ROAD MANNERS FOR BEGINNERS.

A Condensed Guide on Customs and Observances. ANNOTATIONS ARISING FROM IGNORANCE.

Points on Which Even Experienced Drivers Go Astray.

Camplains or loud going in the car is the custom in many cases, and any car, no matter how expensive, is liable to be damaged by the noise of the engine.

Starting—More your car of gradually and quietly. After starting your car, there will be no interference with driving. Turn it off no more than necessary.

Over-taking—Be sure to give the driver in front the right of way. Do not overtake unless you are sure you can do so without interfering with the traffic.

Never drive so fast as not to be able to pull up within your own length. When approaching a traffic situation, or any point that will mean a stop, begin to slow down in ample time and do not stop on a sudden pull up.

Always wear your seat belt. It is a life insurance policy. Do not drink and drive. It is a sure way to get into trouble.

Always look ahead. Do not look at the car in front of you. Look for obstacles in your path. Do not tailgate.

THE FIRST SLEEVE-VALVE ENGINE.

The Coming Battle of Valves.

The first sleeve-valve engine was made in 1882. It was a four-cylinder engine with a displacement of 100 cubic feet.

The sleeve-valve engine has many advantages over the ordinary valve engine. It is simpler in construction and has fewer parts.

The sleeve-valve engine is also quieter than the ordinary valve engine. It has no valve gear and no valve springs.

The sleeve-valve engine is also more durable than the ordinary valve engine. It has no valve wear and no valve seat wear.

The sleeve-valve engine is also more efficient than the ordinary valve engine. It has no valve leakage and no valve seat leakage.

The sleeve-valve engine is also more reliable than the ordinary valve engine. It has no valve failure and no valve seat failure.

The sleeve-valve engine is also more economical than the ordinary valve engine. It has no valve friction and no valve seat friction.

The sleeve-valve engine is also more powerful than the ordinary valve engine. It has no valve resistance and no valve seat resistance.

The sleeve-valve engine is also more flexible than the ordinary valve engine. It has no valve binding and no valve seat binding.

The sleeve-valve engine is also more adaptable than the ordinary valve engine. It has no valve adjustment and no valve seat adjustment.

The sleeve-valve engine is also more versatile than the ordinary valve engine. It has no valve limitation and no valve seat limitation.

The sleeve-valve engine is also more efficient than the ordinary valve engine. It has no valve waste and no valve seat waste.

The sleeve-valve engine is also more powerful than the ordinary valve engine. It has no valve loss and no valve seat loss.

The sleeve-valve engine is also more flexible than the ordinary valve engine. It has no valve restriction and no valve seat restriction.

The sleeve-valve engine is also more adaptable than the ordinary valve engine. It has no valve limitation and no valve seat limitation.

WHY FORD PREDOMINATES IN VALUE. From 1904 to 1922, the Ford Motor Company of Canada, Ltd., manufactured 450,000 Ford Cars and Trucks, of which 91% are still in use.

Selected materials, simple design, and accurate workmanship are factors in this long life. They explain the high utility and operating economy of the Ford when new, and they also give it the ruggedness to withstand the wear and tear of daily driving over your road.

This Ford means low depreciation, continued low, satisfactory performance from your Ford while you continue to drive it, and a measurable resale value when you wish to dispose of it.

It means that the Ford gives you unusual value for your investment, not only this year, but for a long term of years to follow—mean that when you select the Ford you obtain approved security for the money you invest.

CROSLEY CARS.

A Further Royal Appointment. From time to time it has been the custom of the Government to appoint a person to be the motorist of the motor vehicle of the Government. This appointment is made by the Government and is a very important one. It is a position of honor and is a very important one. It is a position of honor and is a very important one. It is a position of honor and is a very important one.

ROAD MARCHES.

Much of the anxiety which is directed against motorists in our country is unwarranted. There is no legislation which will seriously curtail any phase of the traffic problem and, as in the case in other directions, much has to be left to the common sense of the motorist. Within pedestrian vehicles, lamps and the other features are naturally to blame, there is no doubt that many an accident could be avoided by the motorist who exercises common sense. They have and there are generally very few exceptions to the rule. The road that they are generally are not these motorist. The motorist is a public nuisance. It is for these motorist that the road is a public nuisance. It is for these motorist that the road is a public nuisance.

