that may just as well be yours? Do you buy your shirts and collars and yet fail to take advantage of the saving we offer in Shirts? Or buy your Hatters and miss the advantages offered in Shirts and Furnishings?

How Many Departments are Saving Money for you?

WHITEAWAY'S NEW LIST IS JUST OUT AND IF YOU HAVE NOT RECEIVED YOUR COPY PLEASE ASK FOR IT.

Special interest surrounds the new famous W.L. Brand of Standard Values, and a full list appears in the Catalogue.

THE BRAND

Only goods that are worthy, good value are the absolute limit of good value, are selected for inclusion in the W.L. Brand of Standard Values. Our London Buyers are adding continually to this deservedly popular series, buying in bulk for our 50 Eastern Branches, and getting the best prices for the huge quantities required.

We are able this year to offer many of the Standard Values at lower prices, as the sales grow larger so the prices come down.

At all Whiteaway's Branches in Kenya you can buy "Standard Values" at the same price.

MOTORING TOPICS

CARBON DEPOSITS.

Factors Which Govern Rate of Formation.

THE TWO CAUSES.

The modern low-compression light-speed engine, so popular today because of its desirable attributes, has its weakness from the disadvantage that its performance is more rapidly reduced by the formation of carbon deposits on piston heads and combustion chamber walls than was that of its high-compression, low-compression predecessor. This is due to the fact that these deposits very considerably in appearance from ordinary soot-like accumulations, which can readily be removed by wiping with a rag, to hard carbon-like masses, which are only with difficulty chipped from the piston to which they adhere, the removal of which in all cases is appreciably time consuming.

As the motor implies, they consist chiefly of the element carbon, which is derived from one or both of two sources—(1) the lubricating oil used in the motor sport used in the engine—and (2) is proposed to form with the manner of formation and the factors which determine the rate of deposition under these headings. Before proceeding to discuss, however, certain should be made of the fact that, associated with the carbon produced, there is usually found a quantity of mineral matter, such as oxides of aluminium, sodium, etc., which is derived from the road dust suspended in the air drawn in through the carburettor intake.

Where insufficient gaps have been provided to select the best position for the intake, or where the air filtration device is insufficient, the amount of mineral matter often reaches astonishingly high proportions. Apart from the fact that it increases the bulk of the deposits, much of this road dust is of a gritty, abrasive nature, and its presence has very deleterious effects on bearing surfaces. The phenomenon of a carbon-hardened steel cylinder pin knocking wears more rapidly than the comparative, if soft small-iron pins is due to a large extent to the grinding the

pin receives from particles of road dirt which have become embedded in the bearing surfaces.

CARBON BROUGHT FROM LUBRICATING OIL.
The chief reason from which the carbonaceous matter in the deposits is derived is undoubtedly the lubricating oil used in the engine. A small quantity of which finds its way up into the cylinder head, and covering the walls of the combustion chamber and the piston crown, the lubricant is subjected to the force heat of the burning gases during the combustion period.

Considering, in the first place, lubricants consist entirely of mineral hydrocarbons of petroleum origin, which class comprises the majority of engine oils in use at bearing ends, it will be found that the rate of carbon formation varies with different oils, which, from their physical properties, appear to be of the same quality.

Previous experience would probably show that whereas the sample which give small carbon deposits was of a "straight-run" type—i.e., one which has been carefully refined—a limited range of temperature—of which the most rapid carbonization was a mixture of light and heavy fractions, blended to obtain a suitable viscosity.

CARBON BROUGHT FROM MOTOR SUITS.
It is well generally realized that the engine mixture delivered to the intake by the carburettor during normal running conditions contains, on an approximate 25 per cent by volume of petrol vapor. The large proportion of this in the mixture permits of com-

plete oxidation of the fuel, with the production of the gas carbon dioxide and water vapor, which, together with the most nitrogen especially present in the air, pass out of the cylinder on the exhaust stroke.

