The Whisky bottle that looks proud and pleased

The "bragging" and "dimpler" on the face give it an unmistakable expression. It is brimming with pride and dimpling with pleasure. It is unable to conceal the fact that its contents are "great."

The genuinity old whisky that fills the "P.D." bottle with pride and pleasure will inform you also with pride and pleasure at your discovery of it. It is not permanently old whisky. It is not false-whiskered whisky. It is genuinity old whisky, time-matured and wood-matured. Insist on Peter Dawson.

Ford that Ford predominates is due to the fact that in Kenya, at the end of 1931, 95% of all cars in use were FORDS.

Ford predominates because it occupies the essentials of adequate, economical transportation.

Ford has been the pioneer in the automobile industry; has blazed the trail in every fundamentally sound transportation principle.

Ford Service is an outstanding example of Ford production. Authorized Ford Service is to be found wherever motor cars are used—always capable, intelligent and prompt.

Most of the fun of motorcar can be pleasantly combined and lived for all your days, that you may enjoy the excitement of motorcar in the form of a collection of snapshots. Every one is interested in pictures. Almost every one likes to take pictures. This is particularly true of motorcars because the automobile itself is such a conspicuous feature in the scenes. Front and backgrounds are constantly changing. Incidents and experiences—many of which are quite likely to be of only a momentary nature—will occur before your eyes.

The camera of a motorcar is particularly apt to be used in places where it is not usually expected to be used. It is used in places where it is not usually expected to be used. It is used in places where it is not usually expected to be used.

Whenever possible, and it is almost always possible, you should take a photograph of the motorcar from the front. This is the best angle for the motorcar. This is the best angle for the motorcar.

Goodyear Solid Tyres have been made to wear longer, by adding 80% to 35% to the height of the tyre. When the tread is finally worn down there still remains a plain surface tyre of ordinary thickness, that can be re-grooved with the All-Weather Tread Design

Solid Lorry Tyres

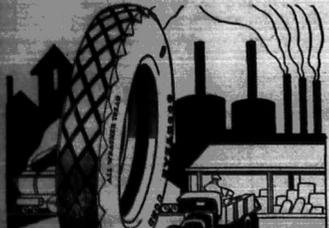

The Goodyear All-Weather Tread holds the lorry to the road in all kinds of weathers. It takes hold, hangs on and wears a long time.

The added height of special high grade wearing rubber in the big flexible diamond-shaped blocks has made Goodyear Solids more resilient. They effectively reduce expense for lorry repairs and parts replacements.

COLONY'S PRODUCTIVE POWER AND THE FRUIT OF EXTENSIVE RE-SETTLING.

As recorded in Volume 1, to the "C. A. Standard" (Vol. 1, No. 1), the Annual Report of Agriculture for Kenya, has just appeared. The Annual Report of the Department for the year 1923, is a valuable and extensive document, regarding settlement and taxation. Owing to the great growth in land available, the publication of the report is now being the first time in the history of the colony. The report is published in the form of a daily instalment in the manner in which a mass of statistical information is after all published but condensed.

The agricultural year 1923 was well up to average in points of rainfall, many of the seasons were made, and the weather was generally favourable. The progress of the year was generally good, and the results of the year were generally good. The results of the year were generally good, and the results of the year were generally good.

Why Duck Farming Should Recieve Attention.

There are a great many reasons why duck farming should receive attention. Ducks are especially suited to the climate of the East African Standard, and they are not so much affected by the heat of the sun as other birds. They are also very hardy and can live in a great variety of conditions.

The raising of ducks is a profitable business, and it is one that can be carried on in a small way. Ducks are also very easy to keep, and they are not so much affected by the heat of the sun as other birds.
