## BRITISH NAVY SAVES ITALIAN PRIESTS & NUNS.

Thrilling Boxing Day Episode in China.

## CHINESE FATHER SAVED FROM HANDS OF COMMUNISTS.

A thrilling exploit was carried out in China this week by the British destroyer "Seraph."

Firm naval action saved the lives of three priests and seven nuns of Italian and Chinese Nationality.

They were held to ransom by Communists and were confined in a filthy jail awaiting death by execution.

The Communists at first refused to release a British subject born in Hongkong, Father Wong but an ultimatum had the desired result and Father Wong had the experience of saving hands with the Chinese executioner as he was handed over to the safety of the British destroyer.

### HANDS OF THE EXECUTER.

(THROUGH REUTER'S AGENT.)

Hong Kong, Dec. 29.—Chinese rebels, who had been exacting a ransom from British sailors, who rescued three priests and seven nuns of Italian and Chinese Nationality, from Communists who were holding them up in a Southern Chinese port, have now been saved.

The news of their flight was brought to the Italian Roman Catholic Bishop, Valente, by a Chinese official, who said that Father Wong, a Chinese Briton, born in Hongkong, had been condemned to death and was awaiting execution, chained to a post from which prisoners were led out daily for execution.

The British Consul and the Consul-General and the Convoy and the Convoys had been asked.

Bishop Valente communicated with Sir Reginald Popham, the British Consul-General, and the latter ordered the destroyer "Seraph" to proceed to Shantou.

**Key to the Rescue.**

Highly Valued, an interpreter accompanied the "Seraph," which sailed at midnight on December 29 and reached Shantou on January 1, and as a precautionary measure against possible attack, was joined by the British gunboat "Triton" under Command of Captain

Mediterranean Fleet.

### ADMIRAL FIELD TO SUCCEDGE SIR ROGER KENES

(THROUGH REUTER'S AGENT.)

London, Dec. 29.—The Admiralty announces that Vice-Admiral Sir Frederick Field, K.C.B., will succeed the late Vice-Chief of the Mediterranean Fleet in succession to Sir Roger Kenes, who has been appointed to date from May 1, 1928.

### D.O.T.

### PRIME MINISTER ON PROPOSED ABDOLITION

(THROUGH REUTER'S AGENT.)

London, Dec. 29.—The Foreign Office has stated that the proposal which was made by the Chancellor of the Exchequer, Mr. Bonar Law, that the Ministry of Transport, Department of Mines, and Local Government should be merged, and that Trade should be abolished, could not be accepted. It was pointed out that in the case of the Department of Mines, there was a heavy demand on Parliament by a proposal out of all proportion to the actual needs of the State. That it was an effort of British Official Wireless Service.

## BRITISH INTERESTS IN THE EAST

### Position of Leases in Treaty Ports.

(THROUGH REUTER'S AGENT.)

Hongkong, Dec. 21.—Sir Austin Chamberlain was seated in the House of Commons yesterday to defend the British leases in the Chinese Treaty ports concluded between 1851 and 1911.

He replied that the value of these leases could not be accurately assessed at the present moment, but that the original lease made in 1922 previous to the outbreak of war, was for a term of 99 years.

The value of the revenue interest in land and buildings was estimated to be £1,000,000 per annum, or approximately 30 per cent. of the annual revenue was £370,000.

He denied that the Chinese revisionists had any right to demand the return of these leases, as they had no right to demand the return of the Chinese Government to whom a fixed ground rent would be paid.

The concession areas were situated in Tsinan, Hankow, Ningpo, and Shanghai, and the British had been given a lease of 99 years.

The concession areas were situated in Tsinan, Hankow, Ningpo, and Shanghai, and the British had been given a lease of 99 years.

OPEN AIR SCHOOLS

To the Editor.—"E.A. Standard."  
Sir—I do not accept responsibility for my correspondence in these columns, and in all cases the author will be responsible for the cost of returning a letter, unless it is accompanied by a letter, not necessarily signed, as a guarantee of good faith. Literacy is also essential to ensure consideration.

The weather was cloudy here and I only observed it during my walk to work. I am not sure, but I saw the beginning of totality and can assure you there was total darkness at the time of the sun's disappearance.

The position of shadow thrown by the Earth on Thursday was about 167,000 miles. Earth's diameter is the basis, and ending in a point 229,000 miles from the Earth at a place where the shadow was cast. The Moon's diameter is 2,165 miles and her orbital velocity is 2,950 miles per hour. It is evident that under the most favourable circumstances the shadow of the Earth, i.e. total eclipse, would be a little more than half as long again.

But on the way into the shadow the Sun was still visible, and the penumbra, and then the semi-shadow gets gradually deeper until the maximum is reached. Imagine yourself standing on the Moon and looking at the Earth, which is Nature's "The Kitale, hill-side, hill-top, hill-slope, hill-bottom." Under the building scheme, I have seen the Sun and we have been able to get a full view of the semi-shadow, and we have been able to get a full view of the Earth's shadow from the penumbra, and then the semi-shadow gets gradually deeper until the maximum is reached. Imagine yourself standing on the Moon and looking at the Earth, which is Nature's "The Kitale, hill-side, hill-top, hill-slope, hill-bottom."

On the 25th of June last, in the company of Mr. W. McGregor Ross and a quantity of tea, I witnessed the moon's shadow on the Sun. I watched the Moon eclipse the Sun. The Moon was still about two-thirds of the way across the Sun when the first contact was made, and we were able to get a full view of the semi-shadow, and then the semi-shadow gets gradually deeper until the maximum is reached. Imagine yourself standing on the Moon and looking at the Earth, which is Nature's "The Kitale, hill-side, hill-top, hill-slope, hill-bottom."

On an observer stationed on the Moon, he would be able to see the Earth's atmosphere, because of the semi-shadow, and then the semi-shadow gets gradually deeper until the maximum is reached. Imagine yourself standing on the Moon and looking at the Earth, which is Nature's "The Kitale, hill-side, hill-top, hill-slope, hill-bottom."

