WHEN YOU BUY MILKMAID MILK

INSIST ON TINS WITH THE WORDS
"PREPARED FOR EXPORT"
printed in RED INK across the face of the label.

Considerable quantities of Milkmaid & Nestle Milk have been imported into E. Africa by a firm that has an official connection with us, and we do not purchase such milk. The labels on these tins are not reproduced as above, and apparently emanate from stocks supplied, some considerable time ago, to continental Governments under peacetime conditions in the Peace Treaty.

ALFA LAVAL SEPARATORS.

No Farmer in these days can afford wasteful methods. A separator which is less than 100 per cent efficient involves waste and loss of butter fat. That is why **IT PAYS TO USE AN ALFA-LAVAL.**

Over 2,500,000 of these machines are in use throughout the World and over 1000 prize medals have been awarded them for efficiency and excellence of design. If any further testimony is needed it will be furnished by any owner. We supply all spare parts.

FASHIONING... WHAT WOMEN CAN MAKE... TITLE No. 252 Y.

There is a certain number of women who are ready to do just what they can for their dresses, just the general utility of a dress that will give the best of service for its wear.

It is in order, practically the only statement that is called out by the advertisement. An old mackintosh, however, put out in the wind, is not only useless, but it is a nuisance to anybody near it.

NOT DIFFICULT TO MAKE... My pattern, No. 260 Y, consists of a dress which is not only very smart, but is also very easy to make. It is made of a light fabric, and is very simple in design.

Having fixed the waist, and secured the front and back with tape and buttons, you can then turn your attention to the skirt, after securing the lacing adjustment.

The skirt needs no fittings, and is not so bulky as the skirt of a gown, so that it can be worn over a long-sleeved blouse, or a long-sleeved blouse, or a long-sleeved blouse, or a long-sleeved blouse.

Agricultural Essay

Tobacco Cultivation and Drying in Nyeri.

WATLAND MERRILL

Tobacco is an important crop in Nyeri, and the following notes are based on a visit to the tobacco plantations in the district during the past few years.

LAND. Tobacco is grown on the most fertile soils, and the soil is usually a heavy loam, with a subsoil of red sandstone.

PLANTING. The tobacco plants are usually planted in rows, and the spacing is usually 4 feet between the rows, and 2 feet between the plants in the row.

IRRIGATION. Tobacco is a very thirsty plant, and it is necessary to irrigate it during the growing season.

WEEDING. Tobacco plants should be weeded regularly, and the weeds should be removed from the plants.

PRUNING. Tobacco plants should be pruned regularly, and the pruned material should be used as fertilizer.

HARVESTING. Tobacco plants are usually harvested when the leaves are fully developed, and the leaves are then cured in a curing house.

MARKETING. Tobacco is usually marketed in bulk, and the price is determined by the market.

many ways, after which the beds are covered with a fine layer of soil, and the seed is sown.

WEEDING. Tobacco plants should be weeded regularly, and the weeds should be removed from the plants.

PRUNING. Tobacco plants should be pruned regularly, and the pruned material should be used as fertilizer.

HARVESTING. Tobacco plants are usually harvested when the leaves are fully developed, and the leaves are then cured in a curing house.

MARKETING. Tobacco is usually marketed in bulk, and the price is determined by the market.

of the beds, about 2 to 3 inches deep, and the seed is sown in the beds.

WEEDING. Tobacco plants should be weeded regularly, and the weeds should be removed from the plants.

PRUNING. Tobacco plants should be pruned regularly, and the pruned material should be used as fertilizer.

HARVESTING. Tobacco plants are usually harvested when the leaves are fully developed, and the leaves are then cured in a curing house.

MARKETING. Tobacco is usually marketed in bulk, and the price is determined by the market.

by mowing out. In this way the soil is kept good for two or three years, and the soil is then ploughed.

WEEDING. Tobacco plants should be weeded regularly, and the weeds should be removed from the plants.

PRUNING. Tobacco plants should be pruned regularly, and the pruned material should be used as fertilizer.

HARVESTING. Tobacco plants are usually harvested when the leaves are fully developed, and the leaves are then cured in a curing house.

MARKETING. Tobacco is usually marketed in bulk, and the price is determined by the market.

each other, commencing from the top, and the soil is then ploughed.

WEEDING. Tobacco plants should be weeded regularly, and the weeds should be removed from the plants.

PRUNING. Tobacco plants should be pruned regularly, and the pruned material should be used as fertilizer.

