The remarkable discovery by Goodyear Chemists results in a tire compound which is more durable than any other.

**The Discovery of Goodyear Chemists**

If you want longer mileage than the best you have ever obtained hitherto from a tyre, get the new Goodyear Cord with the All-Weather Tread

For Goodyear Chemists have discovered a new and improved tread rubber compound of amazing toughness, of a toughness that has never before been known in tyre construction.

And these bevelled diamond blocks that line the wear resisting-tread on each side further increases its durability. They make possible a semi flat instead of round tread with a broader contact with the road giving slower, more evenly distributed wear.

You can get these scientifically improved tyres from any Neilsen Garage or Goodyear Dealer throughout the continent and pay no extra for their extra miles.

Goodyear Heavy and Light are built up heavy solid layers of finest rubber compounds. They feature the most scientific tread pattern. It increases part of the tread surface.

Agents: A. G. Cameron, Manchester & Fort, Ltd., Ltd.

**GOODYEAR**

Light Weight

There is nothing so important as the selection of a tire. It is not only a matter of safety, but also of economy. A tire that is not properly selected may cost more in the long run than a tire that is properly selected.

Scientifically constructed, they are produced with care and precision. They are made of the best materials and are built to last.

LIQUOR ORDINANCES. PLAWS IN LOCAL BILLS. Licensing Commission, Stamp and Customs Acts.

REBELLION AT BUREAUHEAD. The liquor bills were passed by the Kenya Legislative Council at the first sitting.

It was agreed that whenever the words "in the Bill" shall occur in the Bill, they shall mean "in the Bill which shall be passed by the Licensing Commission."

There also appeared to be no reason to suppose that the Government-Committee had the power to amend the Bill in any way.

It was further agreed that the Government-Committee should be empowered to amend the Bill in any way.
