usness. His voice is natural with no onsness. His voice is natural with no trace of the civil service impertuent drawl so frequently and regretably made use of by many of our own countrymen when suddenly through into authority. To sum up a men-and a man of the stanua on a men-tal sum of the stanuary of the Cambridge and the stanuary of the speaks. Evaluate the stanuary of the speaks. Evaluate parts of the world are the following the following the following the flower Mountains. neloding the Rocky Mountains.

Whilst at Dar-es-Salam he en-

quired into all departments, spending the whole of one morning in a stuffy native Court in order that he night see for himself how the law administered to the people for whose welfare he is temporall responsible. As an instance of his desire that his Emperor should be is first thought in any work which caused the following cable to be night of his arrival in the Colony.

The subjects of all classes of you Majesty are gathered together at the Governor's residency and send to you assurance of unbellatable loyalty. We are sure that through brave German labour we aure that through Brave German labour we will succeed to open up the wealth of this beautiful country and under the protection of your Majesty we will be able to develop an oversea empire worthy of the German same.

To which His Majesty, the Emperor replied :-

Emperor replied:—

1 thank you and all Germans of East Africa for the Greeting fram the Colony May the Colony under cour guidance realize a future which life Motherland can look upon with prile and may the Coloniathe richly rewarded for their courage an perseserance. Above all I wish them to work "toggether official and non-official" nity and equality for without this progres

s impossible.". We might well take to heart His Imperial Majesty's telegram. The lack of sympathy between the nonofficial and Official populations of this Protectorate is greatly responsi-

milk vendors and suppliers. In boiling temperature has been neces theory this should offer it in such a sary. state that it is sufficient for the user to add merely a certain amount of water, equivalent to that which has water, equivaient to that which has been removed in the dryine process, be produce a liquid absolutely identical with the original mills from which the dry far was obtained. This idea is not put into practice in the dry wars ago in America. In more than tity years ago in America more than tity years ago in America.

more than they wars ago in America.

The dry substance which was obtained when all the water had been abstracted was pressed into cakes of convenient size, and to those a sunair quantity of bicarbonate of soda was added, and at first the difficulty was believed to have been overcome, and they was believed to have been quercome, and they was believed to have been dearned to the proposed of the propose

been too sanguine.

The fat in the cakes developed a rancid flavour, and owing to this begin did not keep well. It was further found that when the water was added the cakes did not easily dissolve. In fact, the highly produced by mixing them with water, hough our external appearance resembling milk, was shown to be little eits than a mixture of the powdered milk and water. It was found that the direct and shrivelled up nitrogenous matter failed to alsorb water and was loud to the from in which it was present originally in the milk.

The most one made by placing a slatted wooden rack in a trough centaring water, it was found that the direct and the from in which it was present originally in the milk.

The most of the powdered milk and water, it was found that the direct and the from the water was the state of the man and the product of the man and the state of the state of the state of the man and the state of the state o

sent originally in the milk.

That form of preservation was trough and water be poured in; the civing up as unsuccessful, and when brought and water be pound in; the shortly afterwards the metid was historyteed of preservations and the state of the state of the biscovered of preservations are some of the state of the st densed milk, the success of this latter method pushed into a temporary oblivion the method of drying

lately again come to the fore, and accumulation of dirt is so great as one method which has not been to impede the work. insuccessful consists in spraying the An advantage in boiling diseased unsuccessful consists in spraying the milk upon metal rollers while they potatoes is that the fungus within are sevolving. The temperature of the research the rollers is such that they instantly drive off in a vapour the water in the milk, and leave all the solid portion on the roller in the form of a dry within the diseased tuber, of the work of the roller of the roller in the form of a dry within the diseased tuber, of their continuity of the roller of the r

comes off readily and is afterwards no more effectual way of effecting powdered.

The most serious objections to all should be kept fresh when cooked. The most serious objections to all should be kept treat when cooked these methods is that they require a lifter cooking, the moisture should high temperature for the evaporation be allowed to drain away, and after of the water, and the heat necessary this the potatoes should be mashed of the water, and the heat necessary this the potatoes should be masted for this maranishy alters to a greater and placed in an artistiple receptacle or lesser degree the character of II they are runned in tightly so some of the constituents of the milk, that no air gets to them, they will so that the resulting substance often keep fresh for a considerable time indicates by a disagreeable taste the By taking of a layer deally no mould process through which it has passed, will form, and the food will be In the newest process this to a wholesome. If put locaely into a large calcular avoided, and it mode less the, and compressed, the soon frantion in the taske of the resulting become mouldy and unusal to be fall.

