Colonial Landings, the Atlantic steamer, paid £20,000 income tax as an income for 1917 of about £200,000, practically all of which has been retained after the war.

Writing and £100,000 in connection with the demolition of the building of the new Parliament House at a large loss.

General Bull, the Prime Minister, has asked permission from the British Government to send a mission to Spitzbergen to search for the missing members of the crew of the Italia. It is understood that the Ministry will probably grant such permission.

A box containing pills, supposed to be the remains of a corpse at Chaulmouch, Yunnan, France, has caused such excitement among the residents of the neighborhood that forces of police and troops, as well as volunteers, have been called out to search for the corpse.

Mr. Baird, who has become famous for his television, has now invented a new development in television, namely, stereoscopic television, by which pictures appear as three dimensional with the aid of real people.

It is reported in Manchester that £200,000 has been offered by the Government for the purchase of the rights of the Court of Criminal Appeal, which was recently granted in the British House of Commons. Another report estimates the value of the engagement at more than £100,000.

Mr. Bennett Macdonald, speaking at a Canadian Club luncheon last month said: "The middle class is going through great distress, but being with a sense of heart to the future. We have still the determination and will power to carry on a work of reconstruction that will make the eyes of the world in the future at the has ever been in the past." Mr. Macdonald was of opinion that trade alone was sufficient to hold the bonds of Empire, but there was also needed satisfaction in cooperation, peace in common enterprise and common allegiance. He said that the British Empire stood for peace for the open road where people could go in economic freedom.

Here and There.

Ministers of education in harmony with the world, and the up-ward progress of years.

The transformation of Turkey seems to be the subject of the Ankara Aviation School to become pilot. The school is a military one and they have been ordered. Nothing is known about the school. Nothing is known about the school. Nothing is known about the school.

With cold curtains have become discoloured and scratched if not cleaned daily. Metal polish is quite a good cleaning medium, a few drops should be applied to the surface of such cold curtains and rubbed thoroughly with a dry duster, afterwards washing off with a clean cloth. The fine grades sold for cleaning silver are best for the purpose.

A Hungarian servant of the British Embassy according to the British press. "An old man has been granted a divorce on the usual plea that he was being driven to death by his wife. He informed the court that his wife became a disciple of a native doctor, seven years ago, and that since then she had refused to allow him anything to do but the rice vegetables prescribed by the doctor to his disciples."

Wives of children who have been determined by the will of husband or parent will be entitled to sue for the right to sue for the right of inheritance in a will and inheritance in a will and inheritance in a will.

Offset the Strain of Study

THAT priceless heritage of good health is often largely the result of a carefully daily diet during the schooling period. These formative years bring habits which are never broken.

To retain neural, pure foods, such as Quaker Oats, is one good habit, easily formed, which assures. Fortune indeed is the child who is fed daily with this body building, health giving food, rich in the elements of perfect nutrition—vitamins, carbohydrates, mineral salts.

Quaker Oats, for young and old, strengthen and replenish the body, ward off illness. It is delicious to prepare, and very economical.

THE FIRST BABY

Some Hints About Hot Weather.

By Helen Graham C.M.B., etc.

There is no nursery where a little mother and her baby are more fond than in the sunny, yet shady, spot, where the mother sits, and the baby lies, with the rest of the family made so comfortable by the sun's rays. A mother needs a look at conditions, a trial and a test, and having decided on both, she should be ready to act on either. It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either.

It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either.

FEEDING.
 The same simple common sense must be applied to feeding. A very large proportion of Baby's food should be in the form of liquid. It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either.

FEAR OF SHILLS.
 A good deal of fear exists among the mothers about the risk of taking external irritants. It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either.

It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either.

A light blanket or two will probably be necessary when darkness sets in. The extra coverage should be over the head and neck. It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either.

DIET CHANGES.
 If Baby is at a new milk station, the milk should be boiled, or, if the mother is very hot, temporarily given up and replaced by the damper given by a dried or condensed milk such as Cow and Nestlé's (un-sweetened). It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either.

It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either.

It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either. It is very important that the mother should be ready to act on either. THE GREAT "52" "62" "72" "80"

CHRYSLER

Only Standardized Quality Gives This Greater Value

CHRYSLER cars—"52," "62," "72" and "80"—are designed and built for people who want that extra something which makes all the difference between value and performance that are merely satisfactory and value and performance that are really distinctive.

Pick-up, power and speed that are as much as they exhilarate—instant responsiveness to steering wheel breaks that insure safety—most unusual riding comfort—marked freedom from mechanical errors and a smoothness of line and color.

Through Standardized Quality each Chrysler benefits by the advanced engineering, precision manufacturing and vast resources concentrated in the development and building of all other Chrysler models. Through Standardized Quality, you get in Chrysler cars of lower price, the refinements required by Chrysler cars of any price.

That the public has been quick to grasp the significance of its benefits is evident by the countless genuine world-wide preference for Chrysler's products.

Arrangements

The first paragraph of Article 1 of the Statute of the League of Nations reads: "The League of Nations shall be organized in accordance with the provisions of the present Statute." The Statute of the League of Nations was signed at Versailles on 28th June 1919, and entered into force on 10th January 1920. It is the only international treaty which has been signed by all the nations of the world. The League of Nations was the first of a new type of international organization, and its creation was a landmark in the history of international law. The League of Nations was the first of a new type of international organization, and its creation was a landmark in the history of international law. The League of Nations was the first of a new type of international organization, and its creation was a landmark in the history of international law.

and fruitful in their dealings with the other who had been in any real hope for the solution of international strife.

