Mue Park, only river, to whom all correspondence connected with it should be sent.

I always love my work connected with my violets whether it is rational or just sticking the dirt fastidiously perfumed. Yesterday Miss de Louvois or market. This week I have been making new beds and...

But for general garden display and not plenty I let them grow naturally. If the ground is good and plenty of water given, there is no need to pinch back or prune except for exhibition blooms.

I have propagated my new plants from runners of the old plants and by division of the young ones. This is done by digging up the old plants and sorting out the young ones...

They are so many beautiful specimens that to glance down a weedman's sword you feel it bewitching. It always wanders them all of the older varieties I would save like to be without Lady Griet Hamilton...

There is always so much work to be done all year long in the garden and it is much easier to get on with it, than to write about it! Strawberries are being sown in garden and previously prepared beds...

There are many varieties of the violet violet. Horticulturists have selected many beautiful new ones on the floral market within recent years. The "Princess of Wales" does very well here, and gives me all one week in the way of color, scent and size.

There is an important note in this column regarding Kinship. The plants I found had intense deep purple flowers, but no scent. They had the same growth and shape as the English Day-violet (violet cuneata), and were growing in the same ground, together with lovely little blue lobelia, and a blue spiguel.

The same violet grows in Abyssinia and is known as Ethiopian violet. I had hoped it was a new species and it always reminds me when one of the flowers gets an adjoining neighbor's name tacked on to it. "Violet Kinship" would have suited me much better than this "local violet" will be loved from this local view.

Horticulturalists have selected many beautiful new ones on the floral market within recent years. The "Princess of Wales" does very well here, and gives me all one week in the way of color, scent and size.

Another note in doing this week is planting out seedling Sweet Peas. The plants are about four months old and I am now potting them out in their permanent flowering quarters. I am planting them there first apart in deep-dug, well-manured ground and those chosen for exhibition purposes are being hand pruned.

There is an important note in this column regarding Kinship. The plants I found had intense deep purple flowers, but no scent. They had the same growth and shape as the English Day-violet (violet cuneata), and were growing in the same ground, together with lovely little blue lobelia, and a blue spiguel.

I cut back, or take out the leading shoot, allowing two subsidiary shoots only to remain and when lateral shoots form on these I check them off, so in tomato training

RACE PROGRAMME.

To the Editor.—E. A. Standford Sir.—At the Nairobi meeting general dissatisfaction was expressed against the public regarding the printing of the Official Programme and I think this ought to be brought to the Honorable's notice.

Through correspondence or ignorance the Official programme for the last Nairobi race contained long and a half page of practically valueless information regarding the results of the general Nairobi meeting.

It would not cost the Jockey Club a penny to have the card which was the subject of the two pages intelligently sent to the Nairobi race meeting.

PUNISH.

Nairobi, Sept. 10. (We have made enquiries and find that the Jockey Club is impossible to include the information our correspondent refers to in this issue. However, more this will be done in future.—Ed. E. A. S.)

CONDITIONS IN GERMANLY.

To the Editor.—E. A. Standford Sir.—I have just returned from Berlin to-day, where I have been to see my brother, and during the few days in the Black Forest looking up some of the old haunts, and planning the trip to Africa.

I am sure, however, in Kenya would benefit greatly by the application of more systematic methods of which the Germans were and still are the best exponent.

Although it is a fact we may say, out any kind of forestry investigation, I can assure you this is the best way to proceed. Germany is crushed and broken. Trade is crippled and the people are suffering. The only hope is in the occupied territory. From being a rich country and one of the largest buyers and sellers in the world's information, it has been reduced to financial stagnation.

Old stock!

Long before the colobus show, tea stock becomes "old" in a country with a tropical climate. How many times, for instance, have you found that the tea you buy has been robbed of its flavour and strength through contact with excessive damp or heat.

This was because you allowed them to sell you ordinary tea that wasn't really vacuum packed. Next time, insist on Brooke Bond tea in the genuine vacuum tin, and refuse imitations. Don't matter whether it is old stock or not—vacuum-packed tea will remain as fresh and flavourful as it was the day it left the factory, and only Brooke Bond tea is vacuum packed.

Ask for

Brooke Bond Tea

Vacuum packing is essential to keep tea fresh and pure. Only Brooke Bond tea is vacuum packed.

Not only air-tight but also air-exhausted!

WHY SPOIL A GOOD JOB?

You may require only a little amount of concrete work, but do not use JUST ANY CEMENT. Specify one of the following brands so that, when the job is done, it is well done. These brands may be a fraction more expensive than inferior foreign cements, but they are DEFINITELY CERTAIN to give good results when properly used.

Make it

MASSIVE!

"Elephant," "Horse," "Whites," "Anchor," "Fleur-de-Malice Cross" (Woolmark), "Inveria," "Burman," "Rhincorons," "Frydam," "Lithorous," "Delta," "Peters."

THERE IS A REASON
The local price of imported flour has been going down, and the sale of Unga Ltd. flour are steadily going up. "Marmite" has a Hundred Uses

FROM making soup, sauce, dressing, etc., in the kitchen, to delicious food
for athletes before or after a game, MARMITE is invaluable. It is
is economical in use and keeps in perfect condition indefinitely even in our
climate. Moreover, it is full of nourishment, for Marmite is the richest food
in the B-Vitamins, which is so essential to health, which is lacking from so
much of our modern diet. It builds up the body and helps to raise fitness
and endurance.

THERE IS A REASON

The local prices of Imported drugs have been going down, yet the sales of Unga Ltd. have steadily gone up. The average sales during the last six months total all previous records in the Company's history out of sight, and each month shows an advance on its previous month. What is the reason? We offer our price for correct advice because it is the best advice.

