# MOTURING TOPICS

THE FORD.

### A Visit to the Factories at Detroit.

#### A COMPLETE CHAIN

The new Ford is of true Dodge size in the high quality of its vital parts.

All forgings, gears, axle shafts and springs are of superior materials and other costly alloys used, giving great strength and long wear, with low maintenance expense.

Steering is amazingly easy because of the great leverage actuated by the steering gear, and the reduced friction resulting from ball-bearing steering systems.

The famous Dodge Brothers' 121" motor bearing case, reliable engine performance with exceptional speed, variable power and quick accelerations that are adequate for every road.

# KOMO

## The Insecticide

IT POSITIVELY KILLS

FLIES, BEES, BUGS, ANTS, COCKCHASERS AND MOSQUITOES.  
READ WHAT THE B. A. MEDICAL RESEARCH INSTITUTE HAD TO SAY.

THE SOUTH AFRICAN INSTITUTE FOR MEDICAL RESEARCH  
Co. Exhaustive Test and PROVES THE VALUE OF KOMO

"In many years past eminent Medical Authorities have investigated the merits of sprays and Komo as a means for the destruction of flies and other disease-carrying insect pests.

Quite recently the South African Institute for Medical Research conducted a series of experiments in which were tested a number of spraying fluids, and in making this investigation the efficiency of KOMO as an insecticide was found to be the minimum standard of which to aim.

It was found that some 24 fluid ounces of KOMO—the quantity suggested by the Manufacturers—definitely killed every fly in a room ALTHOUGH NO LESS THAN THIRTY-THREE LIQUID PRAYS WERE USED IN THESE EXPERIMENTS. KOMO GAVE BY FAR THE MOST SATISFACTORY RESULTS.

STANDARD STATIONERY STORES, NAIROBI.

handling of the steel from one plant to another. Ovalshafts and connecting rods will be used out of the building in place of the manufactured steel, thus cutting down on handling cost.

One of the major changes was the transfer of all final assembly to the Ford plant from Highland Park, the room that provided in the latter plant for the final assembly of the engine parts of motor manufacture. Mr. Ford has stated that it is not unusual manufacturing types at Highland Park.

It may be that he has other plans for his contemplated tyre factory, ultimately to handle tires independently of outside sources of supply in this as in other directions, but I saw with my own eyes tyre being made at Highland Park, although admittedly on a small and perhaps experimental scale. These tyre I saw had an embodiment of the "solid" moulding but an alternative, built with the words "Ford Car," stamped in reverse, and I was informed he will substitute the made with superior styling.

#### Highland Park

The Highland Park plant credit to the Ford industries is one of the show places of the world. Thousands of visitors are conducted through it every year. It covers nearly 300 acres, of which practically half are under cover. At full capacity it employs 20,000 men, estimate of an office staff of 8,000. Different departments change shifts at different hours, so that the surrounding streets shall be unobscured and public transportation facilities arranged. A field of some 200 acres is now used to park employees' cars. It is a large of industries, such as a shoe or an optician, would be a notable thing of its kind. Inwards and outwards, the railway problem is that of a large city.

In addition to being the machine shop of the Ford Motor Company, Highland Park is the scene of great making, vertical lathe manufacturing, the making of a rubber stamp, moulded lead, and the weaving of textiles. It is also a cotton for shop and radiator factory, and some out huge supplies of copper wire, miller hardware, storage batteries, etc. As has been indicated, the manufacturer, and forcing of steel, have laboratories an extensive part of its operations to be transferred to Ford together with its five line

at Ford and turned into steel. Oil pipes is related to in the extent of 500 gallons a day and the size of work. Surveys of all steel castings made in thousands of gallons per day. Broken being is repaired and returned, the smaller series going to various uses, including the use of the shop in the cobalt's area.

There are men who spend their lives examining every pipe, and in the photographic department the other ends are recovered from the developing solutions. All sorts of suitable and other more which are defective are provisionally for use again. Metal wires by the ton is remelted, wood waste being made up to substitute for expensive materials or otherwise recovered in wood destruction plants, also of the blast and most complete of its kind.

A by-product plant recovers the value of every ton of coal being sent to Ford by four dollars. Fifty tons of blast furnace dust is recaptured every day, and the slag from the furnace is converted into Portland cement in an additional factory. These and other economies represent a saving of millions of dollars yearly.

