

for the first time

an engine- vibrationless beyond belief

Buick now presents a new and finer motor car with an engine, vibrationless beyond all previous experience!

At every point in its whole power range, this engine will remind you of the smoothness and quietness of electrical operation.

No other car to-day, regardless of its price, accomplishes the same freedom from noise and rumble.

Smoothness, power range, and flexibility are amazingly revealed in the smart new Buicks—the fastest of all cars for their price and size, faster than practically any car, except a purely racing machine.

No speed you wish to travel is restricted by the capacity limit of the new Buick models.

Buick engineering has achieved the result that all motor car engineers have sought for for years.

Come in and take out one of these 1927 Buicks for your first ride in the Greatest Buick Ever Built.

Better Than Ever

Following their traditional policy of constant improvement with no yearly models, Dodge Brothers, Inc. during the past year have again vastly bettered their motor car. Never in a similar period have so many fundamental and popular improvements been made.

As a result, sales for 1926 were more than 50% above 1925.

MOTOR TOPICS

COOLING PROBLEMS.

Their Bearing on Modern Efficiency.

OBSERVATIONAL TESTS.

(Continued from yesterday.)

It is far easier now than it was to find the degree of efficiency of the engine's lubricating system, the load-dropping property of the engine, a very great asset. In this direction a well made engine will show improvement in the degree of efficiency of the cooling system of the cooled type.

Now conditions to the modern procedure of the engine for most of the interesting and exciting tests of the latest cylinder head systems of modern engines have been detailed. This condition is possible. In such cases the degree of efficiency of each depends, should not fail to mention to write in a simple and descriptive manner.

Finally, we come to the last aspect of best design for the modern engine—oil level modification. This is the most important of the engine oil level modification, a very great asset. In this direction a well made engine will show improvement in the degree of efficiency of the cooling system of the cooled type.

up the surrounding air to its own temperature.

The efficiency with which cylinder day is to be lost to the surrounding air through the agency of ordinary conducting depends upon several factors. First of all, it depends upon the rate at which the cooling surface is exposed to the external air.

It is for that reason that all types of engines have provided with projecting fins. These fins have great capacity for projecting, because it is found by experiment that the cooling time of the cylinder head is to be as long as possible to the extent of the cylinder head surface according to take place.

We now come to the main problem connected with the question of the cooling of cylinders. First, that of deriving more and more of getting a continual and rapid stream of air to impinge on all portions of the heated cylinder head under way.

In the case of vertical single cylinder, the efficiency of such a system is to be a great deal. The efficiency of such a system is to be a great deal. The efficiency of such a system is to be a great deal.

will be a matter familiar to every lover of adjustment of the fundamental law to the arrangement in the fact that the more the cylinder wall is exposed to the surrounding air, the more the cooling of the head is improved.

The cooling of cylinders of the head is improved in a better, which, without, we know the fact being added is not up upon the fact of the cylinder wall being exposed to the air of the machine.

The problem of providing motor engines with less heat is a matter of great importance. The more the engine is cooled, the more the efficiency of the engine is improved. The more the engine is cooled, the more the efficiency of the engine is improved.

Now the modification of best from the cylinder surface is a totally different procedure from the modification of best from the cylinder surface. This is the most important of the engine oil level modification, a very great asset. In this direction a well made engine will show improvement in the degree of efficiency of the cooling system of the cooled type.

Single cylinders which are in use for the most part of the front wheel have several small holes in the cylinder head which allow the cooling air to enter the cylinder head. This is the most important of the engine oil level modification, a very great asset. In this direction a well made engine will show improvement in the degree of efficiency of the cooling system of the cooled type.

RUBBER STAMPS AS PER STANDARD OFFICE.

"STANDARD" FEATURE PAGE

By Mrs. A. Freeman
[The Editor of the
MARRIAGE AND THE
MODERN WOMAN.

No. 4.

Signs of Matrimonial
Breaking Points.

THE INCREASING LOAD OF
THEY ASSUME.

By the Author, Editor of
the Children's Column,
"By Advice of Counsel,"

There are two critical periods in a woman's life, the first within a year after marriage, and the second about fifteen years later, when the children, if there are any, have reached an age when they do not have to be nursed or fed, and are able to help out in domestic or light housework, or when they are old enough to be able to help out in domestic or light housework, or when they are old enough to be able to help out in domestic or light housework.

is surrounded by love, towards its young spouse, and the sweetly devoted, self-sacrificing devotion of the woman.

PERMANENCE IN MARRIAGE.

It is now so prevalent as to destroy any idea of permanent marriage. No longer does a man, in a life of domesticity, marry a woman, take her to his home, and live with her as a man. "Marriage," says a woman, "is a thing that takes you away from your life and not for it." "Marriage," says a man, "is a thing that takes you away from your life and not for it."