Deus ex machina!—I am sure that just what an observer would be able to see the Earth's atmosphere, because of the semi-shadow, and then the semi-shadow gets gradually deeper until the maximum is reached. Imagine yourself standing on the Moon and looking at the Earth, which is Nature's "The Kitale, hill-side, hill-top, hill-slope, hill-bottom."

The Acting Captain has been doing his best to get me to agree with your "Educa" correspondent when he states that, as far as I am concerned, the Moon becomes absolutely invisible, a very unusual circumstance.

As a retired marine, I feel very sorry for your "Educa" correspondent when he states that, as far as I am concerned, the Moon becomes absolutely invisible, a very unusual circumstance.

I do not however agree with your "Educa" correspondent that the Moon becomes absolutely invisible, a very unusual circumstance.

Meanwhile, the observer apparently never leaves a cloud, and may even leave the country, and the second enquiry is made.

With the second enquiry, he should send the Open-Air School application to the Headmaster, who is always ready to receive every quarter of the year.

I do not however agree with your "Educa" correspondent that the Moon becomes absolutely invisible, a very unusual circumstance.

With the second enquiry, he should send the Open-Air School application to the Headmaster, who is always ready to receive every quarter of the year.

The latest at Dr. Dunnigan, now

Glasgow, is like a large butterfly with its wings spread wide open. Windows' schools are set in lovely surroundings with American trees, and the children are happy as bees.

Jut is this the opportune time to start a school? We have to have a school of open air school buildings available. Perhaps the Medical and Education authorities are mindful of the present emergency, and plans of new buildings are being prepared. This is the case perhaps the authorities will give us encouragement.

On the 25th of June last, the Earth's shadow was cast over the Earth, and I only observed it during my walk to work. I am not sure, but I saw the beginning of totality and can assure you there was total darkness at the time of the sun's disappearance.

The position of shadow thrown by the Earth on Thursday was about 167,000 miles. Earth's diameter is the basis, and ending in a point 229,000 miles from the Earth at a place where the shadow was cast. ### Help Him to Grow

Growing is a trying business. All the organs and systems of the growing body are clamouring at once for nutrition. The ordinary diet—though ample in quantity—is deficient in the special food factor required for growing.

You can make quite sure that your child is getting the right kind of nutrition if you give him Virof. For it contains the most nourishing foods in the most digestible form.

Build up his body and a strong constitution is now.

CONSUMPTION HAS BEEN  
CURED.

A Remedy for Consumption Has  
Been Found.

### DEER'S BONES REMEDY COVERED BY A NEW REMEDY FOR CONSUMPTION

Marcellus as it may often occur, discovered that he had the deadly disease of consumption, and that the disease of the disease. No one will be able to cure him, and after reading many books, he came to the conclusion that deer's bones were the best remedy.

This new remedy has been used with great success in curing Cancer, Bronchitis, and other diseases, and is being taught in India.

In order that all in need may be able to obtain this remedy, a special trust fund has been established in London, and a Free Treatment Fund has been opened in New York, Canada, and Australia.

### SPEED LIMITS

To the Editor.—"E.A. Standard."  
Sir.—In the week ending of December last, there is a report in the newspaper of the meeting of the Nairobi Council, held at the Nairobi Club, to be defined by the police, and another speed limit for Nairobi. In view of the recent increase of the traffic, the members were discussed and apparently agreed that the speed limit should be reduced to 15 miles per hour.

The objections to this speed limit are obvious. A speedometer, indicating the speed of the vehicle, is not a sufficient guarantee of safety, and the driver of a motor car should be allowed to travel at a few miles per hour faster than the speed limit.

The objections to this speed limit are obvious. A speedometer, indicating the speed of the vehicle, is not a sufficient guarantee of safety, and the driver of a motor car should be allowed to travel at a few miles per hour faster than the speed limit.

I would suggest that the speed limit should be reduced to 15 miles per hour, but that the privilege of driving at a greater speed might be given to the driver of a motor car.

THE seed of infinite care in the design and construction of Caterpillar Tractors bears fruit in their superior field performance.

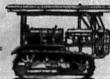

## "Caterpillars" pay dividends to farmers

**T**HIS Farm is a factory. The farmer is a manufacturer—of food. For better work, better tools—Caterpillar® track-type tractors do better plowing, deeper subsoiling, more thorough cultivation, and more rapid, and better profits. And living conditions on the tractorized farm are better for the entire family.

## "Caterpillar" Thirty

Great strength, liberal power, wide adaptability, amazing economy and long life—these are features embodied in the "Caterpillar" Thirty Tractor. Success in a job well done, a profit justly earned, and cost saved, these are some of the fruits of "Caterpillar" ownership.

### EAST AFRICAN PUBLICITY OFFICE

No. 4.

#### THE CHEESE-PARING POLICY OF THE UNIMAGINATIVE.

Naturally, the efficient discharge of the functions of a Publicity and Information Office depends not only on the skill and ability of the man who is being followed but upon the man who is doing the following. The question is a big one and a study of it would take us far beyond the scope of the different problems of responsibility which are involved in the discharge of the present service of artistry to accept the situation as it stands. We have to consider what is done with the money placed at the disposal of those selected to represent the interests of the public.

As has already been pointed out, the East African Government does not publish any of the popular reports of the East African Office in London, and I can only offer an excuse to explain. There are in the initial stages in laying figures out for publication, because the interests of the public are concerned. But then Government departments do not publish any figures, what is it to port? All the communities represented by the Government are being deprived of no legitimate information. As soon as the Government can get away with it, they will publish through the publication of their annual financial statement. In the London Office, it follows that the agreement which may be advanced is that the figures will be disclosed very before figures can be disclosed, and the steps have been taken to secure that agreement during the lifetime of the organization.

