THE SUBMARINES AND

SEPT. 20, 1943

During the War food supplies were greatly restricted the United Kingdom ow the submarine blockade, and Bovril was so indispensable to the volucers, wounded, and the people that it had to be retained in the British Isles, where it is made, or cut to the fighting fronts.

Fresh supplies of Board have now arrived and there is no longer one need to make shift with substitutes which lack its unique vital and energie of properties. Boyril is the lood whose body leaking powers have been proved by indexes dent scientific experiments to be 10 to 20 times the amount taken.
