Mr. HOPGRAFT'S AFPEAL

EIGHTH LIST.

DESCRIPTION OF THE PARTY OF THE

GERMAN NORTH SEA COAST.

The part of the North See Coast which of primary interest to us in this war lies retween the fland of Sylt, on the Coast Scholewig, and the Island of Borkum, I had coast of Seldewig, and the Island of Borkum, a riter in "The Field"). It forms an enter gasple of which the sport in at the month (the Ellie. A line drawn from Sylt to drawn passes or southed of Heighpaland. The be again ready to abow, extreme con-for neutralities which were inconaway night so brutter away and the second of the second of

Them Canal, which enters the Fibe at numbuttelloop, 15 miles above; that is to y, to the east of Cuxhaven. It is obvious that if the British Fleet old caliver an effective blow at taus, the attent or North Sea and of the canal, whole naval position would be memely altered in our favour. The German navy would no longer be able to transfer itself from the Baltic to the North Scoro back. It would either be divided, so that the British Fleet would no longer be completely also be a supported by the British Fleet would no longer be compared to the compared to the support of the could no longer operate in the listic with a superior force. The listicans Navy would be liberted. If also which therman may be bettered. If also which there is the listic state of listic state and obstacles to navgation, to say nothing of artificial defences. The alterna-a purely naval attack would be to close of the entry to the river. But that also as an operation of extreme risk, in face of the defences, natural and artificial, when could be used for its protection.

cound be used for its protection.

There is a general disposition to some the island, or rather, the two islands of Heligoland as the chief defence of the first man North Sea Coast. But this is only an example of a very general tendency to take hold of a name and give it an excessive me and give it an even-ware ment, may be placed at £23,000,000. The ment is an early a meant, or £1,000,000,000 for so ment is the ment in the ment of amaller sandy pland to the east of it the smaller sandy island to the east of it, which together make up Heligoland, he twenty miles from the mouths of the German rivers. If the coast did not possess other and closer natural defences the islands could offer no opposition to the moreoments of our fleets. The Heligoland connection between them was broken by a heavy gale from the N.N.W. They are still joined by a ridge of sand, on which there is only two and a half fatherms of water at low tide, that is to say, 15tt. The N.W. storms blow right the is the space within range of its gums would be almost decided, and the supply part is useful as a steepeding, and as of food few through eliminate and the supply of the steeper of the supply of the steeper of the supply of the

It would be taken as finished our con-tained in the large Yen. We make the table to require the character of the saved free smalling it was interrupted by reacher mobile, may all defence. The first the hospitals, By the sol of the second all most likeased is to be taken by the table that the second of the second terminal terminal and the same gathest like the second of the second terminal terminal and the second of the second application with an very great difficulty if a symbigar were to be gained by great difficulty if a symbigar were to be gained by great the second of the way had reduced them to the state of the control of the second of the second of the Coolvin. Sands, they would be nearly used that the second of t It could be taken as Belleisle was con

and as they are, land as they are.

The real protection of the German river mouths and ports is the character of the coast of the mainland itself. An ordinary map or common book of geography is of title help to the reader. He must take a chart and Volume IV. of "The North Sea Flot." With them to guide him he can Num passes cotable of Heiginaled. The graph that drawn is a close the basic of mortal attack on Great British, graph that drawn is at come the basic british control at the property of the most and provided and the model and provided in the second basic of the most district the second basic district of the provided and the second basic district of the provided and Volume IV of "The North Second Basic Control and Volume IV of "

HOW LONG WILL THE

WAR LAST?

Lord Kitchener propared for a thi

souths war, but his estimate was ourselve successful campaign. The duration be tiermans of an unsuccessful campaign a matter for speculation, and the est

State revenue is about 1320 000,000. In the second month the nur was come ing tiermany, according to a forman entract 133,000,000, with a tendence to

to the control of the carring power of the Iron undition people, and a tremendous increase of unemployment. France, Russia and firest Britain would be put to a propositional coat, but in their case trade can be

WURDAY, NOVEMBER 14, 1914. WIRELESS TELEGRAPHY.

An far as we know in the inland, within 200 miles or so of either Sweloopmund or Ludenthubuch, is a wireless station communicating with Germany, either direct-municating by overthe-or clee via German but dismitly powerful—or clee via German in the furtherousing campaign the previous of such communication will be previously of such communication will be the beginning of the past century, though recognized as being due to an some intangible medium called her, was not thought to have anyto do with electricity or heat. It do for Maxwell to show that light prevention of such communicat a sine-qua non, and may be effer

war not thought to show that light in the property of the state of the By means of its directive aerial this station, will find out the direction of the German station inland, and by sending our high-posperd signals whenever its detector-above that the astenies are sending or re-ceiving, will so mutilate their messages as to rouder their station useless.

This is not a fanciful sketch. It is only brief touch on the marvels possible rough modern science, and the writer

through modern science, and the writer focks aure that a good man with the means of the Union at his disposal could affect the above in a few weeks.