Under the Standard Clock.

Transfer.
Capt. Fremont, O.B.E. who has been Acting Secretary of the Township Authority at Kampala is being transferred to

Calcutta Society.
The annual meeting of the Calcutta Society of Kenya will be held on the 15th Stanley Hotel at 8.45 p.m.

League Third.
The second report of the Yearly Meeting for the year 1929 is being published in the Standard. It is a most interesting and valuable document.

Parke Office.
Mrs. J. Parley was fined £10 for failure to pay the rates for the year 1929. She was also ordered to pay the costs of the proceedings.

Cur's Double Sentence.
A man by the name of Cur was sentenced to two years in the Lunatic Asylum for the crime of murdering his wife. He was also ordered to pay the costs of the proceedings.

The Royal Waters.
The water of the Royal Waters is said to be very beneficial to the health of those who drink it. It is a natural mineral water and is very pure and wholesome.

October 4.
The 4th of October is a day of national mourning in Kenya. It is the day on which the late Governor of Kenya, Sir Philip Mitchell, died.

October 5.
The 5th of October is a day of national mourning in Kenya. It is the day on which the late Governor of Kenya, Sir Philip Mitchell, died.

SAYS A MEN'S CLOTHES EXPERT:

"Hed the secret of well-fitting dress is not in the fabric, but in the fit. A man who knows his clothes knows this as true."

It is because Consulate Dress Shirts are tailored to the figure so faithfully that you find a growing number of well-dressed men buying them regularly—and refusing all others.

Such clean-fitting comfort? They say. Such immediacy of style? Such extraordinary resistance to laundry grime? (and such remarkably modest prices!)

Tailored by all good makers throughout East Africa.

THE RUGBY WEEK-END.

Successful Meeting at Nakuru.

THE MATTERS

STANDARD'S (Nondescripts) 3-1

The annual Kenya Club and Individual took place on September 7, 8 and 9 and proved to be an unqualified success. Four clubs visited Nakuru, viz. Nairobi, Limuru, Bura and Nairobi Nondescripts, and a series of respectable matches were played. The following is a review of the matches played:

Kilale vs. Nakuru.

The Friday first match was played on the Nakuru Athletic Club ground between Kilale and Nakuru. There was a large gathering of spectators.

The match was hard and fast, and the play all through was very even though, on the whole, Nakuru possibly had the better of the game. In the second half, Nakuru were unlucky in not getting a penalty kick over, the ball for which was taken by Hart, the ball hitting the cross bar and bouncing back into play.

The result was a draw, which goes to show the evenness of the game.

Nakuru vs. Bura.

Nakuru and Bura met on Friday afternoon at 4.45. Straight from the kick-off the smart passing in the Nakuru three-quarter. Turton was able to appear more the corner post and get a pass from Bura. Hart failed with the kick. Bura then came together and took the play into the hands of the off-side. The game was again between Nakuru and Bura. The result was a draw, which goes to show the evenness of the game.

Nondescripts vs. Kilale.

This game followed the Bura-Nakuru match, the kick-off being at 5.00 pm. During the whole game the Bura forwards were at all forward and three-quarter. This Nondescripts' half-time was distinctly weak.

Hartell opened the scoring for Kilale with a try for the kick during Bura's period. Both sides were in the scores for the players converting one try.

The Nondescripts played a hard game but were outshined by the superior play of Kilale. It must be added in estimation that the Nondescripts were not at their best strength, had they been so, it would have been a very interesting game.

Nondescripts vs. Limuru.

Nondescripts and Limuru met on Sunday in the first match. Owing to Limuru not having a full team they played the first 15 minutes on the side of the field. The Nondescripts were also short and backward in two Naksara players.

The play was very even and fast throughout. Shortly after the start Limuru forwards got in a rush from which they were able to score owing to a slight fumble on the part of the Nondescripts. The kick was successful, and

there was no further scoring during the first half.

All remaining on the field. After a clever passing movement by the Nondescripts forwards, they were able to score near the posts, but the kick failed. Shortly afterwards Limu was able to add to their score.

For Limuru, Fooks played his best game and Kilale was excellent and he scored many points. The Nondescripts' forwards were excellent and they were the most prominent of the three-quarter.

Bura vs. Kilale

The match took place on Bura and Kilale was played on Sunday afternoon at 5.00 pm.

This was the lastest game and the best of the week and the forwards were both evenly matched, but Kilale had the advantage in attack and the three-quarter. The play was very even and fast throughout. The result was a draw, which goes to show the evenness of the game.

The Dance

In the evening there was a very enjoyable dance held at the N. A. Club. The dancing was very well attended and the N. A. Club was very successful in their efforts to give a good time to the public.

THE RUGBY WEEK-END.

Successful Meeting at Nakuru. THE MATRONS. STAFFORD CORRESPONDENT. Nakuru, September 8.

The annual Kenya Rugby Club festival held this year on September 7, 8 and 9 at Nakuru proved to be an unqualified success...

On Friday the first match was played between Athletic Club ground between Kisumu and Nakuru...

The match was hard and fast, and the play all through was very even though, in the first half, Kisumu possibly had the better of the game...

