A New Political Move.

There is a movement on foot Association, and by attempting to attract the work to a new centre of olitical activity to their detriment. this newest political move.

It is not difficult to see through its newest political move, must on the part of the Government.

The Colonists Association has dement of the part of the Government of the Government of the part of the Government of veloped into a powerful, able, public causes the land which the Governbody bent solely on helping the Government in every possible way to bring about prosperity to this Country. The leaders of this new move, recognizing the high standard of the Colonists Association are begin-ning to realize that their mob agitating tacties have lost their old time power and that they, themselves, future being able to drag into the political mud the great majority of those who have now become responsible for the Association's honour

From correspondence received it is evident there are fears expressed in some quarters that this political novement may capture some of our weaker Colonists, those was analysis anable to read through the real objects

of the political self interested tactics of certain self-appointed leaders. We would hasten to allay these ears of our correspondents. The membership of the Colonists Assoassociations is made up, to the extent of about 90 per cent, of sound responsible Settlers-men, who have steadily worked at their businesse and proved to the world at large that shere are, here, great possibilities before a hardworking honourable Settler. These men cannot afford to mix with the 'mob' or to be led by proved irresponsibles who may at any moment land them into a mire which would prove not only harmful to themselves but also to their Country: They are men of whom we have a right to be proud and, what

is also to the point, they are men who have much to lose. Of the remaining ten per cent it would be indeed well if they left their Mother Association, no matter whether they leave to join in the chorus bolstering up the beckening mob leaders of old.

Their presence as Association numbers is barmful rather than nembers useful and should they be attracted by the disloyalists it will merely strengthen the hands of the Mothe body and enable it to give better and more independent advice when called upon by H. M. Government in times

When Mr. Bowker took up the drop and largely arid farm whether he should not be helped on which the water rights by our various Settler associations, question has developed, he did so with the object of farming ostriches. Being a farmer of considerable ex- opponent as the Secretary of State perience in the South he knew in a matter which is of the greatest perfectly well that whereas the dry interest to all leaseholders of Crown plains of the Kedong are admirably suited for producing fine feathers, yet fine feathers would not be forth-

Forests Ordinance.

Mr. Hobby introduced an Ordinance to provide for the better protection of Forests and Trees on Corona Lands.

The protect of Government forests, be said, are very meager and are admittedly unsatide for the present needs of this country hence the introduction of this fall.

In the present bill forests are divided into two classes viz. Novel stores and demarkated

The term forest area will refer to trees o The form forest area will receive a trees of any such lands as may be determined by the Governor and will enable the Government to control the destruction or utilization of timber on such lands, amongst other things it will enable the Government to control the unlimited destruction of timber trees in native reserves.
