# Willard

## STORAGE BATTERIES.

A Catalogue will be sent to anyone interested.

More Willard Batteries are used by Automobile Manufacturers as standard equipment than any other make.

**Willard**

When a battery is equipped with wood insulation it begins to deteriorate from the time of its manufacture, due to action of acid in the electrolyte on wood fibre. The first signs of weakening are failure to hold charge and the running down of the battery.

Willard threaded rubber insulated batteries are the most efficient batteries made in the world to-day. The threaded rubber insulators outlast the plates themselves.

A battery equipped with threaded rubber insulation bears the following exclusive trade mark on the case.

6 volt Heavy Service Battery Fls. 115  
12 volt Heavy Service Battery Fls. 125

Sub-Agents and Dealers Wanted Throughout Kenya Colony and Tanganyika Territory.