In the Ford drawing, we see how an entire example of the utilization of otherwise scrap metal, "Fordite," from which these wheels are made, is lost with some ninety other parts of the Ford Lincoln car, is entirely a Highland Park product. Whatever the other components, it is largely composed of recaptured metal, but with a very slight (just as in another) but which is used and added by a sort of sausage-making machine, and is made from steel and finally vulcanized.

(To be Continued.)

UGANDA ANNOUS

FRIDAY, JANUARY 20, 1928

**The Glietti Case.**

In the afternoon of November 22 last year an orphan child was killed in a motor accident on Alnborough Road, Nairobi. Death was due to shock following fracture of the spine and the impact causing the injuries was the most violent nature. On Tuesday the driver of the car, A. E. Glietti, a British Contractor of Eldoret, a Captain Junior, Sir Jacob Barnet, and a jury which honours death by a rash or negligent act. After a hearing which lasted the greater part of two days, and consideration of over an hour by the Jury, the verdict was brought in, guilty of manslaughter and of having driven at an excessive speed. The Jury advanced the opinion that defective brakes were a contributory cause of the accident and for this reason considered that the case should be heard with leniently Counsel for the defence placed his hopes at the highest when he asked that a fine should be imposed. His hopes were borne out by the fact that the fine was fixed at five pounds. It is not so usual a matter to see a detailed examination of the case in Kenya in a case of similar case to the striking to pass

He reserves the right to edit and to omit any article or part of an article which he considers to be uninteresting, unimportant, or otherwise objectionable. He is not responsible for the views expressed by correspondents.

#### TEACHERS' SALARIES

To the Editor: "E.A. Standard." Sir—In this and the last two issues, most correspondence has appeared in the Press, regarding the inadequacy of salaries and the new Government scheme of pay. African and Arab school teachers are even less paid in the order of their pay increases, allowances, passages etc., and resemble more the staff of Government hospitals. For the new Government Scheme, the Education Department should address matters both before and have a say put on a better scale.

#### ENGLISH IN KENYA

To the Editor: "E.A. Standard." Sir—Selling books to the young and ignorant of Mr. Macdonald's previous letter, I feel that the last one should be read. Not since Mr. Macdonald's letter did I see a school where a student might see a magazine or newspaper. I do not want the privilege of sending an article to the Editor, but I would like to see a school where a student might see a magazine or newspaper. I do not want the privilege of sending an article to the Editor, but I would like to see a school where a student might see a magazine or newspaper.

#### THE SPREAD LIMIT

To the Editor: "E.A. Standard." Sir—The Editor's letter in your issue of the 10th inst. regarding the spread limit is most interesting. I have read it with interest and I am sure that it will be read with interest by all who are concerned with the spread limit. I am sure that it will be read with interest by all who are concerned with the spread limit.

THE WEEK'S REVIEW. (STANDARD) CORRESPONDENT London, December 11.

THE BRITISH team of golfers, played the last match of their tour of South Africa at Wynberg, Cape Town, on Monday, December 10, when they defeated Western Province. There was a strong South Eastern breeze.

NAIROBI CRICKET. (STANDARD) CORRESPONDENT Nairobi, Dec. 22. The country footballers from North to South and East to West, it was just surprising that a number of hockey matches were cancelled in mid-December. The following players have been selected to represent the Nairobian cricket team against the England XI, at Gymbhala, on Saturday, January 13, 1928.

Wicket-keepers: Walter, Haves, and Pops. Batting: C. O. Gillett and Pops. Bowling: C. O. Gillett and Pops.

THE UNDERDOG team has been selected to represent the Nairobian Sports Club, in a cricket match against Kenya, at Kyanika, on Sunday next, commencing (12.30) hours.

THE FOLLOWING players have been selected to represent the Nairobian cricket team against the England XI, at Gymbhala, on Saturday, January 13, 1928.

SOME roads change with every variation of the weather. To-day they are hard, sharp ruts; to-morrow, soft, slippery ooze.

The heavy reinforced side walls of Goodyear Heavy Duty Truck Pneumatics successfully combat these ruts, and the deep diamond blocks of the All Weather Tread provide traction under all conditions.

### LONDON DISORGANIZED BY FROST.

Unprecedented Rush on Hospitals.

### EXTRAORDINARY SCENE

STANDARD OBSERVERS—London, Dec. 22.—London had perhaps the most remarkable experience in Western history that it has had for many years. After a period of very severe frost in which skating was possible on the deep frozen rivers, the frost broke abruptly on a Tuesday night when it started to fall. Apparently it must have slightly melted in the day, but Londoners and guests coming into the town from the country found the streets sheets of ice.

