WHY Ford PREDOMINATES SERVICE EVERY WHERE AT LOW RATES.

There are over 8,000 authorized Ford service stations in the British Isles. Each of these is a direct link between the Ford car and the Ford factory. Each carries a complete stock of genuine Ford Parts, which are in every detail identical with the original parts in your car, and therefore coordinate perfectly with every other part.

Every Ford and every Ford Service operation is charged for at a standard low rate. You need not bargain because you will not be overcharged.

Therefore, in order that you buy your Ford, or where you use it, there is always a Ford Service Station nearest to give expert and immediate attention.

EVERY GARAGE DISPLAYING THESE SIGNS

IS AN
AUTHORIZED FORD DEALER
and stocks Genuine Ford Parts only.

The Demand for this Tyre is Sweeping the Country

Every Goodyear tyre user throughout this country is spreading the news of the exceptional mileage capacities of the new Goodyear Cord.

Mileage performances of 15,000 and 18,000 on Goodyears are common.

The reputation Goodyear Cords have made for themselves, the big mileages they are delivering under all sorts of road conditions in Kenya and Uganda, have resulted in a demand for these tyres which is without precedence.

Try them next time. Make a note of the speedometer reading the day you fit them, and then watch them roll up thousands upon thousands of miles, month after month, with scarcely a trace of wear.

GOOD YEAR

BRAKE ADJUSTMENTS.

Some Hints by An Authority.

The following article appeared in a recent issue of the *Car* magazine, and is a thoroughly practical discussion of a highly important question of brake adjustment. While dealing with this question in a somewhat general way, it points out the various and necessary adjustments that must be made in the wheel and the lines or cables to obtain the best results.

The writer of the article is Dr. Stanley, an accredited authority on "Driving the Motor." He has found that drivers adjust their steering arms, unfortunately, more than they should.

As the lining wears, the pull of the steering knuckle on each spindle causes the adjusting screws to gradually move down in position.

As the lining wears, the pull of the steering knuckle on each spindle causes the adjusting screws to gradually move down in position. This is a very important point, as it is the only way to keep the wheel from being pulled out of the wheel.

By adjusting, we move the line away of drum relative to brake shoe, and this means that the line is applied to the drum. The result is that the shoe is pulled away from the drum, and the shoe is pulled away from the drum.

If adjustment has a portion that is not correct, the shoe will not be pulled away from the drum, and the shoe will not be pulled away from the drum.

DECELERATION. This subject has been given much thought by the Department of Commerce in Washington. Charts of stopping distances have been made, and the calculations and some from actual tests.

An instrument for measuring the rate of deceleration has been developed by the Bureau of Standards. This instrument is a device which is used to measure the rate of deceleration.

Medical Reviews.

Cooled Cycle.

"Cotton" who is responsible for an excellent series of articles in the *Motor* always seems to find a good job to do. The following is one of the best.

A certain American inventor for the production of a horse which overcame traffic or passing through towns, originated a machine for driving on the wheels of a motor. This machine was used in the early days of the automobile.

The machine was used in the early days of the automobile. It was a very simple machine, and it was used in the early days of the automobile.

Sunday Cricket

PARKLANDS SECOND XI DE. FLAT THE RAILWAY.

A rather sparkling cricket match took place on Parklands ground yesterday when the Club's second XI met and defeated the Railway XI in the first innings. The score was 168 runs to 123 runs. The Railway XI were bowled out for 105 runs in 16.15 hours.

Rifle Notes

THE GLOOM OF THE EARLY MORNING

Sunday morning shots are very much appreciated in Parklands. A satisfactory feature of the sport is that it is often accompanied by a most interesting walk. The morning is usually very bright and the weather is often very good.

The principal scores were:

Table with 4 columns: Name, Score, and other details. Includes names like G. E. Griffiths, D. I. Ker, C. Heath, etc.

FIRST, LARGEST, BEST.

Certain interested parties are spreading the report
 that our milling plant is " antiquated." This is
 quite untrue. Certainly we have been established
 for over 15 years but the new four mill
 machinery installed by us this year, last year, and
 in 1911, has a larger capacity than that of
 any other mill now running or being erected in
 this country. And in planning our new plant
 we had the advantage of 15 years experience of
 local conditions and local wheat.