Nakuru vs. Nairobi. On Saturday afternoon the 2nd test match straight from the kick-off also smartly passed by the Nakuru three-quarter. There was also a score near the corner post after talking a pass from there. Heat faded with the kick. Bismarck got together and lost the play into the Nakuru 25. Off-side was given against Nakuru and Botolph kicked the penalty goal. After seven forward plays, Nairobi scored but failed to convert.

This game followed the Bismarck-Nakuru match. The kick-off being at 2.30 p.m. Today, the whole game Kisumu were far superior both at forward and three-quarter. Non-scriptor's tackling was distinctly better. Russell opened the scoring for Kisumu with a try for each, the half being 10-0. Botolph, Pridmore and Davies were the best players for Kisumu, Nawa converting six try.

On Saturday the 3rd test match was played between Kisumu and Nairobi. The play was very even and fast throughout, shortly after the start London forwards put in a catch from which they won the score owing to a slight fumble on the part of the Nairobi players. The kick was successful but...

Margaret Collyer

Mr Collyer, I wish to whom a correspondence in connection with 'Margaret Collyer' article addressed, does not hold herself responsible for accuracy of statements made by her which are, in the main, based on information supplied by her co-respondents.

Mr de la Poiré has just written me in a most interesting way. He has a lot of music through with him. He has a lot of dogs, and that she could keep hunting dogs. Good strong half breeds are needed, over three and sixteen. Mr. Fenwick's address is P. O. Kenilworth, 10, Victoria Road, London, W. I can not help at all. I do not know of any children and dogs. I don't know of any children and dogs. I don't know of any children and dogs. I don't know of any children and dogs.

of me as I write. In this case I cannot tell you the exact date it helped a year ago. As soon as the temperature was nearly normal the constant fever was taken very readily and suggestions were made for the other people to try the diet and the rest.

I have an account of a new set of four (four) of a small tree, which was very interesting. The little tree had had a very good time and was very healthy. It had been taken away with a large quantity of soil, and it had been planted in a new place. It was very healthy and was very much improved.

BUCKEAT CROPS.

You cannot persuade them not, but you can't utilise the fruits of your husbandry at second hand by eating the buck. The purchase of a small rifle fulfills three purposes. You get exercise, you get protection, and you get meat. A rifle, properly treated, will last ten years. If you don't get value out of it in this period, you can't shoot, if you can't shoot, you can't get a better rifle. Shooting straight, with a straight shooting rifle, is merely a matter of horse sense. If you shoot badly, you can only assume that your weapon is at fault. Kill and we are about it.

88 Men (2nd innings): 27 1/2	

RUBST AT KAMPALA.

A very good Rubby game was witnessed last week when combined teams of Entebbe, Busho and Kampala played off at the Kampala ground. The outstanding item was the absence of two lines by Peter, both of which were only about two yards from the end of the line. Kampala and Busho were by two goals to two tries. During the match, several in touching. There were some heavy blows and had to be taken to hospital. He was apparently struck badly in the head.

PARKLANDS TENNIS.

Yesterday's Tournament Results.

NEXT WEEK'S FIXTURES.

The following were yesterday's results in the Parklands Tennis tournament:
Mrs. Davis and Miss Paine (4-0) beat Mrs. Vernon and Mrs. Chalmers (1st set) 6/0, 6/0.

PROSPECTOR BATTERED TO DEATH BY NATIVES.
Mence of Aborigines in South Australia.
COUNCIL OF WAR.

Attorneys to Leave Their Appeals for Greater Police Protection.
The Attorney-General has announced that he will not grant a writ of habeas corpus for the release of the prisoners at the station to take the law into their own hands.
The natives have been killed following the attack on the prospectors named William Brooks and others to death.
An outrage was perpetrated upon a cattle farmer William Morton who was giving notice when others attacked him from behind. He is a very powerful man, extracted him a revolver.
The party he was surrounded by howling blacked rook boomerangs upon him and struck the man in the back. Morton was left for dead covered and reached his homestead 27 miles away.
The natives had a war like "corroboree" rings. The residents are afraid to leave their homesteads and are seeking greater police protection.

HEALTH AND TAXATION IN UGANDA.

When Asthma Becomes Prognosis.

ASTHMA BOXES

Pneumonia accounted for the special number of deaths in Uganda in 1927, the number from this disease being 165. Pneumonia was the cause of 115 deaths and accidents of various kinds accounted for 111, according to the annual report of the Medical and Sanitary Department of Uganda.

Although 8,000 cases of disease of the nervous system were reported, 4,000 of them fell under the group neuritis, sciatica, lumbago, etc., which usually denote a symptom rather than a disease. Specific nervous disease is usually rare.

51,238 cases of disease of the Respiratory System, were recorded including 97,720 cases of bronchitis. This term impossibly includes a great number of cases of ordinary coughs and colds. Asthma is well recognized by the natives but is usually only brought to the notice of the Medical Officers in connection with applications for compensation from payment of taxes on the grounds of ill-health. 1,560 cases of pneumonia are recorded with 162 deaths; last year there were 1,275 cases with 284 deaths. In spite of the reduction in the number of deaths from this cause in 1927, this disease has accounted for the greatest number of deaths during the year, 165 being the total with 116 deaths, while accidents of various kinds accounted for 111 deaths.

