The Near East.

Austrians Still Nervous.
 PEACE PRELIMINARIES.
 (Reuters Special to "E. A. Standard," London, May 15)

The international blockade of the Montenegro and Albanian coasts has been raised. Reuter's Agent at Constantinople reports that the suspension of hostilities between Turkey and Bulgaria has been prolonged to the end of May.

Vienna, May 15.
 The Austrian military authorities are not altogether satisfied with the situation in the Balkans consequently the removal of the reservists will proceed gradually. Only a third will be permitted to return to their homes.

The French Press discusses with apprehension Turkey's negotiations with Great Britain and Germany and particularly the policy which is ascribed to Germany of the Baghdad Railway. The Press emphasizes that the French have the predominant interest in Syria.

Reuter's agent at Bulgaria reports that Hungary has formally accepted the award of Adakaleh in the Danube river near the Iron Gate. This was held to be a victory of the Austro-Turkish agreement of peace. Hungary is the beneficiary of the award. The award was given to Hungary by the Austro-Turkish agreement of peace.

Reuter's agent at Constantinople reports that the Austro-Turkish agreement of peace is being discussed in the Turkish Press. The Turkish Press is generally favourable to the agreement. The Turkish Press is generally favourable to the agreement.

RUSSIAN MONTENEGRO FOR MONTENEGRO.
 (London, May 15)
 Reuter's agent at Constantinople reports that the Russian Government has submitted to the French a bill granting £100,000 for the assistance of Montenegro.

THE BALKAN PEACE CONFERENCE.
 London, May 15.
 The new Balkan Peace Conference assembles at St. James Palace on Monday. Sir Edward Grey yesterday received three of the Turkish delegates and the Bulgarian delegates including M. Tansel, the chief Bulgarian delegate.

The Canadian Navy Bill.
 THIRD READING PASSED.
 WILL THE SENATE REJECT IT?
 Ottawa, May 15.
 The Canadian Commons has passed the third reading of the Navy Bill. The Opposition opposed the closure motion no further and reintroduced the amendments they submitted previously, including their demand for an annual Appropriation Bill, instead of a lump sum of \$5,000,000 dollars. All of these amendments were rejected. The motion of Sir Wilfrid Laurier to suspend the Bill for six months was defeated by a straight party vote. The Bill passed its third reading. The Senate takes up the Bill next week. The Liberal Press is now less confident of its rejection by the Senate.

Canadian Support for Capt. Scott's Family.
 Ottawa, May 15.
 Premier Borden has announced in the

NO SHOOTING ALLOWED on Sabuga Valley Farm - Bounded by Messrs. Plimmer, Joocoo and James' Estates.

Nairobi Municipal Committee.

A DIFFICULT POINT.

A meeting of the Nairobi Municipal Committee was held at the Veterinary Dispensary on Tuesday afternoon. Amongst those present were: The District Commissioner (in the chair), Mr. B. Heaton, Mr. A. C. Tannahill, Assistant Engineer, Mr. H. B. Stoney, Chief Veterinary Officer, Mr. H. B. Egan, Assistant Engineer, Hon. Mr. H. G. Allen, Hon. Mr. V. A. Newland, Mr. G. A. Wood, Mr. G. A. Naylor, General Manager of Police, and the Town Clerk (Mr. J. A. Wilson).

The minutes were taken as read. Arrangements of the meeting were reported on. It was decided to refer the matter to the Veterinary Department. The Town Clerk stated that no new road would be laid out to the station. It was decided to refer the matter to the Veterinary Department. The Town Clerk stated that no new road would be laid out to the station.

Mr. Tannahill held that they were far more likely to have a sanitary latrine in the house where the building covered the whole plot and had two fridges.

A BUSY THOROUGHFARE.

Congestion of traffic in Station Road was then discussed. It was suggested to write to the General Manager of Railways, pointing out the congestion and asking him to widen the road and to lay down tram lines to the road and to lay down tram lines to the road.

