The soles are made from a specially-hardened Rubber, and as the Studs and Sole are moulded in one piece, the Boots will not break away. There are no nails to hurt anyone.

The SOLES will not become soft with playing on muddy grounds, which is a great drawback to leather boots.

The TOES are reinforced with a leather toe-cap, which is specially strengthened, and the insoles are of solid leather.

The STITCHES are treated to prevent them rotting or breaking.

OUR WOMEN'S PAGE

Our Paris Letter

(From PARIS CORRESPONDENT)

About two weeks there are many pleasant things to tell. They are made in wood shoes of good shape and of all shapes for women's use. They may be quite plain, or ornamental with any ornamentation.

THE LURE OF FINE LINEN.

For the ladies of fine linen who have not yet had a chance to see a bolt of fine linen, there is a beautiful length that can be fashioned into a gathered waist of the best.

WORTH NOTHING.

Three Useful Hints.

If you are cutting up a dress, think of the neckline, by the way.

A Lost Weapon

It is an interesting sign of the times that, although we have seen as much as ever, very few women are taking advantage of this by choosing into their shoes.

A Crossness Walk

(By Ann Travis)

For this last year, I have watched you with a keen eye. It has been interesting to see you in your various outfits.

"The Love of Fine Linen." Some of the most delightful hand-made lingerie sets are in finest white lace, simply finished with a little very good lace and ribbon shoulder straps.

How Does She Walk?

The best length for pants is one that will give you a comfortable fit.

Turned-out toes denote a pronounced, almost-malicious character.

In order to clear out our large stock which is occupying storage space urgently required for grain we are offering Wheat Flour (first quality) at the following special prices:

Most of the Flour is not fresh and is so therefore recommended for horses.

No order for less than 50 bags will be accepted at less than the regular price.

Send your order quickly as the stock will probably soon be exhausted and this offer is not likely to be repeated.

**SPECIALLY TEMPERED STEEL AXLES FOR CUTTING HARD WOODS.**

The following is an extract of a letter received from a client. The original of which can be inspected in my office—  
 "With reference to the Axle I have purchased from you I have to say they are the best I have handled and are the only ones that have stood up to it. I tried several makes of Axles before taking these and had almost given up hope of getting an Axle to stand up to the work. I may say that these I still have of the first consignment I bought over a year ago (the balance having been plied by the workmen, who evidently realised their folly) are as good as when I purchased them, though in use daily."

**OFFICE HOLDING IMPLEMENTS**  
 (as used exclusively by the Coast Hills).

The following is an extract of a letter received from a client. The original of which can be inspected in my office—  
 "I cannot speak too highly of the Coast Hills Holes. They have the Pattern a long way behind in hole digging. The usual hole for a KIBU is 80 holes per day of 12 inches square and 20 inches deep with these holes. I have also found them very useful in falling trees for cutting away the small roots underneath."
