BIRTHDAY GREETINGS

(In Warsaw)

Brigly, Aug. 25.

The cross-Channel air services celebrate their seventh birthday to-morrow and the British air forces have in that time flown over seven million miles. One hundred thousand passengers have been carried across the Channel together with numerous mail million sterling worth of goods. It is estimated that the services have not only by the growth in the size of the aircraft but the greater regularity of the service.

The first aircraft was a converted motor aeroplane of 200 horse-power and the traffic grew so fast that in 1923 the first fully equipped passenger aircraft was built, although only fitted with 100 horse-power engines. This was the number of passengers. The first of the heavily motorized service forward when the Imperial Airways Corporation was formed in 1924. The first of the heavily motorized service forward when the Imperial Airways Corporation was formed in 1924.

BETTER FLOUR

When better flour is made it will sell for "Kanga's Head."

Messrs Thomas Robinson & Son Ltd., of Rochdale, one of the leading Milling Engineers of the world and the largest in the British Empire, are erecting an entirely new flour mill for us at Njoro, which is now nearing completion. It will be the largest mill in the country and the last word in economy and efficiency.

CHESS PROBLEMS

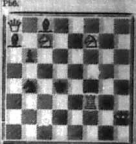

By A. E. HARRISON
Solutions and Chess problems should be sent direct to Mr. Harrison and should be marked "Chess" and enclosed in a separate envelope.

Problem No. 381
By G. H. HARRISON
2nd Prize. Philidor for White.
1911.

White gives in two moves.

Problem No. 382
By G. H. HARRISON
5th Prize. Philidor for White.
1911.

White mates in three moves.

These chess problems, if the solutions are directly recommended to our editors, are published as Mr. Harrison's work.

GAMES NO. 322

The following is the score of the game between the Irish champion, Daniel Abohn (Alexander Charles, Orange Free State), and Dr. Hinton, the present Champion. The remainder took place in the recently concluded tournament at Johannesburg and we are indebted to the *Proreter* for all the particulars of it and the excellent notes.

The game is well worth playing over, as the chess is really the highest class. In my opinion South Africa is only the first among all the colonies of the Empire in the matter of its chess. It is well that the Irish champion should do himself justice, however, in his opening tactics.

QUEEN'S PAWN OPENING.

- White to move.

OLDSMOBILE HAS

gone far beyond all existing standards to give to the public in this latest Oldsmobile the Oldsmobile price field.

Six—beauty, performance and value absolutely new in its class.

Careful refinements in body, engine and chassis lift the already sound and proved Oldsmobile to an even higher plane of quality, just as the new reduced prices strongly emphasize its value.

Greater Beauty is one impressive feature—imparted by longer, smarter bodies; by an attractive double head moulding; by handsome two-tone colour combinations in enuring Duro and by wicker wheels with big balloon tyres—combining to present an appearance smart, youthful, distinctive.

Finer Performance too, has been achieved—through the introduction of vital engineering improvements resulting in swifter economy and in a smooth, flexible power range which makes it possible to throttle down to a slow walk or quickly step up the speed to forty—fifty—or more miles per hour.

Lower Prices also are announced—and it is a striking dominant tribute to the better organization of Oldsmobile's vast resources that this company has succeeded in offering in this its latest Six, a still lower scale of prices with a strong advancement in Oldsmobile's great value.

Coal in Kenya.

For a number of years a systematic survey of the coal fields of Kenya has been in progress. The results of this survey are being published in a series of reports. The first report, dealing with the coal fields of the Kenya Colony, was published in 1924. It was found that the coal fields of the Kenya Colony are situated in the eastern part of the Colony, and are of considerable extent. The coal is of a high quality, and is suitable for use in the power stations of the Kenya Colony. The coal fields of the Kenya Colony are situated in the eastern part of the Colony, and are of considerable extent. The coal is of a high quality, and is suitable for use in the power stations of the Kenya Colony.

and the existence of coal would stimulate the establishment of other industries which depend on cheap and reliable supplies of fuel. Moreover a geographical position would give this country coal development of the same order as that of East Coast and make banking of fuel, now done at Aden or Dar-es-Salaam, a profitable and convenient undertaking. The whole of the work done so far has been carried out by private enterprise. Kenya suffers from the absence of a geological department and when one of the first requirements must be the Department of Geology in the hands of an experienced and expert who will work in connection with the Director of the Geological Survey and of the three main territories. Kenya is rich in coal. It is only in the Uganda Department has also been of great assistance. In Uganda the Department has been established in the hands of an experienced and expert who will work in connection with the Director of the Geological Survey and of the three main territories. Kenya is rich in coal. It is only in the Uganda Department has also been of great assistance. In Uganda the Department has been established in the hands of an experienced and expert who will work in connection with the Director of the Geological Survey and of the three main territories.