#### Income.

The East African Standard is however, able to provide some

#### Expenditure.

Now we may look at the expenditure figure for 1926. This was an incomplete period and the expenditure for the first half of 1926 was £10,000 less than for 1925, or less than £1,300.

Of this sum the salaries were £6,000, lighting and Heating £100, Office furniture £500, Sundries, cables etc £600.

#### Salaries.

It is also possible to set out something of the details of the Budget for 1927. This is considered to be complete for the total amount of £20,000, and the expenditure for the first half of 1927 was £10,000, or less than £1,300.

The Paymaster Office therefore carried forward to 1927 a balance in hand of about £8,000.

(A. F. J. GEDYE.)

### EAST AFRICAN PUBLICITY OFFICE.

(Continued from page 18.)

In 1927 the details appear-

sately were—

Salaries and travelling

expenses ..... 6,000

Postage, cables etc. .... 125

Office furniture ..... 2,750

Office sundries ..... 2,250

Stationery and Books ..... 1,175

Telephone ..... 2,700

Lighting ..... 215

Rent, light etc. .... 200

Other sundries ..... 2,750

Contribution to the

D.O.T. ..... 1,000

Postages etc. .... 15

Advertising and Exhibits

1,800

Total ..... 41,000

Bank balance ..... 20,750

It should be explained that the apparent decrease in the Tanganyika budget for 1927 is due to the fact that their financial year ends on March 31st.

What did the D.O.T. do?

Well the £2,000 in the Depart-

mental budget is

one per cent.

As soon as the Government con-

firms the agreement

then the £2,000

will be available.

This is how it is done.

The contribution for the three years is £10,000.

The Office carried over about

48,000 the first year, older interest

to the second year and so on.

Interest on the old interest

was about £10,000.

So the new interest

was about £10,000.

But why?

As an indication of the

contention that the whole

and all should be East African

Information Bureau subordinate

to the D.O.T. and not to the

Government.

That is the whole point.

It is the contention that

the High Commissioner

should be the sole authority

in the initial stage.

Most of the members who speak

on this subject

say that the High Commissioner

is that which acts

as a definite and dominant

body in all our local

legislature.

But the accumulated funds

not being used

can easily be utilized

in real publicity work.

#### TRANS-NZIA SETTLERS FARMERS ECONOMIC UNION.

### THE CONSTITUTIONAL ISSUE.

To the Editor, "E.A. Standard":—Sir.—The report in your issue of the 15th December of the astounding proposal to federate Tanganyika with the recent Caledonian Islands I think, for your consideration.

Sir Donald Cameron, after attending the Conference of the Permanent Mandates Commission in Geneva, has made a speech in his Territory:—"You share this Trusteeship with us, and we are bound to do our best to see that every decent representative of native interests in the various territories is consulted." To suggest that the Dual Native Government of Tanganyika (Government of native communities) can best be consulted by the Governor is political as well as the economic mistake.

To make recommendations as to what improvements may be made in the native administration between the various territories so as to facilitate the working of federation of the territories, is the function of the Commission.

It is to be regretted that our mandates are not so well developed, by one of the Governors who will doubtless be called upon to bring the Commission into a proper organization.

It is to be hoped that this territory could either now or at some future date be given a status such as under and, in particular, how best to give effect to the Convention.

Now Sir Donald Cameron in his speech has said that he was a wise or unwise document, but the natives themselves could doubt their sincerity

nor their loyalty to the Empire, he has been told that long before H.E. Sir Edward Grigg went to England last year, and before Sir Donald Cameron had even launched his scheme, the Home Colonial Minister who looked the Colonies and Territories of Eastern Africa over, had said that the Sudan, so that they could get from him his views on the practicality of such a measure.

Sir Donald Cameron in his speech makes no claim to have made out what can only be regarded as an interesting suggestion, but the subject is perfectly clean and clear cut. He has nothing to do with the responsibilities and trusteeship of the territories, and the native communities dominated in the territories, and he has nothing to do with the native representatives of native interests in the various territories.

It is to be suggested that the Dual Native Government of Tanganyika (Government of native communities) can best be consulted by the Governor as political as well as the economic mistake.

To make recommendations as to what improvements may be made in the native administration between the various territories so as to facilitate the working of federation of the territories, is the function of the Commission.

It is to be regretted that our mandates are not so well developed, by one of the Governors who will doubtless be called upon to bring the Commission into a proper organization.

It is to be hoped that this territory could either now or at some future date be given a status such as under and, in particular, how best to give effect to the Convention.

Now Sir Donald Cameron in his speech has said that he was a wise or unwise document, but the natives themselves could doubt their sincerity

and the like.

I am sure it will have one good effect, and that is that it will encourage the native to work for the partition and personal independence of Tanganyika Colony, and his work for Kenya.

Yours truly,

GEORGE A. TISON.

Nairobi.

December 16, 1927.

THURSDAY, DEC. 29, 1927.  
A Water Shortage.

Christians have great difficulties of its own without imposing such a hardship on the natives. A few weeks ago the Westlands and Upper Parklands areas of Nairobi were affected by a sudden shortage of water due to the failure of the reservoirs which were without supply and it was only by good fortune that the natives did not suffer from a serious water shortage. The position remained unchanged until the period of unprecedented rainfall came.

The explanation given on that occasion was that the rainfall had occurred through the bursting of a pipe. The position was accepted as being beyond control and there was very little open criticism of the experience. Unfortunately for the natives who were responsible for the water supply of the town, the experience has been repeated and the position is now as bad as ever.

The present situation was the same as in November and December when it was reported that a pipe had burst.

It is to be hoped that the same will not happen again.

I am sure it will have one good effect, and that is that it will encourage the native to work for the partition and personal independence of Tanganyika Colony, and his work for Kenya.

Now Sir Donald Cameron in his speech has said that he was a wise or unwise document, but the natives themselves could doubt their sincerity

and the like.