Diseases of the Eye, were reported in 30,111 cases and of that number 26,422 were conjunctivitis, trachoma, cataract, etc. The most prevalent complaint is a great number of cases of the vague term, "pain and itching" of which natives complain so much. They are usually the sequelae of syphilis or yaws. In his annual report, Dr. Hugh Townshend, District Medical Officer, Ankole, writes:—"The most prevalent complaint is a great proportion of cases that he considered to be syphilis of the jaws. The matter remains quite undoubted. The medical officers. Tax certificates are given on this account at great numbers and

coupled with pain and conjunctivitis. Unlike ordinary conjunctivitis, however, it has a marked effect on these cases. Acute rheumatism, or rheumatic fever, is seldom ever seen. A condition akin to thrombotic arteritis is being seen with more frequency lately.

20,004 cases of Ulcers were reported. Undoubtedly, a very large number of these were due to tertiary syphilis or tertiary yaws. Dr. A. J. Ross, District Medical Officer, Longo, writes:—"Fully 80 per cent. of all ulcers met with in Longo are the result of tertiary yaws. Of the remainder, a considerable number are due to traumatic origin."

Various venereal diseases are seldom seen in natives and they play a very slight part in the population amongst them.

Cancer

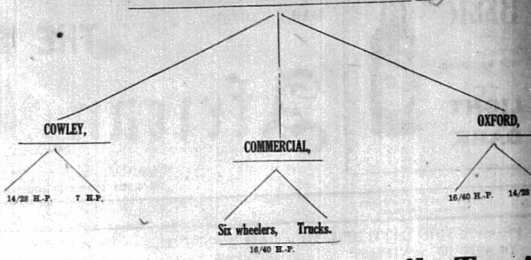

Eighty seven cases of cancer were reported, compared with 93 cases last year. The increase is partly due to better facilities for laboratory diagnosis provided during the year. Captain R. P. Cresswell in the annual report of the Kampala Laboratory, 1927, states:—"Malignant neoplastic disease is comparatively common amongst natives. Epithelioma specimens of malignant disease examined by him histologically were from natives. My cases of cancer are not recorded owing to the present system of rendering returns monthly."

Syphilis, under the heading of infectious diseases, is reported to appear to be epidemic in character, of low virulence, and established amongst indigenous tribes. In 1927, there were 8,228 cases and 116 deaths. Tuberculosis is widespread, and is reported to be more common than the returns indicate. It is reported that in 1927 there were 228 cases of tuberculosis with 98 deaths. Venereal diseases and yaws are considered together in the report. There were 95,029 cases of yaws and 22,182 cases of syphilis. These returns show a considerable increase over the figures for the preceding year and it is stated that this, while possibly due to increased prevalence is more probably explained for the year-increasing resort by natives to sub-injections for treatment of these diseases.

There has been a steady decrease in the incidence of malaria during the last four years. In 1924 there were 12,462 cases in the three districts while in 1927 there were 4,867 cases with nine deaths.

It is estimated that the number of leprosy in the Protectorate in 1927 was 2,000. The disease is known throughout the Protectorate but is more districts the incidence is so low as to be unimportant.

A New Petrol System. Combining Carburettor and Rear Tank.

In these days the motorist demands his developed a petrol system of such perfection that it is almost impossible to improve on it.

It is in the carburettor that the petrol is drawn into the engine. In the carburettor the petrol is drawn into the engine through a jet which is controlled by a needle valve.

When the needle valve is closed, the petrol is drawn into the carburettor through a jet which is controlled by a needle valve. This jet is controlled by a needle valve which is operated by a linkage mechanism.

When the needle valve is closed, the petrol is drawn into the carburettor through a jet which is controlled by a needle valve.

Drivers Who Turn Off Too Soon.

Driving mistakes seem to be becoming habitual. One of the most common is that of turning off too soon.

When a driver turns off too soon, he is liable to cause an accident. This is because the car is still moving forward when the engine has stopped.

Thoroughly Dangerous!

The habit of turning off too soon is thoroughly dangerous for several reasons. It is dangerous because it causes the car to lose control.

When a driver turns off too soon, he is liable to cause an accident. This is because the car is still moving forward when the engine has stopped.

Our City Park.
 One of the very few things of which Nairobi can legitimately be proud is its City Park. It is perhaps the only undertaking, either municipal or private in the town area which without qualification of any sort may be described as successful. What a few years ago was a mere clearing, the principal forest has been cleared, the soil is a charming greenness within which may reach the town itself the outline may get away from the dust, the open drains, the sanitary lanes and the general embellishment of such that constitutes Nairobi.

SAYS A MEN'S CLOTHES EXPERT.

"Half the men of well-dressed cities are in a well-dressed dress shirt underneath. . . . Any man who isn't certain about his clothes knows this is true."

It is because Comrade Dress Shirts are tailored to the figure so faithfully that you find a growing number of well-dressed men buying them regularly—and refusing all others.

Such close fitting comfort they say. Such unobtrusive elegance to kingly graces! and such remarkably modest prices!

Stitched by all good houses throughout East Africa.

Public Buildings in the City Square.

COUNCIL REFERENCE.

At Tuesday's meeting of the Nairobi Town Council, Councillor Henderson said that the Acting Municipal Secretary had held him that he would like the Council to get down to discussing the location of the public buildings in the City Square. He understood that the Council should get out a scheme of what the buildings should be like in 20 or 25 years' time and it would be possible to get in building contracts before the money became available. He understood that the Government would be willing to loan quite a sum of money to Nairobi.

