BUICK** -- || 928--

HERE is road performance, speed, acceleration and economy, surpassing any other creation, past or present.

Here is comfort on the roughest of roads, resulting from Hydraulic shock absorbers and new spring suspension, that is positively amazing.

The motor world knows no achievement comparable to BUICK for 1928.

Motorists everywhere are trying and buying the new World Morris

THE new Morris "World" models were introduced just twelve months ago. During that short time they have fully proved how well they filled a long felt need. For this is a car typically British in workmanship, in performance, and in cononny. And in its design are embodied those features essential for universal motoring. The "World" radiator combines handsome lines with ample cooling power; the re-designed chassis spells strength with comfort; the Dunlops "buttressed" lyres add to that comfort and ensure big mileage.

In the "World" Morris you buy a car that will do 30 miles per gallon of petrol 3 1,000 miles per gallon of 0i; that will gird you ten years honest service, and this year still better bodies, still more models, still greater value. Is it any wonder that motorius everywhere are triving and buying the "World" Morris?

Turn the key! and your Buick

No lock could be safer! One turn of the key locks both ignition and steering wheel. But merely turning off the ignition does not lock the wheel. You may shut off the engine and coast, if you like, and still have your car under perfect control.

And no lock could be more convenient! It is illuminated and located within easy reach, where the steering column meets the dash.

The Buick double-lock is an exclusive Buick feature —one of many important refinements which characterize Buick for 1928.