Purchased one sow in pig in May, 190 or £5. A week later she had a lifter of te

liquid is perceptible. The first application of the process was made The New Breed of Pi MILK AS A POWDER.

with skim and separated milk, which is so valuable as a food for stock, and the arm was to reduce this to a standard state is but too liable. Powder which on the addition of the commany state is but too liable. Powder which on the addition of the standard state is but too liable, which are a strated should serve the known custed of the British Isles, have been supported by the command of the strategy of the standard state of the standard state of the standard state of the standard st

e constituents of milk in some very much less than that of the specially sor m which, while much more constituents, the water will nearly all lay on large of nm which, while much more constantiation enter the more than the pass of as vapour with the use of the pass The well-known condensed milk is an unpleasant burnt taste in the e method of preservation which solid portion remaining unevaporated.

cleaning will be quickly effected. The dirt will fall through the open-

Drying.

Orying.

The last stage of the drying is done in pans which are expected to a fanaght of dry soid and with the control of the

Drawbacks of Powdered Milk

the difference in size was the cause of the meedity, he must be experiment of reducing the size of the globules in row's milk in order to experiment must be size of the globules in row's milk in order. Though it produced as improvement in the result of the size of the s nce in size was the cause of the

sful fature before it.

The other great drawback is the insolubility of the powder in water. The really perfect milk powder should be quickly and entirely soluble in cold water, and should yield an

tion for one or other of the processes of drying which are carried out.

If must be admitted, therefore, that the perfect milk powder is yet to be produced. The best of those at present obtainable is not suitable for use at the breakfast or tea fable. For use with ecoos, which is itself of a fatty

food for infants.

Not there is much still to be done by the inventor and experimenter before we obtain an article which can be purchased at a reasonable price, and which by the addition of wefer will give us a liquid sphich will serve as a fair substitute for ordinary fresh milk. C. W. WALKER-TISDALE

Great Ship Canal. £20,000,000 Scheme.

All estimates for the great £20,000,000 scheme for a ship canal deep enough to carry ocean liners into the interior of Canada are now ready for the consideration of the Dominion Government. So said Mr. R. W. Perki. M. P. who handed at Liverpool on his return from an eight weeks' inspection of the projected canal, acting in the survey for the company which will undertake the construction to only other them. The contraction with Messrs. C. H. Walker.

which will enable ocean-going steamships to transport the grain and other produce from the interior of the Dominion direct to Liver-

THE ELEVEN PROPOSED BILLS.

Six Months Hard Work Before the New Council.

A CURSORY REVIEW.

During the week we have been During the week we have been perusing the drafts of the eleven proposed Bills which have passed their first reading in the Legislative Council and which will come up in succession for a second reading on and from September 2nd. Seve the Bills can be viewed most favorably but it will take some time for both the Legislative Council and the Public to grasp the full import s ces appear to have sprung out of excerpts from various ordinances of various other countries, crudely

The Powers of the High Court.

As Ordinanse to define the power of the High Court and the power of Courts subsciolinate Courts of the High Court has been depending of the High Court and the beard by one Judge.

[24] All spoals from Subsciolinate Courts of the parties beard by one Judge.

[25] All spoals from Subsciolinate Courts and the High Court has been depended and the power of the parties beard by one Judge.

[26] All spoals from Subsciolinate Courts and the High Court has been depended and the power of the parties beard by one Judge.

[26] In the event of an appeal being Judgement shall follow the finding of the Senior Judge.

[27] In the event of an appeal being the High Court has been depended and the subscious and

There is much eise in the ordin-ice which requires open and free which to them is repugnant, iscussion and we trust the Bar of 16 is termed a 'saving claus

The Abolition of the Legal Status of Slavery. LIWALIS PROMISE TO SUPPORT

NEW ORDINANCE.

On August 26th His Exceller the Governor held an interview at Mombasa with the Sultan of Witu, the Liwalis of Mombasa, Maindi, Takaungu, Yanga, Lamu and Siu and the Kadirs of Wasin and Faza and informed them of the instruc-tions which he had received from the Secretary of State for the Colonies to legislate for the abolition of the legal status of slavery within the mainland dominions of the Sultan of

native Governors that in view of the fact that the word slavery was repugnant to the feelings of all Englishmen it was decided to abolish the legal status on the mainland as had been done in 1897 in the Islands of Zanzibar and Pemba, and he hoped that, as compensation would be paid to all slave owners for those slaves who wished to quit their master's service, the slave owners would co-operate with His Majesty's Government in securing a peaceful set-tlement of all claims. The Sultan of Witu and Liwalis were further informed that a special officer would be appointed to investigate together with the Provincial and District Commissioners the claims which would be submitted, and to make a register

After a short discussion as to the amount of compensation which would be paid, etc., the Sultan of Witu and Liwalis expressed their sati tion at the steps which were being taken and promised to explain to the Arabs and to those interested the full purport of the measure.