NAIROBI TAX-PAYERS' WELFARE ASSOCIATION.

Fifteen Hundred Attend First General Meeting Under Archdeacon Owen.

NOTEWORTHY MOVE FORWARD BY NATIVES.

There was a very large attendance at the General Meeting of the Nairobi Tax-payers' Welfare Association, held at Bomo Camp, Nairobi, fifteen hundred present, representing all religions, Christian and non-Christian, and all sections of the community, though not all were members of the Association. The President, Archdeacon Owen, was in the Chair, supported by the Rev. J. Britton, Vice-President, Jonathan Okumu, Chairman of Committees, and Benjamin Orenoi, Secretary.

The first business was to approve the Constitution of the Association as printed and circulated for information and criticism. This was completed.

The Association wished to express its gratitude to Government for the official efforts to foster the cotton industry. Certain statements were made that African cotton instructors were too severe in their methods and that some of them caused great offence by saying those who were digging the soil were essential at this time more than at any other.

It was pointed out that in very early patches of cotton as many as five hundred and young plants were being choked each other in one place, and it was decided to beg Government to increase the number of instructors, either European or African, as they are most essential in the early stages of the industry. Later the number might be reduced, when the people understand the cultivation of cotton well.

The President described some of the cotton plots which were being overworked with young trees as "agricultural slums." Mr. P. C. Chacha and Headman Mwangi, during the course of discussion, were woefully underpaid, and at the time the various underpays were put by the Chief, nothing was done for himself from the small paid him by Government. It was pointed out that many of the cotton plots are in receipt of a large remuneration that Chiefs receive.

It was stated that many abuses of civil in Native administration are based on the fact that the native officials were underpaid, the money being for them to make use of their people in ways not recognised by Government and very detrimental to order and good government. The following resolution was passed unanimously:—

"We, members of the Nairobi Tax-payers' Welfare Association, are aware that Chiefs receive a very small salary indeed, and desire to ask Government to examine the matter with a view to increasing the salaries of Chiefs, for we are well aware that the present system is responsible for some of the things which make trouble between us and African officials and is responsible for some dishonesty.

Suggestions to Government. There followed a very animated discussion on the aspect of venereal disease in the Reserve, and it was proposed on all sides that these diseases stop on the increase to an alarming extent. Various suggestions were put forward to remedy matters, the older men especially desiring that the old habits custom be enforced of felling the person found to have contracted the disease to another, while the younger men felt that the root of the trouble lay in the conditions which Africans live in. It was, together with the existence of many unwholesome Native villages which render the spread of disease inevitable.

It was resolved to ask Government to conduct an enquiry on the matter with a view to taking steps

to prevent the spread of these diseases. The first meeting of the United Council of Luo, to which the Association attaches great importance, was held in January of this year, and a second meeting was to be held in August. The Association would respectfully ask Government not to allow this Council to drop, and would beg that another meeting be held in the near future.

Elementary Education. A very animated discussion on Education took place, and it was pointed out that in the opinion of many the time had nearly come for Government to make some provision for the elementary education of the vast numbers of children or school (about two hundred thousand) in the Province. It was decided to ask the Executive Committee of the Association to approach the Nyansa Board of Education (of which the Provincial Commissioner is Chairman) on the matter, and to make suitable representations to the effect of the urgent necessity for Government aid being given at the earliest possible moment.

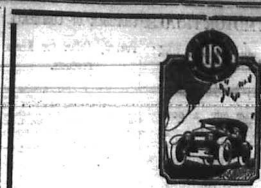

During the discussion on elementary education it was decided respectfully to approach Government with a request that the inclusion of Africans on the Board be accelerated. At the present time there is no African member, and though at first Africans would probably learn only how to function on the Board yet it was felt that ultimately they would have a very real contribution to make to the Board's usefulness. Especially would they be able to keep in the foreground African claims to consideration. The Association feels that either the Chiefs or else some Africans engaged in educational work in the province would prove themselves to be useful members of the Nyansa Education Board.

Bridging of Rivers. An appalling long list was given of roads now in process of being attempted to cross the various swamps and swollen rivers in the Province. The rivers Atsch (Stanley Noia (Uganda), and Yala (South Gosa), as well as others were specially mentioned as being death-traps. It was decided to urge upon Government the extreme desirability of devoting an adequate portion of revenue from hut and poll tax to the bridging of these rivers.

It was decided to approach various European, official and non-official, and to ask them to accept the office of Vice-President of the Association.

Sowing Season. A request was put forward from the younger members of the Association that the old custom of waiting to sow seed until the local African rains give the seed should be allowed to die out. It transpired that in many districts it is an old custom to sow seed on individual plots recognised sowing before some recognised authority (such as the Chief's principal wife) set the example to the custom. A letter was read by the President from the District Commissioner, Kisumu, asking for the co-operation of the Association in a show to be held in January. The idea of a show was explained to the meeting and full approval was given. It was hoped that these shows will do much to stimulate Native production in all branches of African industry.

The recent reference in the local press and in the Convention of Associations to the proposed formation of a Native Affairs Board was discussed, and it was decided that such a Board would be unacceptable to the Association unless there were African members of the Board. It was suggested that two suitable Africans from each of the three districts, i.e. Coast, High

To our customer—the retailer

Should you have any square tins unopened left on your hands we urge you to return them and full invoice price will be refunded.

To sell them would be harmful to you as well as to us—the tea will be quite out of condition in spite of the tin having been hermetically sealed. The patent vacuum tin is the only perfect container for tea in this country.

- 1st quality (fine tea) "Red Label." 2nd quality (ordinary good tea) "Green Label."

Famous packing is essential in tropical climates in which tea is good condition, and only Brookes Bond is vacuum packed.