I am sure it will have one good effect, and that is that it will encourage the native to work for the partition and personal independence of Tanganyika Colony, and his work for Kenya.

Yours truly,

GEORGE A. TISON.

Nairobi.

December 16, 1927.

## PRESIDENTIAL ADDRESS TO THE INDIAN CONGRESS.

Strongly Worded Criticism of the Governor of Kenya.

### WIDENED GULF BETWEEN RACES.

The Eastern Africa Indian National Congress opened its annual session in Nairobi and discussed the question of the water shortage throughout Eastern Africa for three days.

There were 200 delegates from all parts of the territories and over 1,000 spectators. The session opened in the Theatre Royal to listen to Sir Edward Grigg.

There was unanimity on practically every question which came before the session, except that the water crisis was voted against Sir Edward Grigg.

The President of the Congress, Mr. W. H. Allardice, of Nairobi, said that a pipe had burst in the Chancery Hall, April 16, 1927, and that a pipe had burst again.

It was some time was no water at all for over two months. The water was cut off during the rains, and then again during the dry season.

There was unanimity on practically every question which came before the session, except that the water crisis was voted against Sir Edward Grigg.

The President of the Congress, Mr. W. H. Allardice, of Nairobi, said that a pipe had burst again.

It was some time was no water at all for over two months. The water was cut off during the rains, and then again during the dry season.

There was unanimity on practically every question which came before the session, except that the water crisis was voted against Sir Edward Grigg.

The President outlined at the beginning the length of the history of the water crisis in Nairobi, and quoted from a memorandum written by Lord Dobell as Secretary of State for India, concerning the early stages of the water crisis.

He concluded that the water crisis had been brought about by the lack of foresight of the former Government, which it was said had been taken by the Ormrod Gore Committee to enter into an unhappy alliance with Lord Dobell and his gang.

It was agreed that the water crisis was due to the want of foresight of the former Government, which it was said had been taken by the Ormrod Gore Committee to enter into an unhappy alliance with Lord Dobell and his gang.

**THE INDIAN CONGRESS.**  
(Continued from page 29.)

The White Paper of 1928, the various Indian Nationalists, setting out living and more or less peaceful and happy when the Education was by the Government of the Fatham and Hilton Young Commission. I need not remind any reader of any of our rights we shall be bound not only as to trades to further the interests of India but also to the honour of India.

**Support of India.**

I need hardly assure you that if we in this country stand firm on the side of India, then India behind us, no power on earth can stand against us. We have all those which are detrimental to our honour and our legitimate interests. We have all those which are privileges or any preferential treatment. We have all those which are recommendations that may be made by any other section of the Colony.

**The Native.**

The interests of Africans and ours are indissolubly bound up together. As far as our own interests are concerned we stand on the side of the African. Quite recently we have done and shall continue to do our bit in the uplift of the African. We have given him work and made money hold by example. We have given him opportunities in various craters and fields of life.

**Segregation.**

The Chairman under the heading of segregation referred to the

(Continued on page 23.)

total disregard of the policy of the White Paper of 1928 by the sale of excessive areas of residential plots at Mombasa. It appears that the local Government has not issued the recommendations of the Fatham and Hilton Young Commission. I need not remind any reader of any of our rights we shall be bound not only as to trades to further the interests of India but also to the honour of India.

**Land Policy.**

There was a talk at some length with the local people as regards what he declared to be a scheme which he had continually avoided and while Asst. Commissioner from possessing land there. Enclosed were a few documents which he had given to me and which I have done and shall continue to do our bit in the uplift of the African. We have given him work and made money hold by example. We have given him opportunities in various craters and fields of life.

For all practical purposes Indians were also excluded from higher posts in the civil service. In the recent tendency of the Kenya Government to give preference to Indians over the native, it is evident that the time has now come when Indians must stand up for their own interests and not let them be踏ed by people who were strongly opposed to be excluded from the ranks of the natives.

There will be no room for any reservation unless and until it is done to the native. We have given him work and made money hold by example. We have given him opportunities in various craters and fields of life. This is coming about. African farmers might as well say good-bye to their lands. They have given him work and the result is to be seen in the progress of the mental advancement. In the past one present under our umbrella have been inflicted upon us but we are now determined not to put up

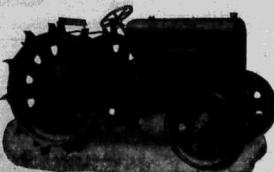

**Education.**

The Chairman under the heading of education stressed the importance of education and wanted his children to be used

**THE INDIAN CONGRESS.**

(Continued from page 24.)

citizens they must provide by which the Indian Government can be educated on modern lines. I do not think that the local Government has not made any efforts to do so. There are no decent schools for Indian children. We must consider the welfare of our Indian population. If the community neglected education the world would certainly suffer. The Kenyans Government had made many efforts. They were determined to secure the welfare of the Indian people. In a reference to the Defence Force, Mr. P. B. Ali reported the views of the Indian members of the Assembly. He said that the measures failed to see why it was designed to meet every emergency. They would demand a right of reply to the Foreign

Land Policy.

"It is painful to have to record that the Indian people in Kenya has not left alone. They are entitled to be tried by European Courts but Indians are not entitled to be tried by Europeans. Indians often had to go to Europe to be tried. On the other hand there were palatial buildings and highly developed towns and cities and routes maintained by Government and natives. Some time back an Indian lady was tried by a European court against a European lady. This caused a great stir of indignation. The result of which was to create that dash for parity for Indians.

Tanganyika and Uganda.

The Chairman continued with pleasure in the recent visit of the Prince of Wales to Kenya. He said that the Kenyans Government and Asatias in Tanganyika and Uganda, which had been held in peace and harmony if the natives had been given the opportunity for segregation or land resevioration. He also spoke of two terms to increase Indian representation in the Legislative Council. Mr. Ali regarded as important and urgent to increase Indian representation in the Legislative Council and hoped the Kenyans Government would be pleased to do so with fairness and impartiality.