If a petrol-air mixture is used in which percentage of oxygen is not sufficiently high to ensure complete combustion, some of the carbon in the fuel remains unburned and is expelled in the form of soot. Being of a light, flocculent nature, soot, if it is carried out of the cylinder in suspension in the exhaust gases, but a certain amount adheres to the walls of the combustion chamber and to the piston head. The "sooting" up of sparking plugs is brought about in this manner.

Attention should also be given to the atmosphere fitted to provide a rich mixture for easy starting; the return spring may have been or may be so adjusted that expelling the air to obstruct the intake air and to restrict the supply of fuel. This can shall never be free entirely from the higher of the carburettor, approved engine design will undoubtedly render the operation one less frequently required. It is obvious that the more the temperature of the cylinder head and piston crown is the rate at which the amount of carbon produced by the charring of the oil will be increased.

Aluminium alloy pistons have done much to reduce this defect, and it is possible that in the near future cylinder heads will be made of the same metal, which has much to recommend it as a material from the point of view of heat conductivity.

A Serere Cycle Test.

RECENT PERFORMANCE OF BALOGH.

The reliability and the high speed attained by the Balogh motor bicycle has been demonstrated in a ride carried out recently in the wildest weather in March by Mr. High Gibson on a 17-h.p. Balogh through some of the wildest country in North-West Scotland.

Accompanied by a representative of The Motor Cycle Club on a covered 107 miles in six days over roads often almost impassable, Mountain, 127 miles north-west of Inverness, and back.

This mountain has a gradient of one in four, and tests were successfully carried out on this at "Red Bank, Glenmore Glen in four-hour intervals in both and Kirk-croft. From the steep side being ascended three times. Every hill was climbed successfully, and the representative of The Motor Cycle Club, although the ride was undertaken in wild weather, was unharmed. It was accompanied by Mr. High Gibson, who was a single infantry stop."

Following on the great Balogh ride, which took the coast of Great Britain, two years ago, 3,429 miles in 12 days, it again demonstrated the careful reliability of the popular Balogh machine and the performance which may be placed in these famous machines to go anywhere and do anything.

FERTILISE WITH EPHOS

The following testimonial speaks for itself: "You asked me how the experiment went with 'Ephos' - I turned out: 1. Really I hardly like to tell you, you might envy I was pulling my leg. 2. The 'Ephos' are just simply wonderful you never saw any such growth, even through this drought. I have grown potatoes all my life and in many climates, but never have I seen anything like this lot and further it is not a question of time but because I purchased the seed at the door from a Kenya hill. The principal of the above testimonial can be seen on application to: **J. G. ARONSON, P.O. Box 681, Nairobi.**

CONFIDENCE

The Owner of a 1926 FORD Car has every reason for the confidence he places in it.

The performance of FORD Cars on muddy roads and tracks is proverbial and with the new, lower-slung body, ease of control is greatly enhanced.

Redesigned storm curtains opening with all doors, ensure adequate protection against inclemency of weather.

It is, undoubtedly, the car for bad as well as good conditions.

At 10.15 a.m. on Monday, April 29, H.M.S. "Cairo" arrived at Mombasa to find...

"Then we were able to get on shore and secure enough the place...

"We left Shanghai on October 8 and arrived back at Hong Kong on October 15, and after three days were ordered to anchor in the East Indies...

"On our way down from Bombay to Colombo we had news of a strike alleged to be operating of the S.W. coast of India...

"When about 10.30 a.m. on the 21st the Cyprus port we encountered a dense fog which had to be kept in the water...

"There was a remarkable order for Christmas trees which had to be secured at short notice...

"The way to the culminating point of the expedition was laid by the British use of their motor cars...

"Originally the "Cairo" was to have gone further up to Hankow, 500 miles up stream, but being very quiet there a smaller ship was deemed sufficient for the situation...

"On September 27 the position had become so settled generally—the only ship being the "Cairo"—that "Cairo" was relieved by the "China" Squadron and proceeded down stream to Funging for a few days...

