GRATUITIES.

What is and what is not a illegal gratuity has been occupying the attention of the old country for some little time and as a result of the debated opinions on the question, the Prevention of Corruption Act has been added to the Common Law of England

in the home Press we gather that the interpretation of the Act is most difficult, more particularly at this season of the year when gratuities have been the order of the day for learly two thousand years. The Act lays it down that a gratuity is immeral when given with the in-tention to corrupt but it is impossible to state definitely in many instances ow far the intention is to corrupt and there can be little doubt that judges will disagree on this point ery considerably.