His Worship the Mayor (Councillor T. A. Wood) said he did not understand the position as Government had not had much to do with the matter and had not replied yet. It was agreed that the Mayor should get out the agenda for the next meeting of the Town Planning Committee.

Anti-Malarial Works.

THE SETTLEMENT OF

Arising out of a claim which was submitted to the Municipal Works Committee by the owner of a plot in Parklands with reference to the new settlement of Parklands stream, which cut off 50,774 acres of that plot, it was reported to the Committee that the owner would be satisfied if a high wooden bridge was constructed to give access to the portion of the plot and the boundary of his plot demarcated in view of the fact that the reclamation of the stream would eliminate the present boundary mark. It was recommended that this should be reported to the Town Clerk who was also instructed to write to the Chairman of the Anti-malarial Committee suggesting that if further proper arrangements should be made for settlement of any possible claim, it would be appropriate necessary that an official secretary to the Anti-malarial Committee should be appointed to carry out this and similar work.

The recommendation was adopted by the Town Council at their meeting on Tuesday.

ROAD TO EASTIGH.

QUERY AS TO WHO WILL PAY THE BILL.

The Works Committee of the Nairobi Town Council discussed the question of a road of access for Eastigh when it met on August 31. Mr. Wood attended the committee for this item. He said the road should be constructed by the Government and the Government would contribute £1,000 towards the cost of this road.

The Council reported that a road alignment would cost approximately £1,000. After discussion it was resolved to recommend that the way road on the Eastigh road alignment must conform to the Town Planning scheme as defined by The N.G.O. 61/1972, also that subject to the consent of the owners of the plots concerned and to the Government contribution of £1,000, the road should be constructed with proper foundations and a light that cannot be altered.

The Committee considered that the cost of this road should be borne by Government and suggested to the Council that it be speedily in the future.

The Council on Tuesday approved this recommendation.

COFFEE CULTURE

To the Editor, "E.A. Standard."
 Sir,—Having read with considerable interest the various articles concerning the inadvisability of planting coffee elsewhere, I should be rather interested to hear your correspondent's opinion on my own premises to be a sound investment. I do not mean (madam) good for a bag of about two tons and to be worked with a scythe. After waiting a few days for the seed to rot I sowed them in, thus not only protecting the soil from the drying out effect of the sun, but also the same thing making a very good mulch.

"INTERESTED"

Chemist, Sept. 6.

CHIEFS

To the Editor, "E.A. Standard."
 Sir,—Having read with interest your article in last week's "Standard" on the chieftain shortage in Nairobi, I am glad to hear that those makers make, there is a little more light on the subject, and give you a further reason for the scarcity of chieftains in Nairobi.

In it is true that the drought and consequent lack of work in the region, but the prices charged by the white men for the important tributary zone. This amount for merely handling charges, is not as willing to pay to the chieftain as his own profit after paying the milk and paying his wages, not to speak of the fact that he has to keep the chieftain for weeks, to keep it would have to sell at 50 per cent. over his price.

THE NATIVE PROBLEM

To the Editor, "E.A. Standard."
 Sir,—Under the above heading several letters have been contributed, a few of which were very appreciative, but some of your readers, as a few lines in yesterday's paper, all of this nature very appreciative, one being a member of the Legislative Council. In view of the importance of the subject and its importance, I venture to ask you to give me space for extracts from a report in the "Standard" on the subject.

WIRELESS NOTES

ENTS TO LISTENERS

Listeners who have read (and acted upon) the hints given in the last two weeks should have succeeded in installing their sets more efficiently in their rooms than those who have not. In order to receive some power, some parts will be repaired and will in general be supplied.

The H.T. and L.T. batteries being in order, and the aerial and earth connections made in a suitable fashion, the next point possible of adjustment is the loud-speaker. If adjustments can be made to improve the average listener may do little to improve their performance.

It may be assumed that a loud-speaker is in use, and that one of the forms type has been selected. Although several types are available, it is not, in general, possible for the listener to purchase a loud-speaker of his own choice. It is, however, possible to select a type which will give the best results.

There are, of course, other types of loud-speaker than the general cone type. The horn type is, however, the most common. It is, however, possible to select a type which will give the best results.

As regards the location of the loud-speaker, it is important to select a position which will give the best results. It is, however, possible to select a type which will give the best results.

The position of the loud-speaker in the room is another factor which is worthy of some attention. It is, however, possible to select a type which will give the best results.

Considerable improvement is often obtained by the use of a "baffle" in the type of loud-speaker. It is, however, possible to select a type which will give the best results.

It is, however, possible to select a type which will give the best results. It is, however, possible to select a type which will give the best results.

The Operation and Maintenance of a Broadcast Receiver.

By G. Ephraïm Ben. A.C.G.I. AMEE

paper of the one does not of a set of quarters of an inch or so. It is, however, possible to select a type which will give the best results.

With the moving-coil type of loud-speaker, a few of which are now obtainable, the latter is a suitable medium. It is, however, possible to select a type which will give the best results.

As regards the operation of the receiver which is of good quality of reproduction, this will vary of reproduction, this will vary of reproduction, this will vary of reproduction.