Attempts have been made to direct torpedors and vessels by wireless. This is done either by correctly timed signals or also by having saveral receipters, on the else by having several receivers vessel working on different wave

some per second—tracally called the support of the period this powder is practically a non-mar, effering great resistance to the east of an electric current. The filings annow, higheldy-piggeldy, in disorder; is girlly touch one another in a chaotic by austably timed impulses-just like one but when the electric waves fall ties, order is installed; they are mar-alled in serried ranks and press on each in-in a word, they cohere. Electrical matter is established, and a attention

the inception and invention of wireless supply, as invention of incalculable use aty, and one which has only been rays have not yet been transmitted any distance—and has a period of vibration distance—and fins a period of vioration very near that required. So the world may yet wake up one day to find the little electric spark which is the key of so many wonders has had get another added to its messages, and wireless affords a varied uses by becoming the most dreade of all engines of war.

LETTERS FROM THE FRONT.

The Editor will at all times be glad to receive for publication letters from the front which conarral as the piano, and the next piant is obvious. The sending and the circuits are so adjusted that the and tain items of general interest. He would also be glad to receive from friends and relations photographs s mast sensitive to that wave inch the sender is producing most. This is called "tuning." Very sling is now possible, wave little shorter or longer than a one failing to affect the receiver. of those now serving with Every effort will be made to re-turn both letters and photographs is evidently the first thing undamaged.

Stamp your own Note Paper and it is possible for one army with sid of instruments to find out the Y ware length, but still sharp tuning smalle for the efficiency it produces with the following words with the following words

ATTACK OF THE

AEROPLANE.

In 'La Science on la Vay,' demend provided in an American newspaper that to the provided in an American newspaper that to the provided in an American newspaper that to the provided in the pr Then there were five billions for we give the second of attacks open to the asset planes by the second of second of second of the two billions for we give the second of second it is almost certain that a mean castoon, parked a better diver trailed beneath an appeals would be a quite enfficient control of the control nue fire has proved sufficient to bring a alloon down. It is evident that

THE WEAK POINT.

legames respectively. From these figures is evident that the price per man killed as the opposing side was, in 1870-71, 2,000 dollars; 1877-78, 15,000 dollars; and 1905, 20,400 dollars; all of the figures a snews of those named in the American attack from above; in the non-rigid ty without going to the length of any elabor apparatus, and without endangering segment and to be of conclusive effect if a fairly hist the envelope, if the case of the rigid type, and have in the case of the rigid type, and have been described in the Zeppe, limited the result of the case of the rigid type, and have been described in the case of the rigid type, and the rigid type of the rigid ty rather expenses, and that the costs were send to find that the conjugation. On the one side the engines are cost more as they are perfected, as cost more as they are perfected, as other hand progress in the art of as other hand progress in the art. as at of defence.

The result is that the ratio of men tild or wounded in actual battle is containly diminishing. This ratio was six prosst, under Frederick the Great, three prost, under Frederick the Great, three jested under Angeleon, two per cent, in 180, and a half per cent. "In Manchuria, and the second of the participant in aerial warfare. It may MEASE WORSE THAN BULLETS.

ESCAPE FOR A TIME

It Mandauris, on the contrary, they be seen that the contrary of the seen that the contrary of the seen them and many every day. The hattles were where, them along as Mandau, rather the manufact of high-powers (fast-dimbin and right as Lino Yang. This seen the same of the hattless of t spit into priving day. The market week of the priving and many render a certain monant of used the given, there also as Makhati, and the service, but not by thanks to the fact that exhibit, and right at Like's large. The has made of the service of the state of the service of see no cannon or the ride, but severable in the bands of a man prepare so where, and typical. In 1800, the repaired in the hospitals no fragile and combestile a contrivance as a 80,000 Germans who, although the contribution of the ride of the contribution of the ride of the right of the ride o modern aeroplane and the engines offence with which before long it will i furnished. but as as many occasion to the state and the state. But as the state in 1877-78 and only two to one are the Japanese, thanks to their extended the state of the s

GERMAN YARNS

The German authorities are turning al English women and girls out of Berlin and four hundred recently arrived at Liverpoo

Street Station.

One of the women, in an interview, whe fully believed that the Germans occupied Paris. On the occasion of "Creasy," "Aboukir." and "Hogue" b torpodoed, she stated that the Germanspapers came out with bold feasili, "Destruction of the British North.

Pleet."
It was also fully believed in Berlin, ah
asserted, that the Germans would be in
England in a month. When told the reastate of affairs she was considerably
relieved.

Money Spent on Advertising

Is not wasted—it is invested. It is like sowing good seed in good land which in time yields a crop, but advertisements frequently yield several crops. med Robbs's action will light a fermion in this recently which will be seen to be perty distractors of a Not Wasted

ENEMY FLOODED OUT.

London, Tuesday.

A Paris communique states that in the Soupert, Dammide and Ypres districts the combardment was resumed more vidently lant on the previous days. Our artiller in the canal, to the south of Digmuide Arped the works of the Germains where attempting to check the immidstice.