SHOCK MURDER.

The case of the murder of a woman, who was shot in the street, was discussed. The Town Clerk stated that the woman was shot in the street.

NAIROBI TOWN PLANNING.

After the case of the murder, the following recommendations of a committee were presented: The committee recommended that the Town Clerk should be asked to prepare a plan for the town.

MARVELS OF CONVENIENCE.

They may be had near home from the following, or any other high-class store. Oxo Cubes contain in exactly the same proportion the stimulating extracts of beef which tone up the nervous system, aid digestion, and the rich, nutritious protein which feeds the body, and gives strength, vigour, and health. They are used as well outdoors, or in the distance journeys, as in the home.

Several other members detailed the question, and it was decided to remove the last portion of the rule and substitute "service" for "passage".

Mr. Allen held that no building should be allowed to be erected without having proper provision for a sanitary passage. He contended it was as necessary in the case of places where the water borne system was used, other for the purpose of removing refuse as when it was used.

Mr. Tannahill held that they were far more likely to have a sanitary latrine in the house where the building covered the whole plot and had two fridges. The question was then dropped.

Mr. Tannahill pointed out that the two new blocks on the Hill did not find themselves to sub-divide smaller than the one which Mr. Allen contended that it was illogical to make such a condition. They were prepared to divide into smaller areas.

Mr. Tannahill pointed out that the two new blocks on the Hill did not find themselves to sub-divide smaller than the one which Mr. Allen contended that it was illogical to make such a condition. They were prepared to divide into smaller areas.

Educative Expedition across Africa.

The continent of Africa is the largest and most fertile of the world's continents. It is a vast and varied land, with a rich and varied flora and fauna. The continent is divided into many different regions, each with its own unique characteristics. The climate varies from the hot and arid deserts of the north to the lush and fertile rainforests of the south. The people of Africa are diverse in their customs and traditions, and their languages and religions. The continent is rich in natural resources, including minerals, timber, and agricultural products. The discovery of oil in the Middle East has opened up new opportunities for the continent's development. The continent is a land of great potential, and it is our duty to explore and develop it for the benefit of all its people.

Mr. Cherry Kearton.

An Eventful Career.

In another edition we give our readers some of Mr. Cherry Kearton's ideas in respect to British East Africa. Below, we present an interesting feature relating to his wonderful experiences in hunting without weapons and animals in the various places not yet of civilization. He is one of the best of the world's most distinguished natural philosophers and has been twice named amongst average animals in Africa, India, Borneo, and the Rocky Mountains and North America.

Twenty years ago he published the first book on ornithology illustrated by photographs, and since then he has issued five more. As soon as the invention of the camera had begun their studies of the natural world and concealed in birds and mammals, sometimes being taken in the hills and above, they succeeded in taking the most remarkable series of pictures of birds and mammals.

Such a great success did these pictures make in Great Britain that they were recommended by the King to give a personal appearance and lecture before the members of the Royal Society in the museum before every scientific body in the country.

Many of these pictures were not taken without risk to life and limb, for when heavy nature attacks him he has to make good the cliffs, taking moving pictures of the way they act on their nests. But adventures more daring than those of home made a trip into British East Africa for the purpose of recording the life of the African animals and birds.

Mr. Kearton does not hunt with the rifle, but he has a gun which he uses only in the most desperate cases. He has been captured by the natives and taken to their homes by means of the photographs and mounted by the Royal Society.

It is a fact that the great majority of the pictures of animals are taken and mounted in the field. The only exception to this rule is that of the pictures of the animals which are taken in the museum.

Mr. Kearton has been to the most interesting parts of the world, and has taken the most remarkable series of mounted photographs of the various parts of the world. He has been to the most interesting parts of the world, and has taken the most remarkable series of mounted photographs of the various parts of the world.

On the river Mr. Kearton's adventures were a little more of a nature, and he has spent the most of his time in the mountains and hills, and he has been to the most interesting parts of the world, and has taken the most remarkable series of mounted photographs of the various parts of the world.

