Friendly criticism is a matter of course.

EMERGENCY ASSISTANCE.

To the Editor, "E. A. Standard."
 Sir—In view of Major Douglas's coming letters to me, I wish to express my sympathy for the people of Kenya, and I would like to see the Government really get to the bottom of the matter. I am sure that the Government will do so.

LABOUR.

To the Editor, "E. A. Standard."
 Sir—It is interesting to judge how far "Dobson's" picture is based on the facts. It is interesting to see in your issue of the 24th inst. a picture of a man who is supposed to be a member of the Kenya Labour Union. I am sure that the Government will do so.

Railway Development and Rates.

"There seems to be a certain opinion abroad," said the Acting General Manager of Railways in his recent report, "that the Railway should undertake at once a thorough revision of rates and standards of all-round conditions. I am, however, in complete agreement with the view that the rates of our own line, perhaps in certain commodities, especially high, but I would like to point out that in numerous instances our rates are undoubtedly low. I am no means averse to a revision of rates, but only when the time opportunes." In a further section of the same document, dealing with what he termed the "so-called policy" of the Department, the Acting General Manager pointed out that every penny that could be secured out of revenue has had to go back into the betterment of the line and until the large arrears have been overthrown "it would be imprudent policy to embark upon any reductions in rates. He added that General charges were increasing (they will be almost 500,000, in 1923 on the present line) and the budget will continue to increase as new lines are opened for traffic, although the new lines would be thoroughly being increased revenue, he contended it is very doubtful whether, in the first few years, these extra earnings will be sufficient to cover working and interest charges. In the case of the main Kinsho Railway, the estimated charges will exceed 2,000,000 per annum and that of other branches, and therefore the annual interest charges, will unfortunately be increased to a heavier volume of labour and the liability in completion caused by the liability of the Railway to transport the construction materials with their facilities, and the means to which the General Manager, in connection with rate reduction is very widespread. The general view of the commercial element in this country is that the present rates upon the cost of imported articles constitute a serious barrier on the commodity which contribute in an considerable manner to the growing cost of living which is such a bad advertisement for this country as well as a definite impeding upon expansion of trade and development. The rates up to some extent, increased by the low charges which are made for exported produce and the fact will eventually arrive when the whole rates policy of the Railway must receive close investigation. At the present time the Government, without consulting public opinion in any way, has put forth proposals for considerable extension of main railway routes to wards the Congo and Indian to be financed from the ten million loan and, at the same time, the General Manager has referred to the increased rates in London that a further loan will probably be necessary to build the large trunk railway programme for which provision has been made for any year. In connection with the whole question of the introduction of new railway programmes we recommend careful study of the analyses provided by the Acting General Manager in a lengthy document which has been made to be submitted. It is not apparent from the views that some of the present conditions. It appears that it is to be economical—what consideration by which the Railway today is in a very poor position towards African women passengers.

To the Kenya Farmer

MOTOP transportation has come to be such a necessity to the progressive farmer as it has to the successful merchant.

The Chevrolet truck is especially adaptable for farm use in Kenya. There is ample power in the Chevrolet in-head engine for every use, and to pull rising hills. It is speedy, and provides fast, heavy duty service at the lowest operating and maintenance costs.

There is a type of body available for any work you wish to do, and we shall be glad to advise you on the type best suited for your needs. Leading in high mileage on petrol and tires, and built for long life, the Chevrolet deserves your earnest consideration before you make your purchase.

Write or come in and we'll show you actual figures that prove what we say.

With open and wagons the market are necessarily slow and infrequent. Usually one trip consumes an entire day, and often longer. With a motor truck it is possible to make two or more trips the same day. thereby doubling or even tripling the farmer's profits.

For farm use a light truck is the most desirable. There are very few occasions when a heavy one is necessary, and a light truck is easier to handle, especially economical to operate, and not delayed by adverse road conditions such as we have in Kenya.

The Body of This Car is All Steel—The Latest and Sturdiest Construction Known

The body of this smart, Special Touring Car is made of steel.