The Germans endeavoured to cross the laine (?) near Vally, and were either rebulsed or destroyed. There has been a subsiciont camounde above Vailly, and in the
region of Beitins. There has been no infanstry section in the Argonne district. We
mimed a number of German trenches on
the heights of the Mensie. We have again the height of the Mense. We have again advanced at several point; but he south of Verdun. We seized the fifth houses in the verbage of Chownocourt and the barracks of the St. Milniel garrison. The village con-stituted the sale point d'appui still held by the enemy on the left bank of the Meuse, There was nothing to report on the re-mainder of the front.

FIGHT IN BLACK SEA.

"GOEBEN" BADLY HIT.

[THROUGH REUTER'S AGENCY.]

Petrograd. Thursday. Petrograd, Thursday.

It is officially stated that a Russian division in the Black Sea engaged the
"Goeben" and "Brealau" yesterday. The
"Goeben" was badly hit, several explosions urring on board. T

THE LIEGE FORTS

oxygen.

The cupolas were bombarded without in-terruption with heavy shells. At Lorein the bombardment lasted twenty-six hours, at the rate of six shells a minute, a total of almost

ten thousand.

Most of the mor were sufficialed. About fifteen found relige in a room underground, in which they were able, Most web boxer, hard work, to open an emergency door, which was looked, with irote hars sufficiently. Of course, it was impossible for the garrieon to defend their against the storming of the security, who came also under the walls of the flort. Mark of the other for the other forms of the security, who came also under the walls of the flort. Mark of the other forts were taken in the same way. In some cases the magazine exploded.

The 17in. gins were only a bluff. The work was done by other guns. The great guns were mounted on platforms and carried by rail. Two were brought to the Gard des Guillensins, then on a small railway truck to Should All the force were taken by Aug. at.

The authorities are preparing an official
casually list concerning the operations at.

Liogo, and it is stated that it will show no
fewer than 37,000 Begian soldines were
killed in the course of that historic defence.

VANGUARD OF SHEED ther device, which to the is one of

most spectacular ever seen in warfare, ot so generally known. Barbed wire used here, as everywhere, particularly protect field guns and machine guns, it so happens that East Prussia is y a grazing country Imagine the awrui but thrilling spectacle of a troop of Cossaeks sweeping down upon one of these batteries, driving sheep and cattle before them right on to the tangled mass of wire, charging their horses over the platform of flesh, and sabring the gunners in the very their horses over the platform of sabring the gunners in the very behind. This plan was quickly by the Germans, however, who renches behind. This plan was quit followed by the Germans, however, were equally fearless, and successful

At the opening of hostilities the German var plan was to strike through lighgium to be heart of France and then, Paris having apitulated, to settle with Russia. At first sully a small force was sent to the castern tentier in the hope that it would be sufficient to protect Germany against invasion for a few weeks. But the dark storm clouds grow rapidly and by the middle of August the Russian army was pouring into East Prussia. On this the Imperial Government decided upon a complete change. Troops destined for the west-were shifted to the east.

General Lemenshalerfolt solvance of Keniphery was specified in very military shall present the steep control of the second properties of the secon General Rennenkakmpf's advance on onlighberg was perfect in every military

LETTERS FROM THE FRONT.

The Editor will at all times be glad to receive for publication letters from the front which con tain items of general interest. He would also be glad to receive from friends and relations photographs of those now serving with the troops, whatever rank they hold. Every effort will be made to return both letters and photographs undamaged.

THE PART

African Standard MOMBASA TIMES - UGANDA ARGUS

WEDNESDAY, NOVEMBER 25, 1914

General Smuts, the South African Minister

General Smuts, the South African Minuser of Defence, has regestively declined an un-official offer of help from Australia, stating that they have as many men as are required and that many more are offering themselves.

The Handelsblad says that the Buglish Naval Brigade men who regained Ostend for Eugland said of Antwerp, "We were there in a hell. No courage, bravery, or self-sacrifice could withstand toe German beavy artillery."

On September 22, the usual wreaths and downs were taken to the monument in the Place des Martyrs. Several Prussis offices watched the ceremony, and after it was over it they actually pulled flowers out of the wreaths to make batton-holes.

By an order from German headquarters at the transway inspectors to Breasels have been obliged to take gold ase off their hats. We expect some German officer or other has discovered that gold lase for a transway servant is out of place

Surgeon-Major Klein, of the French Army, writing to his family as Feesing, states that he had under his care the sea states that he had under his care the sea of General von Moltke, who had succumb-ed to his wounds and who "remained arrogant to his very last breath."

In reply to a Silesian ziri's congratulations on his defeats of the Russians General von Hindgeburg, "the saviour of Bast Prussis," sent her a posteord from the field reeding as Callows:— Hearty thanks for your thought of me. The war, I hopp, will hast until serveybody has been bent to our will.

in the public as well as in the official mind fault ist us make it perfectly clear that the American the remaining projector of the public of the public of the public of the public of the fault of the public of the public of the public of the block with the Allies in Europe, is as com-pletely above the asystem of conjugate of the public of the the Englishmen to whom she sees fit to contrast the official concluse of the public of the summar the official concluse of the public of the summar the official concluse of the public of