MOTOR CYCLES IN EAST AFRICA.

RELIABLE AGENTS IN ENGLAND.

LOCAL FIRMS CANNOT OBTAIN SUPPLIES TO KEEP PACE WITH THE DEMAND.

Casually considered, says the "British East Africa and Uganda" would be regarded as among the best likely parts of the British Empire for a motor cycle "boom"; yet such a commercial phenomenon, though of course, of unusual proportions, is undoubtedly developing in these promising and rapidly progressing Protectorates. It is only a few years since the first motor cycle was imported into Uganda, and at the present time nearly a hundred machines are whizzed on its roads, and some importing firms even find it necessary to announce that the demand for machines is so great that they are unable to obtain supplies. The East African Press writes with advertisement of suitable machines for those who are experiencing a keen taste in endeavouring to keep pace with the active inquiry which has arisen.

KEYMER, SON & CO. WHITEFRIARS, LONDON, E.C.4.

Various types are already becoming popular, as for example, the "Royal Enfield" owing to its special suitability for general markets, an advantage being obtained instead of both drive, the latter being regarded as more liable to slip in wet weather. But the motorist is still in a plastic state, ready to adopt new patterns and to meet local conditions, and the introduction of suitable machines, at present unfamiliar, may therefore be undertaken with confidence. Most of the types hitherto introduced have ranged between 2 1/2-h.p. and 5-h.p. for solo use, to 8-h.p. and 10-h.p. for side-car machines with side-cars, but on both and still rules can be had for a model like the "Royal Enfield," which weighs only 90 lb. and gives a very moderate petrol consumption, which, indeed, being a distinct advantage when the necessity arises for rough obstructions met with on colonial roads, and in like manner, a single power for side-car work in the most severe conditions. It may be taken for general conditions that, to the routine use of the country, machines should possess exceptionally strong frames and sharp curves, and the fact that models like the "Royal Enfield" have been popular have been especially designed with a view to these conditions, ensures their popularity in the market.

THE ATTENTION OF MESSRS. BARNES AND HEATON, who would not wish to have the special design advantages and the substantial and well-finished work, could be recommended.

In a few years, owing to the swift advance of civilization in the great and fertile plains of British and German East Africa, the vast herds of antelope and game will soon have disappeared, the elephant is already diminishing, and the lion, which was once only heard in the bare spaces of the Zulu and Bechuanaland, will soon be seen only in the bare spaces of the Zulu and Bechuanaland, and hippopotamus will only be remembered by the pictures of their unimpaired shapes in natural history.

It is of tremendous interest to posterity that concerted and well-directed efforts are being made to bring into the world, as unimpaired, and moving in their natural haunts.

It is a sign of progress that attention is being directed to British East Africa to save, whereby the inadequate water supply for agricultural purposes may be secured by the construction of dams. It is, however, says the "British and South African Exporter," whether the local conditions favor there could be anything to improve upon the wind motor, pump, the progress of the new dam in South Africa, where conditions are in many respects identical with those in the Protectorates, is an example which could well be copied in some parts of the Union, where yields are as much as 200 tons of 80,000 gallons per acre at a depth of 50 to 60 feet, and there is every reason to believe that similar results could be obtained in East Africa.

The attention which has been paid by both the British and American engineering firms to the construction of an apparatus invariable in form in all parts of the world, and the simplicity of its construction, and its all-round utility, is a fact which is being recognized by the insufficient rainfall or absence of streams. The only serious trouble is that of boring wells, which is being done by the use of Government drills. With a large demand for artesian wells, however, private contractors for boring operations would amply justify themselves.

COUGHING PLANT. A French botanist claims to have discovered a plant that actually coughs. The plant, which is found in tropical regions, possesses the power to cough in the most approved fashion. The fruit resembles the human larynx. It appears that the coughing of a crane that it only works itself into a rage, and that it has a curious horror of all dust. As soon as a few grains of dust are deposited on its nose, the air chambers that cover their faces and are the respiratory organs of the plant become filled with water, and end by driving out the gas with a sharp explosion, and a sound that resembles so much the cough of a child suffering with a cold.

