NAIROBI, SATURDAY, SEPTEMBER 17, 1921.

In the houses of the better classes statistics show that the daily consumption of water per capita is far in excess of the capita consumption among the lower classes. In first class hotels, for instance, the amount of water used per capita daily is many gallons greater than is used per capita in the third class hostel. The amount of water consumed per capita bears a direct relation to the state of civilization and the standard of living.

Is your water supply ample?
Would it not be a great convenience and comfort to have all the water you could possibly want?

Better water systems and better Pumps are not expensive. They are the cheapest equipment you can buy. Better systems and better Pumps are necessary if you would have a satisfactory, efficient water supply. They are low in first cost and their maintenance is next to nothing.

Perhaps a windmill would suit your own particular problem best. Or it might be that a ram would be more efficient under certain conditions.

If you require hand lift and force pumps, semi rotary hand lift and force pumps, or centrifugal power pumps, we can supply you.

Also automatic electric pumps for use with 32 volt current produced by the usual house-lighting sets.

The following article by Mr. George Buchanan appears in "The Times" of East Africa, of Kenya Colony as it is now called, in the issue of 15th July. The article is written by one who has been known to be particularly well informed on the financial and industrial situation of Kenya, especially in the development of the rubber industry. The article is written by one who has been known to be particularly well informed on the financial and industrial situation of Kenya, especially in the development of the rubber industry.

At the present meeting of the Kenya Legislative Council on Monday, 20th July, the Governor declared that as appeared certain of the proposals before the Council would not be adopted, the Government would not be bound to accept the proposals. The Governor's statement was a significant one, as it indicated that the Government was not prepared to accept the proposals in their present form. MAHARAJA NINTRA.

In the review "A Congressman" it is stated "I am a resident in Nairobi." Is Mr. Morgan a Maharaaja? I think not.

Mr. Morgan must not allow himself to be misled by the title of the petition which he has presented and signed. The title is "A Congressman" and not "A Maharaaja".

It is a pity that Mr. Morgan should have been misled by the title of the petition. He is a Maharaaja and not a Congressman.

The petition which Mr. Morgan has presented is a petition of the Maharaajas of the State of Mysore.
