CELEBRATION IN RUSSIA.

Fete Day in the Capital.

THE TSAR OVATED.

En route to the Cathadral the strests were througed with thousands of the "Little Pathers" loyal subjects who tomoltomaty ovrated their Mjasties. The troops lined the spacious thoroughfares, bells were rung in harmonious mealage of selecone, royal subtree were fired, and flags were frantically waved by the jubilant people. A striking assemblage of all the great dignizaries of EnPetereburg, including needless stile, beltifons and military.

including coclesiastics, politicians and military and civil personages of importance, were present at the coremony at the Cathedral. Following-the service at the Cathedral, at which the "Te Devem" was sung, salutes were fired by the artillery and their Majestics returned to the Palace, being greated along

London, March II Private discount is at 42 per cent, which is nearly that of the bank rate. This is an unusual condition for this season of the year but no increase in the Bank of England rate anticipated for the present.

is anticipated for the present. The present stringeoup of the money marked is due to the exceptional accumulation of taxinoney, whilst the high level of the discount market rates is accounted for mainly by international reasons, notably the hoarding of gold in Germany and France. In view dite contingencies of the extraordinary moser, pressure in Germany and Austria there is a resulting record of note circulation for the loan programmes of Germany, France, the Balkans and also China.

DR BUREITT'S EVIDENCE. EXPERT'S TECHNICAL ADVICE.

The second sitting of the Sanitation Com-The second sitting of the Sanitation Com-mittee was held at the Native Dutries!

In the Sanitation Com-page 19 of the Sanitation of the forward, Dr. Burkitt thought that the

sion of disease and sickness in Nairobi is a proper sence system, the open them as a saintay conduit for the reflexival of super-fluous water was out of the question. The only saintay method is for the Municipality-to control an efficient underground sater-drainage system, with sufficient water flow-ing to flux this sewiest and prevent obstruc-tion. The double bickes system is not a good seek but it is the best under prevailing: has become of increasing importance size and yet the greater portion of it is red with jungle which collects water and paratively good.

WATER SUPPLY

The most important point in the elimi-ation of disease is the purity of the water nation of disease is the purity of the water supply. The source of Nairobi's supply is not uncontaminable and the amount of water could be decreased where the pres-sure of the supply is broken and should be very strictly protected at this spot; and all persons should be prohibited admission at EAST TOWNSHIP SITE.

I think the site an admirable one but too far; it should be under the control of the Municipality so that the erection of suitable buildings only should take place.

A TALE-AND A MORAL.

The youthful hunter talked a lot. By all the gods he swore
He'd cause a thousand animals
To welter in their gore.
(Of course he'd never killed a cat
Much less a lion, before.)

The big game bunter smiled a smile.

The big game bunier similed a smile.

(His smiles were grim and few)

"My boy" quoth he in kindly tones,

"Talk less of what you'll do.

I fancy that's the best advice

That I can give to you."

Not (ar away a lone tree stands. (In fact, 'tis on the Plains.) And there our youthful boaster sought

The refuge it contains.

And there, for aught that I can tell,
The hunter bold (?) remains! Now, if a moral be attached

It is, don't boast of game exploits
In wildest B. E. A.
There always is the chance, you see,
That you may run away!

Besides, a lone tree may not be Within your reach some day!

MARKING CATTLE AND SHEEP

The modern tendency in marking animals is for branching to be replaced by horus stamping and ear-punching or notching. One great disadvantage attached to the system of branching is the consequent depreciation of the hide.

of the nade. Ear-punching and notching is especially useful in the case of sheep, where accuracy in tracing pedigrees is required. It can o course be used equally satisfactorily in the case of cattle. Irranding in the case of eath has the advantage that the animal need no e handled in order that its mark may

umber in the ear, is in vogue, but the stu very liable to be torn out as the anima azes or rubs its head

A convenient system of notching and unching is indicated in the following dia-ram, which is an outline of an animal's end viewed from the front.

LAND TENURE.
