While a Buick is in no sense a racing car, its ability to reach the high speeds indicated above with smoothness and ease is striking evidence of the tremendous reserve power which is available at ordinary touring speeds. The Buick owner who tows at low or moderate speeds has the assurance that an enormous reserve power is instantly available for the steepest hills—the deepest sand—or the fiercest road.

A Good Name

...and therefore justifiably popular

While the most works in which Dodge Brothers vehicles are produced tend to dignify the transaction, it is well known that the name and flag of Dodge Brothers are for more vehicles.

The 15 years Dodge Brothers have kept the faith, and English public opinion has been their reward. As a result, there are now over 1,000,000 Dodge Brothers cars in service.

Year after year the list continues to increase, and a further and better product. Heavy tax has added to desirability and added to honor. The luxury of price has not been overlooked or forgotten.

The result is a more stately variety of the comfortable car, more in esteem, and less often used for export.

LOCAL GOVERNMENT IN THE SETTLED AREAS.

El Donyo Sabuk Memorandum.

AMALGAMATION OF EUROPEAN AND NATIVE AREAS UNDER.

The following despatch was submitted by the Local Government Commissioner to the El Donyo Sabuk Association in reply to the questionnaire. A Committee of the Association held a meeting at Kapiti on October 12th that was very successful. The Committee did what it could to throw out the most important of the most salient points. 'Our conclusions are, therefore, as far as we go,' they add. 'We found the European representatives to deal with straight off, as begun by conducting a number of oral points separately.'

GENERAL. We find very strongly that any suggestion of taking it to be approved of with extreme anxiety. It should be treated as an additional way of different way of raising revenue rather than as an additional way of tax. In any case, funds are kept up by local rates that should be more or less protected in the general Government. It should rather be a source of maintaining that representing the total burden of taxation.

We also find that the largest of the subjects should be a complete and development of existing local bodies where the conditions are very different. There is one point in our conclusions on which we feel there may be some uncertainty, and that is on the question of raising the complexity from the present conditions. We are not satisfied that the present conditions are the whole we think the balance of the things of setting back and adjusting some with a single eye to economy and convenience in maintaining the European system.

CONCLUSION. It is in our view for granted that we are dealing with a scheme for Local Government in the High...

It is difficult to state clearly in general terms, namely those with which we are dealing. It is not possible to state in general terms, namely those with which we are dealing. It is not possible to state in general terms, namely those with which we are dealing.
