A report has been received from the Director of Agriculture stating that the cotton erop now approaching harvest is not going to be such a good one in the Uplands. coing to be such a good one in the Uphards, where it is cultivated principally by Euro-pean planters, and the crop has never been so late. The conditions on the Shire River, where the industry is carried on largely by native cultivation, are most promising, the area under coulen is larger than in any pervious year, and the rath is independent on the native cultivation of the control of the native copy, but acme decrease in the total European erou.

The tobacco industry is making great progress in Nyasaland and it is estimated that the Protectorate will this year saport 4,000,000 lbs. of cured tobacco, or nearly 6 per cest. of the total average consumpt in of Great Britain. It is understood that one of Great Britain. It is understood that one of the reasons why tobacoc cultivation has made such rapid progress is that the planters are able to realize their produce quickly and the Association are accordingly arranging to purchase cotton outright from any planters who wish to sell their crops.