Now when the matrimonial ship goes astray, it is usually because the captain and the mate do not take the trouble to lay a proper course, or make any adequate study of the sea, which, of course, is the sea of matrimony. It is not because the mate is so much more than the captain, but because the mate is so much more than the captain, but because the mate is so much more than the captain.

DISORGANIZED UNCONTROLLED.

It is right that men should realize women. Dreams and dreams alone cannot be realized, and women should be able to control their own lives. It is not because the mate is so much more than the captain, but because the mate is so much more than the captain.

It is not because the mate is so much more than the captain, but because the mate is so much more than the captain. It is not because the mate is so much more than the captain, but because the mate is so much more than the captain.

they settle, they perhaps begin to see the world that is forty or fifty years old, and they begin to see the world that is forty or fifty years old, and they begin to see the world that is forty or fifty years old.

They want too much, and so they never have enough. They see the world that is forty or fifty years old, and they begin to see the world that is forty or fifty years old, and they begin to see the world that is forty or fifty years old.

It is not because the mate is so much more than the captain, but because the mate is so much more than the captain. It is not because the mate is so much more than the captain, but because the mate is so much more than the captain.

A BELATED FLIRTY BOY.

And last Wednesday: Perhaps with your husband he has begun to see the world that is forty or fifty years old, and they begin to see the world that is forty or fifty years old.

They want too much, and so they never have enough. They see the world that is forty or fifty years old, and they begin to see the world that is forty or fifty years old, and they begin to see the world that is forty or fifty years old.

It is not because the mate is so much more than the captain, but because the mate is so much more than the captain. It is not because the mate is so much more than the captain, but because the mate is so much more than the captain.

COURTESY AND MARRIAGE.

The trouble is that men and women are not equal. They are not equal in the same way, but they are not equal in the same way.

They want too much, and so they never have enough. They see the world that is forty or fifty years old, and they begin to see the world that is forty or fifty years old, and they begin to see the world that is forty or fifty years old.

It is not because the mate is so much more than the captain, but because the mate is so much more than the captain. It is not because the mate is so much more than the captain, but because the mate is so much more than the captain.

A LANDSLIDE TO THE BUICK SIX

Buick registrations in Kenya, Uganda and Tanganyika outnumber by more than two to one those of any six cylinder car regardless price.

OFFICIAL Motor Car registrations for Kenya, Uganda, and Tanganyika, which have just been computed show the remarkable sales record of Buick cars.

From the day the agency was established a little over two years ago Buick began to make history. Its astounding road performance under the most severe conditions created a demand that called for ever increasing supplies.

In an incredibly short space of time, Buick registrations in Kenya, Uganda, and Tanganyika have mounted until today they are MORE THAN DOUBLE those of ANY other six cylinder car, not

only in its own price class, but regardless of price.

The registration figures give proof—proof that leaves no room for doubt as to the overwhelming preference for Buick Cars. They indicate that there is literally a landslide of buying opinion toward Buick's unexcelled standards of engineering quality and value.

Yet, the most impressive phase of this outstanding success lies not in its magnitude—but in the ever growing satisfaction freely voiced by the hundreds of Buick owners in their cars, and the unbounded enthusiasm of those who have driven and purchased the new 1927 model—The Greatest Buick Ever Built.

MOTOR TOPICS

FLEXIBLE GLASS. Fire Engines.
A SURE INFLAMMABLE FUEL DISCOVERY.

Details of the New Discovery.
ENGLISH RIGHTS

Further details regarding an indispensable and highly elastic glass are given in *The Engineer*.

The material is known as Poliplex and is such a nature that it can be drawn like lead through it without harm, while a ball of it dropped on to a hard surface, remains without damage. It is most important the new product is similar to "Jutek" which is used extensively for electrical insulation purposes, and the discoverer of the process of production is Dr. First Poliplex of Jena.

The glass made by Dr. Poliplex is a combination product of formaldehyde and urea formed under special conditions. At this stage the solution is soluble in water, and finally a jelly is produced which on careful drying becomes a transparent glass-like material.

An equally product, Poliplex withstands the ordinary climatic conditions of Europe, and it was found that in extreme temperatures, such as are encountered in America, repeated exposure to dry cold and heat, tested by means of a trucking. A slight variation in the process of production entirely overcame this difficulty, but rendered the glass opaque, or ultraviolet rays, just as ordinary glass, but the slight product had the same elastic property of being transparent to the eye.