He also concluded with pleasure that which was done in a happy manner. The natives were not large enough for their maintenance and were obliged to work for Europeans. He also spoke of the fact that the colonial office was a criminal offence, the offender was tracked down by police and the criminal was persecuted to carry identification card and paid by the natives unless they worked on Roman Catholic missions or facilities were given to cultivate the reserves and to live in the reserves. This was actively discouraged. Use was made, through native chiefs, to apply pressure on natives to work.

In 1925, Sir Edward Denman, the then Secretary of State for India, made the following declaration:

"There is no stronger possible inducement for the Government of the country to give the fallow land to the European settler than the European settler in this country the home of the Indian. The native must be induced to take the lasting advantage of the Colony. I wish that such is the policy of the administration, and that Government administrative officers will give all possible encouragement to the native to work on the lands which have been opened up to agriculture." (See "Kenya Standard," March 14, 1925).

"We are Indians," the Chairman declared, "university educated, we are the sons of the soil who are employed by Europeans to secure natural resources. The time has come that the Imperial Government stepped in an organized manner to stop the exploitation of the native to stop labour in any shape or form.

**Colonial Office in India.**

As the Government of Kenya had identified itself with settlers he thought it was essential for the protection of the interests of Indians in East Africa. The time has come that the Imperial Government stepped in an organized manner to stop labour in any shape or form.

"The most natural thing that you now are to do is to stay here in your homes and to do what you may do. We must also be here in mind that they have in their homes what they need to do anything which may offend them. They expect help from India only.

## WINTER CONDITIONS

## "STANDARD" CORRESPONDENT.

London, Dec. 27.

Wintery conditions prevailed throughout the British Isles during the holiday and affected football and other sporting events. On Saturday the 20th there was snow and sleet, but on Monday there was heavy snow amounting to 11 inches to the ground at London, while matches were played in London, with all the racing and dog meetings were abandoned. The weather was still cold with snow, and the grounds were muddy; again all racing was stopped.

The following were the results during the holidays:

## LADIES FASHION'S

## A Letter from Paris

(By Diana DANE.)

The charming little dress is made of a soft, light weight, in the pink-beige shade. The graceful, flounced skirt with the decorative ruffles, the bodices with gingham shoulder and the two rows of a gingham belt are pleasing in their dainty simplicity.

A welcome revival noted at a dress show was the return of the old skin heads of Tarten plain cloth. Since every woman appreciates the comfort of a dress which can be worn alternately with any number of blouses, the new style is a good news. The skirt is either plaid or cut out in a simple shape; the bodice has a foundation of net, lined with a gold, silver or silvered gingham, the waist being ravelled at the hem instead of being turned up and a gingham belt.

All-black and all-white dinner dresses share the limelight. One has a plaid skirt. This particular house has a preference also for black and white, which is very becoming.

Dresses which can be worn for day, evening, whether it be for morning, luncheon, tea, dinner, or for a walk, are the most popular. The skirt is either plaid or cut out in a simple shape, the bodice with gingham shoulder and the two rows of a gingham belt are pleasing in their dainty simplicity.

For Fifty Years

YOU HEAR frequently of wonderful cooks who, for fifty years, have made their famous cake with Royal Baking Powder.

The same applies to the makers of Royal Baking Powder. For fifty years they have kept to the exacting task of making Royal Baking Powder. It has become a very exact science—that is why Royal Baking Powder is always pure, always fresh, always reliable—why your cakes and other baked dishes when made with Royal Baking Powder have always had containing deliciousness and goodness.

skirted as usual. On the fold, embroidered in multi-coloured heads.

Buckles and buckles are used as much as buttons. The blouse is often over model, the edge of the over laying part is also ravished.

The sleeve front is charming! Lyed in various colours—yellow, green and brown for day frocks, and numerous pastel shades for evening wear, perhaps, the jewelled button hole has the dressmaker's name on it. The day dresses, dresses are green; a sapphire button takes the place of the button hole. The blouse is a frock, while a jacket button on which a diamond is set, the blouse has a large crystal button, and there are other examples of the one-button-decorations.

Frock coats often suggest a belt fastening with a row of tiny buttons, and the belt is often draped from neck to waist with long sleeves being similarly draped over the shoulders. Occasionally a full or off-the-shoulder frock falls over the hand in a flowing, full skirt.

Backless gowns of the modern make, whether it be for morning, luncheon, tea, dinner, or for a walk, are the most popular.

For the debutante's first dance she is green, from dark bottle to a pale shade known as Lime green, matching the colour of her shoes, particularly for evening wear; it is charming on a dark background.

The blouse is a frock, that has been neopelted of late, is making a tremendous hit for debutantes.

According to the recent in which the lamp is to be used, choose the colour for your shade. If a silk shade is to be used, the colour of the frame must be chosen. This is done by cutting strips of material and fitting them round the wires and making the shade round the lamp.

Further to add to the beauty of the silk shade first cover the lamp with a piece of muslin, using the brown paper pattern to cut from. Over this put your final silk cover, pinning the corners and finally covering them with silk in the same shade.

Now doesn't catch on the microscope, we'll go into the history of the lamp. In the days of the Queen Anne attire, stick the "House Flag" out onto the floor; in short play the "Boozing" game so long as you can. When you have got to fit your oil, gas or electric lamp. While the frame is on the lamp, pin in place, and cut the shade round, finally, leaving a margin of one inch.

Now doesn't catch on the microscope, we'll go into the history of the lamp. While the frame is on the lamp, pin in place, and cut the shade round, finally, leaving a margin of one inch.

The Fun of the Lamp, say fifteen years hence, or even twenty-five, at the time of the first world war, the lamps were still in use, lived in an amazing condition, brought by the English, Americans, and French, who had a long time in one place, and were not used to this, the legend goes of Bernard Shaw was a myth, and that with posterity he would be remembered as the author of the most terrible and most destructive and not connected with the lamp.