Not the usual frame of wood supporting a thin steel shell, but steel throughout—walls, bracing, ribs and all.

Moreover, every joint and seam is welded or riveted together at intense heat; producing a single, staunch steel unit.

Nothing to work loose, rattle, or creak the finish. A body that lasts for years—in the most enduring type known.

Dodge Brothers invested a fortune in ideas and equipment to perfect this construction for all their motor cars.

One reason why today they rank *this* in the world in sales.

The Famous Super-Six Advantages are Exclusive to Hudson and Essex

HUDSON COACH £425

HUDSON-ESSEX

World's Largest Selling "Sixes"

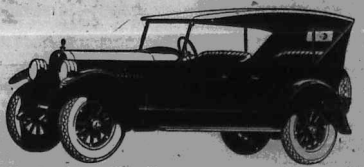

Hudson's position as the world's greatest value is not merely a new attainment. For ten years the Super-Six has stood alone in mechanical supremacy. Basic patents have kept others from copying its motor. The smoothness and long life it gives are exclusive. No motor has yet equalled the Super-Six in smoothness and long economical car life.

Because of its simplicity, the Super-Six has always enjoyed manufacturing ad-

vantages that permit a lower selling price than is possible with more complicated types. Essex, too, shares the Super-Six advantages. Yet it costs little more than low-priced "Fours". And it gives performance, comfort, fine appearance and lasting class. No wonder these cars—Hudson and Essex—continue year after year, the world's largest selling "Sixes".

The Body of This Car is All Steel—The Latest and Sturdiest Construction Known

The body of this smart, Special Touring Car is made of steel.

Not the usual frame of wood supporting a thin steel shell, but steel throughout—frame, walls, braces, ribs and all.

Moreover, every joint and seam is welded or molten together at intense heat; producing a single, staunch steel unit.

Nothing to work loose, rattle, or crack the finish. A body that lasts for years—the most enduring type known.

Dodge Brothers invested a fortune in dies and equipment to perfect this construction for all their motor cars.

One reason why today they rank third in the world is sales.

The Folly of throwing Away Even 5%

We are prepared to show you how at least 7% of your total bare-plate investment can be saved by Dorrol Lubrication.

Would you knowingly throw away—

- 5% of your oil, or
- 5% of your postage stamps, or
- 5% of your raw materials?

Our lubricating recommendations are based upon manufacturer and engineering experience gained by more than 25 years of service to industry in Africa.

This service is open to all, from great industries to small industrial plants.

Scientifically correct Geopyle grades for every type of engine and machine are obtainable everywhere in East Africa.

General Motors.

5,000,000 CARS SOLD IN NINE YEARS.

In the twelve months ended May 8, 1926, General Motors produced and sold 1,000,000 cars and trucks, amounting, all positions reported by a wide field, to more than the value of \$1,000,000,000. This is a new record value for the automobile industry in any twelve-month period.

It is further interesting to note that, on Saturday, May 8, General Motors sold the millionth car. It took over nine years to sell the first million cars, but it required only 12 months to sell the last million cars.

Table of the car division by calendar year follows:

Year	No. Cars
1917	20,820
1918	65,792
1919	69,686
1920	123,770
1921	162,885
1922	208,119
1923	295,536
1924	391,728
1925	509,952
1926	514,799

Seven thousand motor buses a day use the Street, Closed Street, Pontiac, Rapid Road and the famous Touring.

The Famous Super-Six Advantages are Exclusive to Hudson and Essex

**HUDSON COACH

HUDSON-ESSEX World's Largest Selling "Sixes"

Hudson's position as the world's greatest value is not merely a new attainment. For ten years the Super-Six has stood alone in mechanical supremacy. Basic patents have kept others from copying its motor.

The smoothness and long life it gives are exclusive. No motor has yet equalled the Super-Six in smoothness and long economical car life.

Because of its simplicity, the Super-Six has always enjoyed manufacturing ad-

vantages that permit a lower selling price than is possible with more complicated types.

