TANGANYIKA REPLY TO

To the Editor, "E.A. Standard. Sir,—The evidence of Sir Do-nald Cameron as given before the Committee of the Joint Houses of Parliament will doubtless occasion surprise if nothing else, but we here in Tanganyika have been under this curious re-gime since 1924 and we rather come the fact that at least and by his own word of mouth, his sets and motives may be judged by all, not merely by the people he governed in Tanga-nyika.

He states that in 1928 the protection of the natives for ex-port was 1,800,000.

Non-native production in 1928 for export was £1,810,000 or £10,000 more.

There are approximately only 1,500 non-native producers who setually produced or caused to be produced, this result.

There are 5,000,000 natives Tanganyika and yet the result of export test brings their pro-1,500 non-natives.

One would think that logic the smaller number were at least of some economic, or other, im-portance in Tanganyika. Sir Do-nald Cameron "disarrees". Strangel

There were about 290 people present and as Sir Donald Cameron stated that he was not in the habit of speaking at a public meeting, a selected number of, I think, six persons were invited. to discuss matters.

Shorthand notes of the pro-ceedings were taken officially but on examination it was found that definite and very important statements made by the Moshi representatives had not been in-eluded and that certain very em-phatic expressions made by Sir Donald Cameron were also not in

The document was corrected and sent for approval to Sir Donald Cameron. He refused to accept the corrections, and stated that he absolutely forbade all publica-

Of course, I feel I must add that I trust the camps of all con-tractors of all communities are visited alike, and that all mightbe offenders should be similarly brought before the Court, re-gardless of race, and that la-bourers on all camps, should be clearly given to understood, that they must not be afraid to lodge their complaints to Labour In-spectors, whoever or whatever their respective employers may be; again regardless of race. That may be important.

The section of the Native Af irs Department under Me Imbert, is worthy of congratula-tion from all, and of ferven thenks from many for the for bearance it shows in taking sction against even potential delinquents who fail to submit Labour Returns.

Though I am against the Re-gistration of Natives (the lipindi) system to a very large extent which I consider introextent which I consider intro-duces class distinction and declines towards adornment of badges of slavery and against the Domestic Servants Ordinance involving new taxation, and the likelihood of exploitation of natives, I do not blame the Na-tive Affairs Department for those
