The Body of This Car Is All Steel-The Latest and Sturdiest Construction Known

The body of this smart, Special Touring Car is made of steel.

Not the usual frame of wood supporting a thin steel shell, but steel throughout—frame, walls, braces, ribs and all.

Moreover, every joint and seam is welded or melted together at intense heat; producing a single, staunch steel unit.

Nothing to work loose, rattle, or crack the finish. A body that lasts for years — the most enduring type known.

Dodge Brothers invested a fortune in dies and equipment to perfect this construction for all their motor cars.

One reason why today they rank third in the world in sales.

The declaration continued:

"Prance miends paying the debts
abe contracted in defence of
liberty but we absolutely refuse
to resort to any increase of the
limit of our more circulation; and
reserve to courselves absolute inreserve to ourselves absolute in-dependence. Our object is to stabilise the franc."

The declaration roet with a most rold reception.

UNWELCOME POLICY

An amplification of the Minis-terial declaration says the Gov-enment's programme is based on the conviction that the country count to save itself with its own resurrees. France intends to pay the debts contracted for the de-

The Body of This Car Is All Steel-The Latest and Sturdiest Construction Known

The body of this smart, Special Touring Car is made of steel.

Not the usual frame of wood supporting a thin steel shell, but steel throughout—frame, walls, braces, ribs and all.

Moreover, every joint and seam is welded or melted together at intense heat; producing a single, staunch steel unit.

Nothing to work loose, rattle, or crack the finish. A body that lasts for years — the most coducing type known.

The Body of This Car Is All Steel-The Latest and Sturdiest Construction Known

The body of this smart, Special Touring Car is made of steel.

Not the usual frame of wood supporting a thin steel shell, but steel throughout—frame, walls, braces, ribs and all.

Moreover, every joint and seam is welded or melted together at intense heat; producing a single, staunch steel unit.

Nothing to work loose, rattle, or crack the finish. A body that lasts for years — the most enduring type known.

Dodge Brothers invested a fortune in dies and equipment to perfect this construction for all their motor cars.

One reason why today they rank third in the world in sales.
