NEGRO RIGHTS

Remarkable Meeting in London

Mr. J. H. Arnold, formerly Mayor of Harare, presided over the inauguration meeting and dinner of the African Progress League, a newly organized organization to promote the welfare of Africans and African people from all parts of the world.

There were also present about fifty representatives of the negro race from all continents from America, Africa and the West Indies.

Mr. Arnold said that when England was a divided and weak nation, they had fought in Flanders and died for the British nation. He said that the British nation was now a united and strong nation and he thought that it was time for the African people to claim their rights.

If they were granted their rights, they would be able to bring to light the true condition of the African people and to help them to improve their condition.

It was decided to call the meeting "The African Progress League" and to hold it in London in the month of April 4.

The African Progress League will have its headquarters in London and will have branches in all the principal cities of the world.

The African Progress League will be a non-political organization and will be devoted to the welfare of the African people.

SUNFLOWER CROPS What Could be Done on B.E.A. Farms PROFITABLE PRODUCT

In B.E.A. it is not uncommon to see a few sunflower stalks in the middle of a whole field in a more unsheltered, though the sunflowers grow practically all through the Province. Mr. J. J. Hevrick has some hands to uncertain that the possibility of growing them on the land is a possibility. He has about 30 acres in the Province and is growing them on 10 acres. The yield was 100 bushels of the seed to the acre, which was sold for the equivalent of the seed. Mr. Hevrick has had a net profit of about £2 6s 6d per acre.

Mr. Hevrick said he had used the seed for bedding and poultry. It is used in European countries for the silage purposes. A well known silage mixture is made of sunflower seed, horse beans and corn. The proportion of two acres of sunflowers to half an acre of sunflowers is used for the same purpose.

Mr. Hevrick said that the seed of sunflowers is a good substitute for the seed of the Indian man's seed. The seed would be well adapted at this time.