Inauguration of the Joint East African Committee.

MR. COLVIN'S ACTIVITIES.

So it Legat as Exponent of Local Problems.

THREE 'AUTHORITATIVE' GUARDIANS.

[From Our Own Correspondent.]

London, April 20. East Africa may well be pained with regard to the attitude which was assumed by the British Government...

The object of the establishment of the East African Committee was to provide a body which would be able to discuss with the Colonial Office...

The meeting was well attended and was presided over by the Hon. Mr. Chamberlain...

Colonial Office Quarterly.

The quarterly statement of the East African Committee is published by the representation of the various Governments...

It is a pity that the East African Committee should have been formed in the first place...

All without storage batteries

A Revolutionary Development in Electric House Lighting Outfits

NOW AVAILABLE ANYWHERE WITHOUT STORAGE BATTERIES

Full particulars may be obtained from
GILFILLAN & COMPANY, LIMITED.
NAIROBI.

Those who are familiar with the ordinary electric house lighting outfit with its shelves of storage batteries know the constant and skilled attention these delicate glass cells require.

The Kohler Automatic dispenses with the expensive and troublesome battery sets (with the exception of a small automobile-type battery which is used only in connection with the automatic starting).

The operation is entirely automatic. One need never go near the plant except to occasionally replenish the supply of lubricating oil and fuel. The turn of any switch, or the plugging in of any appliance, automatically starts the plant and sets the current flowing. When the last switch is turned off, the plant stops.

Many Fields - new uses

- where current demands are heavy and constant;
- where current must be carried long distances;
- where the use of electricity is economical;
- where space is limited;
- where a temperature rise is needed;
- where power lines are impracticable.

KOHLER

AUTOMATIC POWER & LIGHT
NO STORAGE BATTERIES
110 VOLT D.C.

Cheaper to install.

- Because there is no battery to be set up and charged. Because the wiring can be lighter than with ordinary 22 volt systems.

Cheaper to operate.

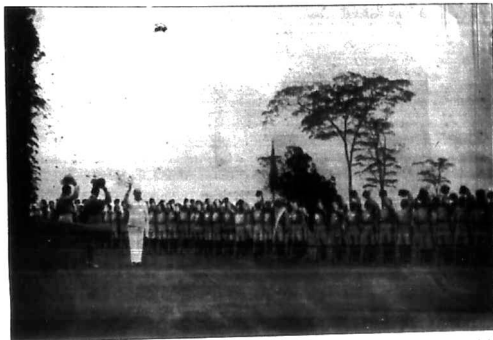

- Because the current goes, without waste, direct from the generator to the job. Automatic governor adjusts the fuel consumption to the load. When one, or only a few lamps are being used, the fuel consumption is correspondingly light. As more lights are turned on the plant responds instantaneously to the increased load.

Cheaper to maintain.

- Storage battery plants require complete new battery sets every two or three years. These materials cost between £20 and £30 each time. This means that the monthly depreciation of battery plants is between Shs. 25 and Shs. 30. - Kohler outfits dispense with this heavy battery depreciation and save £2 each month in connection with this one item alone.

THE RESPONSIBILITY OF WHITE WOMEN.

Dr. Garfield Williams Views.

DOGGED BY THE MEN.

Organized by the E. A. Women's League... at the New Reading Club on Wed. evening, June 5th.

Mr. H. B. Turner who organized the meeting... in London, in her letter to the Colony papers...

The Williams' protest... Mr. Williams said it was impossible to do anything with the kind to which we address ourselves...

Another drawback was lack of knowledge of the language... the best way of gaining a knowledge of the nature was through reading...

It was found that the women of Kenya had not met a stronger case... than they had to regard the 'old' white women...

that any good could be achieved... The 'old' white women of Kenya had not met a stronger case...

It was found that the women of Kenya had not met a stronger case... than they had to regard the 'old' white women...

There was a girl, the daughter of a missionary at Kakamega... with only 30 sh. as an allowance...
