SAFER RAILWAYS

Railway travel however, remains the business of every year and the Ministry of Transport returns issued a day or two ago show that only one passenger was killed in a train accident during 1923. This is in striking contrast to France where the number of rail accidents is becoming alarming. There have been very bad accidents in this country during the last few days, which have involved several deaths. The Ministry of Transport points out:

"When it is considered that over 1,200,000 passenger journeys by train are made every year on the railways of Great Britain, in view of the number of 200,000,000 passenger train miles it will be seen that a passenger's risk of death on the railways is so infinitesimal as to be negligible, one in 1,200,000,000 chance. It is impossible to contrast this comparative freedom from mishap with the conditions which obtain on the roads and in the motor cars. The number of motor cars in use in Great Britain is about 1,100,000. It has a motor to man ratio of 1 to 1,100,000. In the motor car, the driver is exposed to a risk of death which is 100 times as great as that of the railway."

POSITION OF COAL SUPPLY IN AFRICA.

Miners' Decks for Fresh Negotiations.

DECLINE OF MR. COOK.

(FROM OUR LONDON CORRESPONDENT.)

The Miners' Delegate Conference resumed work on Tuesday afternoon which was about the time that the miners' deck was being laid. After a meeting in which the delegates spent two days, at which delegates from every part of the industry were present it was decided to continue the Executive Committee in accordance to open negotiations, with a view to a settlement. The delegates voted according to the membership of the federation in the various districts represented.

Vote negotiations: £20,000 Accepted: 200,000

Mr. Cook's suggestion that negotiations might take place on the basis of the plan put forward by a section of the Church representatives was rebuffed by the conference, which refused to become further entangled, and ordered him to come back with a plain statement of the best terms he can get for the benefit of his members.

POSITION OF COAL SUPPLY IN AFRICA.

It would be very difficult to estimate the amount of coal which is available in Africa for export to other countries. It is, however, not possible to say that such a thing is possible.

DIFFICULT NEGOTIATIONS.
 The fact that the British Government has agreed to sell coal to the United States is a very important step. It is, however, not possible to say that such a thing is possible.

Gibbs Dentifrice safeguards every one of your thirty-two precious teeth.

Mouth and enamel, they prevent decay on the toothbrush can remove any grey particles for aches, redness and decay and other irritation. This they do without having placed against the tongue, thus preventing the germ of disease. It does nothing and does nothing that requires washing and rinsing of the teeth. It does even more. It polishes the teeth to pearly luster. So easily calculated is the polishing agent that it causes scrub or wear of the precious enamel. It is Gibbs Dentifrice, twice a day. Make it a household rule. Liking tooth brushy is a price-less possession that brings health, joy, and success in its train.

Gibbs Dentifrice
 safeguards every one of your thirty-two precious teeth.

Nooks and crannies, they revise where no toothbrush can reach, are snug retreats for germs, for decay, for pain, for toothache, for bad breath, for all the ills that come from the mouth. But they attack no living place against the fragrant, cleansing, restorative foam of Gibbs Dentifrice. It mingles nothing and spares nothing that remains the whiteness of the teeth. It does even more. It polishes the teeth to pearly luster.

So exactly calculated is the polishing agent that it cleans without or near the precious enamel.

So use Gibbs Dentifrice twice a day. Make it a household rule. Lifting tooth health to a priceless possession that brings health, joy, and success in the track.