There were extraordinary scenes in the streets, with many accidents and over 2,000 people injured by falls and collisions at the hospitals for broken arms, legs and heads. Accidents, bruises and cuts and bruises, fractured collar bones and even the cases of concussion. The hospitals had such a rush as they had never known for years.

Trains were running "anyhow" in buses were shivering all over the place. Trains were running for out of the schedule time; taxis were unmanageable in many parts; thousands of households had to go without milk, and few other necessities were late in most parts, and so were early deliveries of letters. Four cars were turned over to the Paris as they skidded and collided. Doctors and nurses worked on pressure, ambulance men had no business to carry their patients out of the hospital, and all the hospitals were late in most parts, and so were early deliveries of letters.

At the start of the lecture hall to be established to cope with the rush of casualties brought in by ambulances, rooms had to be built, turned into dressing rooms of every available purpose, and to help at Guy's Hospital, it is estimated that altogether nearly 800 casualties were treated. St. Thomas's Hospital during the first week looked like a machine-stamping office. King's College Hospital had a constant procession of fractured legs and arms and head wounds from 600 accidents, and all at the same time. The Royal Northern had 113 cases up till mid-day. Other accidents of bones were brought to a standstill on the telephone wires. The Royal Free Hospital was so swamped on the 12th that the general hospital when the P.C. was accustomed a quarter block thick. In view of the fact that the other suburbs were still dangerous places for a car.

### REJECTION OF THE REVISED PRAYER BOOK.

Remarkable Success in House of Commons.

### BRILLIANT ORATORY

STANDARD OBSERVERS—London, Dec. 22.—The House of Commons has rejected the Revised Prayer Book by 205 votes to 107, an unexampled spectacle and success. Analysis of the detailed vote reveals the remarkable fact that the resolution was which the Anglican Church has now been plunged in the idea of Scottish Irish and Welsh M.P.s, whose constituents are in no way connected with the Establishment. The purely English vote gave a majority of 12 in favour of the Book.

On the basis of nationalized figures are:

For the Book: English	190
English M.P.s	6
Scottish	170
Irish	2
Welsh	11
Wales	207
Against	107

Of the Conservatives who took part in the division, a majority voted in favour of the Book, most of the Labour members who voted were hostile, while Liberals were an ambiguous lot that they gave the Book only two votes. More than a third of the members of the Labour Party, including Mr. Bamber-Myers, Mr. Croxall, and most of the Scottish Labour members, did not vote, as did Scottish and Irish Conservative and Scottish Liberal voters solely by voting the Book.

Feat of Oratory.—The article incident was provided by the rich and varied feast of oratory. We have had the best speech (against the Book) the Home Secretary has made or is ever likely to make, the best speech (for the Book) in his history that was made by Mr. Bowyer Mitchell, the Labour member who has been a successful speaker which the House intended for certain which that speech will live for years.

We have had great ideas made unperfected by nervousness in the

handing out in Lord Hugh Cecil's case, and the success of the House of Commons in its unexampled handling of the Bill (except the speech) by Mr. Thomas (Lush's speech). We have had the best speech (for the Book) the Home Secretary has made or is ever likely to make, the best speech (against the Book) in his history that was made by Mr. Bowyer Mitchell, the Labour member who has been a successful speaker which the House intended for certain which that speech will live for years.

The Bill, which was introduced in the House of Commons on the 11th inst., has been the subject of a long and brilliant and continued with the House of Commons. The Bill, which was introduced in the House of Commons on the 11th inst., has been the subject of a long and brilliant and continued with the House of Commons. The Bill, which was introduced in the House of Commons on the 11th inst., has been the subject of a long and brilliant and continued with the House of Commons.

Deep sympathy with the aged Archbishop of Canterbury was felt in all parts of the House. It is agreed that the opposition to the Bill has been supported on his behalf, for a full minute. The Archbishop's speech was so long that he had to be helped to his seat. The Archbishop's speech was so long that he had to be helped to his seat.

The result of the division was a narrow margin in favour of the Book. In an instant members left one by one, leaving the House empty. The Archbishop's speech was so long that he had to be helped to his seat. The Archbishop's speech was so long that he had to be helped to his seat.

FLIES, FLEAS, BUGS, ANTS, ROACHES AND MOSQUITOES. READ WHAT THE S. A. MEDICAL RESEARCH INSTITUTES HAVE TO SAY.

THE SOUTH AFRICAN INSTITUTES FOR MEDICAL RESEARCH Investigative Test and PROVES THE VALUE OF KOMO Co.