Beekeepers' Association.

A NINE MONTHS' REVIEW.

A general meeting of the Beekeepers' Association of British East Africa was held on Monday, 12th July, at the residence of Mr. Hunt in Nairobi. The meeting was attended by Messrs. Hunt, Hunter, and Hunter, and Mr. Hunter, Secretary. The Chairman, Mr. Hunt, opened the meeting by referring to the success of the Association in the past nine months. He stated that the Association had been very successful in its work, and that the members had been very active in their work. He then referred to the various matters which had been discussed at the meeting, and to the progress which had been made in each of these matters. He concluded by expressing his confidence in the future of the Association, and by thanking the members for their support and assistance.

The chairman thought that it was a pity that the members had not been more active in their work. He stated that the Association had been very successful in its work, and that the members had been very active in their work. He then referred to the various matters which had been discussed at the meeting, and to the progress which had been made in each of these matters. He concluded by expressing his confidence in the future of the Association, and by thanking the members for their support and assistance.

NAIROBI HONEY EXTRACTORS.

A large number of men attended at the meeting of the Nairobi Honey Extractors. The chairman, Mr. Hunt, opened the meeting by referring to the success of the Association in the past nine months. He stated that the Association had been very successful in its work, and that the members had been very active in their work. He then referred to the various matters which had been discussed at the meeting, and to the progress which had been made in each of these matters. He concluded by expressing his confidence in the future of the Association, and by thanking the members for their support and assistance.

AN ASPHYXIATING FIREARM.

The Paris Police have made use for the first time of the asphyxiating revolver, which was recently invented by the subject of overeating criminals offering poison. The revolver was used in the case of a young man who was found dead in his room. The revolver was found in the room, and it was found that the man had been shot in the head. The revolver was found to be a very dangerous weapon, and it was found that the man had been shot in the head. The revolver was found to be a very dangerous weapon, and it was found that the man had been shot in the head.

A Sanitation Expedition to Visit B.E.A.

We learn officially that Professor G. C. O. is a member of the Advisory Committee to the Secretary of State on sanitary matters in Tropical Africa. He is now in Nairobi on a tour of inspection. He is accompanied by a number of experts in sanitation. They will be visiting various parts of the country, and they will be reporting to the Secretary of State on the sanitary conditions in each of these parts. They will also be advising on the measures which should be taken to improve the sanitary conditions in each of these parts.

An Exciting Incident.

When the Makallah arrived at the Harbour on Wednesday, Mr. Hunter was anchored in midstream, ready to receive the cargo. The cargo was found to be very heavy, and it was found that the ship was in a very bad state of repair. The cargo was found to be very heavy, and it was found that the ship was in a very bad state of repair. The cargo was found to be very heavy, and it was found that the ship was in a very bad state of repair.

A Solving Handicap.

The Solving Handicap was a very interesting race. It was a handicap race, and it was very exciting. The winner was a very good horse, and it was a very good race. The winner was a very good horse, and it was a very good race. The winner was a very good horse, and it was a very good race.

Have you tried them? If not Why not? Obtainable at all leading firms in British East Africa, Uganda and Zanzibar.

(Holland) ESTABLISHED 1854. Parveyors to the Royal Family.

against them compelling stay of the Lushai Masses and their stock to move from the said Lushai district.

YI. Costs. The above reliefs with the exception of No. 5 are claimed against the Crown and the defendants on the grounds that the Government having by the 1904 agreement become trustees for the Masai, they failed to execute their trust but entered into another agreement in 1911 contrary to the former one and thereby to the interests of the former owners of the land and that the latter agreement was obtained by duress, and is further null and void as it was not received with the approval of the tribe, and that the losses they allege they have suffered are due to the Government executing the terms of the second agreement in violation of the first which still continued to exist.