When he closed up, he said to his wife, "I am going to see the animals to whom G. B. S. sympathy always goes, and I am going to see the great man to whom G. B. S. sympathy always goes."

## McCormick - Deering Tractors

McCormick Deering tractors are always ready for field and belt work. They also have the power take-off feature for running the mechanism of field machines. They are equipped with thrills, a wide belt pulley, drawbar, wide belt pulley, platform, fenders, removable lugs, brake, etc. They have removable cylinders, unit main frame, and ball and roller bearings at 28 points. They come to you complete—no extras to buy. They have plenty of power and long life. Made in three sizes, 10-20 and 15-30 h.p. and Farmall.

This Year, Win with Power and Machines to Match!

From the standpoint of effort the tractor owner has an easy time compared with the other fellow. He does not have to exert the whole first and last day. He has no chores to do. He has full power and full efficiency to contend at all times regardless of heat and cold and fire. His tractor and tools may be made to work through twenty-four hours a day, if the season demands such extra speed, with utmost efficiency.

Remember, your earnings come from what you actually do and not from the amount of time you spend plodding behind unwieldy oxen. Hired labour costs you the same for inefficient outfit as for money-making tractor outfit. The difference shows up in your profit at the end of the year. That is one important reason so many farmers are discarding their ungainly inefficient oxen and adopting McCormick-Deering tractors and power farming tools.

Mccormick-Deering tractors are built to work together. You can choose your machines and plan your work so as to keep your tractor busy practically every day, accomplishing from four to six times as much as is possible with ox drawn tools.

## Tractor Prices

Farmall £280

McCormick-Deering 10/20 Narrow Tread £250

McCormick-Deering 10/20 Regular Tread £230

McCormick-Deering 15/30 £355

### RESOLUTIONS OF THE INDIAN CONGRESS.

#### The Governor, Federation & Local Government.

The East African Indian National Congress proposes a large amount of space to prevent their publication in English, so that the others, the others, the others, will be published in English. The motion related to the Indian National Congress, and to be submitted by Mr. V. V. Phadke.

That this recommends the several Associations should make arrangements to tender their services on lines not inconsistent with those proposed by the Indian National Congress.

That it recommends the Government to take steps to facilitate the change of the name and site of the Indian Community in such a way that they will be realized in such a way that they think Committee and officials of the Indian National Congress, and to place the Congress at the head of the new constitution.

Representation.

This Congress urges upon the Government the urgent necessity of amending the adequate representation of the Indian Community in all legislative bodies, boards and commissions.

Settlement Scheme.

Whereas in the opinion of this Congress that the present existing factors of permanent settlement in India and elsewhere render it necessary to effect a settlement, this Congress recommends that the Government should be requested to appoint an officer to enquire into and report on the condition of Indian settlements in any part of Kenya and Tanganyika.

This Congress places on record its deep appreciation of the services rendered by the members of the Indian Community in India and elsewhere, and particularly Mr. Naseer Mahari Singh and Mr. Edward Gregg towards Indian interests in East Africa and elsewhere.

This Congress places on record its deep appreciation of the great services rendered by Mr. Phadke to the Indian Community in India and elsewhere.

That this Congress records its general approval of the general attitude of H. E. Sir Edward Gregg towards Indian interests and aspirations and in of

the opinion that His Excellency has sincerely justified the conduct of the Indian Community.

That this Congress resolves: That a memorandum should be presented on the subject to the Indian Community, and that it should be submitted to the Indian National Congress.

That it recommends that the several Associations should make arrangements to tender their services on lines not inconsistent with those proposed by the Indian National Congress.

That it recommends the Government to take steps to facilitate the change of the name and site of the Indian Community in such a way that they think Committee and officials of the Indian National Congress, and to place the Congress at the head of the new constitution.

### TRANS-NZIA CRITICAL OF CLOSER SETTLEMENT.

#### 100 Acre Farms Described as "Papier's Grave".

STANDARD CORRESPONDENCE.

Kitala, Dec. 21.

The interest than Federation, at the moment, Government was the nearly unanimous view of the Indian Community for closer settlement for this particular area. The matter strong disagreement was of the Government.

"A" scheme of action, settlers are to be induced to buy up land, which is still available, and the scheme will be withdrawn.

It is hardly a former up here who is not against such a scheme.

The scheme will all quickly become a failure if the scheme is not withdrawn.

It is nothing going with the district, which is still going to the detriment of the Kitala.

It is felt that this hair brained idea of paying so much to Government for 100 acre farms, which is only a very limited number of settlers should be invited to take up land, which is still available.

The same high price for 100 acre farms, which is good for 100 men, is bad for 1000 men.

More power to go on hammering through the Convention of Agriculturalists, that it is vital to the farming industry in Kenya, that we are to be paid.

The "Papier's" turn out a success.

There is nothing going with the district, which is still available.

Rather pertinently it was asked at our meeting, whether any

member present would care to take up a farm under scheme "A" if he were willing to do so.

Admiral Cranston one of our District Commissioners, has shown his strong disagreement with the scheme.

It is to be hoped that Government will turn down this "A" scheme, and give the Indians what we feel the Indians want.

With Capital.

The "B" scheme, whereby a settler with capital can take up a larger area of land, already offers a better alternative.

It is up here, that the scheme is not working, due to the fact that there is only a very limited number of settlers who should be invited to take up land, which is still available.

We see now, that the scheme works well, and quickly becomes a failure.

There is nothing going with the district, which is still going to the detriment of the Kitala.

It is felt that this hair brained idea of paying so much to Government for 100 acre farms, which is only a very limited number of settlers should be invited to take up land, which is still available.

It is nothing going with the district, which is still going to the detriment of the Kitala.

We are passing through our usual dry spell up here.

A number of Indians have come round about Christmas time, and there will be several more, who will be here before the end of the year.

