To hope as we hope is then to hope Imperially in the best sense of the word and we believe that in the word and we conserve that the printiple of the printiple control of this elect day throughout our country would have far reaching effect. Our natives as in a state of transition, natives as in a state of transition, they are just awakening from a long aleep of irresponsibility and individu-alism and are through a system of corrective punishment and admini-tration of justice beginning to realize that there is a higher duty in life than mere consideration of self-inte-

rest. They are beginning to realize the meaning of the power of good over evil, the duty we owe to our neighbour, evil, the duty we owe to our heighbour, and it appears to us that we can more quickly foster this awakening and direct it more easily in the right path by adopting still further methods than those we have clung

to so closely in the past. On Empire Day we would do well to take the opportunity of instilling into the natives through their chiefs, village headmen and inzees a sense of responsibility, teaching them by communal re-joicing that they also have a share in joicing that they also have a share in the great Empire and at the same time impress upon them the greatness of the Empire of which they are subjects. We are confident that their inborn pride can be taken ad-vantage of and worked upon favourably by judicious treatment while their good fellowship, which even in a native is worthy of our acceptance, will be more readily gained and kept more constant by such means than through punitive expeditions and ever hanging penal systems.

We would ask the Government to organise a gathering of the commu-nities around our various administrative centres, to issue instructions to the principal Administrative Officers to form local committees whose duties should be the inviting of contributions towards the necessary expenses connected with the day of based on the same economic and ethn public rejoicing.

We would also suggest to His Exthe mutual claims of self-asse cellency, the Governor that he take adcellency, the Governor that he takes of variage of Empire Day by causing to of political writers in Paris that advess he need at all Government Stations roution of the two kingdoms cannot be he read at all Government Stations some simple message from himself, as Governor, to the people setting little Monarchies together because the forth the duties and responsibilities each other and are only too bashful is expected of British citizens of all their feelings. A SUGGESTION.

As Public Affairs move slowly in As Public Affairs move slowly in British East Africa it is not too early to begin to think of the approaching day when the British Empire celebrates its greatness. May 24th brings to mind—more particularly to adults of the present generation—the fact that it was on this day, eighty-nine years ago, Queen

Victoria first looked upon that Empire which was destined to Victoria first looked upon that Empire which was destined to become the autonialment of the world through her benign infeared.

Continued Acts of Violence.

NATIVE WEAPONS

The Drink Curse.

It must be apparent to the ordinary erver of local conditions that some sharp measures are at once needed to dewith the wave of crime among the native which is spreading all over the country. I is recognised that one of the weaknesses o semi-civilized natives is their want of self somical under provocation. Particularly is control under provocation. Particularly is his so at the Coast where intoxicating liquor is always on tap and beyond the reach of the Police to deal with. Hardly a day goes by in our Coast villages without one native or another in drunken rage stabbing his neighbour ith his over ready knife invariably carried in his lofn cloth. In the recent murde one of the native witnesses was asked by the Judge for some information with references to the knives carried by the murderers of the

claims are put in. It was argued that it was unfair to exact a fee from a person who is unfair to exact a rec from a good title. To satisfied that he already has a good title. To satisfied the bill this chiestian we have amended the bill so that all claims shall be made free of an charges and that only in contested cases will it be in the Power of the Recorder of Title to nforce payment of a sum not exceeding two per cent. on the value of the property claimed. This payment well be in the nature of a court fee and will be exacted from the unsucce Claimant. But while making no charge for an uncontested claim, we consider it reacnable to impose a fee for every certificate of Title issued by the Recorder of Titles, and we have put the fee at one per cent. on the value of the property, the subject of the certificate. The result will be that while it will be obligatory for every one to put in his claim, it will be optional for him to des certificate of title which will be prepared by the Recorder. If he considers his title Recorder. If he considers his title good enough he can refrain from taking the certificate; but if he obtains a certificate he must pay for it, and we believe that the small fee will deter very few persons from taking out including all interests in land in the w applications for such waste lands on the of the proceedings to be held in the Land stion Court. This is necessary to prepare the way for the larger and comprehensive ordinance to be brought later date on the general lines of the To

> The question of the expense of putting boundary marks was also considered. If the pertificates of title are to be of permanent use it is important that boundary marks should be in existence on each property. But in order to reduce the expense as far as posaible to the owners of the small holdings we propose to provide in rules to be published under the Ordinance that the Recorder of Tities will have power to accept as boundary marks such things as pine apples or other plants which are commonly used by natives denote the limits of their properties.

Under the existing draft Ordinance and to which no rights are proved by It is true that a map of the Maintid dis-truct was prepared under the direction of the Honourable the Secretary for Native Affairs We have thought it fair to add a clause allowing a person for good cause waste does not necessarily imply that it is shown to advance the claim against the Crown within twelve years, and to allow the Governor the option to compensate the

claimant in cases of real hardship. It is understood that this privilege will be conceded in only exceptional cases.

Ordinarily the twelve months notice should be quite sufficient time for the putting in of all claims. Other Amendments have been made relating to the procedure of the Lands

Registration Court, and provision has made for the powers of a Deputy Recowner such may be appointed.
