Two Distinct Departments
MOTORS
 AND
FURNITURE

The Furniture Department will tell you of another time.
 The Motor Department has specialised in
Motor Cycles.
 The Sole Agencies we hold are—

- The 2 1/2 h.p. Douglas 2-Speed Gear. A beautiful little Machine for runabout purposes.
- The 3 1/2 h.p. Trusty Triumph, 3-Speed Gear. A sturdy motor for general rough work. The "Get you there AND bring you Back" Machine.
- The 5-6 h.p. Clyno and Sidecar, 3-Speed Gear. Specially made for bathing side-car work, can climb anywhere, the wheels will grip.

Those three machines, each for a purpose of its own, have a reputation deservedly gained by consistent reliability. You may buy a cheaper machine but surely it is a significant fact that more Trusty Triumphs are to be seen here than any other make.

We hold stocks and generally supply without delay. Spare parts there are plenty of and fresh supplies always arriving.

Motor Cars.

Our endeavour is to convince potential buyers that English Cars, although higher in first cost, are actually cheaper than cheap cars, because—

- 1. Depreciation is much less over a period.
- 2. A Good English Car usually spends fewer days in the repair shop. This gives more utility, less worry, and so better value.
- 3. The car of quality lasts longer.
- 4. The great satisfaction derived from the ownership of something really good.

The car we are selling is
"The All British Standard"
 in various models.
 The Standard Lightcar is now coming forward in quantities and interested parties should lose no time getting in touch with us to secure early delivery.

Catalogue and particulars of those various makes of motor cars we will send on request.

Interview with Captain Grogan.

The London correspondent writes as follows on an interview he had with Captain Grogan—Captain Grogan will leave England on the 27th for the "Lancashire Castle" on the 27th, and his interview was held on the 26th. He is a thoroughly practical man, and his views on the future of the Protectorate are of great value. He is to look after the interior of the Protectorate, and he is to be in charge of the interior of the Protectorate. He is to be in charge of the interior of the Protectorate. He is to be in charge of the interior of the Protectorate.

Manufacturers installed in Proteles and Johannesburg principal centers of manufacturing. The smaller firms could compete successfully against such a group of big concerns as Lever who have capital of £2,000,000 for South Africa, because the latter had to pay extra railway over a distance of about 200 miles on the Bechuanaland, and incidentally on the surrounding portion of water contained in the enormous space an expenditure would be about the same as that of the result? Messrs. Lever have purchased a factory in Johannesburg. The advantage of having a factory in principal manufacturing districts are therefore manifest. The value of over £1,000 for soap imports here is very encouraging, for one who would naturally consider the industry in this country a very unimportant one, and a soap-making industry, since with the necessary machinery may be relied upon to increase. Moreover, the water, as the water more and more into contact with which soap will be obtained to use soap, which is cheap and makes it a very profitable industry. Now the question, what assistance would the Government render towards this project of the establishment of a factory for soap-making? Would there, this day prove adequate? To enter into an exhaustive inquiry is not the purpose of this article, but to see a neighbor as the South Africa. There is a factory of 200,000 lbs. of soap a week, and it is expected to be increased to 500,000 lbs. a week. The factory is owned by Messrs. Grogan and his partner, and it is expected to be increased to 500,000 lbs. a week. The factory is owned by Messrs. Grogan and his partner, and it is expected to be increased to 500,000 lbs. a week.

The Arctic Regions Filmed.

By PAUL HAINES
A private view of some excellent arctic pictures was seen at a private party at the Gaiety Theatre on Saturday night, when Mr. Paul Haines of "The African" came out on the screen and announced that he had taken these pictures in person. He was accompanied by a number of his staff, and the pictures were taken in the Arctic regions. The pictures were taken in the Arctic regions. The pictures were taken in the Arctic regions.

Industries for British Equatoria.

SOAP MAKING.
According to the Customs Returns for the year 1912, a quantity of 2,000 tons of soap, valued at £11,751, was imported into British East Africa. Of this quantity, 1,000 tons were used for the manufacture of soap, and the remainder was used for other purposes. The demand for soap in British East Africa is increasing rapidly, and it is expected that the demand will continue to increase in the future. The manufacture of soap is a profitable industry, and it is one of the industries which should be encouraged in British East Africa. The manufacture of soap is a profitable industry, and it is one of the industries which should be encouraged in British East Africa.

The Arctic Regions Filmed.
By PAUL HAINES
A private view of some excellent arctic pictures was seen at a private party at the Gaiety Theatre on Saturday night, when Mr. Paul Haines of "The African" came out on the screen and announced that he had taken these pictures in person. He was accompanied by a number of his staff, and the pictures were taken in the Arctic regions. The pictures were taken in the Arctic regions. The pictures were taken in the Arctic regions.

Two tons of automobile just to carry four persons? Ridiculous weight! Unwarranted expense! Of cars, the Ford is the most economical—because it is lightest and has more power for its weight. All pleasure cars of the future will have present Ford lightness.

Think what these great savings—for the car that has stood the test! Bonobus \$125, Touring Car \$190, Tourer Car \$220. Handle with an equipment, get advantage and participate from