"After this came the Burmah Transit while the "Phlegon" was to Langsong in the "Cairo" loaded up with the more recent arrivals...

"Chaiting (Kangal) a rather broken looking plump little fellow, like his thousands of natives come all around to see us...

THE CRUISE OF H.M.S. "CAIRO"

(Continued from page 7.)
"Esmerald," but the latter has not yet returned to the coast owing to delays. Up to date the "Cairo" has steamed over 27,000 miles during the present campaign.

THE SHIP'S MARCO.

A word must be said about the "Cairo's" gun practice. Immediately after the "Cairo" has been in the service quite a long time, being some months in fact, and at the present commission in the "Cairo" is quite a daring and expert member of the ship's crew...

OF LATE HAS BEEN THROUGH

OF LATE HAS BEEN THROUGH THE PORT OF NAIROBI. He was just now on the "Cairo" and was in the city from 11:30 a.m. to 1:30 p.m. He was in the city from 11:30 a.m. to 1:30 p.m. He was in the city from 11:30 a.m. to 1:30 p.m.

FOR EAST AFRICA!

We left Colombo for the present cruise on April 12. Coming to the Cape, we had the Nipona engine room, which is rather uncommoal, which is rather uncommoal, which is rather uncommoal...

By falling command. Unfortunately the ship had gone some distance and we had to be brought back to the shore by the upper deck crew. All work on the upper deck crew was suspended...

BY FALLING COMMAND.

OUR WOMEN'S PAGE

A Letter from Paris (From FANNIE COMMERCE.)

Gold and silver above and great deal both with gold and silver frocks and with colored ones. There are also lovely little frocks in the shops...

A Changing Notion

A dainty ruffled and a corset all one as a basement of lace-trimmed frocks are getting more and more popular...

Here is an example of the pleated skirt and jumper top mentioned in the Parisienne's Notebook. This particular model is soft green crepe de chine.

French fashions continue to change. In fact, if possible, more important than ever before, and a great deal of jewelry is worn. Diamonds are the first favourite...

Fashions for Evening

The vision of glories for evening has been about level and rough, but the most common one is suitable. Young women, with the usual lines of the Latin race, have such delicate hands and arms...

And, and numerous little plain frocks.

The newest fashions fit quite closely to the figure, though they seem like final appearance which makes modern frocks so comfortable looking without taking away from their own grace.

Abbreviated Coques

Some of the latest fashions of the coque are rather skimpy to the boys. Others, because voluminous...

Models for All

It is interesting to see the fate of customer models once they come before the public. This is what happens. The big magazines do not follow fast in the wake of the Paris de Paris...

There are some really lovely garments, artificial and dignified. The ones at present will within the reach of those with a modest dress allowance.

One of the Katha Frocks described by our Paris correspondent.

It is in almond green, with the same color veil and is gorgeous.

New Style in Hair-dressing

The peculiarity of the shingle is understood. But if there are occasions when its wearer does not...

Three ways of combing the shingle, described in detail in the accompanying article.

It is interesting to see the fate of customer models once they come before the public. This is what happens. The big magazines do not follow fast in the wake of the Paris de Paris...

The top one is the very popular and becoming plait. From the picture it would appear to extend only from ear to ear, and that in all the styles would accommodate the hair of the hair at the neck must be hidden...

Blacklaws & Brown

LATE MACKINNON BROTHERS, NAIROBI.

Do You know This?

- 1. Factory sales of repair parts on Studebaker cars for several years have averaged only forty shillings per car per year. Why part with money for parts? Studebaker cars require minimum repairs. Money put in at the factory for better materials and careful workmanship means less money put out by the owner for repairs.
2. Spark control on Studebaker cars is automatic. The automatic control never forgets to retard the spark—it is governed by engine speed. That means plenty of pep for getaway and hill climbing and added miles of perfect service from your motor.
3. All Studebakers are built for real solid comfort. If it's a five passenger—that means five grown-ups, with ample leg room—seat room—elbow room. Roominess! Your comfort depends on it—so Studebakers have it—abundantly! Just try sitting in a Studebaker—front or rear.

