# Talking of HAIR... how is yours?

For many men and women who think their hair is graying, only when it becomes thin and falls out does it show up on the scalp. If you realize this, to look well, have your hair cut in a style that will make you most understood how hair grows.

As you see they grow by pulling a rope from a ball and coiling the rope. The rope is the hair, the ball is the scalp. When a rope is pulled from a ball, the rope is pulled from the ball and the ball is left behind. In the same way, the hair is pulled from the scalp and the scalp is left behind.

The hair's natural color is a result of the amount of melanin in the hair. Melanin is a pigment that gives hair its color. It is produced in the hair follicle and is carried up the hair shaft as the hair grows.
