REDACTED, BUREAU AND OWNERS REPORT.

THURSDAY, APRIL 13, 1923.

George's speech in the House of Commons. The discontent that was aroused in France, Germany, and America with the very London tone of the British Prime Minister's pronouncement, made of the positive statements of Signor Fatica's speech something more than mere philandric and slight him in the British Government with his definite liberation of European countries, a real part of which, or so he, Great Britain. It is a speech that can have had but too effect on the British Government, and we do not think it will surprise if in the House of Commons, this statement makes a series of statements for more satisfactory from the British Government.

Something more than the character of a mere business reminder attaches to the note issued to the other Allies by the British Government in relation to the payment of interest on war debts; the initiative is not now in the hands of the Allies but in the hands of Germany. It is a question that is clearly American to be asked so far as the Conference is concerned and which must not be left to the Allies but to Germany.

Maize, Posho and Crushed Maize
To all Employers of Native Labour

Why not make forward contracts to meet your Maize and Posho requirements for the next six or twelve months?

By so doing you will not only be assured against fluctuations in the Grain Market, but you will also be enabled to secure the lowest one of your main items of working costs, which you cannot possibly otherwise do. The advantage of this method over that of buying from hand to mouth should be obvious.

The B.E.A. Farmers' Association has only a limited supply of native labour, and employers are urged to make contracts now in order to avert future disappointment.

For quotations and all other particulars apply,

WHAT WOMEN CAN MAKE

Lately, I have seen a great many women in the papers drawing attention to the necessity of women to make their own money.

Large shawl coats are very much in evidence as last winter's. Black and white hatching with other and weird lines, the shawl often gives an abrupt outline to the body, and is a hat of unusual character. THURSDAY, APRIL 30, 1923.

TO ALLY A FEAR. The period of the official session issued by the Government in connection with the Economic and Financial Committee is 70 less arduous and important than the previous one. It is, in fact, of far less immediate importance. It indicates the ally which the Government are giving effect to the suggestions put forward by the Committee; and we congratulate the Committee, the Government, and the country on the completion of the report duty on bills and the railway conditions indicated in connection with the industry. The new ground broken in this communication is also of very great practical and will command very general support. The release of the working soldier-servants from a large part of the burden of the purchase price of their farms, has much to be said for it, and we must feel, we should imagine, to commend itself very warmly to His Excellency the Governor for submission to the Secretary of State, with the case that is put forward for the early and departmental consideration of the Nyoni. It is one worthy of very close attention. We shall look for similar activity to follow this, and we should be glad to see these other proposals coming before the House. The country is now in a position to take a goodly and profitable part in the Economic Committee and with the relation to it in which the Government has set itself. It looks for a growth and prosperity in the coming and valuable time. It must not be taken as an evidence of expense and cost. Maize, Posho and Crushed Maize
To all Employers of Native Labour

Why not make forward contracts to meet your Maize and Posho requirements for the next six or twelve months? By so doing you will not only be insured against fluctuations in the Grain Market, but you will also be enabled accurately to estimate one of your main items of working costs, which you cannot possibly otherwise do. The advantage of this method over that of buying from hand to mouth should be obvious. The R.E.A. Farmers' Association has only a limited supply available, and employers are urged to make contracts now in order to avoid future disappointment.