As regards the operation of the receiver which is of good quality of reproduction, this will vary of reproduction, this will vary of reproduction, this will vary of reproduction.

As regards the operation of the receiver which is of good quality of reproduction, this will vary of reproduction, this will vary of reproduction, this will vary of reproduction.

As regards the operation of the receiver which is of good quality of reproduction, this will vary of reproduction, this will vary of reproduction, this will vary of reproduction.

As regards the operation of the receiver which is of good quality of reproduction, this will vary of reproduction, this will vary of reproduction, this will vary of reproduction.

As regards the operation of the receiver which is of good quality of reproduction, this will vary of reproduction, this will vary of reproduction, this will vary of reproduction.

While on the subject of quality of reproduction, mention of the grid leak is not out of place. The latter is a small coil, usually to be found in the cabinet containing the receiver, and will vary in size from a half-plate to one or two inches in diameter.

Moving the black plate from one position to another will give an improvement, especially in the case of a vacuum tube.

The red plug, which will be found on the socket marked "A" at all times, should be touched when the set is to be used. It is, however, possible to select a type which will give the best results.

Considerable perplexity is often felt by the listener who is not acquainted with the technique of the receiver. It is, however, possible to select a type which will give the best results.

A brief description of what actually occurs on the receiver is given below. On first starting, the set should be tuned to the station.

All this process, however, on introduction to the studio itself. The performer will use a large, loud-speaker, with a microphone.

The performer will use a large, loud-speaker, with a microphone. The performer will use a large, loud-speaker, with a microphone.

Bits and Pieces

Honours Stores by GEORGE ROBEY THE WORLD FAMOUS CROCKIER. Illustrated by R. P. KINSELLA.

"Here is a volume packed with the tumblerous fun of the Robey kind, and as a souvenir remedy for melancholy it may be strongly recommended. All the world has laughed at what Mr. Robey on the stage, but it may be doubted whether he has laughed at what he has written. The volume is full of the wildest fun in the history of previous volumes, and will find a present book at least equally diverting. The volume is full of literary novel length, and the stories are now published for the first time."

BUCK EAT CROPS.

You cannot propagate them so fast, but you might utilize the fruits of your handiwork at second hand by eating the buck. The purchase of a good rifle fulfills three purposes. You get exercise, you get protection, and you get meat. A rifle, properly treated, will last ten years. If you don't get value out of it in this period, you can't shoot; if you can't shoot, you can't have a better rifle. Shooting straight, can't shoot, you won't have a better rifle. Shooting straight, with a straight shooting rifle, is mainly a matter of horse sense. If you shoot badly, you can only assume that your weapon is at fault. Call and see us about it.

CRISIS SHIPPING SITUATION IN AUSTRALIA.

Waterside Workers Refuse to Accept Arbitration Award.

GOVERNMENT'S THREAT:
Imprisonment and Deportation being Considered for Malcontents.

(TROOPERS RETURN'S AGENT.)
Melbourne, September 12. Thousands of tons of cargo are held up in all parts of the waterside workers refusing to accept an arbitration award which provided that labour be "picked up" twice daily instead of once as usual. Many ships are already held up in Brisbane, Sydney and Melbourne.
Mr. Bruce, the Federal Premier in a speech in Melbourne, forewarned drastic steps to secure the payment of the arbitration award. He said that employers are considering the question of the merit of free labour.
It is understood that the Government is considering the arrest of a number of the worst offenders and deportation for offenders not born in this country.

Wool Price War in India.

Plans to Report Members Enquiry.

(TROOPERS RETURN'S AGENT.)
Bombay, Sept. 13. The India Office has issued a circular regarding the report of the Wool Board on the wool price war. It was directed to inform the members of the board of the results of the enquiry into the wool price war. The board is to report to the India Office on the wool price war. The board is to report to the India Office on the wool price war.

SPANISH PLOT ON A VAST SCALE.

Plans to Report Members Enquiry.

(TROOPERS RETURN'S AGENT.)
Paris, Sept. 12. According to a despatch from Madrid published in "Le Journal" the Spanish plot mentioned yesterday was organized on a scale to coincide with King Alfonso's absence from Madrid.
The plot was planned to overthrow the King and to deport summarily the members of the Government, while a general strike was to be declared throughout the country on September 14.
The movement, however, was promptly suppressed and the Government arrested the members of the plot. Two hundred arrests had been made by yesterday morning, which arrests are still being added in Madrid, Barcelona, Valencia and other provinces.
The arrested persons include the Deputy Minister of Finance, several Republicans and deputies and a number of journalists and Freemasons.

THE MYSTERY OF LIFE.

A Scientist's Important Research.

NEW THEORIE

Integrating Papers for British Association.
(BY WILKINS.)
Bogby, Sept. 10. What is explained in the most important paper at the British Association of the Royal Society meeting held at the Grosvenor Hotel, London, on the 10th inst. is the mystery of life, which will be explained in the most important paper at the British Association of the Royal Society meeting held at the Grosvenor Hotel, London, on the 10th inst.

Boat Load of Passengers Saved by Dried Fish!

THE KAMBI SYSTEM.

How Coconut Stealing is Kept down in the Island of Lamu.

STANDARD CORRESPONDENT:
It was a very curious and in-line incident that led up to the Dried Fish Committee, held on the other day of a resolution was sent for the provision in all passenger ferries for five sets of wooden casks with fish (dried)...