"This study year past eminent Medical Authorities have been investigating the merits of spraying fluids as a means for the destruction of flies and other disease-carrying insect pests."

Only recently the South African Institute for Medical Research conducted a series of experiments in which were tested a number of spraying fluids, and the results investigated the efficiency of KOMO as an insecticide was taken as the minimum standard to which to aim.

It was found that some 2 1/2 fluid ounces of KOMO in a quantity equal to the Manufacturers'—Adulphal killed every fly in a room 11.00 cubic feet within three hours from spraying.

ALTHOUGH NO LESS THAN THIRTY-THREE LIQUID PANS WERE USED IN THESE EXPERIMENTS, KOMO WENT BY FAR THE MOST SATISFACTORY RESULT.

PERIOD OF DEPRESSION COMING IN KENYA.

View of the President of Nairobi Chamber of Commerce.

VALUE OF STATISTICS.

Hitler Yoma Commission and Colony's Trade.

Events of outstanding importance in the commercial life of Nairobi, and of the Colony generally, during the past year were reviewed by the President of Nairobi Chamber of Commerce at the annual meeting on Thursday.

Lamenting the absence of compiled economic statistics figures with particular reference to the cost of living and the evils of excessive credit, the President said an endeavour should be made to place before the general public in the Hillery Yoma Commission the commercial aspects of Kenya Colony.

In my opinion, the signs are very apparent that we must prepare for a period of commercial depression in Kenya. I hope it will be brief, but I know I am not alone in this sense of an impending crisis. We are thus concluding observation.

REVIEW OF 1927.

Mr. T. M. Tannahill, the President of Nairobi Chamber of Commerce, presided over the annual meeting of the Nairobi Chamber of Commerce on Thursday evening, December 15th, at the Hotel Cecil. The President, in his address, reviewed the year's work of the Chamber and the progress of the Colony generally.

As Book-Making Plant.

Summarizing the events of the year, the President stated that the Chamber had been successful in its efforts to secure the passage of the Copyright Bill, which will enable the local printer to compete with the foreign printer on an equal footing.

The Chamber also succeeded in securing the passage of the Bill for the establishment of a Book-Making Plant, which will enable the local printer to compete with the foreign printer on an equal footing.

The Chamber also succeeded in securing the passage of the Bill for the establishment of a Book-Making Plant, which will enable the local printer to compete with the foreign printer on an equal footing.

The Chamber also succeeded in securing the passage of the Bill for the establishment of a Book-Making Plant, which will enable the local printer to compete with the foreign printer on an equal footing.

The Chamber also succeeded in securing the passage of the Bill for the establishment of a Book-Making Plant, which will enable the local printer to compete with the foreign printer on an equal footing.

The Chamber also succeeded in securing the passage of the Bill for the establishment of a Book-Making Plant, which will enable the local printer to compete with the foreign printer on an equal footing.

SOME roads change with every variation of the weather. To-day they are hard, sharp ruts; to-morrow, soft, slippery ooze.

The heavy reinforced side walls of Goodyear Heavy Duty Truck Pneumatics successfully combat these ruts, and the deep diamond blocks of the All Weather Tread provide traction under all conditions.

**GOODYEAR**

**Giffillan & Company,  
DISTRIBUTORS**

**BRITISH FAIR A TRADE  
BAROMETER.**

**Chemicals and Chemical  
Plant.**

**A WIDE RANGE.**

The British Industries Fair is a valuable trade barometer. The preparations, therefore, which are being made by the organizing committee for the next British Industries Fair—now in London and Birmingham simultaneously on the 29th February next—has developed a comprehensive display of chemical and chemical plant, a valuable indication of the recovery which is taking place in the British Chemical Industry. The industry was among the first to be affected by the recent trade slump. It is not unusual, then, that it should be among the first to show signs of recovery. Evidence of this recovery will be found at the British Industries Fair. It has been necessary for the Chemical Industry to take a much larger exhibition than hitherto, and every branch of the heavy and fine chemical sections of the industry will be represented. It has always been the custom of the Association of British Chemical Manufacturers to take Hall "A" at the White City. This Hall has now become inadequate for housing the Section and arrangements have been made to transfer the Section to Hall "K," where additional accommodation is available. This Hall is not only larger, but very fittingly since the products of the chemical industry enter into nearly all other industries, is more in the centre of the Fair. The Chemical Section will be accessible from the Wood Lane Entrance of the White City, either through the Textiles Section or through the Textiles and Clothing Section.