It may be confidently expected that the Liwalis and other leading Arabs will not call upon H. M Government for compensation has will forego any claims they may have as a mark of appreciation of the bonefits they have received from British rule, Etc.,

FIELD FARM

GARDEN.

THE A. B. C. OF COTTON.

Taken from the Pamphlet published INTRODUCTION.

What is the object of this passiphlet!

A. It is to assist and advise growers of otton how to cultivate the land to the best drantage and obtain a profit as the result (their labours.

of shorf-stapic outson?

A. The principal drawback is the risk of prices falling below the cost of production. In Soath America, Insia activation of the production of the prices and production is likely to increase to rapidly that prices may be grown, the production is likely to increase to rapidly that prices may be not pay in the West Indies and the cultivation would have to be abandoned.

What are likely to be the profits on the cultivation would have to be abandoned.

Solve the profits of the profits on the cultivation would have to be abandoned. A Yes; in districts exposed to strong rinds and in exposed portions of fields, it is dvisable to plant head-rows of pigeon peas ad guines corn to shelter the cotton plants.

A. If 200 lb, of lint are obtained per acre
there would also be obtained about 700 li
of cotton seed. This, for feeding purpose
on the spot (at £7 per ton) would be wort
about £2. The total return in lint and see obtainable within eight months would therefore, probably be not less than £7 per

A. This is cotton originally obtained in be West Indies, but improved by cultivati-uring many years, on the Sea Islands outh Carolina.

A. A suitable soil for cotton is a rather analy loam, where there is good drainage Cotton will not thrive in land where the drainage is deficient. A soil that will grow good crops of sweet potatos or eorn is likely to suit cotton. What is Engation cotton?

A. This is supposed to have been ally Sea Island cotton but altered iteration in Egypt.

Will cotton grou on other kinds of not?

A. Yest good erops of cotton are often produced on rather sandy soils, provided there is sufficient humas and the subsoil is not too porous. Cotton will also grow of cotton cotton to the subsoil is not solvey soils. Dut in wet seasons the yield is usually station that the subsoil is usually station that the subsoil is usually station that the subsoil is usually station to the subsoil of the subsoil is usually station. Subsoil the yield is usually station to the subsoil to the subsoil the yield is usually station to the subsoil to the subsoil it is subsoil to the What are the relative values of these tie

and best in the world. The b now selling for 16d, to 18d, per her hand, Egyptian cotton sells

A. The soil in the Sea Islands consists for the most part, of a fine, sandy loam. This soil rests on a subsoil of yellow sand or yel low elay, and contains a large proportion of sand.

What is Kidney cotton !

Are there my difficulties to be corrowned in proving Sca Island cotton?

A. Yes, there are several difficulties. The plants are somewhat delicitate. The plants are somewhat delicitate. The proving Sca Island cotton?

A. They there are several difficulties. The plants are somewhat delicitate. The plants are somewhat delicitate. The plants are somewhat delicitate. The plants are somewhat delicitates are somewhat the proving somewhat the proving somewhat the possible of the plants are somewhat the possible of the possible of the plants are somewhat the possible of the po

ther countries?

A During the present year Sea Island cotton from the West Indies is obtaining the highest prices of any. It is superior to Georgia and Florida long-staple cotton, and the search of the search of

A. In rather poor soils and in dry district experiments with short-staple cottons mig so tried, especially if present prices a ikely to be maintained.

Cultivation of Cotton.

Where may cotton be grown?

A. Cotton may be grown anywhere sheltered situations in the West -Indies, vided the elevation is not too great and

Will cotton grow on other kinds of soil?

What is a suitable soil?

Why would it not be belief to odopt a sequence of the control of t

Consumption.

Consumption.

It should be born in mind that consumption is a gern disease. It is not eassed by a cold to a rule state with a cold. The cold prepares the system for the reception and development of the gerns of that lodge-which otherwise word by the cold is deserved and the cold is deserved and you will be much less liable to contract consumption. This is sepoidly true when you associate with any one how has that disease. To cure a cold cold the cold is deserved and you will be much less liable to contract consumption. This is repositly true when you associate with any one how has that disease. To cure a cold cold the cold is the cold of the cold one how has that disease. To cure a cold us Chamberlain's Cough Remedy. It can alway be depended upon. For sale Everywher Wholesale Agents, Surgical Hall, Zanzib and Harris and Lewis Godwin, Nairobi.
