No one should buy a Motor Car without a demonstration.

In these days when true economy and wise investment are so important, no one should buy a motor car without thorough demonstration. What will this car do on hills? How does it get away in traffic? How readily a top gear car is it? Does the car steer lightly and does it have positive, silent, powerful 4-wheel brakes for safety? Does the car have an unspatterable glass windscreen and strong steel body and front and rear bumpers for the safety of its occupants? Does the car ride comfortably over all kinds of roads? Does it combine swiftness and ease of handling with safety? What is the car's petrol consumption?

What does it cost for insurance? How long will it last? What kind of conventional facilities stand back of it? Is the car safe and easy for a woman to handle? We invite the strictest possible investigation of the new Ford cars. Study their design. The Ford cars are made of the best materials and methods that are employed. The sincere dealer will show you Ford cars always commended. Careful motor car investment is necessary today. Inquire for record of extraordinary profitable motoring. Ask now for a thorough demonstration and explanation of the new Ford car.