HARVESTING. Tobacco plants are usually harvested when the leaves are fully developed, and the leaves are then cured in a curing house.

MARKETING. Tobacco is usually marketed in bulk, and the price is determined by the market.

Empire Sugar Supply

The British Empire produces a large quantity of sugar, and the supply is usually sufficient to meet the demand.

The sugar is usually produced in the tropics, and the climate is very suitable for the growth of the sugar cane.

The sugar is usually harvested in the autumn, and the cane is then crushed to extract the juice.

The juice is then refined, and the sugar is then crystallized, and the crystals are then dried.

The sugar is then packed in bags, and the bags are then shipped to the various parts of the Empire.

The sugar is a very important commodity, and it is necessary to have a steady supply of it.

The British Empire is well supplied with sugar, and the supply is usually sufficient to meet the demand.

The sugar is usually produced in the tropics, and the climate is very suitable for the growth of the sugar cane.

The sugar is usually harvested in the autumn, and the cane is then crushed to extract the juice.

The juice is then refined, and the sugar is then crystallized, and the crystals are then dried.

The sugar is then packed in bags, and the bags are then shipped to the various parts of the Empire.

The sugar is a very important commodity, and it is necessary to have a steady supply of it.

Wool-Gathering

Wool-gathering is an important industry in the Empire, and it is necessary to have a steady supply of wool.

The wool is usually gathered from the sheep, and the wool is then cleaned and carded.

The cleaned wool is then spun into yarn, and the yarn is then woven into cloth.

The cloth is then finished, and the finished cloth is then packed in bales.

The wool is a very important commodity, and it is necessary to have a steady supply of it.

The British Empire is well supplied with wool, and the supply is usually sufficient to meet the demand.

The wool is usually gathered from the sheep, and the wool is then cleaned and carded.

The cleaned wool is then spun into yarn, and the yarn is then woven into cloth.

The cloth is then finished, and the finished cloth is then packed in bales.

The wool is a very important commodity, and it is necessary to have a steady supply of it.

The British Empire is well supplied with wool, and the supply is usually sufficient to meet the demand.

The wool is usually gathered from the sheep, and the wool is then cleaned and carded.

Transplanting

Transplanting is an important part of agriculture, and it is necessary to transplant the seedlings at the right time.

The seedlings should be transplanted when the soil is warm, and the weather is clear.

The seedlings should be transplanted in rows, and the spacing should be 4 feet between the rows.

The seedlings should be transplanted in the evening, and the plants should be watered.

The seedlings should be transplanted in the soil, and the soil should be pressed down.

The seedlings should be transplanted in the soil, and the soil should be pressed down.

The seedlings should be transplanted in the soil, and the soil should be pressed down.

The seedlings should be transplanted in the soil, and the soil should be pressed down.

The seedlings should be transplanted in the soil, and the soil should be pressed down.

The seedlings should be transplanted in the soil, and the soil should be pressed down.

The seedlings should be transplanted in the soil, and the soil should be pressed down.

The seedlings should be transplanted in the soil, and the soil should be pressed down.

Bees

Bees are very important insects, and they are necessary for the production of honey.

The bees are usually kept in hives, and the hives are usually made of wood.

The bees are usually kept in the hives, and the hives are usually made of wood.

COFFEE MARKETING

In view of the fact that the coffee market is very important, it is necessary to have a steady supply of coffee.

The coffee is usually produced in the tropics, and the climate is very suitable for the growth of the coffee tree.

The coffee is usually harvested in the autumn, and the coffee is then processed.

The processed coffee is then packed in bags, and the bags are then shipped to the various parts of the Empire.

The coffee is a very important commodity, and it is necessary to have a steady supply of it.

The British Empire is well supplied with coffee, and the supply is usually sufficient to meet the demand.

"Wasting the Empire"

FREEDOM AS A BUSINESS ASSET.

It is the most important news holding was the proposed new league of Nations which had been decided by the Council of the League of Nations on the 10th of January. This was the first time since the war that the League of Nations has been able to do anything.

... by white men (chiefly taking their finger out of the pie) in the name of the League of Nations, and who had been doing so since the war. Mr. Harrold writes that almost every one who has broken the Indian Empire in the name of the League of Nations is a white man. In Kenya Colony we were told that the League of Nations was a white man's party, and that the League of Nations was a white man's party. It is the League of Nations that has done the most to help the white man in the world. It is the League of Nations that has done the most to help the white man in the world. It is the League of Nations that has done the most to help the white man in the world.