The acts of defendants complained of by the plaintiffs Acts of State. The answer to this is in my opinion contained in the fact that both the agreements are in fact treaties. For a follow from that finding there was no null and void contractual relationship as alleged between the parties, and that in this action the plaintiffs are seeking redress of the Court to enforce the provisions of a treaty. The paramount chief himself could not bring such an action still less can his people. Feather v. Queen 83 L.R.Q.B. 208 and Burrow v. Donnan 2 Kiebbey.

As respects the plea of duress and the want of approval of the tribe to the second agreement, the defendant's contention is that the plaintiffs' compliance with the provisions of the second agreement, having had the agreement to be a treaty, could not be said to be a treaty, and that the plaintiffs' signature of the said "porcupina" before his signature or a want of authority on the part of the signatory.

As to the alleged losses incurred by the plaintiffs, they themselves plead that defendants 22 and 23 were the agents of the Government acting in pursuance of the orders of the Government or Secretary of State in carrying out the second agreement, which pleading is accepted by both of these defendants in their defence. Such an action as against them is founded on tort and will not lie, and their acts in carrying out the terms of a treaty having been on instructions from, and adopted by the Government as such Acts of State as the treaty itself. Belief V claimed against these defendants for similar reasons as not one that this Court could not be said to be a treaty, and that the plaintiffs are in fact Acts of State which are not cognizable by a municipal court.

I hold, therefore, on the issue before me that the acts of the defendants complained of by the plaintiffs are in fact Acts of State which are not cognizable by a municipal court.

The Crown acting through its Commissioner first made one treaty with the Masai, and subsequently acting through the Governor modified that treaty by another, and I cannot do better than adapt to the terms used in the concluding words of Lord Kingsdown in giving judgment in the Privy Council in the case of S. of S. for India v. R. B. Bahab (XIII Moore 221).

"It may have been good or unjust, 'sollicite or impolitic, beneficial or injurious, taken as a whole, to those whose interests are affected. These are considerations into which this Court cannot enter. It is sufficient to say that even if a wrong has been done, it is a wrong for which no Municipal Court of Justice can afford a remedy." The action is dismissed with costs.

(S2) R. W. HAMILTON, Dated 26th May, 1913.

Nairobi Vigilance Committee.

A Public Meeting of Citizens of Nairobi will be held in the Assembly Rooms, State Avenue, on Thursday, the 5th June at 3 p.m.

CYCLE CARS.

This vehicle has so far completely failed to fulfil the wonderful promises which it made last October that the makers of cheap ones have stopped manufacturing.

For a cheap two-passenger motor the Motor Cycle and Side Car combination is still the best. What has come forward however is a vehicle which will undoubtedly create a stir. This is the perfect Motor Car in miniature. Of this class there are several makes, some dangerous because cheap, some however of most deserving excellence.

One of our firm is at present inspecting and testing in England the various makes, and next week we intend offering you — REMEMBER not a Cycle Car but a LIGHT CAR Of English make.

J & M CRAE Ltd NAIROBI.

Uganda Railway. Steam Coal.

TENDERS are requested for the supply of good quality Nalot or Traversal Steam Coal for use on the Uganda Railway.

- 1. Consignments may be in quantities of:— a) Shipments of 2000 to 10,000 tons of which there shall not be more than one shipment in any one month. b) Shipments of 1,000 tons of which there shall not be more than one shipment in any one month. c) Shipments of 500 tons of which there shall not be more than one shipment in any one month.
2. The Coal must be stacked at the places appointed, or loaded into trucks as the General Manager may consider to be most expedient.
3. Tenders should be addressed to the General Manager, Uganda Railway, Nairobi, and must be in duplicate.
4. Payment will be made either by actual weight per wagon passed over the weighbridge, or by a method of measurement to be mutually agreed upon.
5. Tenders should be made either by actual weight per wagon passed over the weighbridge, or by a method of measurement to be mutually agreed upon.
6. Delivery must be effected from lighters, hoisted ashore, or by means of the Uganda Railway, and must be made in accordance with the conditions of delivery.

