individual firms to spend large sums of on advertisements, in order to maintain their position in a particular trade, also render it imperative that every effort should be made at the present day to maintain and improve the reputation of British manufacturers as a whole. Experience has shown that even in the case of firms having an established reputation and worldwide connections attempts to discontinue advertising have usually been followed by a diminution of the sales effected, and it is not unreasonable to assume that the neglect by Great Britain of one of the most important forms of national advertisement would be equally detrimental to her interests as a manufacturing country.