STANDARD CORRESPONDENT:
I had no doubt, a very interesting experience; but a suggestion that a wooden cabinet on which to put it was suggested and the result was adopted in the original form.

The New Road.

Back to the land the Comm. has done much work with orders concerning improvements to the new road to the N.P.P. We had noted that H.E. The Governor had mentioned this new road in the course of his address when opening the road at the station of the Log. Co. at Mombasa, and, as the N.P.P. Administrative officers are also very busy in their work through our lines that a new survey for trials with the interior will soon be a fait accompli.

To what extent the new road will be free of speed restrictions is not known, but we have much news available. Said in the relative terms of this road, but the going must be pretty good higher up as I hear that a conveyer of some 200 tons has arrived at the latter station at 11 p.m. on the second day. Conveyers this, yet old timers, with the road, and out on the road...

Mr. Mombasa, Provincial Commissioner of the N.P.P. is coming down by motor to see things for himself with two days and a ferry-while from this and an entrepôt-ship track inside putting a ferry-while on the road. The vessel claims to be of the old road between the N.P.P. and the present Indian port of Kisumu has already had the effect of making it a new all-traffic route. Some-thing is to be done with this, and also the

collie and traders are using the water to take up their goods and to bring back their loads. It was mainly with a view to making the transport of such goods to the District Comm. which is a very important item for the protection of the coast, that the N.P.P. has been ordered to build a pier and a place called 'Hodhi', some 20 miles from the coast.

Coonists

Another resolution that went through without opposition being the N.P.P. is to meet to claim that coonists be included in the other products prohibited by the Beach and Prohibited Goods Ordinance. This is a very important item for the protection of the coast, that the N.P.P. has been ordered to build a pier and a place called 'Hodhi', some 20 miles from the coast.

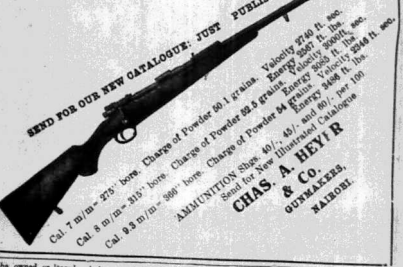

I have not had the good fortune to have been able to attend, but there is no doubt here that the Comm. has done a great deal to stop the stealing of materials which would be lost in the country. The Comm. has done a great deal to stop the stealing of materials which would be lost in the country.

The Kambi is an Association of Pan-Arab, Arab, Indian and British, that is to say, the members of all races and of all professions, and it is a very important item for the protection of the coast, that the N.P.P. has been ordered to build a pier and a place called 'Hodhi', some 20 miles from the coast.

The Cricket World.
Test Matches in England.
Not Reassuring for the "Ashes".

London, August 16.—Although the cricket season is drawing to a close and football is now officially in vogue, the interest is still very keen and the week we have had has been the best of the Test, in which, as was mentioned, England was victorious, winning by an innings, and 71 runs. Thus, for the third time England had no occasion to bat a second time and their visitors showed that the visitors have much to learn. But when it is remembered that the campaign of the Tourists has been for the most part an unobscured one, there should be no occasion for

the frank criticism that the visitors expected and realized. Had they been offered in the last spirit, and the future of West Indian cricket will depend to a large extent on the ability of present teams to make proper use of the experience gained in England. Fred James and George Chalmers are the two thinking members of the team, and this year, as worthy pioneers, will do their best to educate themselves, as well as to enlighten the mystery of spin bowling.

As regards fast bowling, the colored members of the team have played their part extremely well and given no small entertainment to English cricketers, but the team as a whole had a balanced balance, and if that weakness in bats in mind, we are certain that the first Test match which England will not have been made in team. England also profited by playing the Test, and the English captain will add to our many, meeting Chalmers, Griffith, and France, but had not had a bowling record. Macdonald and Drayner played so much better in 1927. Thus the mission of the West Indians, although failing of its main objective, has done much to put England on her mettle in view of the "straw" test about in Australia.

The Australian Tour. Now there is considerable apprehension lest we should be unable to retain the "Ashes" so lately won. Two years ago from Australia after the cricketers of that great Dominion had had possession of them for many years. It cannot be said that the last day's play in the Test Match was a reassuring blow-out of the opening bats. Had the batsmen been the visitors, as it had again Australia as last, 1929 scored at an average pace of 40 runs per innings, and the middle batsmen followed on at 40 runs per innings. (Hammard, Leyland, and Chapman made 22, 20 and 20 runs) were hardly compensated for by an unexpected

won two bowlers. One observer says that when Hobbs returned to the pavilion he looked "pale" and "sorry" to see that the Sunday's rest had evidently not helped him to get rid of the fatigue. The batsmen would be Australia in long-distance cricket. It is true that on three successive occasions we have got good scores having bowled as good as they have, but after the one failure, Chalmers and French made that first wicket stand and both played well.

The Last Test. As regards the last Test, it was attended by 15,000 people and had Australia been playing the ground could hardly have been more closely packed. On the Saturday, in fine weather, the West Indians scored 164 and made 238, the highest yet scored by them in a Test Match. They started well and before the first batsman was out 90 runs had been scored, but after that one failure, Chalmers and French made that first wicket stand and both played well.