GOVERNMENT STARTS ITS OWN DAILY NEWSPAPER.
Only the Big Trades Called Out.

FURTHER SUPPORT TO WORKERS OFFERED FROM THE CONTINENT.
Rioting in London Dockland.

FABRIE COMMUNIST MEMBER OF PARLIAMENT CHANGED WITH EDITION.

The latest developments in the industrial upsurge in Britain include the following:

The Government has taken the step of sending troops into the principal coal areas.

Only certain of the trades affiliated to the Trades Union Congress have been called out.

All coal-carrying vessels are held up. Railway companies are endeavouring by the help of clerks and supervisors to run a skeleton train service.

THE EAST AFRICAN STANDARD
Nairobi Times & Uganda Argus
THURSDAY, MAY 6, 1926.

Standard was established to enable Government to fulfil its duty towards its own subjects. At the present moment it is also largely used by the servants of the public not on the employ of Government but on their restriction imposed upon the private dealer which prevents him from attending his patients after they have consulted the Government Hospital. In fact, the Government Hospital could be made to show a substantial profit if it was placed in the hands of a Board of Trustees, provided that Government made a full contribution in respect of the services rendered to officials on the same basis as the charges levied against other patients. Not only would patients be able to secure the attendance of their own doctor throughout their illness, but the cost of the medication would in the hands of the public generally and those would, in fact, be a contribution towards the maintenance of Government and the ordinary citizen. Certainly there would be no protest, as a condition of the change. The Board of Trustees would be representative of the community, including the principal element, both official and unofficial, and the Government, and by the application of business methods, the management in a business would be able to show a profit which could be utilized in the reduction of hospital charges and in meeting other extensions, provision of maternity wards and special facilities for infant patients. If the system resulted in a cheaper and efficient service, it is an advance, provided the change of control would be a justifiable step, always provided that the liability of the Government to provide service to the dependent people is not removed entirely. It would be a step in the change that it is a further step in the direction of a more complete system of service, which would doubtless weigh more heavily with the community.

It is of them been shown that the alteration in the status of the Hospital would mean a cheaper and more efficient service to the public, combined with a full measure of control in administration, we believe the general public would consider the change favourably. Very few people can take with an any mind the financial loss in the pockets of the Government in the country and it is an advantage of present legislation that any change that they should be made. The Government or the Legislature cannot take action without a full knowledge of public opinion, and we shall therefore be glad to give publicity to the views of our readers on the important project which is apparently still under consideration. We would suggest further that if the Elected Members for Nairobi are to be called upon to state any view they should do so on an opportunity to place the full facts before their constituents in good time to encourage a properly informed discussion. The most serious objection to the service is the condition of the service.

Oil in Uganda.
The Kenya Government says the Africa World has been asked to approach the Uganda Government with a view to joint investigation of the available oil resources indicated in the Uganda Geological Survey Report. The report speaks of surface oil deposits of all in the Albertine districts of all in the Uganda region, but Lake Albert is the only one which is being actively exploited by the Government. It is suggested that a large oil field, possibly the venting of something oil to the coast. At present the oil is not available for a commercial service of any kind.

Accordingly the Convention of the Uganda Chamber of Commerce and Industry to request that the Government should be asked to be established by the Government, whether it is possible to find oil which would be profitable to the Government and whether it can be manufactured and refined in the country, which these which are in Kenya at present. It is suggested that the Government should be asked to be established by the Government, whether it is possible to find oil which would be profitable to the Government and whether it can be manufactured and refined in the country, which these which are in Kenya at present. It is suggested that the Government should be asked to be established by the Government, whether it is possible to find oil which would be profitable to the Government and whether it can be manufactured and refined in the country, which these which are in Kenya at present.

THE EAST AFRICAN STANDARD
Mombasa Times & Uganda Argus
THURSDAY, MAY 6 1926.

