## Prize Winners

Mr. Moulton especially reading these I have and says "The entries on the whole are distinctly good especially the efforts of Reginald and Norman."  
Special mention must be made to Mrs. Moulton's story of the kind little girl who longed to see a monkey at Kinnor for her cat and of Kari Koko's tale of Toy's black kitten which would not drink in one night the milk put in a white tin on its chin.

One day a lady who lived in India was playing the piano when her little kitten came and started to run round the piano. They made a funny noise but the kitten took no notice of that but went to her mistress in a strange way. Then the lady got up to see the kitten out, but the kitten ran in front of her still meowing until it came to the back door. So the lady knew that there was something in the room. She saw a light and three or four white cats with black spots. They scratched their heads very much and the lady knew that the black cat had been killed. (By special permission of the author.)

## DEPRESSION IN COTTON INDUSTRY.

Report by Committee of Enquiry.

CONCERTED ACTION NEEDED.

Recommendations for Recovery of Lost Trade.

The report of the Economic Advisory Council Committee which was appointed in August of last year to investigate the causes and remedies in the Lancashire cotton industry, has now published its report.

The report finds that costs of production in Lancashire are substantially higher than among competing countries, and emphasizes the need for concerted action by employers and operatives in the direction of a reduction of costs and increase of efficiency.

This reduction of costs and increase in efficiency is imperative if Lancashire is to arrest the decline in its exports and is to recover its lost trade.

A number of recommendations are made by the Committee including the need for a marketing system to be organized as to methods of sale for goods. It is also suggested that short stapled Indian cotton be used to a greater extent, rather than the more expensive longer stapled American cotton.

An meeting of representatives of all sections of the industry, discussed the report, and spokesmen gave an assurance that it would receive very serious consideration.

## HIGH COSTS OF PRODUCTION.

(THROUGH REUTERS' AGENCY.)  
 London, July 6.—The report of the Economic Advisory Council Committee on the Cotton Industry, August 1949, under the chairmanship of Sir M. G. Ordley, President of the Board of Trade and Secretary of State for the Colonies, has been published today.

The report states that the cost of production in Lancashire is substantially higher than among competing countries, and emphasizes the need for concerted action by employers and operatives in the direction of a reduction of costs and increase of efficiency.

A Letter from Paris.

By Edith Wood.

The printed fashion can be modified with complete certainty by the home dressmaker.

The latest fashions have for some time past been taken from the Parisienne. It is a fact that the most beautiful and the most successful of the Parisienne is the woman who is able to make her own dresses.

There is no doubt that the Parisienne is the most successful of the dressmaker. She is able to make her own dresses and to make them in the most beautiful and the most successful manner.