It is stated that the rights of the process have been acquired by Anglo-English syndicate, and that they make the application of Poliplex to automobile wheels, and to the production of a new kind of automobile glass, which will have the advantage of all in the ordinary sense.

It is proved, however, in the present literature, that it is possible to guarantee that the material is not soluble in water, and that it is an excellent fire plate, while the manufacturer claims that it will stand up to the demands of the automobile, as it has been found that

At first thought a motor engine which is non-inflammable would be of little importance in the motor-transportation engine. One has, however, to bear in mind that a motor which can only be ignited at a great temperature really meets this requirement when used in the Diesel type of engine, for it could not be ignited except when highly compressed.

However, it is claimed that a French discovery has been made of a motor spirit which is practically non-inflammable, with a view to increasing the speed of the greatest form of motor from aviation.

The discovery is attributed to M. Paul Demaree, chief engineer of the technical department of the French Government. The petroleum derivative, which he calls "A-20," is distinguished between 130 and 140 degree centigrade. It is a highly volatile liquid, practically employed in automobile engines, and is said to be 60 and 140 degrees. The lesser volatility of the white spirit reduces its inflammable character at low temperatures.

It is claimed that repeated firing tests have been made with flames being nearly as high as 2700° F., and that the inventor's construction has never broken out. At present the tests were not so satisfactory as to increase the safety of motor.

We are making further inquiries into this matter, says *The Motor*, and, if possible, shall carry out tests, as described a motor spirit which would not catch fire in the event of a collision or in the event of an accident, they will undoubtedly increase the safety of motor.

Poliplex will stand the stress put upon post-holes and headlights in the ordinary class will not be so good as the present one.

One of the most promising lines of work of the material, however, is the possible use for finishing coats of the walls and in the liquid form it has already been used with success for paper.

At first thought a motor engine which is non-inflammable would be of little importance in the motor-transportation engine. One has, however, to bear in mind that a motor which can only be ignited at a great temperature really meets this requirement when used in the Diesel type of engine, for it could not be ignited except when highly compressed.

 WEDNESDAY, MAR. 8, 1922

The Acting Governor's Speech.

The Address delivered by His Excellency the Acting Governor, Mr. E. H. Dodson, to the members of the new Legislative Council yesterday was noteworthy for its clarity of its message, for its full yet quiet tone and for the vigour of the generally impressive outlines of the Colony at the beginning of a new year and the beginning of another period of legislative activity. The Address will be studied this morning by all sections of the community as a document of no mean importance. We are glad that steps have been taken so promptly to regularise the positions created by the existing legislation, which, in some respects, is a little out of date. It is a pity that the Address should have been so long, but it is a pity that the Address should have been so long, but it is a pity that the Address should have been so long.

understanding among all sections of the community. It is a pity that the Address should have been so long, but it is a pity that the Address should have been so long, but it is a pity that the Address should have been so long.

being brought into operation in the future. It is a pity that the Address should have been so long, but it is a pity that the Address should have been so long, but it is a pity that the Address should have been so long.

Auction Sale of Londiani Farm

Daily instructed by the Trustees we shall offer FOR SALE BY PUBLIC AUCTION at our Salerooms, Mutos Building, Handings Street, Nairobi.

On **14th March 9th**, at 3.30 p.m.

SUNNYBROOK FARM, consisting of 614 acres and only four miles from Nairobi. This VALUABLE PROPERTY is served by a good road from Nairobi and is suitable for WHEAT, OATS, TEA, or DAIRY FARMING. An area of 70 acres, of which two wheat crops have been reaped in ready for ploughing. A small patch of experimental tea is doing well. 400 acres as Bush Forest land and other areas likely to give small scope, for development. An area of 100 acres is wooded with acacia trees. A Dairy Production experiment scope is offered on the grazing and good, and there is Permanent Water.

There is a WELL BUILT STONE RESIDENCE of 14' walls, and consisting of four large rooms, each with fireplace, Dressing Room, Bathroom, with porcelain bath and hot and cold water laid on. There is also a Kitchen, large Front Verandah, Lavatory, and a well attached by a covered way to a Bedroom. There is also a Kitchen. The House is surrounded by Gardens, Lawns and is well fenced in. Rabbits, Fowl Houses and Runs are provided, whilst a good Gattie Drive is available.

This excellent property is being offered at an upset price which could not be bettered, and being situated in one of the best districts of Kenya, should appeal to anyone in search of a Home-land for investment, or the vigorous development of a mixed farm. For further particulars, and permit to view, apply to: MUTER and OSWALD, Auctioneers, NAIROBI.

A LANDSLIDE TO THE BUICK SIX

Buick registrations in Kenya, Uganda and Tanganyika outnumber by more than two to one those of any six cylinder car regardless of price.

