WAVE OF OPTIMISM IN BRITAIN.

Feeling that Worst is Over. HEALTHY SIGNS.

It is hoped that this feeling of optimism will continue, although the Government authorities have expressed an opinion as to the outlook for the world and over-optimism and perhaps also a reluctance to spend would be a great deal of harm at the present time.

Whether it is the spring in the New York Air Line, it is not clear how far there is a definite wave of optimism sweeping the country at the present time, and the same may be said in fact every-where in the world.

There were of optimism started last week with the announcement of the Chancellor that £80,000,000 of the United States loan had been agreed to be paid that week while the people obtained from France bankers would be reduced from £20,000,000 to £7,000,000.

TANGANYIKA RAILWAY TARIFF.

Raised to Meet Full in Revenue.

MAJN FEATURES. Adjustments in the "De-Demon" Rates.

As a result of some of the Tanganyika Legislative Council (says "The Standard"), a memorandum was laid on the table containing the financial position of the Tanganyika Railway.

The railway memorandum, the following statements are made: "The railway policy adopted in the development of a country, particularly one being charged with a heavy load, is being changed largely for London.

The General Manager stated that while the railway is progressive and profitable, it is being hampered by a heavy depreciation and a large number of costly items of the type of the railway. The General Manager stated that while the railway is progressive and profitable, it is being hampered by a heavy depreciation and a large number of costly items of the type of the railway.

They are smartly fashioned, beautiful to look upon, and are the choice of smart woman everywhere.

Increased Rates.

The Acting General Manager stated at the outset that, as a result of the fall-off in railway revenue in Kenya which has been apparent throughout the year, the Tanganyika Railway has been advised to raise its fares.

The Acting General Manager stated at the outset that, as a result of the fall-off in railway revenue in Kenya which has been apparent throughout the year, the Tanganyika Railway has been advised to raise its fares.

These proposals and some of the details that will be referred to in this column will not meet revenue in any other cases. The Tanganyika Railway did not, therefore, propose any other increase of fares. It is understood, however, that the Kenya and Uganda Railways will also be affected by the proposals.

The most important suggestion of the memorandum is the proposed increase of the rate of freight from 30 shillings and 10 pence to 40 shillings and 10 pence. This increase will be applied to all goods of the same class.

With regard to the passenger fares, the General Manager stated that while the railway is progressive and profitable, it is being hampered by a heavy depreciation and a large number of costly items of the type of the railway.