Essex, too, shares the Super-Six advantages. Yet it costs little more than low-priced "four's". And it gives performance, comfort, fine appearance and lasting reliability never approached in this price class. No wonder these cars—Hudson's world's largest selling "Sixes".

OFFICIAL REPORT ON STATE OF ROADS.

Heavy Rain Renders Many Impassable.

Mr. Galton-Pearl, Hon. Secretary, U.E.A.A., writes as follows:—
Very heavy rains have fallen upon country during the last fortnight, and with the exception of the Nairobi-Nakuru road, Nairobi-Thika road and Nairobi-Mombasa road, all the other parts are generally impassable. Anybody desiring to go to the coast must go by country for the coming week, and such travellers will be advised to cancel their arrangements. They, however, should prove to hardship, as what will be done, Thika, Tournaments, Durban and the wonderful Child Welfare Fair, there wanting to be no movement enough in the country to provide anyone from Thika to the other side of the country.

The following is the present state of country roads, as far as possible advice received that night.
Nairobi-Thika Fair. Thika-Nyeri-Nanyuki—Bad. Nyeri-Meru—Impassable. Nairobi-Nakuru—Excellent. Nairobi-Mombasa—Excellent. Nakuru-Lodini and Nakuru-Eldama Bay—Bad. Lodini-Eldama Bay—Excellent. Eldama Bay—Excellent. Lodini-Kericho—Bad. Kericho—Bad. Kericho-Mombasa—Bad. Kericho-Nairobi—Bad. Kericho-Nakuru—Bad. Kericho-Thika—Bad. Kericho-Tournaments—Bad. Kericho-Durban—Bad. Kericho-Child Welfare Fair—Bad. Kericho-Tournaments—Bad. Kericho-Durban—Bad. Kericho-Child Welfare Fair—Bad.

NAIROBI-MOMBASA. Curiously there has been laid 17 by miles lately in Uganda, and some between Nairobi and Mombasa, but the rest of the country has been situated for some time. One of the Members has just come through from Mombasa to Nairobi. It is reported that Mr. Murrell, the Political Officer, is based at work in completing this section which should be ready by the 4th or 5th of August. At Eldama there are understood to be some trucks which will stop there the night they must take their beds and go.

SHARBA, MERU AND MATHARA. The Meru and Mathara sections has been improved as the working party has already cut the road and smoothed the road for the first time after the heavy rains, and they should be well on to Kajiado by the beginning of August.
FRANCIS KAJIADO. The Tanganyika border is all wet but has also been improved, and the road is quite fair condition. There are 12 miles of Meru road which is still laid as the grain has been laid for some time. It is said to Mombasa by the new road is 72 miles, and as mentioned above it should be finished by the 4th or 5th of August. The first 17 miles present no difficulty, but is still a bit rough. Mr. Murrell is hard at work completing it. At Mombasa there is a water ferry which can be crossed by driving a little in the right where the rubber landing. They will be fully marked out with white paint.

From there to Mr. Yverson's farm is about 15 miles and the road is excellent and the continue all the way to Mombasa, about 100 miles, the members who have just gone over this road, they are of the opinion that there are a few irregularities which are not on the map so please advise me if you have any information. The whole of this section is really very good.

The most 27 to Taveta are still there up at present at the Taveta there are gangs working on the road in the grass. The surface of this section is excellent and practically a grade track. The new level crossing has been put in at Voi Station and a new level crossing has been put in at Voi Station.

Deep Seated Ulcers

First application given relief.

Mr. A. E. Roberts, St. David's Hospital, writes:—
"I wish to thank you for what you have done for me. I had a deep seated ulcer on my cheek, and it was very painful. I had been treated by several doctors, but I was unable to get any relief. I was advised to try Gormolene, and I was very glad to find that it was so effective. I was cured in a few days, and I am now perfectly well. I am very grateful to you for what you have done for me. I am sure that your medicine will be of great benefit to many other people who are suffering from deep seated ulcers."