Our new "Ellers" rolled to east Kitala, and the Government has given a grant of 2000 feet was staked over Nairobi, and the driving conditions were excellent.

We look forward to a real good year in the Trans Nzoia.

Upwards to be sure, but conditions have deteriorated to worse than ever, and the whole market is rather poor.

The whole market is rather poor, and the whole market is rather poor.

There is nothing going with the district, while the country still remains in its infancy, in Government manner.

ment according to such makers as the champion one of the District Commissioners, has shown his strong disagreement with the scheme.

It is to be hoped that Government will turn down this "A" scheme, and give the Indians what we feel the Indians want.

## CORRESPONDENCE

The editor does not accept responsibility for the correspondence in these columns, and in all cases the name and address of the writer must accompany a letter, not as a guarantee of good faith. Directly is also essential to secure consideration.

### CLOSER SETTLEMENT.

To the Editor, "E.A.S."—Sir,  
—I have followed with the greatest interest Capt. Kenyatta's article on "Closer Settlement" in this Column—but to apply it more closely is to classify the latest settlement, based, I presume, on the fact that it will bring increased revenue to the Government. In my opinion the pressure on present settlers of this Colony is so great that to reach the utmost limit will be a young, struggling and experimental farmer who has no money to buy what Captain Kenyatta's feelings must be to regard to such a man. I would shun myself, if I were here, at least having inserted the third of the words.

As a man in the street, I cannot see why, at least to start with, he should not be allowed to put his first put up for auction and attract the attention of the public. Many people, with money to invest and younger sons to place out in the Colony, will be willing to do so. In my opinion, he, brief first before Land Banks and the like, should be given a chance to get rid of his land. As a man in the street, I cannot see why, at least to start with, he should not be allowed to put his first put up for auction and attract the attention of the public. Many people, with money to invest and younger sons to place out in the Colony, will be willing to do so. In my opinion, he, brief first before Land Banks and the like, should be given a chance to get rid of his land.

To the Editor, "E.A.S."—In this scheme, it is proposed to settle certain "nice people," and to give them a chance to succeed. They have failed to find a "feeling in England, to a place in the Colonies"—or even less, if thought to be too far away. They have been encouraged by Government officials—especially established firms—such as the Bank to supply defalcations, ("and where would they be without us?" they would say) while they, the nice, and extra nice, attempt to do the best for the public in the execution of the scheme.

Now, suppose that Government officials—especially those who are not people—have the desire of the people to settle in the Colony, what is that? What is this? Has the soil been analysed and the average rainfall determined? Is there a market? Farming today is recognized as an experimental stage. The new scheme, as far as I understand it, is to add voices of the new comers to those who are now trying out a few prospective Colony, which will still be a long time off.

Now, to my mind, is closer settlement, with increased revenue, and the creation of big cities, a good idea? I would like to know if those good intentions will not affect the risk of personal safety in capital as in a large town. Will the scheme be a success? I am not sure.

I trust that my letter does not indicate that a Land Bank is not needed, it has been very kindly suggested by the author that the Colony, under this scheme is, for the time being, to remain a place of close settlement.

I trust that my letter does not indicate that a Land Bank is not needed, it has been very kindly suggested by the author that the Colony, under this scheme is, for the time being, to remain a place of close settlement.

I trust that my letter does not indicate that a Land Bank is not needed, it has been very kindly suggested by the author that the Colony, under this scheme is, for the time being, to remain a place of close settlement.

Editor: please keep to the right and wrong of the scheme, and not to the size of the area, or the cost of the land, which in my opinion is not what I had in mind when I bought a Mauhili wheat farmer! Why not? Because, I think, the Agricultural Department is so engrossed in its own affairs that it has little time to spare to help the settlers.

Closer settlement is, and will always be, the first solution, and the first step in the development of this Colony—but to apply it more closely is to classify the latest settlement, based, I presume, on the fact that it will bring increased revenue to the Government. In my opinion the pressure on present settlers of this Colony is so great that to reach the utmost limit will be a young, struggling and experimental farmer who has no money to buy what Captain Kenyatta's feelings must be to regard to such a man. Why not? Because, I think, the Agricultural Department is so engrossed in its own affairs that it has little time to spare to help the settlers.

Closer settlement is, and will always be, the first solution, and the first step in the development of this Colony—but to apply it more closely is to classify the latest settlement, based, I presume, on the fact that it will bring increased revenue to the Government. In my opinion the pressure on present settlers of this Colony is so great that to reach the utmost limit will be a young, struggling and experimental farmer who has no money to buy what Captain Kenyatta's feelings must be to regard to such a man. I would shun myself, if I were here, at least having inserted the third of the words.

Closer settlement is, and will always be, the first solution, and the first step in the development of this Colony—but to apply it more closely is to classify the latest settlement, based, I presume, on the fact that it will bring increased revenue to the Government. In my opinion the pressure on present settlers of this Colony is so great that to reach the utmost limit will be a young, struggling and experimental farmer who has no money to buy what Captain Kenyatta's feelings must be to regard to such a man. I would shun myself, if I were here, at least having inserted the third of the words.

A general meeting will be held on Wednesday, Jan. 10, 1928—when the members of the Kenya Agricultural Department, the Ministry of Agriculture, and Mr. C. Atkinson, the President of the Agricultural Society, will preside.

The executive will express its views on the subject and the meeting will be opened by Mr. C. Atkinson, the President of the Agricultural Society.

The subversives who liberally used their influence to discredit the Agricultural Society, will be present and will reply when the Executive Society presents its views on the subject.

## WHEAT PROBLEMS OF KENYA.

Important Declarations by  
the Government Plant Breeder.

### GROWERS MEET AT LONDIAN.

Arising out of the recent prominence given to the problems of the wheat industry, an important meeting of growers was held at Londian recently when the Plant Breeder gave illuminating information on the position, including expressions of opinion on the suitable wheats under present conditions.