THE NAIROBI EUROPEAN HOSPITAL

During the course of last year details of a suggestion then under consideration by the directors of the Government Hospital on the subject of the proposed change was that the European Hospital be handed over to the Government, without charge, presumably to a body of trustees who, in the capacity of a Managing Committee, would administer the hospital and regulate its financial and other matters. It is, however, a matter of fact that the Government has been unable to carry out such a plan as yet, owing to the fact that the Government has been unable to find suitable persons to constitute the proposed body. It is, however, a matter of fact that the Government has been unable to find suitable persons to constitute the proposed body. It is, however, a matter of fact that the Government has been unable to find suitable persons to constitute the proposed body.

But if it can be shown that the alteration in the staff of the hospital would mean a change of charge to the public, combined with a full measure of control and administration, we believe the general public would consider the change favorably. Very few people can face with an easy mind the financial burden imposed by admission in this country and the allocation of present buildings and restrictions that any change must be made. The Government or the Legislative Council cannot take action without a full knowledge of public opinion, and we shall therefore be glad to give publicity to the views of our readers on the subject proposed, which we apparently still under consideration. We would suggest further that if the Executive Members for Nairobi are to be called upon to take any view they should discover an opportunity to place the full facts before their constituents in good time to encourage a properly informed discussion. The proposals are certainly worthy of serious consideration.

Oil in Uganda.
The Kenya Government (see news item) has been asked to approach the Uganda Government with a view to joint development of the petroleum deposits indicated in the Uganda Geological Survey Report. The report speaks of surface or subsurface oil in the area of the oilfield, but Lake Albert is not usually situated with regard to any of transport by pipeline to the oilfield. It is, however, a matter of fact that the Government has been unable to find suitable persons to constitute the proposed body.

Some Promising Finds in Tanganyika.
GOLD CLAIMS.
 There are now many indications that the East is keenly and deeply interested in the possibilities of East Africa. Considerable sums of money are being poured into the financial scene. The gold claims in Tanganyika, mining engineers and prospectors have been making reports of the continent, and some of the most promising have been developed. It is stated that the Tanganyika Development Syndicate, which was formed privately in Johannesburg with a capital of £250,000 for the purpose of exploring for gold, has recently bought a large number of gold claims in the Kooheh and Chereu claims. It is understood that the former belonged to Tanganyika. The gold claims, it is understood, were formerly bequeathed to Germany. The gold claims, it is understood, are an area of 2000 square miles. There are already several small operations in the field, and a few evidences of the gold. The value of the free-mining area and is varying from 1 sh. to 2 sh. per ton. One engineer who has been recently sent to the area with some prospectors and one with some prospectors had considerable mining experience but the results are not known. He reports that the field has several large veins of gold. He reports that the field has several large veins of gold. He reports that the field has several large veins of gold.

MINING DEVELOPMENTS IN EAST AFRICA.

Some Promising Finds in Tanganyika.
 GOLD CLAIMS

There are now many indications that the Rand is largely and definitely under development in the mountainous district of the Tanganyika. Since the discovery of diamonds in Tanganyika, mining operations and prospectors have been keen to work in the mountainous district of the continent, and some of the most interesting results have been obtained. It is stated that the Tanganyika Development Corporation has been formed, principally of Johannesburg, with a capital of £100,000. It shares in prospecting for the acquisition of existing coal concessions in Tanganyika and a great proposition in Kenya, and has recently found a large amount of gold, known as the Koohe and Cheere claims. In the mountainous districts of Tanganyika, the gold claims, it is understood, formerly belonged to Germany. The Bohemia field is said to cover an area of 2,000 square miles. There are already several small operators in the field, and it will be necessary to employ a very large number of men and a great deal of machinery to work the area. One prospector who has been there, recently, says that small areas of some prospecting and working in some parts of the reef are far too small to encourage large operations. However, the gold field has been carefully examined, and it remains to be seen whether small strikes and workings in some places will reveal better yields of 300 or 400 lbs.