Twenty Years Ago

Twenty Years Ago. The Standard was first published in 1906. It has since then become one of the most popular newspapers in Kenya. It has a large circulation and is read by many people. It contains a wide range of news and information. It is a very important part of the life of the people of Kenya. It has helped to bring the people of Kenya together and to make them more aware of their own country. It has also helped to make the people of Kenya more aware of the world around them. It is a very valuable newspaper and is one of the most important parts of the life of the people of Kenya.

THE COMMERCIAL TRAVELER OF AFRICA Growing Menace of Profit CAPTAIN CALDWELL'S

THE CHINESE

The Chinese are a people of great energy and initiative. They are a people who are not content to sit still and wait for things to happen to them. They are a people who are always looking for ways to improve their lot and to make their lives more comfortable. They are a people who are always looking for ways to make their lives more interesting and more varied. They are a people who are always looking for ways to make their lives more meaningful and more purposeful. They are a people who are always looking for ways to make their lives more enjoyable and more satisfying. They are a people who are always looking for ways to make their lives more successful and more prosperous. They are a people who are always looking for ways to make their lives more happy and more content.

Studebaker. Brockway. Case,

CASE TRACTOR

Has These Advantages :

Modest Cost. Nothing to be added. All models are equipped as standard with belt pulley, fenders, governor, magnetic ignition, air-cleaner, and radiator temperature control.

Advanced Design. Apart from completeness of equipment Case-Tractors are economical by reason of their valve in head motor from which the power is transmitted with a minimum of frictional loss through spur gears running in oil.

Reerve Power over its rating prevents overtaxing the engine on recommended loads, and assures steadiness of operation at drawbar and belt.

Usefulness. Proper weight distribution, wide tyre, effective space lugs, proper location of belt pulley, width of tractor, unusual flexibility, and ample reserve power are big factors in its all round usefulness.

BETTER FLOUR

When better flour is made it will still be "Kenya's Mill."

Messrs Thomas Robinson & Son Ltd., of Nairobi, one of the leading Milling Engineers of the world and the largest in the British Empire, are erecting an entirely new flour mill for us at Njoro, which is now nearing completion. It will be the largest mill in the country and the last word in economy and efficiency.

MOTURING TOPICS

THE STANDARD CAR

Latest Model for Colonial Use.

DETAILS OF CONSTRUCTION

The latest model of Standard Car, the first of its kind, has been developed through a view to making it completely suitable for general use throughout the continent of the world. BUILT AT 1204 H.P.S. in engine class, that engine gives that is demanded by many users.

The chassis conforms to an international requirement for general road travel. Its clearance to the ground which conforms with the various models. Improved landing, that has reduced the use in districts where the condition is difficult.

ENGINE DETAILS: The engine of this motor car has four cylinders, with a bore and stroke of 72 x 110 mm., giving a cubic capacity of 1944 cc. The valves are overhead, operated by push rods which conform with the latest design of the Standard Car, with an overhead inlet valve and a side valve outlet valve.

The design of this motor car has been developed with a view to making it completely suitable for general use throughout the continent of the world. BUILT AT 1204 H.P.S. in engine class, that engine gives that is demanded by many users.

Power for Business-Like Farming

For nearly a century, the builders of this Company's line have been selected in the pursuit of happiness on the Farms deriving the machines that are lifting the millions of too hard labour off the shoulders of men and women. This spirit has been made since Cyrus Hall McCormick built the first Reaper on an acre in Virginia in 1831. Agriculture has been assisted upward by Mechanized Farm equipment that has benefited the world. We wish to announce that we expect the arrival of our second shipment of the new McCormick Deering Narrow Track Sial and Coffee Tractors. Absolutely the best word in Sial and Coffee Tractor construction. Its main features are listed with the first in regular McCormick Deering Tractors. Years of grinding work in sial and orchard estates have proved every feature. Such dependability plus the narrow track makes this new Tractor extremely desirable.