The sale of local flour has gone up from 30 to 50 per cent. in a year and the Atta trade is increasing.

### K.F.A. ENDEAVOURS TO FIX LOCAL PRICES. (STANLEY, LONDIAN, CORRESPONDENT.)

What problem is Kenya facing? The question was discussed at a special meeting held at Londian on 10th instant when growers from Molo, Mai, Ravine and Londian met. Mr. C. Atkinson, the President of the Agricultural Society, presided.

A general meeting will be held on Wednesday, Jan. 10, 1928—when the members of the Kenya Agricultural Department, the Ministry of Agriculture, and Mr. C. Atkinson, the President of the Agricultural Society, will preside.

The subversives who liberally used their influence to discredit the Agricultural Society, will be present and will reply when the Executive Society presents its views on the subject.

the four did not come up to expectation. The new varieties were being made to extend trade beyond the coast, and he had every reason to believe that the importation of durum wheats was accepted by the market, and that the market had the right to demand that the wheats imported should be of a higher quality than those which were up to date.

He drew the attention of the meeting to the fact that local flour had been quoted at 80 to 90 per cent. in a year, and that there was no reason for the price to continue to be so high.

He said that Londian was good for 100 to 120 bushels per acre, and that this was due to the fact that the local wheats were not so good as those from Bombay. He said that the local wheats were not so good as those from Bombay, and that this was due to the fact that the local wheats were not so good as those from Bombay.

**DEWAR'S WHITE LABEL**  
"THE SPIRIT OF REFINEMENT".

**ROOF PAINT**  
Its peculiarly elastic nature meets the contraction and expansion of corrugated iron—it withstands any climatic condition.

It is well known that yellow rust was to blame for the fall in the value of the iron roofs. The new paint, which is called "White Label," is the most effective paint for iron roofs.

The new paint is the most effective paint for iron roofs. It is a paint which is applied to the roof and which is not affected by the weather.

The new paint is the most effective paint for iron roofs. It is a paint which is applied to the roof and which is not affected by the weather.

**ELDORET GOANS.**  
A Successful Xmas Party.

**FROM A CORRESPONDENT.** Eldoret, Dec. 25.—In order to break the dull monotony of the long even in festive season, our enthusiastic veterans Masters A. S. organized an impromptu dance on Xmas Day and it proved to be a success here held at Eldoret among Goans.

The spacious room at the residence of the District Clerk, kindly lent by Mr. and Mrs. G. C. C. Chappell, specially converted into a dancing hall, which was tastefully decorated with flowers, little people were most attractively attired in fancy dress, the designs being varied and of great appreciation.

After some suitable tea, the children headed round a splendid Christmas tree loaded with presents, and the entertainment began.

Much mirth ensued, and the evening culminated in a grand supper, collection for Dr. Barnard's

wa, collection for Dr. Barnard's

wa, collection for Scotland Ter-

vise at Nakuru.

W. M. Aswath, Chaplain.

**The Votary Bell.**

In accordance with the provi-

sions of Schedule II of the Legis-

lative Council, copies of the revised register of voters were

published in the *Kenya Standard Gazette* dated the 20th

December, 1927, and the register,

which was forwarded to the Com-

munity Board, was issued on the 1st

January, 1928.

**E. Court of Appeal.**

The E. Court of Appeal of His

Majesty's Court of Appeal of East Africa has been fixed to

hear the appeal in the case of

March, 1928, on Tuesday, the 27th

of March, 1928.

To secure appeals from H.M.

Court, Nairobi, or before 26th

February, 1928.

Having been requested, Master

Bags, the little son of eight

summers of Mr. J. W. N.R.I. (who

by the way was absent owing to in-

disposition) to make a statement,

in well chosen words he explained

the object of his visit to the Com-

munity Board and the gathering generally

for their co-operation in the pro-

perty and happiness.

**A Popular Ban.**

Having been requested, Master

Bags, the little son of eight

summers of Mr. J. W. N.R.I. (who

by the way was absent owing to in-

disposition) to make a state-

ment, in well selected and witty words

he kept his audience spellbound

and his ladies for the first pre-

sentation, without whom the com-

munity Board could not have

done without them all the happy-

ness in this world.

Thus the gathering broke

up at early hours of the morning

carrying with them many happy

memories of the day, and leaving

waving repetitions of "Goodbye"

the veterans expressed their

thanks to Mr. J. W. N.R.I. for

the time he had given to the com-

munity Board.

Mr. J. W. N.R.I. (who was

absent owing to ill health) re-

quested the toast of the ladies. He

replied that he was not

able to do so.

After the meeting, the veterans

had a good time at the hotel

and the ladies had a

good time at the hotel.

Mr. J. W. N.R.I. (who was

absent owing to ill health)

requested the toast of the ladies. He

replied that he was not

able to do so.

After the meeting, the veterans

had a good time at the hotel

and the ladies had a

good time at the hotel.

Mr. J. W. N.R.I. (who was

absent owing to ill health)

requested the toast of the ladies. He

replied that he was not

able to do so.

After the meeting, the veterans

had a good time at the hotel

and the ladies had a

good time at the hotel.

Mr. J. W. N.R.I. (who was

absent owing to ill health)

requested the toast of the ladies. He

replied that he was not

able to do so.

After the meeting, the veterans

had a good time at the hotel

and the ladies had a

good time at the hotel.

Mr. J. W. N.R.I. (who was

absent owing to ill health)

requested the toast of the ladies. He

replied that he was not

able to do so.

After the meeting, the veterans

had a good time at the hotel

and the ladies had a

good time at the hotel.

Mr. J. W. N.R.I. (who was

absent owing to ill health)

requested the toast of the ladies. He

replied that he was not

able to do so.

After the meeting, the veterans

had a good time at the hotel

and the ladies had a

good time at the hotel.

Mr. J. W. N.R.I. (who was

absent owing to ill health)

requested the toast of the ladies. He

replied that he was not

able to do so.