OFFICIAL Motor Car registrations for Kenya, Uganda, and Tanganyika, which have just been computed shew the remarkable sales record of Buick cars.

From the day the agency was established a little over two years ago Buick began to make history. Its astounding road performance under the most severe conditions created a demand that called for ever increasing supplies.

In an incredibly short space of time, Buick registrations in Kenya, Uganda, and Tanganyika have mounted until to-day they are MORE THAN DOUBLE those of ANY other six cylinder car, not

only in its own price class, but regardless of price.

The registration figures give proof—proof that leaves no room for doubt as to the overwhelming preference for Buick Cars. They indicate that there is literally a landslide of buying opinion toward Buick's unexcelled standards of engineering quality and value.

Yet, the most impressive phase of this outstanding success lies not in its magnitude—but in the ever growing satisfaction freely voiced by the hundreds of Buick owners in their cars, and the unbounded enthusiasm of those who have driven and purchased the new 1927 model—The Greatest Buick Ever Built.

BUICK

MOTURING TOPICS

THE USE OF THE BRAKE.

Seldom Tested by Modern Drivers.

WORK ON HILLS.

Probably there has been a great deal of which the subject of brakes on motor vehicles has been more widely discussed.

In the early days of motoring any one who mentioned brakes to all capable of driving a car would have been thought of as being

SPENDING-BLAKE. BATHS. The next point to be noted is that a difference in the engine power is usually to be noted

TO LET. GODD operations and air effluents to be let on upper floor in our building on Government Road, near

fast as an ordinary dry surface road is to be a white road with

STOPPING DISTANCE. Each motorist who is concerned on the way in which the stopping distance of his motor car is

SPENDING-BLAKE. BATHS. The next point to be noted is that a difference in the engine power is usually to be noted

TO LET. GODD operations and air effluents to be let on upper floor in our building on Government Road, near

fully of that kind than is to be had. Then there are our plans for the use of every possible source of power should be used for the

DISPENSING HILLS. Again, drivers of all classes of motor vehicles probably should not their brakes differently

TO BE LET. GODD operations and air effluents to be let on upper floor in our building on Government Road, near

SUIT & ATTACHE CASES & TRUNKS MAY & CO.,

THE EAST
AFRICAN STANDARD
 Mombasa Times & Uganda Argus
 THURSDAY, MAR. 19 1927

East African Aviation.
 Sir Nelson Brindley, the Director of Civil Aviation, is to be the first to visit the East African continent, having travelled to Kenya by the late K.M.S. Railway route and made the first flight of the journey in a machine which is the property of a Kenyan pilot. The visit of so distinguished a man and so high an official to the development of aviation which is the Empire will have a stimulating effect upon public opinion in the course of which will be the first and foremost in the East African territories. There is, however, a very real danger in the fact that the visit of the first Lord-Lieutenant of the Empire will be the closer bond and the stronger link between the East African continent and the Empire. We are sure that the experience which Sir Nelson has gained of the Empire will be of great value to him in his capacity of the first Lord-Lieutenant of the Empire. We are sure that the experience which Sir Nelson has gained of the Empire will be of great value to him in his capacity of the first Lord-Lieutenant of the Empire.

The Sports House
NAIROBI.

The annual general meeting of the Kenya Angling Association was held on Tuesday afternoon at the offices of Messrs. Johnson, Bond Street, in which the President, Mr. H. B. Herby, presided over a very busy gathering of members.

The minutes of the previous meeting were read and confirmed. The President reported upon the previous year and stated that the financial position of the Association was very satisfactory during the year and that a good deal of work had been carried out. The new constitution of the Association was read and approved.

LOST FISH.
There was one unfortunate fisherman who was out fishing in the lake on Tuesday afternoon. He had been out for some time and had been very successful. He had caught a number of fish and was very pleased with his catch. However, when he returned to the shore, he found that his fish had all disappeared. He was very angry and was looking for the fisherman who had stolen his fish.

THE FIVES.
Both the streets of Malindi had been crowded with people on Tuesday afternoon. The people were very excited and were looking for the winner of the fives match. The match was very close and was very interesting. The winner was very happy and was celebrating with his friends.

FROM OUR OWN CORRESPONDENT.]
A. J. Buchanan, the former member of the last Australian team who was selected to accept the offer of the Kenya Cricket Club to play in the Kenyan League cricket. It is stated that he will receive a salary of £100 per annum. When he was here last season, Buchanan acted as captain in September to play for Kenya, but days later his agreement was cancelled by mutual consent. Buchanan has written to Ken New Zealand with New Zealand's best cricketer.

GETTING READY FOR THE FOOTBALL SEASON.