McCormick-Deering TRACTORS

10-20 £268 f.o.r. Nairobi. 15-30 £368 f.o.r. Nairobi.

Some Reasons Why Practical Men Select McCormick-Deering Tractors

- Powerful Engines.** These tractors have valve-in-head, heavy-duty engines. They are built to deliver an abundance of power over a long period of years. Working parts are thoroughly protected from dust and dirt.
- Removable Cylinders.** Each cylinder is cast in one piece, with the piston and crank which makes it possible to place a new cylinder in only a few minutes. New cylinders can be practically a new engine.
- Overhaul Kit.** The heavy-duty two-bearing crankshaft runs in large ball bearings.
- Throttle Governor.** The throttle governor regulates the fuel to the load and keeps the speed practically uniform.
- Efficient Transmission.** The efficient sliding and have four gears which insure good compression and most power from the fuel.
- Drive Drive.** The power is transmitted to the drive wheels through high-grade gears that run in oil.
- High-Tension Magneto.** The high-tension magneto supplies a hot spark for starting and running. Engineers consider this the best type of ignition for a farm tractor.
- Oil-Pump.** The oil is kept in circulation by a gear oil-pump which assures proper lubrication on gears, bearings, and on every part of the tractor.
- Front-End.** Strong durable fenders protect the tractor and operator from dust and dirt.
- Platform.** The platform adds to the comfort of the operator and provides carrying space.
- Air Oil Cleaner.** Air that reaches the cylinders must pass through the oil air cleaner which removes the dust and dirt.
- One-Piece Main Frame.** The main frame is a single casting. There are no weak joints bolted together. It is strongest and lightest.
- Gears Run in Oil.** All gears run in a bath of oil.
- High-Grade Bearings.** An unusually large number of ball and roller bearings are used which are easily lubricated, reduce friction, and save power for productive work.
- Coaling System.** The thermo-pyren system of cooling maintains uniform engine temperature.
- Accessibility.** Regular working parts are readily accessible by removing handhole covers and plates.
- Catch.** The multi-disc clutch is large and insures proper transmission of the power.
- Easy Service.** Interchangeable Harrow covers the country, and it is easy to get extra parts or assistance whenever necessary.

ASTONISHING RESULTS!!

Have been obtained with our wonderful Patent Winchester 22 long Rifle Repeating Magazine Carbine with extra long barrel.

The Patent of this Rifle lies in the grooving of the barrel and in the bolt action. It can be used as a bolt rifle or as a semi-automatic. The Magazine Carbine is 5 or 10 Cartridge. Fitted with Military sliding Tangent sight up to 200 yds. Weight about 6 1/2 lbs. Shoots and handles like any ordinary Rifle.

HUPMOBILE SIX

Get behind the wheel of this big, roomy, New Hupmobile Six. Retired the speed and thrusts it down to a mile an hour. Then shoot it up to sixty. Nois a source of vibration all this speed! This is Hupmobile's idea of smooth, flexible power.

A genuine Hupmobile, this Six—with greater performance and longer life than you will find in any car at anywhere near its low price.

PRICES	
Standard Chassis	£375
Box Body	£409
Touring Car	£435
Magneto Ignition extra	£10.

BETTER FLOUR

What better flour is made it will sell for
"Kenya's Best."

Messrs Thomas Robinson & Son Ltd., of
Rusholme, one of the leading Milling Engineers
of the world and the largest in the British
Empire, are erecting an entirely new flour mill
for us at Njoro, which is now nearing comple-
tion. It will be the largest mill in the country
and the last word in economy and efficiency.

UNGA Ltd., Njoro.

Carbon Dioxide
Another Factor
in the
Production of
Fertilizers

Chemists have estimated the
amount of carbon dioxide which is
produced in the world by
the burning of fossil fuels.

It is estimated that the
amount of carbon dioxide which
is produced in the world by
the burning of fossil fuels is
about 100 billion tons annually.

This carbon dioxide is
now being used in the
production of fertilizers.

Power for Business-like Farming

For nearly a century, the builders of this Company's lines have been selected in the pursuit of happiness on the Farms producing the machines that are lifting the millions of too hard labor off the shoulders of men and women.
Rapid strides have been made since Cyrus Hall McCormick built this first Reaper on a farm in 1831. Agriculture has been assisted upward by McCormick-Deering Farm equipment that has benefited the world.
We wish to announce that we expect the arrival shortly of our newest shipment of the new McCormick-Deering Narrow tread Steel and Coffee Tractors. Absolutely the last word in Steel and Coffee Tractor construction.
Machines featuring with those found in regular McCormick-Deering Tractors. Years of grinding work in acid and orchard sections have proved every feature. Such dependability plus the narrow tread makes this new Tractor extremely desirable.