13. Payment will be made either by actual weight per wagon passed over the weighbridge, or by a method of measurement to be mutually agreed upon.
14. Delivery must be effected from lighters, hoisted ashore, or by means of the Uganda Railway, and must be made in accordance with the conditions of delivery.
15. The total quantity of coal to be required will not exceed 10,000 tons under this Contract.

The School Closed.

The Nairobi Government School has been closed indefinitely upon medical advice. It appears that three of the natives employed at the school staff were found on Thursday to be suffering from cerebro-spinal meningitis. It is considered that the school staff were in contact with the children, some of the patients, and the teachers are being vaccinated with the vaccine prepared by the Government.

A brilliant from S. Pictorizing
Irregular Queen's Pawn opening

White: Arlethen Black: H. Lovenscheit

- 1 P—Q4 Black
- 2 P—Q2 (1) Kt—KB3
- 3 P—K3 (1) P—NK3
- 4 P—K4 Kt—Q2
- 5 P—P3 P—Q3 (1)
- 6 P—K5 P—P3
- 7 P—K6 Kt—K5
- 8 P—K7 QN—K4 (1)
- 9 P—K4 Kt x Rch (E)
- 10 P—K4 Kt—B2
- 11 P—K4 Kt x Rch (E)
- 12 B—B1 Q—K3
- 13 Q—K2 Q x P (1)
- 14 N—K5 (1) Q x Bch (1)
- 15 B—B2 Q x R
- 16 R—Rch K—Q4
- 17 R—Rch B—Q2
- 18 Q—Qch B—Q2
- 19 P x B Resigns (1)

(Solved by J. P. Lawrence.)

1. An old defence that has latter's come into vogue again. The only merit that it can boast is that of throwing both players on their wits, and against this must be set its burdensome pressure on Black of the opening.

(B) P—Q4 is the usual play, but we prefer the move in the text.

(C) A necessary precaution. If, for example, B—R2 White could give P—K5, P x P—R—K5, or P—K4 with

(D) P—P3 then P x P—R1, Kt 10, Q x K4, Q—K4, B—B4, Kt—K3, B—B4, and P—Q4, 15 R—K5, Kt—K4, 16 Q—K2 would be met by P—K4, Kt—K4, 17 Q—K2.

(E) A misnomer. Black's development is too backward to allow of such a permanent. Comparative, but B—R2 for example R—K2 White quietly continues

(F) Black has vain hopes of a check, but P—K4 and P—Q4 should win without much difficulty.

(G) A brilliant stroke.

(H) The line offered, but in any event 16 Rch—R, 17 R—R, 18 Q—Qch, etc. For or Rch—P White plays 20 B—R6 and note cannot be avoided.

Local Chess News from 'Old Secretaries' will be welcomed.

Magnificent Business Opportunities
Fixed Rent
Certain Profits

Every Merchant should Own a Plot.
No speculator can afford to miss the Sale.

Further particulars will be advertised in due course or may be obtained from the Auctioneers.

Newland, Tarlton & Co. Ltd

The Motor Industry

Lake Magadi.