In a contest when England led visitors with some quickish bats, the West Indians were helplessly beaten—ran runs were made, but after that one failure, Chalmers and French made that first wicket stand and both played well. In a contest when England led visitors with some quickish bats, the West Indians were helplessly beaten—ran runs were made, but after that one failure, Chalmers and French made that first wicket stand and both played well.

Visitors Handicapped. The West India group were badly handicapped by the absence of Cyril Broom, their clearest batsman, and that sort of thing—who is ordinary circumstances provides such a fall to those who join their bats to show down again. Had such a thing had, they did little in particular. It had not been a very good bowling and good fielding. In particular, it had not been a very good bowling and good fielding. In particular, it had not been a very good bowling and good fielding.

made 61 for four wickets still needed 120 to save the innings defeat with Harton (31) and now (31) in possession, and the side were all out for 129. Scott and Langford batted the wicket, the decision which appeared to improve matters. The batsmen on the day were all out for 129. Scott and Langford batted the wicket, the decision which appeared to improve matters. The batsmen on the day were all out for 129.

New I. A. W. Victoria. Unusual changes in the laws of Cricket, especially in regard to the bat before wicket, have been proposed. These proposals are intended to be adopted at the M.C.C. have sent in to various committees, asking for opinions by next month on the suggestion that the proposed changes may be put to the test during the cricket season of 1929. These proposals are intended to be adopted at the M.C.C. have sent in to various committees, asking for opinions by next month on the suggestion that the proposed changes may be put to the test during the cricket season of 1929.

That a batsman may be out for before wicket, to a ball which does not hit the wicket but for the intervention of the batsman. The batsman may be out for before wicket, to a ball which does not hit the wicket but for the intervention of the batsman. The batsman may be out for before wicket, to a ball which does not hit the wicket but for the intervention of the batsman.

There are many differences of opinion as regards the 13th proposal. Jack Hobbs considers it dangerous to interfere with the law, and says the proposals would not only affect country but also cricket where the scores are often very high. "I think," he says, "it would be better to widen the wicket, but I would not be averse to giving the proposed new law a trial." C. B. Fry declared that the 13th law had nothing whatever to do with high scoring, and that any alteration would give rise to a serious case. "What we want," he said, "is the introduction of the high-pressure atmosphere of a test match into all county cricket."

SAYS A MEN'S CLOTHES EXPERT:

"Half the secret of well-fitting evening dress lies in the fit of the trousers that undermatch it. Any man who isn't certain about his clothes knows this is true."

It is because Consulate Dress Shirts are tailored to the figure so faithfully that you find a growing number of well-dressed men buying them regularly and refusing all others.

Such close-fitting comfort they say, such immediacy of style! Such extraordinary resistance to laundry wranglings! And such remarkably modest prices!

Backed by all good houses throughout East Africa.

TENNIS IN TANGANYIKA.

The Champions of the Territory.

The Tanganyika Lawn Tennis tournament started on August 23rd and throughout was won by the Railway XI. The weather was very hot and the matches were postponed to Tuesday, August 24th. The number of people was quite good many people from the surrounding districts were present and the standard of play was in no way below that of previous years.

Men's singles.
The champion of the tournament was won by J. S. D. who beat W. J. Smith in the final set. The match was a very close one and the Railway XI was victorious in the final set.

Men's doubles.
The champions were J. S. D. and W. J. Smith who beat M. S. S. and R. S. S. in the final set.

Women's singles.
The champion was W. J. Smith who beat M. S. S. in the final set.

East Africa in London

Personal Notes and News.

Old Scotch Rare in Quality

ESTD 1860

Crawford's LIQUEUR

SCOTCH WHISKY

London, Aug. 14.
 Mr. Friday Hume M. P. has spent the previous time performing an arduous session of the last land in the present time suffered from Harsh winds and by use of the making satisfactory progress. However, will however, take some time.

The Report of the East African Power and Lighting Company Limited, which was formed in 1912 to acquire electricity undertakings in the Province of the East Africa, was published this week. It is an interesting note that profits have been made on a continuous, increasing scale, but the initial dividend of 8 per cent has not yet been repaid. The distribution is, however, on the 1920 and 1921 at 8 per cent. A comparative table is given of the operations of the company's business during the past three years, as set out which follows, in following order:

The Times, London, Aug. 22.
 It is stated that the new local attention to the Railway Freight War in East Africa. It states that a correspondence has brought to the attention of the public this which does not up to the present has been generally the effect of violent changes in railway tariffs on the East African continent.

As a result of the recent visit to the port of Mombasa, East Africa, it is stated that the railway rates in London, a report describing the work for improvement has been done up to the committee of Joint East African Board. In view of the great of trade the question of adequate port facilities is of great importance, and the following are some of the recommendations:

Water facilities for loading and unloading ships, with additional cranes.
 Increased storage for both in and out of the port.
 No further land to be situated which may be required for the port.

Water facilities for Customs and Excise for passenger luggage.
 A proper supply of drinking water.
 Houses, buildings and police quarters.
 A permanent police force.
 A permanent hospital.
 A permanent school of the anti-venereal apparatus.

The East African office will continue to be the headquarters of the East African and very little is happening. Among other things, Mr. M. P. Hume, Mr. V. A. Wilson, Mr. M. P. Hume, Mr. P. O. Standard, Mr. M. Hume, all of Kenya and Mr. M. Hume, of the Administrative Service in Nairobi.
