Concrete Fence Posts

A new ordinance will shortly be introduced in Kenya making it in many cases compulsory to erect boundary fencing

The making of reinforced concrete fence posts presents no difficulty.

They are practically indestructible

They are NOT expensive to make.

About two and one-fifth casks of cemers with four cubic yards of crusked stone and the requisite steel rods say #" thick will make 48 posts 6 feet long.

If you use the rapid hardening portland cement known as

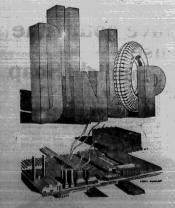

your posts can be put into position three to four days after making whereas if made with ordinary portland cement 14 to 18 days will be required for curing.

J. MCNAB MUNDELL Eldoret, July 2 1929

To the Editor, "E.A. Standard." Sir.—I am glad to see that the question of the Daylight Saving Bill is to be re-opened. The corthe correspondence in the Press, have brought to light some of the have brought to light some of the disadvantages and inconveniences that have accrued from its adop-tion. But, to my mind, the chief argument against the Act lies rather in the moral or psycho-logical sphere.

To me, Sir it appears that the greatest obstacle to the advance and development of this country is the lack of homogenisty amongst the various units of which the Colony consists. The Some to list in the staged ones and the Temperature Device to sense the stage of th

vs. the Country question. This still awaits its solution. The weakness which the absence of weakness which the absence of harmony produces was apparent in 1923. And it is because this Daylight Saving Act tends to widen the fissure between the vital elements of the population rather than reduce it, and thus postpoors the happy day when with itself and be able to promy with itself and be able to promy united front to all its foes, but welcome the prospect of its abrogation.

Apart from the many inconve-piences which the discrepancy benences which the discrepancy be-tween official and suntime ad-mitfedly entails to a large majo-rity of the population for the bene-fit of a very small minority, it cannot be denied. I think, that the cleavage of which I have spoken is increased every settler who has an une settler who has an unexpected puncture on the way to his town-ship, finds the Bank doors shut against him, or that he has tnissed ' his train; or when Jeroge, through dawding on the road, is too late are a consistent and delitiments of the colors pre-section and the colors p want half hour's additional tennis or guif in the afternoon. The the day of peace and godwill is further postponed, another piece of giri gets into the wheels, and disunity gains another victory over unity, and the next Commission that comes along will find it still harder to find out what we really want than the last one did.

Only, sir, if we do decide to alter the law, don't let us go back to the bad old days when sun time at Mornbasa was the official measured time for the whole county. That meant that Mombasa was the only and on Elgon sun time was basa sees Kenya. But now that Nairobi is the espital, and the Nairobi is the capital, and the geographical centre, of the Colony, I should like to suggest again that wan time at Nairobi be made the official mean time for the whole country. This would mean that Mombass aun time would be ten minutes earlier, and Kitales went time ten minutes later, than the time ten minutes later, than the efficial time. Nobody could ob-ject to this, and it would certain-ly be better, both in equity and convenience, than that Mombass should be first, and all the rest of

matches in a few days, but com-petitors can be assured that everything possible is done to the extraction of the companies of the analysis of the companies. The "summer time" is a great help in this connection, as it can ables two rounds to be played off on the Friday afternoon, which considerably relieves the conjec-tion in the early stages.

Ten courts will be used at the commencement of the meeting, although it will be impossible to keep this number fully occupied after the first two or three rounds.

Although, naturally, the bulk of the competitors are usually drawn from Nairobi and surround-