A gentleman from Nairobi writes as follows from (Chicago to a friend, who has a large interest in motoring—
I've got to the motor making district in Michigan, (Lansing), etc. I've never before seen a more wonderful sight than the large factories engaged in motor making and all I have been built up in so short a time. Without exception, all the makers are full up with work with their output well up to the mark. Extension is being put on and so great activity everywhere.
I saw through many of the large places and was much impressed with the wonder of machinery I saw there. Some machines were almost human intelligence doing delicate work. Turning out small things, being intricate and all other important parts of a car to a fourth part of an inch.
However, what I was most interested in was the modern machine called the Cycle Car. I visited many of the makers of this light car. What I found was everywhere experimenting—Many machines had been made but without success. All the new cars are at the moment untried. There is not one without some serious defect, making it entirely unsuitable for use. The trouble is that they all seem to be made in a cheap vehicle, and being it at a low price—more part has to be sacrificed. Some time it is a two cylinder engine, sometimes both or chain or belt transmission, and all of these are bound to give trouble. Up to £145 or £150 some machines had one or more weak points and I saw the light sky and I thought that was a motor of that price were at least a good one would work for the money but a something better than an apology for a motor car. So I did not buy any cycle car.
But there is something else new and it is a light car. Now this must not be confused with the cycle car. There are at least two makers of the light car in existence. The Standard and the Light. I visited both places and when they light car I fell in love with it at once. In every way it is just a duplicate of the Standard, but a big machine, very strong and it is made with just as much care and attention as the parts of his big motor. The frame is steel pressed the engine is a cylinder, thermo-siphon cooling, overhead valves, automatic hot and cold gear box, 4 speeds and reverse, high tension ignition, heavy front axle, wheel clearance 14 inches, track 40 inches, 19 inch steel spoked wheels with 7 inch tyres. The English price is £185 and includes 2 seat body, high side doors and gentle dash, hood, wind screen, 50 miles of best quality, one spare steel road wheel with tyre, full set of tools and accessories.
Now this car weighs about 12 cwt. at a very easy to run, 40 miles to the gallon, and will do 40 miles an hour, and is very light tyres. It is made of good, strong materials throughout and will stand the hardest car in East Africa gets. It is a wonderful car, having no slipshod parts about it in any way.
I had some very delightful spins on both the "Standard" and the "Light" and was much impressed with the flexibility of the little engine, and the quietness and way running.
"Altogether it is just a sweet little car and I thought as many of them as I could get for this year. The first of them will be out before I get back and I trust you will have an early opportunity of having a run on it and testing it for yourself!"

Says Lord Cranworth in his book recently issued—
In a normal condition it appears as if it has been frozen, and that thin snow-like film, and the snow has then partially thawed and frozen solid again, giving that surface effect. The temperature gives the ice to the appearance of ice, so the water is through and on the lake in midday almost subsides. The soda forms the best light for all the world like ice-cream, will pour there is a layer of water over the greater part, giving the water a wonderfully beautiful appearance. By moonlight the water is like a mirror, and never to be seen one can almost swear to a gentle swell. It is estimated that the lake consists of composed almost equally of carbonate and sulphate of soda in the natural state, ground streams fed by surface and underground water, and soda liquor. Not only is the present supply of soda enormous in itself, but its place is taken as fast as it is removed by the new salt formed from the "mother liquor" remains. Native soda is the same spot year after year, whereas the slightest difference in the abundance of the supply. The company formed to work the deposit hopes to remove at least 100,000 tons per annum.
"Running, as it does, throughout the great game reserves, the Magadi Railway faces a distinct handicap in that the game is very numerous, and has a tendency to time given trouble to the collectors by carrying off working cars, although as far they have not succeeded in causing the ruin of the car which existed at Tavo during the construction of the main line, they are, however, very bold, and are frequently seen with near the employees' camps, and even approach the settlement at Magadi. At Junction, the point at which the new line branches off from the Uganda Railway, lions and giraffe are frequently seen, and the motor trolley used by the railway officials has more than once had to be pulled down in order to avoid a collision with them.
"The telegraph wires were propped up by a giraffe, whose neck became entangled in them. The water supply has proved a case of some difficulty, and expense to the builders of the line. For example, the water used at mile 81 is brought by a 6 in. pipe from a distance of forty-seven miles, and two inspectors are constantly employed in patrolling this line, the efficiency of which the lives of some 3,000 natives working at the rail head depend. The construction of the railway is being pushed forward as fast as possible, and the work is now practically completed, but the difficulty of transporting material over the single line from Mombasa to Magadi Junction is proving a great obstacle to progress."