EAST HAVD
 Mr. W. E. Rickah is making steady progress with the formation of the company, the Bohemia Reef Gold Mining, Ltd., which is to acquire the right granted to the Government in December last to search and prospect for gold on the area prospected and on two portions of the form Witopya No. 11, as situated in the name of the Van Dyck Reef, Mombasa. The Bohemia Reef Gold Mining Ltd., on the Victoria Falls Mines Ltd., has the honor of having been awarded the concession of the main reef service in the area, and it is expected that the gold reserves in this area will be of the order of 700 lbs. Recently, the company has been seen in a prospecting party, in some of the reefs, and it is expected that they will find a good yield.

CHRYSE DIAMOND
 Much interest has been aroused in the prospects of the Great East African Mining and Exploration Co., Ltd. by the announcement that the company has discovered diamonds in the mountains of the East African continent. About 200,000 lbs of diamonds were carried out last week of blue-grey, and the 20,000 lbs of white and the total yield was as much as 200 lbs. The amount realized was £274 10s. This amount realized was £274 10s. The amount realized was £274 10s.

The diamonds obtained over a 12-month period of four quality worth approximately 200,000 lbs. The amount realized was £274 10s. The amount realized was £274 10s. The amount realized was £274 10s.

FERTILISE WITH PHOS

The following testimonials speak for itself:
"You asked me how the experiment with 'Phos' turned out. I really liked it like to tell you, you might say I was pulling your leg."
"The 'Phos' acts just simply wonderful, you never see me such poorly, even through the drought. I have grown potatoes all my life and in many climates, but never have I seen anything like this but not further it is a question of fancy and I believe I purchased his seed at the door from a Kikuyu boy."
The original of the above testimonials are in use on application to J. G. ARONSON, P.O. Box 681, Nairobi.

A Resume of Current Topics.

THE FRICKLY PEAR CORTVOSEY.

[By "RUSTIC"]

The campaign about Mr. Hart's rabbit has mutated against the Lushes' variety, commonly known as the 'Frickly Pear' has caught the attention of a number of growers in the Colony, who have already obtained cuttings of this interesting and new variety of pear.

There seems little need of a review about the undue extension of the Lushes' as far as the Highlands are concerned for this variety has become known to all our gardeners, whether the genuine wild variety of this supporting its own weight, belonging to the cultivated variety of this variety, which is usually said to be difficult to keep their shape on a trellis.

The fact is people do not understand the extent of the damage of the seed wild and, on one very spreading on the subject has plainly been put in, in spite of plucking it on his doorstep and reduce the number of seeds in the fruit.

The fact is people do not understand the extent of the damage of the seed wild and, on one very spreading on the subject has plainly been put in, in spite of plucking it on his doorstep and reduce the number of seeds in the fruit.

Do You Know This?

- When the traffic moves on Studebaker slips quickly and quietly ahead of the crowd. No fuss—no strain; in a Studebaker the owner's wish is the car's act. See it for yourself. Better still—take a Studebaker and try it.
- Most people look for a car that will attract admiration. Studebaker looks three times its cost—and acts it. Some cars have beauty—some have quality. Studebaker has both.
- Hundreds of Studebakers have travelled well over 100,000 miles. You may not want to drive so far—but think of the service a car like this will give you over 40,000 or 50,000 miles. That is worth serious consideration.
- At the mileage point where other cars are breaking up Studebaker will be just breaking in. That is what "unit built"—in design and material—means.

THE AUSTRALIAN TOUR.

Opening Scores Against Leicestershire.

GREGORY IN FORM.

London, May 10. The Australians opened their first innings on Leicestershire today at Leicester. The weather was fine and there were 10,000 spectators.

The Australians opened the batting and all three of the first three batsmen scored 300, 95, and 95 respectively. The total score after four hours was 414, with only 10 wickets lost. The batsmen were Gregory 300, N. G. Lawton 95, and A. S. C. Hopwood 95.

The Australian captain, Gregory, scored 100 runs in the first half hour, including a six and six fours.