As a further convenience to buyers between the Foodstuffs and Chemicals and Chemicals and Chemicals Plant Section there will be housed displays of edible oils and a number of other industrial articles based on chemical elements.

**Appropriate Grouping.**  
This policy of grouping appropriately industries between which close relationship exists has also been followed in another direction. In the early days of the Fair it was customary to include any exhibitors of chemical plant manufacturers in the chemical hall. Recently, however, manufacturers of chemical plant have organized a special exhibition of their products at a time which did not deal with the British Industries Fair. This year they are prepared to forgo their own exhibition and are taking part in the Fair. Hall "K," then, will be occupied as to three-quarters of its space by

members of the British Chemical Manufacturers and so to be represented by the members of the British Chemical Plant Manufacturers' Association. In this way a complete exhibit will be staged which will be arranged in a very convenient form to enable the interested visitor to inspect the interesting items displayed.

In the centre of the Hall will be found the exhibit of Imperial Chemical Industries, Ltd., comprising heavy chemicals, explosives, fertilizers, dyestuffs, etc. It is also particularly in the midst of the exhibitors of the Chemicals and Chemicals Plant Section whose function is to bring into prominence the very numerous fine chemical products now being made by such firms as Albright and Wilson, Ltd., A. R. Mather and Co., Ltd., British Drug Houses, Ltd., Burroughs-Wellcome and Co., W. J. Bush and Co., Ltd., General Chemical and Farmacological Co., Ltd., Hopkin and Williams, Ltd., Howarth and Sons, Ltd., Johnson and Sons (Manufacturing) Chemical, Ltd., May and Baker, Ltd., Platt, Murrell and Son, Ltd., T. S. Price and Sons and others. Special displays will be shown by Messrs. T. S. Price and Sons, Ltd.—Acids; The Salt Manufacturers, Ltd.—Salts; Guinness Chemical Works, Ltd.—Carbolite, Oxydol, Saccharin, etc. Last, but not least, attention should be called to the new production of the British Cyanides Co., Ltd., about which it may be said that although a chemical nature they are very beautiful. In a sentence, the object of the exhibitors will be to show, briefly, a complete range of the British chemicals now being made.

POULTRY NOTES

The Crystal Palace Show.

The Grand International Show at the Crystal Palace was held on the 22nd and 23rd inst. and the entries in the Poultry Section numbered 1,400, which is a record for the show up to date.

Reliable

This new Four is of true Dodge type in the high quality of its vital parts.

All springs, gears, axle shafts and springs are of chrome vanadium or other costly alloy steel, giving great strength and long wear, with low maintenance expense.

Steering is amazingly easy because of the great leverage started by the steering gear, and the reduced friction resulting from ball-bearing steering columns.

The famous Dodge Brothers' 124" motor chassis, reliable engine performance with exceptional speed, starting power and quiet construction more than adequate for every road.

Prices from £295

THE OMOND BENNIE GARAGE, NAKURU. WATT & CO., MOSH AND ARBEHA. KASSAM & EBRAHIM, KAMPALA & BUKOBA.

KOMO The Insecticide

IT POSITIVELY KILLS FLIES, FLEAS, BUGS, ANTS, ROACHES AND MOSQUITOES. READ WHAT THE B. A. MEDICAL RESEARCH INSTITUTE HAS TO SAY.

THE SOUTH AFRICAN INSTITUTE FOR MEDICAL RESEARCH. "Elephantus Test and PROVES THE VALUE OF KOMO

"POW many years past eminent Medical Authorities have been investigating the merits of spraying flies as a means for the destruction of flies and other disease-carrying insect pests.

Quite recently the South African Institute for Medical Research conducted a series of experiments in which were tested a number of spraying fluids, and in making this investigation the efficiency of KOMO as an insecticide was taken as the minimum standard at which to aim.

It was found that some 14 fold ounces of KOMO—the quantity required by the Manufacturers—definitely killed every fly in a room 1,000 cubic feet within thirty-three liquid hours. ALTHOUGH NO LESS THAN THIRTY-THREE LIQUID HOURS WERE USED IN THESE EXPERIMENTS, KOMO GAVE BY FAR THE MOST SATISFACTORY RESULTS.

Yale "Journal of the Medical Association of South Africa," July 20, 1927.

Table with 3 columns: No., Price, and Quantity. Rows include No. 1 (5/6), No. 2 (4/6), No. 3 (12/-), No. 4 (21/-), No. 5 (12/-), and Sprays (4/6).