McCormick-Deering TRACTORS

10-20 **£268** f.o.r. Nairobi.
15-30 **£368** f.o.r. Nairobi.

Some Reasons Why Practical Men Select McCormick-Deering Tractors

- Powerful Engine.** These tractors have advanced, heavy-duty engines. They are built to deliver an abundance of power over a long period of years. Working parts are thoroughly protected from dust and dirt.
- Removable Cylinders.** Each cylinder is cast separately and fitted into the engine block which makes it possible to place a worn cylinder easily and economically. New cylinders make practically a new engine.
- Overhaul.** The heavy-duty two-bearing crankshaft runs in large ball bearings.
- Throttle Governor.** The throttle governor regulates the fuel to the load and keeps the speed practically uniform.
- Pistons.** The pistons are close-fitting and have four rings which insure good compression and most power from the fuel.
- One Drive.** The power is transmitted to the drive wheels through high-grade gears that run in oil.
- High-Speed Magnets.** The high-speed magnets supplies a hot spark for starting and running. Engineers consider this the best type of lighter for a farm tractor.
- Oil Pump.** The oil is kept in circulation by a gear oil pump which assures proper lubrication on grades, hillsides, etc.
- Feeder.** Strong durable feeders protect the tractor and operator from dust and dirt.
- Platform.** The platform adds to the comfort of the operator and provides carrying space.
- Oil Air Cleaner.** Air that reaches the cylinder must pass through the oil air cleaner which removes the dust and dirt.
- One-Step Main Drive.** The main drive is a single casting. There is no main joint bolted together. It is dustproof and oil-tight.
- Clear Run in Oil.** All parts run in a bath of oil.
- High-Grade Bearings.** An unusually large number of ball and roller bearings are used which are easily lubricated, reduce wear, and save power for productive work.
- Cooling System.** The thermo-siphon system of cooling maintains uniform engine temperature.
- Accessibility.** Engine working parts are readily accessible by removing handhole covers and plates.
- Clutch.** The multi-disc clutch is large and insures proper transmission of the power.
- Oil Service.** International Harvester service covers the country, and it is easy to get extra parts or assistance whenever necessary.

Medical Treatment for Native Labourers.

The current issue of the Official Gazette contains the following: His Excellency the Governor-General in Council under the Master and Servants Ordinance 1910 which are of interest to all employers of native labour. The Rules state that an employer must provide, free of charge, in all cases of illness, or injury to any servant in his employ, whether such illness or injury are considered to be a result of the work on which the servant was employed, or not, medicines, medical and medical treatment. The term "medical treatment" shall include treatment at a Government Hospital if available. The Rules provide further that in all cases, farms or other labour centres employing more than fifty labourers, there shall be kept an adequate stock of medicine and equipment. The employer shall be liable for charges for maintenance of any servant admitted as an inpatient in a Government Hospital until the 15th of the servant's contract, or for a maximum of thirty days, whichever is the less, provided that the servant is not a casual labourer. This employer shall not be liable for the hospital fees of a doctor or a servant admitted without leave, unless the illness or injury is the reason for the admission of the servant. No employer shall be liable for the hospital fees of a servant. Free treatment will be provided in a Government Hospital for any medical labourer.

any person who fails to provide the full treatment specified in the rules or neglects to keep the necessary stock of medicines is liable to a maximum penalty of one month in prison and a fine of fifty shillings. The penalty of one month in prison is a responsibility which has been assumed by accepted by almost every European employer of labour in this country. In such cases the care and treatment of the native has been given by the farmer and his wife without question and free of any charge, especially in cases where there is long association between the landlord and the tenant through the squatter system.

It is not only in the case of the squatter system that the native labourer is treated as a human being. In the case of the European farmer, the native labourer is treated as a human being. In the case of the European farmer, the native labourer is treated as a human being. In the case of the European farmer, the native labourer is treated as a human being.

It is not only in the case of the squatter system that the native labourer is treated as a human being. In the case of the European farmer, the native labourer is treated as a human being. In the case of the European farmer, the native labourer is treated as a human being.