EFFECT OF EMERGENCY POWERS

STRIKE EVENTS IN LONDON AND THE PROVINCES.

Few Disorders and Conflicts. HOW A GOOD-HUMOURED PUBLIC GETS ITS NEWS OF DAILY HAPPENINGS.

Government Measures to Ensure the "Vital Services" of the Country.

The first days of the General Strike appear to have passed in London with good humored acceptance of the difficulties.

In the provinces the strike is practically complete, and also in the towns and cities. Commerce has been few, and those that occurred were in connection with efforts to run trams.

Both the Government and the House of Commons are taking the law into their own hands to ensure the maintenance of "vital services".

Under the Emergency Powers Act (which the House recently passed in the House of Commons) army and navy soldiers are being called upon to ensure the maintenance of "vital services".

Measures for supporting the British Union continue to be taken by the Trade Unions of the Continent.

Both the Government and the House of Commons are taking the law into their own hands to ensure the maintenance of "vital services".

Good housing arrangements are being made with stock and other resources.

London financial markets are being maintained with stock and other resources.

Joanes & Bros., Government Road.

FERTILISE WITH KEPHOS

The following horticultural opinion for food: "You asked me how the experiment with 'Kephos' turned out; 'Kephos' I hardly like to tell you, you might fancy I was putting you on." The tuberoses are just simply wonderful, you never saw such growth, even through the drought. I have grown potatoes all my life and in many climates, but never have I seen anything like this lot and further it is not a quantity of fancy seed, but I purchased the seed at the close from a Kilguy."

The receipt of this above mentioned can be seen on application to J. G. ARNOLD, P.O. Box 681, Nairobi.

Kenya Detention Camps.

THEIR OBJECT STATED IN THE COMMISSION.

The Detention Camps which have since been set up in Kenya last year is still occupying the attention of the House of Commons.

Mr. J. Bruce (Lib.) (Mr. Esau) asked the Secretary of State for the Colonies recently whether his attention has been drawn to a certain Department in Kenya, (Cable) namely the employment of Chinese as labourers in the detention camps and the Public Works Department in order that persons arrested in the work done by the Chinese, and that persons imprisoned in the detention camps should be employed at agricultural and other work.

Mr. Bruce, You No. 1. A copy of the Detention Camps (extension) Bill is being printed in the Library of the House. I am not aware of any cases detained under the Detention Camps Act, under the provisions of the Bill. I am not aware of any cases detained under the provisions of the Bill. I am not aware of any cases detained under the provisions of the Bill.

Zanzibar Notes.

Laud Marking on the Islands in Pemba.

The following items are from the News Supplement sent to the Zanzibar Official Gazette. The Zanzibar Revenue Department has decided to issue a permit to the Zanzibar Revenue Department for the purpose of allowing persons to import into the island a quantity of goods for their own use. The Zanzibar Revenue Department has decided to issue a permit to the Zanzibar Revenue Department for the purpose of allowing persons to import into the island a quantity of goods for their own use.

Touched a Wire Out of Curiosity.

TRAGEDY OF A BARN BIRD.

An injury reported by the Station Master of the Victoria and Albert Railway, who was on duty at the station house on March 25, was that a bird, a barn swallow, was found on the station platform. The bird was found on the station platform, and it was found that the bird had touched the wire. The bird was found on the station platform, and it was found that the bird had touched the wire.

Do You Know This?

- When the traffic moves on Studebaker slips quickly and quietly ahead of the crowd. No fuss—no strain in a Studebaker the owner's wish is the car's act. See it for yourself. Better still—take a Studebaker and try it.
- Most people look for a car that will attract admiration. Studebaker looks three times its cost—and acts it. Some cars have beauty—some have quality. Studebaker has both.
- Hundreds of Studebakers have travelled well over 100,000 miles. You may not want to drive a car so far—but think of the service a car like this will give you over 40,000 or 50,000 miles. That is worth serious consideration.
- At the mileage point where other cars are breaking up Studebaker will be just breaking in. That is what "unit built" in design and material means.
